ARUBA

KEY HISTORICAL EVENTS

Discovered by Alonzo de Ojeda in 1499, the island of Aruba was claimed for Spain but not settled. It was acquired by the Dutch in 1634, but apart from garrisons was left to the indigenous Caiquetios (Arawak) Indians until the 19th century. From 1828 it formed part of the Dutch West Indies and, from 1845, part of the Netherlands Antilles, with which on 29 Dec. 1954 it achieved internal self-government.

Following a referendum in March 1977, the Dutch government announced on 28 Oct. 1981 that Aruba would proceed to independence separately from the other islands. Aruba was constitutionally separated from the Netherlands Antilles from 1 Jan. 1986, and full independence had been promised by the Netherlands after a 10-year period. However, an agreement with the Netherlands government in June 1990 deletes, at Aruba's request, references to eventual independence.

THE NETHERLANDS ANTILLES

KEY HISTORICAL EVENTS

Bonaire and Curaçao islands, originally populated by Arawak Indians, were discovered in 1499 by Alonso de Ojeda, and claimed for Spain. They were settled in 1527, and the indigenous population exterminated and replaced by a slave-worked plantation economy. The 3 Windward Islands, inhabited by Caribs, were discovered by Columbus in 1493. They were taken by the Dutch in 1632 (Saba and Sint Eustatius), 1634 (Curaçao and Bonaire) and 1648 (the southern part of Sint Maarten,

with France acquiring the northern part). With Aruba, the islands formed part of the Dutch West Indies from 1828, and the Netherlands Antilles from 1845, with internal self-government being granted on 29 Dec. 1954. Aruba was separated from 1 Jan. 1986. At a referendum in Nov. 1993 Curaçao voted to remain part of the Netherlands Antilles.

TERRITORY AND POPULATION

The Netherlands Antilles comprise two groups of islands, the Leeward group (Curaçao and Bonaire) being situated 100 km north of the Venezuelan coast and the Windward group (Saba, Sint Eustatius and the southern portion of Sint Maarten) situated 800 km away to the north-east, at the northern end of the Lesser Antilles. The total area is 800 sq. km (308 sq. miles) and the census population in 1995 was 207,333. The projected population for 2000 is 210,000. An estimated 69·2% of the population were urban in 1995. Willemstad is the capital.

The areas, populations and chief towns of the islands are:

Island	*Sq. km*	*1995 Census*	*Chief town*
Bonaire	288	14,218	Kralendijk
Curaçao	444	151,448	Willemstad
Saba	13	1,200	The Bottom
Sint Eustatius	21	1,900	Oranjestad
Sint Maarten[1]	43	38,567	Philipsburg

[1]The northern portion (St Martin) belongs to France.

Dutch is the official language, but the languages usually spoken are Papiamento (derived from Dutch, Spanish and Portuguese) on Curaçao and Bonaire, and English in the Windward Islands.

CONSTITUTION AND GOVERNMENT

On 29 Dec. 1954, the Netherlands Antilles became an integral part of the Kingdom of the Netherlands but are fully autonomous in internal affairs, and constitutionally equal with the Netherlands and Aruba. The Sovereign of the Kingdom of the Netherlands is Head of State and Government, and is represented by a Governor.

The executive power in internal affairs rests with the Governor and the Council of Ministers, who together form the Government. The Ministers are responsible to a unicameral legislature *(States)* consisting of 22 members, elected for a 4-year term in 3 multi-seat constituencies and 2 single-seat constituencies.

The executive power in external affairs is vested in the Council of Ministers of the Kingdom, in which the Antilles is represented by a Minister Plenipotentiary with full voting powers. On each of the insular communities, local autonomous power is divided between an Island Council (elected by universal suffrage), the Executive Council and the Lieut.-Governor, responsible for law and order.

At a referendum in Curaçao on 19 Nov. 1993, 73% of votes cast favoured maintaining the status quo of Curaçao as part of the Netherlands Antilles. The other options were: Autonomy (18%), unification with the Netherlands (8%) or complete independence (1%). At a referendum in Oct. 1994 Sint Maarten, Sint Eustatius and Saba voted to remain part of the Netherlands Antilles.

KEY HISTORICAL EVENTS

New Zealand was first called *Aotearoa* by the Maori who migrated from other northern islands in Polynesia, sometime around the AD 1400. The first European to discover New Zealand was Abel Tasman in 1642. He named the south island after the Dutch province of Zeeland. The coast was explored by Capt. Cook in 1769. From about 1800 onwards, New Zealand became a resort for whalers and traders, chiefly from Australia. New Zealand's European constitutional history can be traced back to 1840 when the Maori entered into an agreement with the Crown under the Treaty of Waitangi and New Zealand became a British colony with the Maori retaining full rights of self-governance. However, the effective administration of the country was soon taken over by European settlers although there were movements for Maori self-government. These movements declined in the early 1900s but the struggle for self-determination has re-emerged in recent years which have also seen a relative decline in the number of immigrants from England, Scotland and Ireland. New Zealand had its first elected House of Representatives in 1852 along with a nominated legislative Council and a Governor. Sheep farming came to dominate the economy and in 1882 the first refrigerated meat was sent to Britain.

In the last years of the 19th century, New Zealand adopted a succession of radical social reforms. New Zealand women gained the vote in 1893, the first in the world to be enfranchised.

TERRITORY AND POPULATION

New Zealand lies south-east of Australia in the south Pacific, Wellington being 1,983 km from Sydney. There are two principal islands, the North and South Islands, besides Stewart Island, Chatham Islands and small outlying islands, as well as the territories overseas.

New Zealand (*i.e.*, North, South and Stewart Islands) extends over 1,750 km from north to south. Area, excluding territories overseas, 270,534 sq. km comprising North Island, 115,777 sq. km; South Island, 151,215 sq. km; Stewart Island, 1,746 sq. km; Chatham Islands, 963 sq. km. The minor islands (total area, 320 sq. miles or 829 sq. km) included within the geographical boundaries of New Zealand (but not within any local government area) are the following: Kermadec Islands (34 sq. km), Three Kings Islands (8 sq. km), Auckland Islands (606 sq. km), Campbell Island (114 sq. km), Antipodes Islands (62 sq. km), Bounty Islands (1 sq. km), Snares Islands (3 sq. km), Solander Island (1 sq. km). With the exception of meteorological station staff on Raoul Island in the Kermadec Group and Campbell Island there are no inhabitants.

The Kermadec Islands were annexed to New Zealand in 1887, have no separate administration and all New Zealand laws apply to them. Situation, 29° 10' to 31° 30' S. lat., 177° 45' to 179° W. long., 1,000 miles NNE of New Zealand. The largest of the group is Raoul or Sunday Island, 29 sq. km, smaller islands being Macaulay and Curtis, while Macaulay Island is 3 miles in circuit.

In 1995, 85·9% of the population lived in urban areas.

The projected population for 2000 is 3·8m.

Between 1986 and 1996, the number of people who identified themselves as being of European ethnicity dropped from 81·2% to 71·7%. Pacific Island people made up 4·8% of the population in 1996 (3·7% in 1986); Asian ethnic groups went from 1·5% to 4·4% in 1996.

Maori population: 1896, 42,113; 1936, 82,326; 1945, 98,744; 1951, 115,676; 1961, 171,553; 1971, 227,414; 1981, 279,255; 1986, 294,201; 1991, 324,000; 1996, 523,374. There were estimated in 1995 to be 10,123 fully fluent speakers of Maori and a further 12,153 who were at the medium to high fluency level. In the 1996 Census, 153,669 New Zealanders said they could hold a conversation about everyday matters in Maori.

From the 1970s organizations were formed to pursue Maori grievances over loss of land and resources. The Waitangi Tribunal was set up in 1975 as a forum for complaints about breaches of the Treaty of Waitangi, and in 1984 empowered to hear claims against Crown actions since 1840. Direct negotiations with the Crown have been offered to claimants and a range of proposals to resolve historical grievances launched for public discussion in Dec. 1994. These proposals specify that all claims are to be met over 10 years with treaty rights being converted to economic assets. There have been four recent major treaty settlements: NZ$170m. each for Tainui and Ngai Tahu, the NZ$150m. Sealord fishing agreement and NZ$40m. for Whakatohea in the Bay of Plenty. CLIMATE

Lying in the cool temperate zone, New Zealand enjoys very mild winters for its latitude owing to its oceanic situation, and only the extreme south has cold winters. The situation of the mountain chain produces much sharper climatic contrasts between east and west than in a north-south direction. Observations for mid-summer and mid-winter daily averages in 1990:

	Jan (°C)	*July (°C)*	*Annual rainfall (mm) in 1996*
Auckland	23·4	7·8	1,105
Christchurch	21·7	1·5	645
Dunedin	19·1	3·1	800
Hokitika	19·3	2·8	2,810
New Plymouth	21·5	5·4	1,455
Wellington	20·1	5·6	1,270

Although cool overall, the highest extreme temperature recorded in 1997 was 34·1°C at Timaru Airport on 15 Dec. The lowest temperature was –8·8°C, recorded at Lauder, Central Otago on the morning of 16 July 1997.

CONSTITUTION AND GOVERNMENT

Definition was given to the status of New Zealand by the (Imperial) Statute of Westminster of Dec. 1931, which had received the antecedent approval of the New Zealand Parliament in July 1931. The Governor-General's assent was given to the Statute of Westminster Adoption Bill on 25 Nov. 1947.

The powers, duties and responsibilities of the Governor-General and the Executive Council are set out in Royal Letters Patent and Instructions thereunder of 11 May 1917. In the execution of the powers vested in him the Governor-General must be guided by the advice of the Executive Council.

At a referendum on 6 Nov. 1993 a change from a first-past-the-post to a proportional representation electoral system was favoured by 53·9% of votes cast.

Parliament is the *House of Representatives*, since 1996 consisting of 120 members: 60 for general seats, 55 for party list seats and 5 for Maori seats, elected by universal adult suffrage on the mixed-member-proportional system (MMP) for 3-year terms. The 5 Maori electoral districts cover the whole country. Maori and

people of Maori descent are entitled to register either for a general or a Maori electoral district. As at Sept. 1997, there were 163,310 persons on the Maori electoral roll. At the next general election there will be six Maori seats.

New planting has increased from 15,000 ha in 1991 to 66,000 ha in 1997. Introduced pines form the bulk of the large exotic forest estate and among these radiata pine is the best multi-purpose tree, reaching log size in 25–30 years. Other species planted are Douglas fir and Eucalyptus species. Total roundwood production in 1996–97 was 16m. cu. metres. Special courts include the Maori Land Court, the Maori Appellate Court, Family Courts, the Youth Court, Environment Court and the Employment Court. The Criminal Injuries Compensation Act, 1963, which came into force on 1 Jan. 1964, provided for compensation of persons injured by certain criminal acts and the dependants of persons killed by such acts. However, this has now been phased out in favour of the Accident Compensation Act, 1982, except in the residual area of property damage caused by escapees. The Offenders Legal Aid Act 1954 provides that any person charged or convicted of any offence may apply for legal aid which may be granted depending on the person's means and the gravity of the offence etc. Since 1970 legal aid in civil proceedings (except divorce) has been available for persons of small or moderate means. The Legal Services Act 1991 now brings together in one statute the civil and criminal legal aid schemes.

Ombudsmen's functions are to investigate complaints under the Ombudsman Act, the Official Information Act and the Local Government Official Information and Meetings Act from members of the public relating to administrative decisions of central, regional and local government.

During the year ended 30 June 1996, a total of 5,167 complaints were received, 49 of which were sustained and 593 were still under investigation.

The Presbyterian Church is divided into 23 presbyteries and the Maori Synod. The Moderator is elected annually. The Methodist Church is divided into 10 districts; the President is elected annually. The Roman Catholic Church is divided into 4 dioceses, with the Archbishop of Wellington as Metropolitan Archbishop.

There are also 557 play centres which also receive government subsidy. In 1996 there were 46,960 and 17,596 children on the rolls respectively. There are also 1,213 childcare centres with 57,582 children, 767 *kohanga reo* (providing early childhood education in the Maori language) with 14,302 children, and a number of other smaller providers of early childhood care and education.

Total budgeted expenditure in 1996–97 on education was NZ$5,353m. In 1995 total expenditure on education came to 7·3% of GNP.

The universities are autonomous bodies. All state-funded primary and secondary schools are controlled by boards of trustees. Education in state schools is free for children under 19 years of age. All educational institutions are reviewed every 3 years by teams of educational reviewers.

A series of reforms is being implemented by the government following reports of 18 working groups on tertiary education. These include a new funding system, begun in 1991 and based solely on student numbers.

At 1 April 1997 Family Support for families on the lowest incomes was NZ$44·50 for the first child aged under 16, NZ$37·50 for subsequent children aged 13–15, and NZ$29·50 under 13. Child allowance for single persons with one child was NZ$209·30 per week; with 2 or more children, NZ$244·12 per week.

The weekly unemployment benefit in April 1997 for a single person aged 25 and over was NZ$146·13, aged 16–17 NZ$97·97 and aged 18–24 NZ$121·77. Persons

made redundant become eligible for benefit after 26 weeks. In 1991 subsidized housing was replaced by cash subsidies.

In 1993 earners of NZ$17,500 a year and less received subsidized healthcare; a lesser subsidy applied up to NZ$27,000; over that healthcare was paid for by patients.

In the budget of July 1991 it was announced that current rates of Guaranteed Retirement Income Scheme (GRI) payment would be frozen until 1 April 1993, thereafter to be on the previous year's consumer price index. On 1 April 1992 GRI was replaced by the national superannuation scheme which is income-tested. Eligibility will be gradually increased to 65 years by 2001. Universal eligibility is available at 70 years. At 1 April 1997 a married couple received NZ$379·04 per week, a single person NZ$252·82 per week.

CULTURE

Some 800 km east of Christchurch, the Chatham Islands lie 250 km from the dateline and seem to have the best claim to be the first inhabited landmass to witness the millennium dawn. According to their calculations, the sun will rise over the summit of Mt Hakepa on Pitt Island, the most easterly inhabited island in the group, at 3.59 a.m. (15.59 GMT on 31 Dec 1999) on the morning of 1 Jan 2000.

Broadcasting. Legislation of 1995 split the state-owned Radio New Zealand into a government-owned public radio broadcasting company and some 40 commercial stations. As at 1 July 1998 there were 47 AM and 17 FM stations broadcasting, 30 of which were privately owned.

Television New Zealand operates 2 channels. 2 other channels, TV3 and TV4, are commercial. There are also regional TV networks. Pay television was introduced in May 1990—Sky Entertainment operates on 5 channels. The New Zealand Public Radio Service also includes the Radio New Zealand International, a short-wave which broadcasts to the South Pole. In Nov. 1996, there were over 180 radio stations including 21 regional Maori stations for the promotion of Maori culture and 10 community access radio stations. Number of TV receiving licences (1996) was approximately 1,126,000. In 1995 there were 3,550,000 radio receivers.

International tourism (including revenue from airfares) generated NZ$4·8bn. in 1996. International visitor expenditure for the year ending June 1997 was NZ$3,232m.

TERRITORIES OVERSEAS

Territories Overseas coming within the jurisdiction of New Zealand consist of Tokelau and the Ross Dependency.

Tokelau

Situated some 500 km to Samoa's north and comprises three dispersed atolls—Atafu, Fakaofo and Nukunonu. The land area is 12 sq. km. and the population at the 1996 census was 1,487, giving a density of 124 per sq. km.

The British Government transferred administrative control of Tokelau to New Zealand in 1925. Formal sovereignty was transferred to New Zealand in 1948 by act of the New Zealand Parliament. New Zealand statue law, however, does not apply to Tokelau unless it is expressly extended to Tokelau. In practice New Zealand legislation is extended to Tokelau only with its consent.

Tokelau's three villages are its foundation, and have remained largely autonomous. There has never been any resident New Zealand administration. At the national level Tokelau's needs remain formally the responsibility of the New Zealand Government, and in particular, the Administration of Tokelau.

Under a programme agreed in 1992, the role of Tokelau's political institutions is being better defined and expanded. The process under way enables the base of Tokelau government to be located within Tokelau's national level institutions rather than as before, within a public service located largely in Samoa. In 1994, the Administrator's powers were delegated to the *General Fono* (the national representative body), and when the *General Fono* is not in session, to the *Council of Faipule*. The Tokelau Amendment Act 1996 conferred on the *General Fono* a power to make rules for Tokelau, including the power to impose taxes.

Coconuts (the source of copra) are the only cash crop. Pulaka, breadfruit, papayas, the screw-pine and bananas are cultivated as food crops. Livestock comprises pigs, poultry and goats.

Development prospects are restricted by the small land area and population, geographic isolation, and the relatively high cost of providing education, health and other services including telecommunications and shipping, to three widely separated communities. For these reasons Tokelau relies substantially on external financial support, particularly from New Zealand. Nonetheless the development of government structures at the national level has promoted a wish for Tokelau to be self-reliant to the greatest extent possible.

Tokelau affirmed to the United Nations in 1994 that it had under active consideration both the Constitution of a self-governing Tokelau and an act of self-determination. It also expressed a strong preference for a future status of free association with New Zealand.

Ross Dependency

By Imperial Order in Council, dated 30 July 1923, the territories between 160° E. long. and 150° W. long. and south of 60° S. lat. were brought within the jurisdiction of the New Zealand Government. The region was named the Ross Dependency. From time to time laws for the Dependency have been made by regulations promulgated by the Governor-General of New Zealand.

The mainland area is estimated at 400,000–450,000 sq. km and is mostly ice-covered. In Jan. 1957 a New Zealand expedition under Sir Edmund Hillary established a base in the Dependency. In Jan. 1958 Sir Edmund Hillary and 4 other New Zealanders reached the South Pole.

The main base—Scott Base, at Pram Point, Ross Island—is manned throughout the year, about 12 people being present during winter. Temporary accommodation facilities provide support for specific activities in the Dry Valleys and elsewhere in the Ross Sea Region. The annual activities of 200–300 scientists and support staff are managed by a crown agency, Antarctica New Zealand, based in Christchurch.

SELF-GOVERNING TERRITORIES OVERSEAS

THE COOK ISLANDS

KEY HISTORICAL EVENTS

The Cook Islands, which lie between 8° and 23° S. lat., and 156° and 167° W. long., were made a British protectorate in 1888, and on 11 June 1901 were annexed as part of New Zealand. In 1965 the Cook Islands became a self-governing territory in 'free association' with New Zealand.

TERRITORY AND POPULATION

The islands fall roughly into two groups—the scattered islands towards the north (Northern group) and the islands towards the south (Southern group). The islands with their populations at the census of 1996:

Lower Group—	*Area sq. km*	*Population*	*Northern Group—*	*Area sq. km*	*Population*

CONSTITUTION AND GOVERNMENT

The Cook Islands Constitution of 1965 provides for internal self-government but linked to New Zealand by a common Head of State and a common citizenship, that of New Zealand. It provides for a ministerial system of government with a Cabinet consisting of a Prime Minister and not more than 8 nor fewer than 6 other Ministers. There is also an advisory council composed of hereditary chiefs, the 15-member House of Ariki, without legislative powers. The New Zealand Government is represented by a New Zealand Representative and the Queen, as head of state, by the Queen's Representative. The capital is Avarua on Rarotonga.

The unicameral *Parliament* comprises 25 members elected for a term of 5 years.

RECENT ELECTIONS

In March 1994 the Cook Islands Party (CIP) gained 20 seats, the Democratic Coalition Party 3 and the Alliance Party, 2. Subsequently the Democratic and Alliance Parties merged to form the Democratic-Alliance Party (DAP). DAP won two by-elections—one for the seat of Nikao on Rarotonga held on 2 July 1996 and another for the seat of Ivirua on Mangaia held on 2 Dec. 1997. DAP now holds 7 seats and the CIP 18. However, in 1998, 3 members of the DAP broke away to form a second opposition party—the New Alliance Party.

Elections were due to take place between March and June 1999.

NICARAGUA

República de Nicaragua

Capital: Managua
Population estimate, 2000: 4·69m.
GNP per capita: (PPP$) 1,760
HDI/world rank: 0·547/126

KEY HISTORICAL EVENTS

Colonization of the Nicaraguan Pacific coast was undertaken by Spaniards from Panama, beginning in 1523. France and Britain, however, and later the USA, have all tried to play a colonial or semi-colonial role in Nicaragua. Between 1740 and 1786 Britain attempted to organize a colony on the Miskito Coast and from 1848 to 1860 the British occupied the port of San Juan de Norte. After links with other Central American territories and with Mexico, Nicaragua became an independent republic in 1838. Its independence was often threatened by US intervention. William Wolber, the filibuster from Tennessee, conquered the country and declared himself President in 1856-57. Between 1910 and 1930 the country was under almost continuous US military occupation.

In 1914 the Bryan-Chamarro Treaty between Nicaragua and the USA was signed under which the USA, in return for US$3m., acquired a permanent option for a canal route through Nicaragua, a 99-year option for a naval base in the Bay of Fonseca on the Pacific coast, and the Corn Islands on the Atlantic coast. The Bryan-Chamarro Treaty was ratified in 1916 and was not abrogated until 14 July 1970 when the Corn Islands returned to Nicaragua.

The Samoza family held political domination of Nicaragua from 1933 to 1979. Through a brutal dictatorship imposed through the National Guard, they secured for themselves a large share of the national wealth. In 1962 the radical Sandanista National Liberation Front was formed with the object of overthrowing the Samozas. After 17 years of civil war the Sandanistas triumphed. On 17 July 1979 President Samoza was overthrown and fled into exile. A Government Junta of National Reconstruction was established by the revolutionary government on 20 July, and a 51-member Council of State was later created.

The USA made efforts to unseat the revolutionary government by supporting the Contras (counter-revolutionary forces). In March 1984 the Nicaraguan government filed a case against the USA in the International Court of Justice; the court's subsequent ruling was, however, ignored by the USA.

The elections that were expected after the 1979 revolution did not take place until Nov. 1984. The Government Junta of National Reconstruction and the Council of State were dissolved on 10 Jan. 1985 following the presidential and legislative elections; the Constituent Assembly which replaced them drew up a constitution within two years as instructed. On 9 Jan. 1987 the Sandanista president, Daniel Ortega, signed the new constitution but immediately reimposed a state of emergency, suspending many of the liberties granted under the constitution. The state of emergency was lifted early in 1988 as part of the Central American peace process. Rebel anti-Sandinista activities had ceased by 1990; the last organized insurgent group negotiated an agreement with the government in April 1994.

In Oct. 1998 Hurricane Mitch devastated the country causing 3,800 deaths. The country's agriculture was crippled with around 20% of the coffee plantations destroyed.

TERRITORY AND POPULATION

Nicaragua is bounded in the north by Honduras, east by the Caribbean, south by Costa Rica and west by the Pacific. Area, 130,671 sq. km (121,428 sq. km dry land). The UN gives a projected population for 2000 of 4·69m.

KEY HISTORICAL EVENTS

Niger was occupied by France between 1883 and 1899. It was constituted a military territory in 1901 and became a part of French West Africa in 1904. It became an autonomous republic within the French Community on 18 Dec. 1958 and achieved full independence on 3 Aug. 1960.

Guerilla activity by Tuaregs of the Armed Resistance Organization (ORA) seeking local autonomy in the north continued into 1995. On 15 April a peace agreement between the Government and the ORA was initialled under the auspices of Algeria, Burkina Faso and France but the ORA suspended the agreement on 27 Nov. 1995.

On 27 Jan. 1996 in a bloodless coup the army chief of staff Gen. (then Col.) Barré Maïnassara deposed President Ousmane Mahamane, dissolved parliament and began to rule through a National Security Council which he headed. In April 1999, President Maïnassara was assassinated by bodyguards at Niamey airport, prompting troops and tanks onto the streets of the capital. Prime Minister Ibrahim Assane Mayaki suspended all political activity. Opposition forces had called earlier for Maïnassara to resign following the Supreme Court's annulment of some local poll results. A week after the President's assassination, Daouda Mallam Wanké, leader of the presidential guard and the officer widely suspected of being behind the killing, was named as Maïnassara's successor.

KEY HISTORICAL EVENTS

Farming communities settled in the area 4,000 years ago, displacing the hunter-gatherers. They developed the large centralized state of Kanem-Bornu in the 8th century based on control of trans-Saharan trade. Adjacent states notably the Hausa, Oyo and Benin empires arose later and became caught up in the slave trade by the 18th century. British occupation aimed at enforcing the abolition of the trade.

The port of Lagos was captured by Britain in 1851 and annexed in Aug. 1861, administered first from Sierra Leone and then from the Gold Coast. Growing British involvement in the Lagos hinterland and in the Niger Delta led to the establishment of protectorates in the former in Jan. 1886 with Lagos itself becoming a separate colony and in the latter, known as the Oil Rivers Protectorate, in June 1885. British commercial interests among the Moslem emirates of the north led in July 1886 to the chartering of the Royal Niger Company which established its own political administration over a wide territory.

In 1893 the Oil Rivers Protectorate was expanded and renamed the Niger Coast Protectorate. On 1 Jan. 1900 the Royal Niger Company transferred its territory to the British Crown. The southern sector was amalgamated with the Niger Coast Protectorate to form the Protectorate of Southern Nigeria (to which the colony and protectorate of Lagos was added in Feb. 1906), while the remainder was constituted as the Protectorate of Northern Nigeria. On 1 Jan. 1914 the two territories were merged to form the 'colony and protectorate of Nigeria'.

Through the system of indirect rule Africans were excluded from political power until the end of the Second World War. A constitution was promulgated in 1947, and on 1 Oct. 1954 Nigeria adopted a federal system of government comprising Eastern, Western and Northern Regions; the first two of these secured internal self-government in 1956 and the Northern Region in 1959. Full independence was achieved by the Federation of Nigeria on 1 Oct. 1960 and it became a republic on 1 Oct. 1963.

The republic was overthrown by a military coup on 15 Jan. 1966, and a military government established. In May 1967 a decree replaced the existing regions by 12 new states. Ethnic and regional conflict ensued with Hausa northerners fearing domination by the Igbo people from the east of the country. The Chairman of the Supreme Military Council, Johnson Aguiyi-Ironsi, was killed in an army mutiny and replaced by Lieut.-Col. Yakubu Gowon. He restored the federal system but the Eastern Region decided to secede as the Republic of Biafra in May 1967. This set off a bloody civil war, prolonged by international involvement, and a severe famine. Federal forces re-established control in Jan. 1970. Besides the political problems, Gowon also faced economic problems related to Nigeria's new oil wealth and he was ousted in a coup on 27 July 1975. He was succeeded by Brig. Murtala Muhammed who was assassinated the following year. Lieut.-Gen. Olusegun Obasanjo replaced him, returning the country (by now 19 states) to civilian rule in Oct. 1979 when Shehu Shagari was elected president. Shagari was re-elected in Sept. 1983, but overthrown by the military later that year. In Aug. 1985 Maj.-Gen. Ibrahim Babangida replaced Maj.-Gen. Muhammadu Buhari as head of the Armed Forces Ruling Council. This was dissolved in Jan. 1993 and replaced by a transitional civilian council. Presidential elections held in June 1993 were annulled. President Babangida stepped down from office on 26 Aug., nominating Chief Ernest Shonekan as interim head of state.

On 17 Nov. 1993 Gen. Sani Abacha having forced Shonekan to resign, assumed the function of head of state. Moshood Abiola, who claimed to have won the annulled 1993 presidential election, declared himself head of state in June 1994 and was arrested for treason.

Following the execution of Ogoni separatist Ken Saro-wiwa and 8 other civil rights activists in Nov. 1995, Nigeria was suspended from the Commonwealth. Gen. Abacha promised to restore constitutional government by Oct. 1998 but died on 8 June 1998, reportedly of a heart attack. He was replaced as president by Gen. Abdulsalam Abubakar who scrapped election plans designed to retain power for Abacha and released political detainees. Chief Moshood Abiola, the imprisoned undeclared winner of the 1993 presidential election, died on 7 July 1998 the day before his expected release from prison.

Gen. Abubakar launched a corruption probe, announced a cabinet with civilians occupying most of the key posts and promised to give up power in May 1999 to allow for a return to civilian rule. Presidential elections were held on 27 Feb. 1999. The victor was Olusegun Obasanjo, a 62-year-old retired general who once led his country as part of a military junta.

CONSTITUTION AND GOVERNMENT

Under the 1978 Constitution, Nigeria is a sovereign, federal republic comprising states and a federal capital district. As part of the process of demilitarization and democratization, in 1993 the government created 2 parties, the Social Democratic Party (SDP) and the National Republican Convention (NRC).Voting has not been secret since March 1991; voters indicate a poster of the candidate of their choice.

On stepping down from all his offices on 26 Aug. 1993 President Babangida nominated an interim government of national unity headed by Ernest Shonekan (ING).

On 17 Nov. 1993 the Minister of Defence, Gen. Sani Abacha, assumed the functions of head of state and set up an 11-member Provisional Ruling Council headed by himself. Parliament, the 30 state Executive Councils and the 2 political

parties were dissolved. A 33-member cabinet, the Federal Executive Council, was appointed, chaired by Gen. Abacha. In June 1994 a Constitutional Conference opened with 360 participants, 90 of whom were appointed by the government. In Oct. 1994 the Conference recommended the introduction of a plurality of political parties, and the rotation of the presidency between North and South to overcome the bitter hostility between the two regions. In June 1995 the Conference submitted a proposal for a new constitution to the head of state, and the latter lifted the ban on political parties. 5 parties gained government recognition in Oct. 1996. However, by March 1998 the proposed new constitution was still on the drawing board.

Parliament consists of a 360-member *House of Representatives* and a 109-member *Senate.*

Local Government. Each state is administered by a directly-elected governor, who appoints and presides over a State Executive Council. The states are subdivided into local government areas, and there is a Federal Capital Territory, Abuja. Elections were held in Jan. 1999 resulting in a landslide victory for a coalition of centrist politicians. The People's Democratic Party (PDP) won control of about 60% of 774 councils. The All People's Party (APP) won control of about a quarter of contested seats.

DEFENCE

In 1997 defence expenditure totalled US$1,965m. (US$18 per capita).

Army. The Army consists of 1 armoured division, 2 mechanized divisions, 1 air defence brigade and 1 composite division (motorized infantry, airborne amphibious), each with supporting artillery and engineer and reconnaissance units. Equipment includes 60 T-55 and 150 Vickers Mk 3 main battle tanks. Strength (1997) 62,000.

Navy. The Navy comprises 1 German-built MEKO-type frigate with a helicopter and 1 frigate-type training ship (both beyond economic repair), 1 British-built corvette, 2 fast missile craft, 2 minehunters, and some 45 inshore patrol craft. There

are also 2 German-built tank landing ships, 1 survey ship and some 15 service craft. The Navy has a small aviation element equipped with 2 Lynx anti-submarine helicopters. Naval personnel in 1997 totalled 5,500, including Coastguard. The main bases are at Apapa (Lagos) and Calabar.

The Coastguard operate 10 patrol craft launches, and the police numerous boats.

Air Force. The Air Force has been built up with the aid of a German mission; much first-line equipment was received from the former Soviet Union. It has 12 MiG-21 supersonic jetfighters and MiG-21U fighter-trainers, and 22 Alpha Jet light attack/trainers. About 15 BO 105 twin-turbine helicopters serve for search and rescue, while 1 F.27MPA is used for maritime patrol. Transport units operate 7 C-130H-30 and C-130H Hercules 4-turboprop heavy transports, 5 twin-turboprop Aeritalia G222s, 4 Super Puma helicopters, 18 Dornier 128-6 twin-turboprop and 18 DO 28D twin-piston utility aircraft, 2 Navajos and a Navajo Chieftain. Training types include 20 Bulldog primary trainers, 12 MB 339 jets for instrument training, 12 Hughes 300 helicopters and 30 L-39 Albatros advanced trainers. Personnel (1997) total about 9,500, with 62 combat aircraft.

INTERNATIONAL RELATIONS

Involvement in Sierra Leone where Nigeria supported the exiled government of President Ahmed Tejan Kabbah led to a full-scale attack in Feb. 1998 and the routing of the Sierra Leone military junta. Nigeria is in dispute with Cameroon over both its land and its maritime boundary. The two countries are in conflict on the question of sovereignty over the Bakassi Peninsula and also territory which Cameroon claims in the area of Lake Chad.

Nigeria is a member of the UN, ECOWAS, OAU, OPEC and is an ACP member state of the ACP-EU relationship. Membership of the Commonwealth was suspended in Nov. 1995.

ECONOMY

Policy. With the change of leadership, the long promised privatization programme is under way. Money owed to oil companies has been paid. Sanctions, except for the ban on arms sales, have been lifted. A 10-year rift with the IMF ended with an agreement (Jan. 1999) on a Fund-monitored economic reform programme. Promised reforms included abolishing the dual exchange rate, ending the subsidy of local fuel and increasing the pace of privatization. If the incoming government does stick to this programme, expected benefits include a rescheduling of foreign debt and a further IMF agreement on a US$1bn. loan. The new legislation is also committed to implementing the Vision 2010 programme drawn up in the mid 1990s, although many observers doubt whether its goals are realistically attainable.

Performance. Real GDP growth in 1998 was 2·3% (3·25% in 1996). The projected growth for 1999, according to the IMF, is 1·6%. Before the discovery of oil in the early 1970s Nigeria's GDP per head was around US$200. By the early 1980s it had reached around US$800, but has now declined to some US$300.

Budget. The financial year is the calendar year. 1995 revenue, ₦350,700m. (of which ₦150,000m. from oil); expenditure, ₦204,200m. (of which ₦44,500m. capital expenditure, ₦57,000m. debt service).

Currency. The unit of currency is the *naira* (NGN) of 100 *kobo*. Foreign exchange reserves were US$4,100m. in Dec. 1996, but a dual exchange rate allows the government to purchase US dollars for 25% of the market price; gold reserves were 690,000 troy oz. in June 1992. Government figures showed inflation at 28% at the end of 1996. In Nov. 1997 total money supply was ₦268,746m.

Banking and Finance. The Central Bank of Nigeria is the bank of issue (*Governor*, Paul Ogwuma). There were 65 commercial banks (with 2,403 branches) and 51 merchant banks in 1995 (with 144 branches), in 20 of which central or state governments held a controlling interest. Total assets of commercial banks, 1995, ₦463,671m.; merchant banks, ₦91,803m. Total saving deposits, Dec. 1995, ₦121,026m.

A subsequent banking crisis resulted in a decline in the number of banks to 74 at March 1999. Of these, 17 had missed the deadline for increasing their capital to

US$5·75m. by the end of 1998 and faced closure if they did not recapitalise, merge or get taken over by the end of the first quarter of 1999. In banking surveys for 1998, 26 banks were classed as 'distressed' and only 25 as 'acceptable risks or better'. It was predicted that there would be further bank closures as the industry becomes more competitive.

There is a stock exchange.

Weights and Measures. The metric system is in force.

ENERGY AND NATURAL RESOURCES

Electricity. Installed capacity, 1994, 5·88m. kW. Production, 1995, 14,482·6m. kWh (5,500·2m. kWh hydro-electric). Consumption per capita in 1995 was estimated to be 141 kWh.

Oil and Gas. Nigeria depends on oil for more than 90% of its overseas earnings. The cumulative income from oil over 25 years exceeds US$220,000m. With the collapse in the world oil price to around US$10 a barrel (down from US$40 in 1980), it was forecast that there would be a 54% drop in revenue for 1999. Nigeria's oil production amounted to 2·1m. bbls. a day in 1998, up from 1·5m. bbls. per day in 1986. There are 4 refineries. Oil income in 1998 was around US$1bn. a month, representing more than 75% of government revenue, but unrest which threatened to escalate into civil war caused production to be cut by around a third.

Natural gas reserves, 1995, were estimated at 3,114,870m. cu. metres. Production, 1995, 4,131m. cu. metres.

Water. 11 River Basin Development Authorities have been established for water resources development.

Minerals. Production, 1995 (in tonnes): Columbite, 37; coal, 20,000; limestone, 3·66m.; marble, 22,460; cassiterite, 203. Lead production was 3,000 tonnes in 1990; tin, 149 tonnes in 1992.

Agriculture. Agriculture accounted for 43% of GDP in 1996. Of the total land mass, 75% is suitable for agriculture, including arable farming, forestry, livestock husbandry and fisheries. In 1994, 30·16m. ha were arable, 2·54m. ha permanent cropland and 40m. ha permanent pasture. 0·23m. ha were irrigated in 1994. 90% of production was by smallholders with less than 3 ha in 1998, and less than 1% of farmers had access to mechanised tractors. Main food crops are millet and sorghum in the north, plantains and oil palms in the south, and maize, yams, cassava and rice in much of the country, the north being, however, the main food producing area. Output, 1995 (in 1,000 tonnes): Millet, 4,900; sorghum, 6,377; plantains, 1,604; maize, 7,240; yams, 24,370; groundnuts, 1,523; cotton seed, 308; palm kernel, 543,000; palm oil, 871,000; cassava, 31,404; rice, 2,920; cocoa, 331.

Livestock, 1996: Cattle, 18·11m.; sheep, 14m.; goats, 24·5m.; pigs, 6·93m.; 124m. chickens (1995). Products (in 1,000 tonnes), 1995: Beef and veal, 192; pork, 31; mutton and lamb, 94; goat meat, 88; poultry meat, 73; milk, 961; eggs, 399.

Forestry. There were 13·78m. ha of forests in 1995, or 15·1% of the land area (14·39m. ha and 15·8% in 1990). The most important timber species include mahogany, iroko, obeche, abwa, ebony and camwood. Nigeria is Africa's leading roundwood producer, with removals totalling 111·05m. cu. metres in 1995.

Fisheries. The total catch (1995) was (in 1,000 tonnes): Coastal fishing, 142; deep-sea, 11; fish farms, 21; other freshwater, 127.

INDUSTRY

Manufacturing contributes about 9% of GDP. 1994 production (in 1,000 tonnes) included: Sugar, 55; paper and products, 43; cement, 3,086; cigarettes, 9,228. Also plywood, 72,000 cu. metres.

Labour. The labour force in 1996 totalled 45,565,000 (64% males). There were 196 work stoppages in 1995 with 235·1m. working days lost. Unemployment was 1·8% in 1995.

Trade Unions. All trade unions are affiliated to the Nigerian Labour Congress.

INTERNATIONAL TRADE

Nigeria's estimated debt (1997) exceeded US$34,000m. Rescheduling the debt depends on an IMF agreement which requires the ending of a two-tier exchange rate.

Imports and Exports. Exports in 1996 were valued at US$18,614m.; imports at US$7,997m. Principal exports, 1992 (in ₦1m.): Oil, 201,349; cocoa, 1,345; rubber, 766; urea and ammonia, 447; fish, 400. KEY HISTORICAL EVENTS

Norway was under Danish domination from the 14th century. By a Treaty of 14 Jan. 1814, the King of Denmark ceded Norway to the King of Sweden but the Norwegian people declared themselves independent and elected Prince Christian Frederik of Denmark as their king. The foreign Powers refused to recognize this election, and on 14 Aug. a convention proclaimed the independence of Norway in a personal union with Sweden. This was followed on 4 Nov. by the election of Karl XIII (II) as King of Norway. Norway declared this union dissolved on 7 June 1905 and Sweden agreed to the repeal of the union on 26 Oct. 1905. The throne was offered to a prince of the reigning house of Sweden who declined. After a plebiscite, Prince Carl of Denmark was formally elected King on 18 Nov. 1905, taking the name of Haakon VII. He reigned for 52 years, after which he was succeeded by his son.

From 1940 to 1944, during the Second World War, the Germans occupied Norway and set up a widely resented pro-German government under Vidkun Quisling.

Apart from this wartime episode, the Labour Party held office, and the majority in the Storting (parliament), from 1935 to 1965. From 1965 coalitions or minority governments have held power with Labour remaining the largest single party. The discovery of extensive off shore oil reserves in the 1960s transformed the Norwegian economy, making it one of the world's richest.

TERRITORY AND POPULATION

Norway is bounded in the north by the Arctic Ocean, east by Russia, Finland and Sweden, south by the Skagerrak Straits and west by the North Sea. The total area of mainland Norway is 323,758 sq. km, including 17,506 sq. km of fresh water.

Population (1990 census) was 4,247,546 (2,099,881 males; 2,147,655 females); population density per sq. km, 13·8. Estimated population in 1998, 4,417,599; population density, 14.

The UN gives a projected population for 2000 of 4·41m.

There are 19 counties (*folk*). Land area, population and densities:

CONSTITUTION AND GOVERNMENT

Norway is a constitutional and hereditary monarchy.

The reigning King is Harald V, born 21 Feb. 1937, married on 29 Aug. 1968 to Sonja Haraldsen. He succeeded on the death of his father, King Olav V, on 21 Jan. 1991. *Offspring:* Princess Märtha Louise, born 22 Sept. 1971; Crown Prince Haakon Magnus, born 20 July 1973. The king receives a tax-free annual allowance of 19·8m. kroner from the civil list. Women have been eligible to succeed to the throne since 1990. There is no coronation ceremony. The royal succession is in direct male line in the order of primogeniture. In default of male heirs the King may propose a successor to the Storting, but this assembly has the right to nominate another, if it does not agree with the proposal.

The Constitution, voted by a constituent assembly on 17 May 1814 and modified at various times, vests the legislative power of the realm in the *Storting* (Parliament). The royal veto may be exercised; but if the same Bill passes two Stortings formed by separate and subsequent elections it becomes the law of the land without the assent of the sovereign. The King has the command of the land, sea and air forces, and makes all appointments.

The 165-member Storting is directly elected by proportional representation. The country is divided into 19 districts, each electing from 4 to 15 representatives.

The Storting, when assembled, divides itself by election into the *Lagting* and the *Odelsting*. The former is composed of one-fourth of the members of the Storting, and the other of the remaining three-fourths. Each Ting (the Storting, the Odelsting and the Lagting) nominates its own president. Most questions are decided by the Storting, but questions relating to legislation must be considered and decided by the Odelsting and the Lagting separately. Only when the Odelsting and the Lagting disagree, the Bill has to be considered by the Storting in plenary sitting, and a new law can then only be decided by a majority of two-thirds of the voters. The same majority is required for alterations of the Constitution, which can only be decided by the Storting in plenary sitting. The Storting elects 5 delegates, whose duty it is to revise the public accounts. The Lagting and the ordinary members of the Supreme Court of Justice (the *Høyesterett*) form a High Court of the Realm (the *Riksrett*) for the trial of ministers, members of the *Høyesterett* and members of the Storting. The impeachment before the *Riksrett* can only be decided by the Odelsting.

The executive is represented by the King, who exercises his authority through the Cabinet. Cabinet ministers are entitled to be present in the Storting and to take part in the discussions, but without a vote.

National Anthem. 'Ja, vi elsker dette landet' ('Yes, we love this land'); words by B. Bjørnson, tune by R. Nordraak.

Army. There are a Northern and a Southern command, and within these the Army is organized in 4 district commands, 1 divisional headquarters and 14 territorial

commands. North Command consists of 1 brigade group. South Command consists of 2 infantry battalions, including the Royal Guard. Equipment includes 170 Leopard main battle tanks. Strength (1997) 14,700 (including 9,200 conscripts). The fast mobilization reserve numbers 255,000.

Main Naval combatants include 12 coastal submarines (including 6 new German-built Ula class), 4 frigates, 28 missile craft, 3 coastal minesweepers, 6 minehunters and 2 minelayers. Auxiliaries comprise 1 submarine/missile craft support ship, 1 Royal Yacht and some 10 small general-purpose tenders. The Coastal Artillery man 26 coastal batteries and other static defence systems.

The personnel of the navy totalled 6,400 in 1996, of whom 3,600 were conscripts. 1,000 served in Coastal Artillery and 700 in the Coast Guard. The main naval base is at Bergen (Håkonsvern), with subsidiary bases at Horten, Ramsund and Tromsø.

The naval elements of the Home Guard on mobilization can muster some 6,000 personnel, and man 2 tank landing craft, 7 torpedo craft and about 400 requisitioned fishing vessels.

The 12 Coast Guard offshore patrol vessels (of which 3 are armed, and of frigate capability) are Navy-subordinated, and assist other government agencies in rescue service, environmental patrols, surveillance and police duties.

Air Force. The Royal Norwegian Air Force comprises the Air Force and the Anti-air Artillery. The Air Force consists of 4 squadrons of F-16 Fighting Falcons, 1 squadron of F-5 fighter-bombers, 1 maritime patrol squadron of P-3N and P-3C Orions, 1 squadron of C-130 Hercules transports, 1 squadron of Falcon 20s equipped for EW duties, 1 squadron with DHC-6 Twin Otter light transports and 2 squadrons of Bell 412SP helicopters. INTERNATIONAL RELATIONS

Norway is a member of the UN, NATO, EFTA, OECD, the Council of Europe and the Nordic Council, and an Associate Member of the WEU. Norway has acceded to the Schengen Accord abolishing border controls between Norway and Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Italy, Luxembourg, Netherlands, Portugal, Spain and Sweden.

In a referendum on 27–28 Nov. 1994, 52·2% of votes cast were against joining the EU. The electorate was 3,266,182; turn-out was 88·88%.

ECONOMY

Performance. Major oil discoveries on the Norwegian continental shelf coincided with the 1974 and 1979 oil shocks, resulting in a pronounced upswing in mainland economy which lasted until the 1986 oil price collapse. Norway only began to recover from the subsequent slump in the economy in 1993. The strong performance of the Norwegian economy in 1993–98 lifted mainland GDP by 20%, but a significant slowdown now seems to be under way. As in 1986, the oil price collapse of 1998 occurred at a critical time when the labour market was overheated. As a result, economic developments have been marked by several adverse shocks, such as deteriorating terms of trade, coupled with increased wages and high interest rates.

Real GDP growth was estimated at 3·4% in 1998 (3·7% in 1997).

Budget. Central government revenue and expenditure (in 1m. kroner) for years ending 31 Dec.:

	1994	*1995*	*1996*	*1997*
Revenue	347,260	381,849	423,676	429,000
Expenditure	345,046	350,667	365,247	374,600

The 1999 budget, presented in Oct. 1998, projected the central government surplus to rebound by 23·5bn. kroner to over 52bn. kroner—almost 50% of the increase is due to a narrowing of the non-oil budget deficit. As in 1998 the entire budget surplus will be allocated to the Government Petroleum Fund.

Currency. The unit of currency is the *Norwegian krone* (NOK) of 100 *øre*. After Oct. 1990 the krone was fixed to the ecu in the EMS of the EU in the narrow band of 2·25%, but it was freed in Dec. 1992. Annualized inflation was 1·3% in 1996 and 2·6% in 1997, with a forecast of 2·4% in 1998. In Feb. 1998 foreign exchange reserves were US$22,884m. and gold reserves were 1·18m. troy oz. In Jan. 1998 total money supply was 421bn. kroner.

Banking and Finance. Norges Bank is the central bank and bank of issue. Supreme authority is vested in the Executive Board consisting of 7 members appointed by the King and the Supervisory Council consisting of 15 members elected by the Storting. The *Governor* is Svein Gjedrem.

There are 3 major commercial banks: Den Norske Bank, Christiana and Fokus. Total assets and liabilities of the 20 commercial banks at 31 Dec. 1996 were 552,348m. kroner.

At the end of 1992 there were 23 private joint-stock banks. Their total amount of capital and funds was 21,284m. kroner (capital 12,029m., funds 9,255m.). Deposits at the end of 1995 amounted to 248,187m. kroner.

The number of savings banks at 31 Dec. 1996 was 132; ordinary deposits totalled 247,678m. kroner.

There is a stock exchange in Oslo.

Weights and Measures. The metric system is obligatory.

ENERGY AND NATURAL RESOURCES

Electricity. Norway is a large producer of hydro-electric energy. The potential total hydro-electric power was estimated at 178,335m. kWh in 1997. Installed capacity in 1994 was 26·43m. kW, more than 95% of it hydro-electric. Production, 1997 estimate, was 111,636m. kWh (104,712m. kWh in 1996, of which 104,148m. kWh was hydro-electric). Consumption per capita in 1995, estimated at 24,586 kWh, was the highest in the world.

Oil and Gas. There are enormous oil reserves in the Norwegian continental shelf. In 1966 the first exploration well was drilled. Production of crude oil, 1997 (provisional), 156,215,000 tonnes. Norway is the world's second biggest oil exporter after Saudi Arabia, producing around 3·5m. bbls. a day in 1996. It had proven reserves of 11·2bn. bbls. in Sept. 1997. In March 1998 Norway announced that it would reduce its output for the year by 100,000 bbls. per day as part of a plan to cut global crude production.

Output of natural gas, 1997 (provisional), 47,053m. cu. metres.

Minerals. Production, 1996 (in tonnes): iron ore, 1,554,599; ferrotitanium ore, 758,711; copper concentrates, 31,736; lead ore (1995), 3,721; zinc ore, 8,619.

Agriculture. Norway is barren and mountainous. The arable area is in strips in valleys and around fiords and lakes.

In 1996 the agricultural area[1] was 1,031,200 ha, of which 609,300 ha were meadow and pasture, 174,600 ha were sown to barley, 97,000 ha to oats, 58,800 ha to wheat and 18,100 ha to potatoes. Production (in 1,000 tonnes) in 1995: Barley, 547; oats, 354; wheat, 312; potatoes, 400; hay, 3,274; vegetables, 132; meat, 240.

Livestock, 1996[1], 1,005,800 cattle (342,700 milch cows), 1,032,300 sheep, 57,900 goats, 1,328,500 pigs, 3,460,600 hens. 1995: 0·1m. silver and platinum fox, 0·52m. blue fox, 0·33m. mink, 203,900 reindeer.

[1]Holdings with at least 50 ha agricultural area in use.

Forestry. In 1995 the total area under forests was 8·07m. ha, or 26·3% of the total land area (7·94m. ha and 25·9% in 1990). Productive forest area, 1997, approximately 67,375 sq. km. About 80% of the productive forest area consists of conifers and 20% of broadleaves. The annual increment (in 1993) was 20,332,000 cu. metres with bark. In 1995–96, 7·8m. cu. metres of roundwood were cut: 37m. cu. metres were special and saw timber and 36m. cu. metres pulpwood.

Fisheries. The total number of fishermen in 1996 was 23,397, of whom 6,310 had another chief occupation. In 1996, the number of registered fishing vessels (all with motor) was 13,944, and of these 5,290 were open boats.

The catch in 1996 totalled 2,632,867 tonnes, almost entirely from sea fishing. Norway has the highest annual catch in Europe. Total salmon catch in 1997 was 708 tonnes (405 tonnes sea fishing, 303 tonnes river fishing). 10,114 seals were caught in 1997 (including 234 harp seal and 67 hodded seal for research purposes). Commercial whaling was prohibited in 1988, but recommenced in 1993: 503 whales were caught in 1997.

Environment. In 1997 there were 18 national parks (total area, 1,378,840 ha), 1,318 nature reserves (242,906 ha), 86 landscape protected areas (506,303 ha) and 76 other areas with protected flora and fauna (11,052 ha).

Civil Aviation. The main international airports are at Oslo (Fornebu), Bergen (Flesland) and Stavanger (Sola). Kristiansand and Trondheim also have a few

international flights. Denmark and Norway each hold two-sevenths and Sweden three-sevenths of the capital of SAS (Scandinavian Airlines System), but they have joint responsibility towards third parties. SOCIAL INSTITUTIONS

Justice. The judicature is common to civil and criminal cases; the same professional judges preside over both. These judges are state officials. The participation of lay judges and jurors, both summoned for the individual case, varies according to the kind of court and kind of case.

The 96 city or district courts of first instance are in criminal cases composed of one professional judge and 2 lay judges, chosen by ballot from a panel elected by the local authority. In civil cases 2 lay judges may participate. These courts are competent in all cases except criminal cases where the maximum penalty exceeds 6 years imprisonment.

In every community there is a Conciliation Board composed of 3 lay persons elected by the district council. A civil lawsuit usually begins with mediation by the Board which can pronounce judgement in certain cases.

The 5 high courts, or courts of second instance, are composed of 3 professional judges. Additionally, in civil cases 2 or 4 lay judges may be summoned. In serious criminal cases, which are brought before high courts in the first instance, a jury of 10 lay persons is summoned to determine whether the defendant is guilty according to the charge. In less serious criminal cases the court is composed of 2 professional and 3 lay judges. In civil cases, the court of second instance is an ordinary court of appeal. In criminal cases in which the lower court does not have judicial authority, it is itself the court of first instance. In other criminal cases it is an appeal court as far as the appeal is based on an attack against the lower court's assessment of the facts when determining the guilt of the defendant. An appeal based on any other alleged mistakes is brought directly before the Supreme Court.

The Supreme Court *(Høyesterett)* is the court of last resort. There are 18 Supreme Court judges. Each individual case is heard by 5 judges. Some major cases are

determined in plenary session. The Supreme Court may in general examine every aspect of the case and the handling of it by the lower courts. However, in criminal cases the Court may not overrule the lower court's assessment of the facts as far as the guilt of the defendant is concerned.

The Court of Impeachment *(Riksretten)* is composed of 5 judges of the Supreme Court and 10 members of Parliament.

All serious offences are prosecuted by the State. The Public Prosecution Authority consists of the Attorney General, 18 district attorneys and legally qualified officers of the ordinary police force. Counsel for the defence is in general provided for by the State.

Religion. There is freedom of religion, the Church of Norway (Evangelical Lutheran), however, being the national church, endowed by the State. Its clergy are nominated by the King. Ecclesiastically Norway is divided into 11 bishoprics, 96 archdeaconries and 626 clerical districts. There were 237,733 members of registered and unregistered religious communities outside the Evangelical Lutheran Church, subsidized by central government and local authorities in 1996. At 1 Jan. 1997 there were 59 Moslem congregations with 46,500 members. The Roman Catholics are under a Bishop at Oslo, a Vicar Apostolic at Trondheim and a Vicar Apostolic at Tromsø.

Education. Free compulsory schooling in primary and lower secondary schools was extended to 10 years from 9, and the starting age lowered to 6 from 7, in July 1997. All young people between the ages of 16 and 19 have the statutory right to 3 years of upper secondary education. In 1996 there were 6,409 kindergartens (children up to 6 years old) with 192,446 children (not including 33,082 children aged 5 to 7 who attended educational programmes for 6-year-olds) and 52,084 staff. In 1995–96 there were 3,285 primary and lower secondary schools with 477,236 pupils and 37,966 teachers; (1991–92) 75 special schools with 1,980 pupils and (1990–91) 1,099 teachers; 730 upper secondary schools with 216,126 pupils and 20,849 teachers; and 74 colleges, with 93,788 students and 5,116 teachers.

There are 4 universities: Bergen, founded 1946; Oslo, 1811; Tromsø, 1968; and the Norwegian University of Science and Technology, 1996 (formerly the University of Trondheim and the Norwegian Institute of Technology); and 10 specialized institutions of equivalent status. In 1995–96 these had 82,957 students and 6,031 academic staff. The University of Tromsø is responsible for Sami language and studies.

In 1996 total expenditure on education came to 7·5% of GNP.

Health. The health care system, which is predominantly publicly financed (mainly by a national insurance tax), is run on both county and municipal levels. Persons who fall ill are guaranteed medical treatment, and health services are distributed according to need. In 1996 there were 15,368 doctors (equivalent to 1 for every 284 persons), 5,222 dentists and 65,232 nurses. In 1994 provision of hospital beds was 51 per 10,000 population.

In 1996, 910,009 children received family allowances.

Maternity leave is for 1 year on 80% of previous salary; unused portions may pass to a husband. In 1996 sickness benefits totalling 24,784·9m. kroner were paid: 13,220·5m. kroner in sickness allowances and 11,564·4m. kroner in medical benefits. Expenditure on benefits at childbirth and adoption totalled 6,262·5m. kroner to 87,714 cases in 1996.

SVALBARD

An archipelago situated between 10° and 35° E. long. and between 74° and 81° N. lat. Total area, 61,229 sq. km (23,640 sq. miles). The main islands are Spitsbergen, Nordaustlandet, Edgeøya, Barentsøya, Prins Karls Forland, Bjørnøya, Hopen, Kong Karls Land and Kvitøya. The Arctic climate is tempered by mild winds from the Atlantic.

The archipelago was probably discovered by Norsemen in 1194 and rediscovered by the Dutch navigator Barents in 1596. In the 17th century whale-hunting gave rise to rival Dutch, British and Danish–Norwegian claims to sovereignty; but when in the 18th century the whale-hunting ended, the question of the sovereignty of Svalbard lost its significance. It was again raised in the 20th century, owing to the discovery and exploitation of coalfields. By a treaty, signed on 9 Feb. 1920 in Paris, Norway's sovereignty over the archipelago was recognized. On 14 Aug. 1925 the archipelago was officially incorporated in Norway.

Total population on 1 Jan. 1997 was an estimated 3,231, of whom 1,739 were Norwegians, 1,482 Russians, and 10 Poles. Coal is the principal product. There are 2 Norwegian and 2 Russian mining camps. 292,094 tonnes of coal were produced from Norwegian mines in 1995 valued at 73,275,000 kroner.

There were 2,104 motor vehicles and trailers registered at 31 Dec. 1996, including 1,168 snow scooters.

There are research and radio stations, and an airport near Longyearbyen (Svalbard Lufthavn) opened in 1975.

JAN MAYEN

This bleak, desolate and mountainous island of volcanic origin and partly covered by glaciers, is situated at 71° N. lat. and 8° 30' W. long., 300 miles north-northeast of Iceland. The total area is 377 sq. km (146 sq. miles). Beerenberg, its highest peak, reaches a height of 2,277 metres. Volcanic activity, which had been dormant, was reactivated in Sept. 1970.

The island was possibly discovered by Henry Hudson in 1608, and it was first named Hudson's Tutches (Touches). It was again and again rediscovered and renamed. Its present name derives from the Dutch whaling captain Jan Jacobsz May, who indisputably discovered the island in 1614. It was uninhabited, but occasionally visited by seal hunters and trappers, until 1921 when Norway established a radio and meteorological station. On 8 May 1929 Jan Mayen was officially proclaimed as incorporated in the Kingdom of Norway. Its relation to Norway was finally settled by law of 27 Feb. 1930. A LORAN station (1959) and a CONSOL station (1968) have been established.

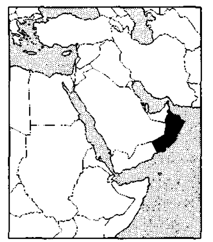
BOUVET ISLAND

This uninhabited volcanic island, mostly covered by glaciers and situated at 54° 25' S. lat. and 3° 21' E. long., was discovered in 1739 by a French naval officer, Jean Baptiste Loziert Bouvet, but no flag was hoisted till, in 1825, Capt. Norris raised the Union Jack. In 1928 Great Britain waived its claim to the island in favour of Norway, which in Dec. 1927 had occupied it. A law of 27 Feb. 1930 declared Bouvetøya a Norwegian dependency. The area is 59 sq. km (23 sq. miles). Since 1977 Norway has had an automatic meteorological station on the island.

PETER I ISLAND

This uninhabited island, situated at 68° 48' S. lat. and 90° 35' W. long., was sighted in 1821 by the Russian explorer, Admiral von Bellingshausen. The first landing was made in 1929 by a Norwegian expedition which hoisted the Norwegian flag. On 1 May 1931 Peter I Island was placed under Norwegian sovereignty, and on 24 March 1933 it was incorporated in Norway as a dependency. The area is 249 sq. km (96 sq. miles).

QUEEN MAUD LAND



On 14 Jan. 1939 the Norwegian Cabinet placed that part of the Antarctic Continent from the border of Falkland Islands dependencies in the west to the border of the Australian Antarctic Dependency in the east (between 20° W. and 45° E.) under Norwegian sovereignty. The territory had been explored only by Norwegians and hitherto been ownerless. In 1957 it was given the status of a dependency.

KEY HISTORICAL EVENTS

Little is known about Oman's pre-Islamic past though it is clear from recent archaeological discoveries that early civilizations existed at least 5,000 years ago. The ancestors of present day Oman are believed to have arrived in two waves of migration over a number of years, the first from the Yemen and the second from northern Arabia at a time when various parts of the country were occupied by the Persians. In the 9th century maritime trade flourished and Sohar became the greatest sea port in the Islamic world. In the early 16th century after the Portuguese under Vasco de Gama had discovered the sea route round the Cape of Good Hope to India, they occupied Muscat and its trade until they were expelled in 1650. The Ya'aruba dynasty introduced a period of renaissance in Omani fortunes both at home and abroad, uniting the country and bringing prosperity; but, on the death in 1718 of Sultan bin Saif II, civil war broke out over the election of his successor. Persian troops occupied Muttrah and Muscat but failed to take Sohar which was defended by Ahmad bin Said who continued to fight the Persians and drive them from Oman after the civil war had ended.

In 1744, the Al bu Said family assumed power and has ruled to the present day. The early part of this century saw a period of decline and, at the time of the First World War, Oman's share of international commercial activities was very limited. Indeed, Oman remained largely isolated from the rest of the world until 1970 when Said bin Taimur was deposed by his son Qaboos in a bloodless *coup*. Sultan Qaboos bin Said introduced reforms including the setting up of an advisory council of regional representatives.

TERRITORY AND POPULATION

Situated at the south-east corner of the Arabian peninsular, Oman is bounded in the north-east by the Gulf of Oman and south-east by the Arabian Sea, south-west by Yemen and north-west by Saudi Arabia and the United Arab Emirates. There is an enclave at the northern tip of the Musandam Peninsula between the United Arab Emirates of Ras al-Khaimah in the west and Fujairah in the south-east. An agreement of June 1995 completed the demarcation of the border with Yemen, and an agreement with Saudi Arabia of July 1995 permits the demarcation of their mutual border.

With a coastline of 1,700 sq. km. from the Strait of Hormuz in the north to the borders of the Republic of Yemen, the Sultanate is strategically located overlooking ancient maritime trade routes linking the Far East and Africa with the Mediterranean.

The Sultanate of Oman occupies a total area of 309,500 sq. km and includes different terrains that vary from plain to highlands and mountains. The coastal plain overlooking the Gulf of Oman and the Arabian Sea forms the most important and fertile plain in Oman.

The **Kuria Muria** islands were ceded to the UK in 1854 by the Sultan of Muscat and Oman. On 30 Nov. 1967 the islands were retroceded to the Sultan of Muscat and Oman, in accordance with the wishes of the population.

An estimated 75·6% of the population lived in urban areas in 1995. In the period 1990-95 the annual growth in the urban population was 8·2%, a rate only exceeded by Botswana and Mozambique.

The official language is Arabic; English is in commercial use.

ECONOMY

Policy. The fifth 5-year development plan (1996–2000) projects that total public expenditure during the period will reach RO 10,630 m. The deficit will be reduced to RO 538m., compared with the RO 2,355m. deficit of the fourth 5-year development plan. The non-oil revenue is estimated at RO 2,639m. of total revenue compared with the RO 2,095m. non-oil revenue of the previous plan. The current plan is based on an estimated oil production average of 880,000 bbls. a day valued at US$15 per barrel. If oil revenues exceed the projected barrel price of US$15–17, the surplus will be placed in the State General Reserve Fund. Total revenues are expected to increase by 17·4% from RO 8,595m. to RO 10,092m. Oil revenues are expected to constitute 73·9% of total revenues.

Operating expenditure will amount to RO 8,696m. (81·8% of total Government expenditure) and capital expenditure will amount to RO 1,854m. (17·4%). Contributions and loans to the private sector will amount to about RO 80m.

The public debt will be maintained at RO 1,500m. over the period of the plan. It is expected to range between 20–22% of GDP as the latter expands. The aim is to attain a GDP annual average growth rate of 4·6% at current prices and to increase the GDP share of the non-oil sectors to 69% by the year 2000.

Privatization of water and electricity is under way.

Performance. GDP, 1998: RO 5,890·3m.

Budget. Revenue (1996) RO 1,990·2m. of which RO 1,473m. from oil; expenditure, RO 2,253·7m.

Currency. The unit of currency is the *Rial Omani* (OMR). It is divided into 1,000 *baiza*. The rial is pegged to the US dollar. Foreign exchange reserves were US$1,334m. and gold reserves 290,000 troy oz. in Feb. 1998. Total money supply in Jan. 1998 was RO 566m.

Banking and Finance. The bank of issue is the Central Bank of Oman, which commenced operations in 1975 (*President*, Hamood Sangur Hashim). All banks must comply with BIS capital adequacy ratios and have a minimum capital of OR

10m. In 1998 there were 17 commercial banks. There are 3 specialized banks: The Oman Housing Bank, The Oman Development Bank (which merged with the Oman Agriculture and Fisheries Bank) and the Alliance Housing Bank.

There is a stock exchange in Muscat, which is linked with those in Bahrain and Kuwait.

Weights and Measures. The metric system is in operation.

ENERGY AND NATURAL RESOURCES

Electricity. Installed capacity was 1·74m. kW in 1994. Production in 1995 was 6,500m. kWh. Consumption per capita was estimated to be 3,412 kWh in 1995.

Oil and Gas. The economy is dominated by the oil industry, which provided 83% of Government revenue in 1990 and 49·2% of GDP. Oil in commercial quantities was discovered in 1964 and production began in 1967. Production in 1996 was 853,000 bbls. a day. Total proven reserves were estimated in 1991 to be 5·2m. bbls.

Gas is likely to become the second major source of income for the country. Oman's estimated gas reserves are 25 trillion cu. ft, of which 16 trillion cu. ft are proven, with exploration continuing.

Water. Oman relies on a combination of aquifers and desalination plants for its water, augmented by a construction programme of some 60 recharge dams. Desalination plants at Ghubriah and Wadi Adai provide most of the water needs of the capital area. In 1995 water production was 16,755m. gallons.

Minerals. Production of refined copper at the smelter at Sohar was 12,015 tonnes in 1990. The mountains of the Sultanate of Oman are rich in mineral deposits; these include copper ore, chromite, coal, asbestos, manganese, gypsum, limestone and marble. The government is studying the exploitation of gold, platinum and sulphide.

Agriculture. Agriculture and fisheries are the traditional occupations of Omanis and remain important to the people and economy of Oman to this day. The country now produces a wide variety of fresh fruit, vegetables and field crops. The country is rapidly moving towards its goal of self-sufficiency in agriculture with the total area under cultivation standing at over 70,000 hectares and total output more than 1m. tonnes. This effort has not been achieved without effort. In a country where water is a scarce commodity it has meant educating farmers on efficient methods of irrigation and building recharge dams to make the most of infrequent rainfall.

The coastal plain (Batinah) north-west of Muscat is fertile, as are the Dhofar highlands in the south. In the valleys of the interior, as well as on the Batinah coastal plain, date cultivation has reached a high level, and there are possibilities of agricultural development. The crop of dates was 625,000 tonnes in 1995. Vegetable and fruit production are also important, and livestock are raised in the south where there are monsoon rains. Camels (94,000 in 1995) are bred by the inland tribes. Other livestock, 1996: Sheep, 148,000; cattle, 142,000; goats (1995), 735,000; chickens (1995), 3m. Live animals and meat constitute more than 25% of the country's non-oil exports.

Fisheries. The catch, which is the largest in the Arabian Gulf, was 139,864 tonnes in 1995, exclusively sea fish. More than 80% is taken by some 85,000 self-employed fishermen. Agriculture and fisheries now contribute more than 5% to Oman's GDP.

INDUSTRY

In 1990 manufacturing accounted for only 3·7% of GDP. Apart from oil production, copper mining and smelting and cement production, there are light industries, mainly food processing and chemical products. The government gives priority to import substitute industries.

Labour. Males constituted 85% of the labour force in 1996. In 1995 there were 619,351 employees in the private sector and 110,529 persons in government service. The employment of foreign labour is being discouraged following 'Omanization' regulations of 1994.

INTERNATIONAL TRADE

Total foreign debt was US$3,415m. in 1996. A royal decree of 1994 permits up to 65% foreign ownership of Omani companies with a 5-year tax and customs duties exemption.

Imports and Exports. Total imports, 1995: RO 1,683·6m.; exports, RO 2,333·2m. (of which oil: RO 1,829·3m.). Principal non-oil exports are metal, metal goods, animals and products and textiles. Main export markets (% of total trade), 1995: Japan, 28·5; South Korea, 15·8; United Arab Emirates, 10·2; China, 9·7. Main import suppliers: United Arab Emirates, 23·8; Japan, 15·8; UK, 10·5; USA, 6·5.

COMMUNICATIONS

KEY HISTORICAL EVENTS

The State of Pakistan was created on 14 Aug. 1947 by the Partition of India and consisted of the former East Bengal (with a district of Assam), the North West Frontier, Sind, the West Punjab and Balochistan. Kashmir was disputed between Pakistan and India. Pakistan was formed to provide Indian Moslems with their own state. This aim had been expressed by the All-India Moslem League since 1940 and was successfully pressed by Mohammad Ali Jinnah (1876–1948) despite initial strong opposition from the predominantly Hindu Indian National Congress. East Bengal acceded to Pakistan in 1947 and seceded after civil war in Dec. 1971 when it became the independent republic of Bangladesh.

The North West Frontier was created by the government of British India as a military buffer zone to protect its Indian empire from Tsarist Russian expansion through central Asia; it was administered as a tribal agency, and included parts of the Punjab across the Indus River, the Peshawar valley and the mountain areas between Chitrál and the Vihowa River. The people were Moslem Pathan hill tribes; government contact with them was often difficult but essential to protect the vital routes across the province through the Khyber, Kuram, Tochi and Gomal passes. The centre was Peshawar, an ancient city on a caravan route.

Sind was a tributary state of the Mughal empire from 1592, its people having previously come under Persian and Arabian influence. The British took Sind in 1843 and governed it as part of the Bombay Presidency, developing Karachi as a supply port.

The western Punjab was part of the Sikh homeland annexed by the British in 1849 (*see* India).

Balochistan was an independent state which entered into treaty relations with British India in 1854 and 1876. The British then obtained a small area around Quetta, British Balochistan. They also received the right to fortify and administer Quetta and Bolan and to bring troops into the territory of the paramount Baloch chief, the Khan of Kalat, who in return received a subsidy. Outside Quetta, Bolan and British Balochistan there was Kalat as an independent state and an independent northern area which was not ruled by the khan and was mainly Pathan. In 1887 British Balochistan was incorporated into British India.

In 1947 Pakistan came into being with Jinnah as its first governor-general. The state incorporated the whole of Balochistan, an action which is still the cause of unrest. Pakistan's status was that of a Dominion within the Commonwealth; it became a republic in 1956 and left the Commonwealth in 1972. Efforts to rejoin were opposed by India until 1989 when Pakistan once more became a full member of the Commonwealth.

The first of several periods of martial law began in 1958, followed by the rule of Field Marshal Mohammad Ayub Khan (until 1969) and Maj.-Gen. Agha Mohammad Yahya Khan (until 1971). During the latter's term, differences between East and West Pakistan came to a head. The East Pakistan Awami League won the majority of seats in the general election of 7 Dec. 1970, pressing for autonomy. Martial law continued while attempts were made to negotiate but civil war broke out in March 1971 and ended in Dec. 1971 with the creation of Bangladesh. President Yahya Khan resigned and was succeeded by Zulfiquar Ali Bhutto.

A new constitution came into force on 14 Aug. 1973, providing a federal parliamentary government with a president as head of state and a prime minister as

head of the government. Mr Bhutto became prime minister, relinquishing the post of president. His government was thought by traditionalists to be too Western and not sufficiently Islamic. There was an army *coup* led by Gen. Mohammad Zia ul-Haq in July 1977. The prime minister, Zulfiquar Ali Bhutto was hanged for conspiring to murder. Gen. Zia ul-Haq became president in 1978. The constitution of 1973 was held in abeyance and national elections were not held until Feb. 1985. The president set up a National Security Council to control the elected government in March 1985; in April 1985 this was replaced by a Federal Cabinet. Martial law ended on 30 Dec. 1985. The Constitution (Ninth Amendment) Bill, 1986, confirmed Islamic teaching as the basis of national law.

On 6 Aug. 1990 the President, accusing the government of corruption and undermining the constitution, dismissed the Prime Minister, Benazir Bhutto, and all her cabinet, dissolved the National Assembly and declared a state of emergency. New governors were appointed for all 4 provinces. On 18 April 1993 President Ghulam Ishaq Khan dismissed the next Prime Minister, Nawaz Sharif, but he was reinstated by the Constitutional Court. Both President and Prime Minister resigned on 18 July 1993, and new elections took place. On 5 Nov. 1996 the President, Farooq Leghari, accusing the government of corruption and mismanaging the economy, again dismissed the Prime Minister, Benazir Bhutto, and all her cabinet, and dissolved the National Assembly, paving the way for Nawaz Sharif's re-election on 3 Feb. 1997.

Relations between Pakistan and India have foundered on the issue of Kashmir, a disputed territory divided by a cease-fire line negotiated by the UN in 1949. In March 1997 the two countries held talks for the first time in three years.

The invasion of neighbouring Afghanistan by Soviet forces in 1979 caused a flow of Afghan refugees into Pakistan, chiefly into the North West Frontier Province which still functions as a military buffer zone.

On 28 May 1998 Pakistan carried out five nuclear tests in the deserts of Balochistan in response to India's tests earlier in the month. US President Bill Clinton invoked sanctions but Pakistan subsequently carried out a sixth test. With first steps towards a nuclear agreement, the USA lifted most sanctions. On 11 June, following India's example, Pakistan announced a unilateral moratorium on nuclear tests.

TERRITORY AND POPULATION

Pakistan is bounded in the west by Iran, north-west by Afghanistan, north by China, east by India and south by the Arabian Sea. CONSTITUTION AND GOVERNMENT

Under the 1973 Constitution, the *President* is elected for a 5-year term by a college of parliamentary deputies, senators and members of the Provincial Assemblies. Parliament is bi-cameral, comprising a *Senate* of 87 members and a *National Assembly* of 217. The 4 Provincial Assemblies each elect 19 senators, the tribal areas are represented by 8 senators elected by the National Assembly and the Federal Capital has 3 representatives. About half the senators are elected for 6-year terms every 3 years. The National Assembly is directly elected with 10 religious minority representatives.

During the period of martial law (1977–85) the Constitution was in abeyance, but not abrogated. In 1985 it was amended to extend the powers of the President, including those of appointing and dismissing ministers and vetoing new legislation until 1990. Legislation of 1 April 1997 abolished the President's right to dissolve parliament, appoint provincial governors and nominate the heads of the armed services.

The Constitution obliges the Government to enable the people to order their lives in accordance with Islam.

National Anthem. 'Pak sarzamin shadbad' ('Blessed be the sacred land'); words by Abul Asr Hafeez Jaulandhari, tune by Abdul Karim Chaagla.

ECONOMY

Policy. The 8th Five-Year Plan ran from 1993 to 1998. Growth targets: GDP, 7%; agriculture, 4·9%; manufacturing, 9·9%; services, 6·7%. The 9th Five-Year Plan is currently being formulated by the government and is due to be launched shortly. There is also a Perspective Plan for 1993–2008. There is a Privatization Commission. In Jan. 1999, the IMF approved a loan of US$575m. to Pakistan.

Performance. The pace of economic growth maintained during the 1980s of around 6% accelerated sharply to 7·7% in 1991–92. However it then declined in 1992–93 when the agriculture sector sank to a negative growth of 5·3% whilst the manufacturing sector came down to 5·4%. The downward drift was checked in 1993–94 but in 1996–97 real GDP growth had plummeted to as low as 1·3%. The sharp deceleration in economic activity was mainly due to the poor performance of agriculture and manufacturing which grew by 0·06% and 1·2% respectively. The performances of all other components of national accounts were also far from satisfactory. In 1997–98 both agriculture and manufacturing experienced growth of 6·0%, and real GDP growth for the fiscal year 1997–98 rose to 5·4%, but the economy remains vulnerable with low reserves of foreign exchange and sluggish industrial growth.

Budget. The financial year ends on 30 June. The consolidated federal and provincial revenue collection for 1996–97 was Rs388,248m. (Rs326,508m. from taxes and Rs61,740m. from non-taxes) and expenditure was Rs543,106m. (current expenditure, Rs457,596m.; development, Rs85,150m.). Defence spending, Rs127,441m. Pakistan's foreign debt in 1998 amounted to US$32bn.

Currency. The monetary unit is the *Pakistan rupee* (PKR) of 100 *paisas*. Gold reserves in Feb. 1998 were 2·07m. troy oz.; approved foreign exchange reserves, US$1,144m. Inflation was 11·8% during 1996–97, but had declined to 7·8% by 1997–98. The rupee was devalued by 3·65% in Sept. 1996 and 8% in Oct. 1997, and by 4·2% in June 1998 in response to the financial problems in Asia. In Jan. 1998 total money supply was Rs660,756m.

Banking and Finance. The State Bank of Pakistan is the central bank (*Governor*, Mohammad Yaqub); it came into operation as the Central Bank on 1 July 1948 and was nationalized in 1974 with other banks.

The State Bank of Pakistan is the issuing authority of domestic currency, custodian of foreign exchange reserves and bankers for the federal and provincial governments and for scheduled banks. It also manages the rupee public debt of the federal and provincial governments. The National Bank of Pakistan acts as an agent of the State Bank where the State Bank has no offices of its own.

The State Bank of Pakistan was granted more autonomy in Feb. 1994 to regulate the monetary sector of the economy.

In Jan. 1985 banks and financial institutions abandoned, in conformity with Islamic doctrine, the payment of interest on new transactions. This does not apply to international business, but does apply to the domestic business of foreign banks operating in Pakistan.

Banks were nationalized in 1974, but a federal government decision of Dec. 1990 again allows banks in the private sector. It was announced in Nov. 1990 that 51% of the equity of state-owned banks was to be privatized in 2 phases.

In June 1995 total assets of the issue department of the State Bank of Pakistan amounted to Rs230,613m. and those of the banking department Rs241,329m.; total deposits, Rs135,593m.

In June 1995 there were 40 banks (21 foreign) with total assets of Rs1,654,094m.

There are stock exchanges at Islamabad, Karachi and Lahore.

The government considers a 20–25% coverage desirable for economic growth and environmental stability. 0·13m. cu. metres of timber and 0·22m. cu. metres of firewood were produced by state-owned forests in 1996–97.

Fisheries. In 1997–98 the catch totalled 590,000 tonnes, approximately 75% from marine waters and the rest from inland waters.

Under them are district and sessions courts of first instance in each district; they have also some appellate jurisdiction. Criminal cases not being sessions cases are tried by judicial magistrates. There are subordinate civil courts also.

The Constitution provides for an independent judiciary, as the greatest safeguard of citizens' rights. There is an Attorney-General, appointed by the President, who has right of audience in all courts and the Parliament, and a Federal Ombudsman.

A Federal Shariat Court at the High Court level has been established to decide whether any law is wholly or partially un-Islamic. PALAU

Republic of Palau

Capital: Koror
Population estimate, 2000: 18,000
Estimated GDP: $81·8m.

KEY HISTORICAL EVENTS

The actual origin of the first Palauans is uncertain but archaeological and linguistic studies have shown that Malays from Indonesia, Melanesians from New Guinea and some Polynesians formed the basic genetic stock, resulting in a diversity of facial types. Palauan money consisting of orange and yellow glass beads, similar to money found in Indonesia, helps in tracing the origins of Palauans to the Malay region. Ancient village sites on one of the islands which make up Palau have been carbon-dated to 1000 BC.

The most noteworthy first foreign contact occurred in 1783 when the vessel *Antelope*, under the command of its English captain Henry Wilson, was shipwrecked. With the assistance of the local High Chief, he and his men were able to stay for three months to rebuild the ship.

Spain acquired sovereignty over the Palau Islands in 1886 but sold the archipelago to Germany in 1899. Japan occupied the islands in 1914, and in 1921 they were mandated to Japan by the League of Nations. Captured by Allied Forces in 1944, the islands became part of the UN Trust Territory of the Pacific Islands created on 18 July 1947 and administered by the USA. Following a referendum in July 1978 in which Palauans voted against joining the new Federated States of Micronesia, the islands became an autonomous republic from 1 Jan. 1981, but acquisition of a free-association status with the USA was delayed by disputes over US intentions to base nuclear weapons on the islands. At a referendum in Nov. 1993 (the ninth of a series) 68% of votes cast favoured a Compact of Free Association with the USA, which provides US$450m. over 15 years in return for military facilities.

Palau became an independent republic on 1 Oct. 1994.

TERRITORY AND POPULATION

The archipelago lies in the Western Pacific and has a total area of 1,632 sq. km (630 sq. miles); water covers 1,124 sq. km (434 sq. miles). It comprises 26 islands and over 300 islets. Only 8 of the islands are inhabited, the largest being Babelthuap (368 sq. km), but most inhabitants live on the small island of Koror (8 sq. km) to the south, containing the present headquarters (a new capital is being built in eastern Babelthuap). Koror had an estimated population of 11,500 in 1995. The total population at the time of the 1990 census was 15,122; 1996 estimate, 17,000, giving a density of 33 per sq. km.

In 2000 the population is projected to be 18,000.

In 1995 an estimated 71·2% of the population lived in urban areas. Some 6,000 Palauans live abroad. The local language is Palauan; both Palauan and English are official.

PANAMA

República de Panamá

Capital: Panama City
Population estimate, 2000: 2·86m.
GNP per capita: (PPP$) 7,060
HDI/world rank: 0·868/45

KEY HISTORICAL EVENTS

A revolution, inspired by the USA, led to the separation of Panama from the United States of Colombia and the declaration of its independence on 3 Nov. 1903. The *de facto* government was recognized by the USA on 5 Nov., and soon afterwards by the other major powers. Diplomatic relations between Colombia and Panama were finally established on 8 May 1924.

On 18 Nov. 1903 a treaty between the USA and the Republic of Panama was signed making it possible for the USA to build and operate a canal connecting the Atlantic and Pacific oceans through the Isthmus of Panama. The treaty granted the USA in perpetuity the use, occupation and control of a Canal Zone, in which the USA would possess full sovereign rights. In return the USA guaranteed the independence of the republic and agreed to pay the republic US$10m. and an annuity of US$250,000. The USA purchased the French rights and properties—the French had been labouring from 1879 to 1899 in an effort to build the canal—for US$40m. and in addition paid private landholders within what would be the Canal Zone a mutually agreeable price for their properties. The Canal was opened on 15 Aug. 1914.

The US domination of Panama has provoked frequent anti-American political actions. In 1968 a more independently minded president, Col. Omar Torryas Herrera, took power in a *coup* and attempted to negotiate a more advantageous treaty with the USA. Two new treaties between Panama and the USA were agreed on 10 Aug. and signed on 7 Sept. 1977. One deals with the operation and defence of the Canal until the end of 1999 and the other guarantees permanent neutrality.

The USA maintains operational control over all lands, waters and installations, including military bases, necessary to manage, operate and defend the Canal until 31 Dec. 1999. Six months after the exchange of instruments of ratification Panama assumed general territorial jurisdiction over the former Canal Zone and became able to use portions of the area not needed for the operation and defence of the Canal.

Torryas vacated the presidency in 1978 but maintained his power as head of the National Guard until his death in an air crash in 1981. Subsequently Gen. Manuel Noriega, Torryas' successor as head of the National Guard, became the strong man of the régime. His position was threatened by some internal political opposition and economic pressure applied by the USA but in Oct. 1989 a US-backed coup attempt failed. On 15 Dec. Gen. Noriega declared a 'state of war' with the USA. On 20 Dec. the USA invaded Panama to remove Gen. Noriega from power and he surrendered on 3 Jan. 1990. Accused as a drug dealer he was convicted by a court in Miami and is now serving a 40-year jail sentence. Currently Panama is preparing for life without America. By 31 Dec. 1999 all American troops—10,000 a few years ago—will have left.

To remain registered, parties must have attained at least 50,000 votes at the last election. A referendum held on 15 Nov. 1992 rejected constitutional reforms by 64% of votes cast. Turn-out was 40%. In a referendum on 30 Aug. 1998 voters rejected proposed changes to the constitution which would allow for a President to serve a second consecutive term.

KEY HISTORICAL EVENTS

New Guinea, especially the eastern half (Irian Jaya), was known to Indonesian and Asian seafarers centuries before it was known to the Europeans. In 1512 the Portuguese sighted the New Guinea coast but made no landing until 1527. The Spanish first claimed the island in 1545 but the first attempt at colonization was made in 1793 by the British. The Dutch, however, claimed the west half of the island as part of the Dutch East Indies in 1828.

In order to prevent that portion of the island of New Guinea not claimed by the Netherlands or Germany from passing into the hands of another foreign power, the government of Queensland annexed Papua in 1883. This step was not sanctioned by the Imperial Government but on 6 Nov. 1884 a British Protectorate was proclaimed over the southern portion of the eastern half of New Guinea and in 1887 Queensland, New South Wales and Victoria undertook to defray the cost of administration. The territory was annexed to the Crown the following year. By 1884 the south-east of New Guinea had been annexed to Britain and the German New Guinea Company took over the north-east of the country. The Australian federal government took over control in 1901; the political transfer was completed by the Papua Act of the federal parliament in Nov. 1905. On 1 Sept. 1906 the Governor-General of Australia declared that British New Guinea was to be known henceforth as the Territory of Papua. The northern portion of New Guinea was a German colony until 1914 when Australian armed forces occupied it and it remained under their administration for the next seven years. It became a League of Nations mandated territory in 1921, administered by Australia, and later a UN Trust Territory (of New Guinea).

The Papua New Guinea Act 1949–72 provided for the administration of the UN Australian Trust Territory of New Guinea in an administrative union with the Territory of Papua, under the title of Papua New Guinea. Australia granted Papua New Guinea self-government on 1 Dec. 1973, and on 16 Sept. 1975 Papua New Guinea became a fully independent state.

What began in 1988 as an armed campaign by tribes claiming traditional land rights against the Australian owner of the massive Panguna copper field soon escalated into a civil war for the secession of the island of Bougainville. Fighting between the government and the secessionist Bougainville Revolutionary Army (BRA) continued until 3 Sept. 1994 when a peace agreement was signed. This provides for 4 neutral zones to be occupied by a Pacific peacekeeping force drawn from the Fiji Islands, Tonga and Vanuatu with logistic support from Australia and New Zealand. The agreement also set up a provisional Bougainville government. The ceasefire was broken by the rebels in mid-1995 and the provisional government leader was assassinated in Oct. 1996. In March 1997 the Government began to employ foreign mercenaries in the campaign against secessionist rebels. This caused public disturbances and led to the resignation of the Prime Minister, Sir Julius Chan. Nevertheless, the use of mercenaries went ahead. In April 1998 the government of Papua New Guinea signed a 'permanent' truce with the secessionists. The 9-year rebellion had claimed 20,000 lives.

Northern Papua New Guinea was struck by 3 tidal waves in July 1998, resulting in some 3,000 deaths.

KEY HISTORICAL EVENTS

A landlocked territory bordered by Brazil, Argentina and Bolivia, Paraguay was occupied by the Spanish in 1537 and became a Spanish colony as part of the viceroyalty of Peru. The Guaraní-speaking population gained some protection from the powerful Jesuit mission stations until the expulsion of the Jesuits in 1767. In 1776 the area became part of the vice-royalty of Rio de la Plata, gaining its independence from Spain, as the Republic of Paraguay, on 14 May 1811. Paraguay was then ruled by a succession of dictators, the first being Dr José Gaspar Rodriguez de Francia, who was elected dictator in 1814 by the national assembly and became perpetual dictator in 1816; he died in 1840. In 1844 a new constitution was adopted under which Carlos Antonio López (nephew of Dr Francia) and his son, Francisco López, ruled until 1870.

During a devastating war fought from 1865 to 1870 between Paraguay and a coalition of Argentina, Brazil and Uruguay, Paraguay's population was reduced from about 600,000 to 233,000. Further severe losses were incurred during the war with Bolivia (1932-35) over territorial claims in the Chaco inspired by the unfounded belief that minerals existed in the territory. A peace treaty by which Paraguay obtained most of the area her troops had conquered was signed in July 1938.

The dictatorship of Gen. Higinio Moringo was ended following a civil war in which the right-wing party (*Partido Colorado*) defeated the Liberals. A period of unrest ensued until Gen. Alfredo Stroessner Mattiauda, the C.-in-C. of the Army, assumed power in a military *coup* in 1954. He was deposed in a further coup in Feb. 1989.

A new constitution took effect in Feb. 1968 under which executive power is discharged by an executive president. In 1977 the constitution was amended to enable the president to stand for more than two consecutive terms of office. Gen. Stroessner was re-elected 7 times between 1958 and 1988. Since then, Paraguay has been under more or less democratic government. The third consecutive general democratic elections held in May 1998 were won by the ruling Colorado Party. Raúl Cubas Grau became president. In Aug. 1998 Paraguay faced another crisis when the new president was threatened with impeachment after issuing a presidential decree to free his former running-mate, Gen. Lino Oviedo who had been imprisoned in 1996 for attempting a coup against the previous president, Juan Carlos Wasmosy. On 23 March 1999, Paraguay's vice-president Luis Maria Argaña was assassinated. The following day, Congress voted to impeach President Cubas who then resigned.

TERRITORY AND POPULATION

KEY HISTORICAL EVENTS

The Incas of Peru were conquered by the Spanish in the 16th century, and subsequent Spanish colonial settlement made Peru the most important of the Spanish viceroyalties in South America. On 28 July 1821 Peru declared its independence, but it was not until after a war which ended in 1824 that the country gained its freedom. The two presidential terms served by Gen. Ramón Castilla (1845–51 and 1855–62) were prosperous ones for Peru, but in a disastrous war with Chile (1879–83) Peru's capital, Lima, was captured and she lost some of her southern territory to Chile under the peace treaty. Tacna, in the far south of the country, remained in Chilean control from 1880 until 1929.

In 1924 Dr Victor Raúl Haya de la Torre founded the *Alianza Popular Revolucionaria Americana* to oppose the dictatorial government then in power. The party was banned between 1931 and 1945 and between 1948 and 1956 its leader failed regularly in the presidential elections but it was at times the largest party in Congress.

In Oct. 1948 Gen. Manuel Odria deposed President José Luis Bustamante y Rivera and became president in 1950. He was succeeded by an elected president, Dr Manuel Prado y Ugarteche in 1956, but the closeness of the 1962 elections led Gen. Ricardo Pérez Godoy, Chairman of the Joint Chiefs-of-Staff, to seize power. A *coup* led by Gen. Nicolás Lindley López deposed him in 1963. There followed, after elections, a period of civilian rule under President Fernando Belaúnde Terry, who enacted important legislation and measures to promote agrarian reforms. The military staged yet another *coup* in 1968, and the Army Chief-of-staff, Gen. Juan Valasco Alvarado, usurped the presidency and dissolved Congress. He in turn was overthrown and superseded by Gen. Francisco Morales Bermudez in 1975. In 1978–79 a constituent assembly drew up a new constitution, after which a civilian government was installed and President Fernando Belaúnde Terry again took office on 28 July 1980. He was succeeded in a constitutional process of election by President Alan Garcia Pérez in July 1985.

On 6 April 1992 the President suspended the constitution and dissolved the parliament. A new constitution was promulgated on 29 Dec. 1993.

On 17 Dec. 1996 Tupac Amaru Revolutionary Movement guerrillas seized the residence of the Japanese ambassador, holding 72 hostages in a demand for the release of guerrilla prisoners. The stand-off continued until the following April when the Peruvian army launched an assault to liberate the hostages.

CLIMATE

There is a very wide variety of climate, ranging from equatorial to desert (or perpetual snow on the high mountains). In coastal areas, temperatures vary very little, either daily or annually, though humidity and cloudiness show considerable variation, with highest humidity from May to Sept. Little rain is experienced in that period. In the Sierra, temperatures remain fairly constant over the year, but the daily range is considerable. There the dry season is from April to Nov. Desert conditions occur in the extreme south, where the climate is uniformly dry, with a few heavy showers falling between Jan. and March. Lima, Jan. 74°F (23·3°C), July 62°F (16·7°C). Annual rainfall 2" (48 mm). Cuzco, Jan. 56°F (13·3°C), July 50°F (10°C). Annual rainfall 32" (804 mm). El Niño is the annual warm Pacific current which moves to the coasts of Peru and Ecuador. El Niño in 1982–83 resulted in agricultural production down by 8·5% and fishing output down by 40%. El Niño in 1991–94 was unusually long. El Niño in 1997–98 resulted in a sudden rise in the surface temperature of the Pacific by 9°F (5°C) and caused widespread damage and loss of life.

CONSTITUTION AND GOVERNMENT

The 1980 Constitution provided for a legislative *Congress* consisting of a *Senate* (60 members) and a *Chamber of Deputies* (180 members) and an Executive formed of the President and a Council of Ministers appointed by him. Elections were to be every 5 years with the President and Congress elected, at the same time, by separate ballots.

On 5 April 1992 President Fujimori suspended the 1980 constitution and dissolved Congress.

A referendum was held on 31 Oct. 1993 to approve the twelfth constitution, including a provision for the president to serve a consecutive second term. 52·24% of votes cast were in favour. The constitution was promulgated on 29 Dec. 1993. In Aug. 1996 Congress voted for the eligibility of the President to serve a third consecutive term of office. All citizens over the age of 18 are eligible to vote. Voting is compulsory.

President Fujimori estimates that El Niño caused US$12m. worth of infrastructure damage, killed over 100 people and resulted in tens of thousands becoming

homeless. The government declared a state of emergency in 9 out of the country's 24 regions. A programme to rebuild the infrastructure, namely communication lines (bridges, roads, railway lines and canals) and healthcare facilities, to prevent the spread of epidemics, has been initiated. President Fujimori regained popularity owing to his efforts to combat the effects of El Niño.

There are 6 diesel submarines built in what was then West Germany (1974–82). Other combatants include 1 modernized former British Daring class destroyer, 4 Italian Lupo class frigates, 6 French-built fast missile craft and 3 tank landing ships. Major auxiliaries include 1 transport, 1 Antarctic patrol ship, 2 replenishment and 1 freighting tankers, 1 survey ship and 1 ocean tug, and 30 minor auxiliaries and service craft. MiG-29 interceptors were bought from Belarus in 1997. Other aircraft in service include medium transports (1 F.28 Fellowship, 20 An-32, 10 C-130/L-100 Hercules), light transports (16 Twin Otter, 5 Y-12, 1 twin-jet Falcon and 12 Turbo-Porter), helicopters (40 Mi-8/17, 25 Mi-24 gunships, Bell 206, 212, 214ST, 412 and UH-1, BO 105 and Ecureuil), 60 training aircraft (including Aermacchi MB 339, Tucano and T-41D) and a small number of miscellaneous types for photographic and communications duties. INTERNATIONAL RELATIONS

Peru is a member of the UN, OAS, the Andean Group and LAIA.

ECONOMY

Policy. Privatization began in 1991 under the aegis of the Privatization Commission (COPRI). By early 1995, 95 state companies had been sold bringing in revenue of US$4,400m. In 1996, 31 state companies were sold, bringing in US$871m. In 1994 a 'citizen participation' scheme was initiated to increase the extent of private shareholding in state enterprises; retirement pensions may also be taken as shares.

Performance. Forecasts for GDP growth for 1998 ranged from 2·5% to 6%. In 1997 the GDP growth (Jan. to Aug.) was 7·2%.

Budget. At US$10·2bn., the 1998 budget is 10% higher in real terms than in 1997. There was a trade deficit of US$1·7bn. in 1997. In 1997 the World Bank approved a US$150m. loan to help Peru overcome expected problems associated with El Niño.

Currency. The monetary unit is the *nuevo sol* (PES), of 100 *céntimos*, which replaced the inti in 1990 at a rate of 1m. intis = 1 nuevo sol. Inflation was 5·7% in 1997 and was forecast to rise to 8% in 1998. Foreign exchange reserves were US$10,954m. in Jan. 1998 and gold reserves 1·11m. troy oz. in Feb. 1998. In Dec. 1997 total money supply was 14,825m. sols.

Banking and Finance. The bank of issue is the Banco Central de Reserva (*Governor*, Germán Suárez Chávez), which was established in 1922. The government's fiscal agent is the Banco de la Nación. In 1995 there were additionally 17 domestic commercial, 1 foreign and 4 multinational banks. Legislation of April 1991 permitted financial institutions to fix their own interest rates and reopened the country to foreign banks. The Central Reserve Banks sets the upper limit.

There are stock exchanges in Lima and Arequipa.

Weights and Measures. The metric system is in use.

ENERGY AND NATURAL RESOURCES

Peru lays claim to 84 of the world's 114 ecosystems; 28 of its climate types; 19% of all bird species; 20% of all plant species; and 25 conservation areas (7 national parks, 8 national reserves, 7 national sanctuaries and 3 historic sanctuaries.)

Electricity. In 1996 output was 16,541·6m. kWh (13,222·7m. kWh hydro-electric). Total generating capacity was 4,771·7 MW. 66·1% of the population were supplied with electricity in 1996. Consumption per capita in 1995 was an estimated 519 kWh. Peru's reliance on hydro-generated electricity means that electricity production was affected by the drought brought on by the 1997–98 El Niño.

Oil and Gas. Proven oil reserves in 1996 amounted to 340·3m. bbls. Output, 1996, 43·91m. bbls. Development of the huge Camisea gas field, Peru's largest commercial project, is on hold while negotiations continue with the Shell-Mobil consortium.

Minerals. Mining accounts for some 8·4% of GDP (1996). Lead, copper, iron, silver, zinc and petroleum are the chief minerals exploited. Mineral production, 1996 (in 1,000 tonnes): Iron, 2,875·6; zinc, 760·6; copper, 484·2; lead, 248·8; silver, 1,970·2; gold, 64·8. Early in 1998 Southern Peru Copper, the country's largest mining company, estimated that 3,000 tonnes of copper production had been lost due to flooding caused by El Niño.

Agriculture. Agriculture produced 7% of GDP in 1996. There are 4 natural zones: The Coast strip, with an average width of 80 km; the Sierra or Uplands, formed by the coast range of mountains and the Andes proper; the Montaña or high wooded region which lies on the eastern slopes of the Andes; and the jungle in the Amazon Basin, known as the Selva. Legislation of 1991 permits the unrestricted sale of agricultural land. Workers in co-operatives may elect to form limited liability companies and become shareholders.

Production in 1996 (in 1,000 tonnes): Potatoes, 2,327·3; wheat, 130; seed cotton, 268·6; coffee, 106·5; rice, 1,203; maize, 559·4; beans, 68·9; sugar-cane 6,119.

Arable land (in 1,000 ha), 1996: 35,381·8, of which 5,477 was given over to agricultural production: 4,314·4 was cultivated, 892·3 was permanent crops and 270·3 was permanent pasture. 29,904·8 ha of arable land was not used for agricultural production, with 16,906·4 natural pasture, 9,053·7 left wild and 3,944·7 was other types of earth. In Nov. 1997 more than 3,000 ha of farmlands were washed away in floods caused by El Niño.

Forestry. In 1995 the area covered by forests was 67·56m. ha, or 52·8% of the total land area (68·65m. ha and 53·6% in 1990). The forests contain valuable hardwoods; oak and cedar account for about 40%. In 1995 roundwood removals totalled 12·58m. cu. metres.

Fisheries. Sardines and anchovies are caught offshore to be processed into fishmeal, of which Peru is a major producer. Fishing in deeper waters is being developed, subject to government conservation by the imposition of quotas and fishing bans. Total catches in 1995 were 8·99m. tonnes, almost entirely from sea fishing, with a value of US$936·7m. (1994, 11·58m. tonnes, US$901·5m.). In 1993, 1994 and 1995 Peru's annual catch was the second largest in the world after that of China. In the first 9 months of 1997, 1·3m tonnes of fishmeal was produced, up 3·4% over the same period for 1996. The central bank forecasts that El Niño will shrink the fishing industry by 14% in 1998–99.

In Dec. 1994 the minimum monthly wage was 132 sols.

Trade Unions. Trade unions have about 2m. members (approximately 1·5m. in peasant organizations and 500,000 in industrial). The major trade union organization is the *Confederación de Trabajadores del Perú*, which was reconstituted in 1959

after being in abeyance for some years. The other labour organizations recognized by the Government are the *Confederación General de Trabajadores del Perú*, the *Confederación Nacional de Trabajadores* and the *Central de Trabajadores de la Revolución Peruana*.

INTERNATIONAL TRADE

KEY HISTORICAL EVENTS

Discovered by Magellan in 1521, the Philippine islands were conquered by Spain in 1565 and named after the Spanish king, Philip. The independence of the Philippines was declared in June 1898 but in Dec. 1898 at the signing of the Treaty of Paris, following the Spanish-American War, the Philippines were ceded to the USA. A four-year war followed with considerable loss of life of Filipinos.

The Philippines acquired self-government as a Commonwealth of the USA in March 1934. This Act provided for complete independence after a ten-year transitional period. The islands were occupied by the Japanese from 1942 to 1945. Independence was achieved in July 1946. From independence until 1972, the Philippines were governed under a constitution based largely on the US pattern, consisting of a president with a fixed four-year term of office, a bicameral legislature and an independent judiciary. Two political parties dominated the political scene during this period, the Liberals and the Nationalists.

In 1971 changes were planned for the constitution. However, in Sept. 1972 before the constitution could be ratified, President Ferdinand Marcos declared martial law. Following the death sentence on Benigno Aquino, Jr (the main opposition leader, in Nov. 1977) criticism of Marcos increased. A stay of execution was allowed, and in May 1980 Aquino was released from prison to go to the USA for medical treatment. Jan. 1981 saw the lifting of martial law and in Aug. 1983 Aquino returned to the Philippines after three years' in exile and was shot dead on arrival at Manila airport. This action united the opposition parties against Marcos.

At the presidential elections of Feb. 1986 Ferdinand Marcos was opposed by Corazón Aquino, widow of Benigno Aquino. Though Marcos was proclaimed president by parliament, the elections proved to be fraudulent and Aquino became president. Marcos fled the country and a new constitution limiting the president to a single, six-year term in office was ratified in Feb. 1987.

Insurgent activities carried out since 1972 by the Moro National Liberation Front (Moslems) were ended by a peace agreement of 2 Sept. 1996. The agreement provides for the establishment of a Moslem autonomous region covering 14 provinces and 9 cities in Mindanao, Palawan, Sulu and Basilan under the administrative council; but Moslem rebels continue their guerrilla war against the state.

TERRITORY AND POPULATION

The Philippines is situated between 21° 25' and 4° 23' N. lat. and between 116° and 127° E. long. It is composed of 7,100 islands and islets, 2,773 of which are named. Elections were held simultaneously with the national elections on 8 May 1995 for provincial governors, city and municipal mayors and councillors.

DEFENCE

An extension of the 1947 agreement granting the USA the use of several army, navy and air force bases was rejected by the Senate in Sept. 1991. An agreement of Dec. 1994 authorizes US naval vessels to be revictualled and repaired in Philippine ports. The Philippines is a signatory of the South-East Asia Collective Defence Treaty.

Defence expenditure in 1997 totalled US$1,422m. (US$20 per capita).

The present fleet includes 1 ex-US frigate, 9 offshore patrol vessels (ex-US minesweepers and escorts) and about 50 inshore patrol craft. There are 5 tank landing ships and 2 medium landing ships, and some 30 landing craft. Auxiliaries include 1 repair ship, 2 small oilers, 3 survey ships and 2 water tankers, as well as some 20 minor auxiliaries. 8 BN Defender maritime patrol aircraft and 10 BO-105 helicopters are in use.

Navy personnel in 1997 totalled 24,000 including 9,500 marines.

Coastguard. The Coastguard is no longer part of the Navy. In 1996 there were some 60 patrol and search-and-rescue craft. Personnel, 2,000.

Air Force. The Air Force had (1997) a strength of 16,500, with 40 combat aircraft and 104 armed helicopters, but serviceability is impaired due to shortage of funds. Its fighter-bomber wing is equipped with 1 squadron of F-5As (only 3 or 4 operational). A strike wing includes 1 squadron having OV-10 Broncos and 1 squadron, T-28s. There are 7 transport and counter-insurgency squadrons (1 with C-

130/L-100 Hercules, 1 with F27s, 1 with Nomads, 1 with C-47s, 2 with UH-1 Iroquois helicopters, 1 with MD-500 helicopters and 1 with S-76 helicopters). Training aircraft include SF.260TPs, T-41s, T-34s, S.211 and T-33 jets. 2 Pumas and 1 S-70 helicopter are used as VIP transports.

KEY HISTORICAL EVENTS

Poland takes its name from the Polanie ('plain dwellers'), whose ruler Mieszko I had achieved a federation by 966, a date taken as that of the foundation of the Polish state. He placed Poland under the Roman Holy See around 990. His son Bolesław I (992–1025) continued his father's territorial expansionism until by the time of his coronation in 1024 Poland's boundaries were much as they are today. The tendency of this state to fragment under German pressure was formalized by Bolesław III (1102–38), whose sons divided the kingdom into 3 duchies. In the 13th century Poland was laid waste by incursions from the pagan proto-Russians and Mongols. In 1320 Władysław of Kraków succeeded in being crowned king of Poland. The work of unification was consolidated by his son, Kazimierz III (1333–70), whose reign brought prosperity and administrative efficiency. A descendant of his married the pagan duke of Lithuania, Jagiełło, who was converted to Catholicism and became king of Poland in 1386, uniting Poland and Lithuania in a vast multi-ethnic empire which was able to break the power of the Teutonic Knights at Tannenberg in 1410.

The Jagiellonian period to 1572 is regarded as an economic and cultural 'golden age'. In 1648 a Cossack revolt in Ukraine resulted in a Russian victory and acquisition of territory; immediately afterwards Sweden occupied and devastated the whole country. Turkish inroads were only finally quelled by King Jan Sobieski's victory at Vienna in 1683. Poland's involvement in the Russo-Swedish wars of 1700–09 brought not only further economic ruin but also the political dependence of the Polish king on the might of Peter the Great. In 1701 the Hohenzollern prince Frederick assumed the title of King of Prussia; his descendant, Frederick the Great, brought Prussia to the position of European power. In the 'First Partition' of 1772 Russia and Prussia in conjunction with Austria took over a third of Poland's territory on the pretext of a Polish uprising at Bar (1768). Poland was wiped off the map by the Second and Third partitions (1793, 1795), except for a brief independent interlude under Napoleon.

Risings in 1830, 1846, 1848 and 1863 were unsuccessful. Thereafter nationalist efforts were channelled more into cultural and economic development. Political parties were formed: the National Democrats under Roman Dmowski campaigned for autonomy; the Socialists under Józef Piłsudski joined the 1905 uprising in search of independence. With the impending collapse of the partitioning powers in the First World War, a Polish National Committee was formed in Paris in 1917 and recognized by the Allies. The thirteenth of President Woodrow Wilson's 'Fourteen Points' guaranteed Poland's independence and access to the sea. A Polish army was organized in France in 1918. Inside Poland Piłsudski had formed a fighting force of his own, the 'Polish legions', and he set up a rival government. The breach was healed by the appointment to the premiership of the neutral Jan Paderewski, with Piłsudski remaining chief of state.

A constitution was voted in March 1921. Poland's frontiers were not established until 1923 after plebiscites in Silesia and East Prussia and a war with Soviet Russia in 1920 which Poland nearly lost. Piłsudski took power in a coup in May 1926. His dictatorship endured until 1935. In foreign affairs Poland attempted to maintain a balance between Germany and the USSR, but after Munich it accepted a British guarantee of its independence in April 1939. In Aug. Hitler signed a non-aggression pact with Stalin which provided for a partition of Poland; this took place a few days after the outbreak of war.

Poland was rapidly overrun, but Polish forces were able to reform on Allied soil under a government-in-exile. Moscow broke off relations with the 'London' Poles in 1943 and recognized the Polish Committee of National Liberation (the 'Lublin committee') which proclaimed itself the sole legal government when Lublin was

liberated in July 1944. In Aug. and Sept. the Soviet army stopped short of the city while the resistance forces were destroyed in the Warsaw uprising. At the Yalta conference Stalin agreed that the Lublin government should be extended to include non-Communists and the 'London' Polish leader Mikolajczyk with 3 colleagues joined the cabinet in July 1945.

Elections were held on 19 Jan. 1947. Of the 12·7m. votes cast, 9m. were given for the Communist-dominated 'Democratic Bloc'. After riots in Poznań in June 1956 nationalist anti-Stalinist elements gained control of the Communist Party under the leadership of Władysław Gomułka.

In 1970 the Federal Republic of Germany recognized Poland's western boundary as laid down by the Potsdam Conference of 1945 (the 'Oder-Neisse line'). In Dec. 1970 strikes and riots in Gdańsk, Szczecin and Gdynia led to the resignation of a number of leaders including Gomułka. He was replaced by Edward Gierek. The raising of meat prices on 1 July 1980 resulted in a wave of strikes which broadened into generalized wage demands and eventually by mid-Aug. acquired a political character. Workers in Gdańsk, Gdynia and Sopot elected a joint strike committee, led by Lech Wałęsa to demand the right to strike and to form independent trade unions, the abolition of censorship, access to the media and the release of political prisoners.

On 31. Aug. the government and Wałęsa signed the 'Gdańsk Agreements' permitting the formation of independent trade unions. On 5 Sept. Gierek suffered a heart attack and retired from the party leadership. On 17 Sept. various trade unions decided to form a national confederation ('Solidarity') and applied for legal status, which was granted on 24 Oct. after some government resistance. On 9 Feb. 1981 the Defence Minister, Gen. Wojciech Jaruzelski, became Prime Minister. On 13 Dec. 1981 the Government imposed martial law and set up a Military Council of National Salvation. Solidarity was proscribed.

Following strikes and demands for the reinstatement of Solidarity, the government resigned in Sept. 1988. After the parliamentary elections of June 1989 the Communists were unable to form a government against the opposition of Solidarity and Tadeusz Mazowiecki, a Solidarity member, was elected Prime Minister by the Sejm on 24 Aug. Unconditionally free parliamentary elections were held in Oct. 1991.

The 6 largest towns and cities all saw a decline in population in 1997, and in 15 out of the 20 largest the population went down during 1997.

Ethnic minorities are not identified. There were estimated to be 1·2m. Germans in 1984, and there are Ukrainians, Belorussians and Lithuanians. A movement for Silesian autonomy has attracted sufficient support to suggest that further moves towards decentralization may soon be considered. A Council of National Minorities was set up in March 1991. There is a large Polish diaspora, some 65% in USA.

The national language is Polish.

CONSTITUTION AND GOVERNMENT

The present Constitution was adopted on 2 April 1997. The head of state is the *President*, who is directly elected for a 5-year term (renewable once). The President may appoint, but may not dismiss, cabinets.

The authority of the republic is vested in the *Sejm* (Parliament of 460 members), elected by proportional representation for 4 years by all citizens over 18. There is a 5% threshold for parties and 8% for coalitions, but seats are reserved for representatives of ethnic minorities even if their vote falls below 5%. 69 of the Sejm seats are awarded from the national lists of parties polling more than 7% of the vote. The Sejm elects a *Council of State* and a *Council of Ministers*. There is also an elected 100-member upper house, the *Senate*. The President and the Senate each has a power of veto which only a two-thirds majority of the Sejm can override. The President does not, however, have a veto over the annual budget. The Prime Minister is chosen by the President with the approval of the Sejm.

A Political Council consultative to the presidency consisting of representatives of all the major political tendencies was set up in Jan. 1991.

National Anthem. 'Jeszcze Polska nie zginęła' ('Poland has not yet perished'); words by J. Wybicki; tune by M. Ogiński.

RECENT ELECTIONS

President Lech Wałęsa, 33·11%. At the run-off round on 19 Nov. 1995 Kwaśniewski was elected by 51·72% of votes cast; turn-out was 68%.

Parliamentary elections were held on 19 Sept. 1997; turn-out was 64·7%. These resulted in the defeat of the reformed communist government and the return of a coalition led by Solidarity Electoral Action (AWS) and the Federal Union (UW). The AWS won 201 seats with 33·83% of the votes and the Federal Union 60 with 13·37% against the Communist Democratic Left Alliance (SLD) 164 seats with 27·13%. The Peasant Party won 27 seats, the Movement for the Reconstruction of Poland 6 and 2 went to German ethnic committees. 51 seats in the Senate went to AWS, 28 to SLD and 8 to UW, with the other 13 going to other parties. On 15 Oct. Jerzy Buzek was nominated by AWS to be prime minister. In Dec. Józef Oleksy, leader of the former communists, was replaced by Leszek Miller.

CURRENT ADMINISTRATION

President: Aleksander Kwaśniewski, b. 1954 (SLD; elected Nov. 1995).

Local Government. The 16 voivodships (regions) are administratively divided into 308 districts (*powiat*) and subdivided into 2,483 wards *(gmina)*. Local government is carried out by councils elected every 4 years at every level. Local government is financed partly by local taxes and partly by central government taxes. There are also district agencies which form a link between local and central government. Communities of fewer than 40,000 inhabitants elect councils on a first-past-the-post system; larger communities have a proportional party-list system. Elections were held on 19 June 1994 for 52,173 seats on 2,465 councils; turn-out was 35·8%. Administrative reforms introduced as from 1993 devolve responsibility for education and health from voivodships to wards. The 1998 administrative reform decentralizes government. Governors act as 'supervisors' of regional government but real power belongs to elected assemblies and to their chairmen who are the new regions' chief executives. They control 30% of income tax and 15% of VAT raised within their regions. A new level of government, 320 elected counties (*powiaty*), administers much state welfare including health and education beyond primary level.

KEY HISTORICAL EVENTS

Portugal has been an independent state since the 12th century apart from one period of Spanish rule (1580-1640). It became a kingdom in 1139 under Alfonso I. During the 15th century Portugal played a leading role in oceanic exploration, opening up new trade routes and establishing colonies. Portuguese influence spread in Guinea, Brazil, the Indies and on the African coast.

In 1807, during the Napoleonic wars, the Spaniards again invaded Portugal, but were driven out by the Duke of Wellington and Portuguese guerrillas during the peninsula war. Brazil, where the king had fled during the French invasion, became independent in 1822.

During much of the 19th century liberal governments, led by financial and agrarian oligarchs and chosen by an electorate composed of fewer than one per cent of the population, were in office. The excluded nationalistic republicans finally deposed King Manual II on 5 Oct. 1910. Another *coup* on 28 May 1926 removed the unstable parliamentary republic which had fought from 1916 on the Allied side in the First World War. The military government established on 1 June 1926 was succeeded in 1932 when Dr Antonio de Oliveira Salzaar became Prime Minister. The corporalist constitution of the New State was adopted on 19 March 1933 under which a civil dictatorship governed in a one-party state. The Iberian Pact with Spain was signed on 17 March 1939.

In the 1960s Portugal faced economic stagnation at home and rebellion in her colonies. Goa was seized by India in 1961. War raged in the African colonies. In Sept. 1968 Salzaar was succeeded by Dr Caetano, but the government party, from 1970 called the *Acção Nacional Popoular*, remained in power.

There was a fresh *coup* on 25 April 1974, establishing a junta of National Salvation. Gen. Antonio Ribeiro de Spinola became president. When he resigned in Sept. he was succeeded by Gen. Francisco de Costa Gomes. During 1974-75 most of the Portuguese overseas possessions, notably the African colonies, gained independence.

Following an attempted revolt on 11 March 1975, the junta was dissolved and a Supreme Revolutionary Council formed which ruled until 25 April 1976 when constitutional government was resumed. The Supreme Revolutionary Council was renamed the Council of the Revolution, becoming a consultative body chaired by the president. The transit to full civilian government was completed in 1982 when the constitution of 1976 was revised to abolish the Council of the Revolution and to reduce the powers of the president.

TERRITORY AND POPULATION

Mainland Portugal is bounded in the north and east by Spain and south and west by the Atlantic Ocean. In 1996 mainland Portugal was divided into 5 regions, with estimated population: North (3,544,780); Central (1,710,070); Lisbon and Tagus Valley (3,313,450); Alentejo (519,040); Algarve (346,110). Density (1996 estimate), 108 per sq. km. (North, 167; Central, 72; Lisbon and Tagus Valley, 278; Alentejo, 19; Algarve, 69; Azores, 104; Madeira, 331).

They are divided into 3 widely separated groups with clear channels between, São Miguel (759 sq. km) together with Santa Maria (97 sq. km) being the most easterly; about 100 miles north-west of them lies the central cluster of Terceira (382 sq. km), Graciosa (62 sq. km), São Jorge (246 sq. km), Pico (446 sq. km) and Faial (173 sq. km); still another 150 miles to the north-west are Flores (143 sq. km) and Corvo (17 sq. km), the latter being the most isolated and undeveloped of the islands. São Miguel contains over half the total population of the archipelago.

QATAR

Dawlat Qatar

(State of Qatar)

Capital: Doha
Population estimate, 2000: 599,000
GNP per capita: (PPP$) 16,330
HDI/world rank: 0·840/57

KEY HISTORICAL EVENTS

There is evidence of human habitation in Qatar dating as far back as the 5th or 6th centuries BC. The Greek historian, Herodotus, refers to the seafaring Canaanites as being the original inhabitants of the country. Qatar embraced Islam in the 7th century AD, and since then it has been noted regularly in the accounts of Arab historians and writers.

Like all of the countries in the area, it eventually came under Turkish rule and control for several centuries. Ottoman power was in fact mostly nominal, with real power being in the hands of local sheikhs and tribal leaders. In 1915 the Turks withdrew, and on 3 Nov. 1916 Qatar signed a protection treaty with Britain. However, British influence was restricted to the supervision of administrative matters.

The dominant economic activity had traditionally been pearl diving, but around 1930 the pearl market collapsed, affecting the whole economy of the country. It was at this time that initial suggestions were being made that oil might be found, and in 1939 oil was discovered in commercial quantities. Although the Second World War delayed progress, exporting began in 1949. This was to change Qatar dramatically. Qatar declared its independence from Britain on 3 Sept. 1971, ending the Treaty of 1916 which was replaced by a Treaty of friendship between the 2 countries. In 1974 the Qatar General Petroleum Corporation was set up, resulting in petroleum extraction coming under national control.

The ruling family, the Al-Thani, arrived in Qatar in the early 18th century and in the mid-19th century moved to the capital, Doha. The family's ancestor, Thani bin Mohammed, was the father of the first Al-Thani sheikh to rule over the entire Qatari peninsula, in the mid-19th century. On 27 June 1995 the Heir Apparent, Sheikh Hamad, deposed his father, the Amir Sheikh Khalifa bin Hamad Al-Thani, while Khalifa was travelling abroad.

TERRITORY AND POPULATION

Qatar is a peninsula running north into the Arabian Gulf. It is bounded in the south by the United Arab Emirates. An agreement of 26 Oct. 1996 with Saudi Arabia provided for a definitive delimitation of the common frontier by 1998. The territory includes a number of islands in the coastal waters of the peninsula, the most important of which is Halul, the storage and export terminal for the offshore oilfields. Area, 11,437 sq. km; population census (1986) 369,079; estimate, 1998, 580,000; density 47·1 per sq. km.

The UN gives a projected population for 2000 of 599,000.

In 1995, 91·4% of the population lived in urban areas.

Area and estimated population of municipalities, 1993:

Municipality	*Area (in sq. km)*	*Population*	*Municipality*	*Area (in sq. km)*	*Population*

The capital is Doha, which is the main port. Other towns are Dukhan (the centre of oil production), Umm Said (the oil-terminal of Qatar), Ruwais, Wakra, Al-Khour, Umm Salal Mohammad and Umm-Bab.

About 40% of the population are Arabs, 18% Indian, 18% Pakistani and 10% Iranian. Other nationalities make up the remaining 14%.

The official language is Arabic.

KEY HISTORICAL EVENTS

The Romanians cherish their Latin origins and language, which date from Trajan's occupation of Dacia. The foundation of the feudal 'Danubian Principalities' of Wallachia and Moldavia in the late 13th and early 14th centuries marks the beginning of an era. (Transylvania, also part of the modern Romania by this time, was in the hands of the Magyars). The Orthodox church and quarrelsome nobility were nearly as powerful as the princes, a balance of power which the expansionist Turks were able to manipulate after the 14th century. Wallachia and Moldavia became tribute-paying vassals without ever being formally incorporated into the Ottoman Empire. The nobility acted as the Turks' agents until 1711 when, suspected of pro-Russian sentiments (Peter the Great was on their northern doorstep), they were replaced by Greek merchant adventurers, the Phanariots.

The Phanariot period of ruthless extortion and corruption was ameliorated by Russian interference. Bessarabia was annexed and Russian support after the rebellion of Tudor Vladimirescu in 1821 brought about the restoration of Romanian princes. Between 1829 and 1834 the foundations of the modern state were laid under a Russian protectorate, but in the revolutionary episode of 1848 Russian interference became repressive. After the Crimean War, Bessarabia was restored to Moldavia, and under the auspices of the great powers elections were held in both principalities which resulted in the election of Alexandru Cuza to both thrones in Jan. 1859; the Moldavian and Wallachian assemblies were fused in 1862. Cuza's reforms brought him into conflict with the nobility, who deposed him in 1866. Carol of Hohenzollern was brought to the throne, and a constitution adopted based on that of Belgium of 1831. Romania was formally declared independent by the Treaty of Berlin of 1878, and became a kingdom (the 'Old Kingdom') in 1881. Romania regained Bessarabia by the Treaty, and gained Dobrudja from Bulgaria in the Balkan wars of 1913.

This was a period of expansion for an economy firmly in the hands of the landowners (represented by the Conservative party) and nascent industrialists (of the Liberal party). The condition of the peasantry remained miserable, and the rebellion of 1907 was an expression of their discontent. Romania joined the First World War on the allied side in 1916. The spoils of victory brought Transylvania (with large Hungarian and German populations), Bessarabia, Bukovina and Dobrudja into the union with the 'Old Kingdom'. The centralizing constitution of 1923 reduced the autonomy of the Transylvanian Romanians; the National Peasant party of Iuliu Maniu was formed in 1926 in protest. The Liberals had broken the power of the Conservatives by the land reform of 1920, and continued in office until the (relatively fair) elections of 1928, at which the Peasants gained 330 seats to the Liberals' 13. Carol II's advent to the throne was delayed by a sexual scandal; when he acceded in 1930 Maniu resigned. Hit by the world recession, Romania was increasingly drawn into Germany's economic orbit. Against this background the fascist Iron Guard assassinated the Liberal leader in 1934. Carol himself adopted increasingly totalitarian modes of rule, banning political parties by his constitution of 1938. Following Nazi and Soviet annexations of Romanian territory in 1940, he abdicated in favour of his son Michael. The government of the fascist Ion Antonescu declared war on the USSR on 22 June 1941. On 23 Aug. 1944, Michael with the backing of a bloc of opposition parties deposed Antonescu and switched sides.

The armistice of Sept. 1944 gave the Soviet army control of Romania's territory. This, and the 'spheres of influence' diplomacy of the Allies, predetermined the establishment of communism in Romania. A government under the pro-communist peasant leader Petru Groza was installed in March 1945. Transylvania was restored to Romania (though it lost Bessarabia and Southern Dobrudja), and large estates were broken up for the benefit of the peasantry. Elections in Nov. 1946 were held in an atmosphere of intimidation and fraudulence; the communist bloc received 376

seats, the Peasants 33, the Liberals 3. In 1947, the latter parties were abolished, Michael was forced to abdicate and a people's republic was proclaimed. The communist leader, Gheorghe Gheorghiu-Dej purged himself of his fellow leaders in the early 1950s. Under his successor, Nicolae Ceauşescu, Romania took a relatively independent stand in foreign affairs while becoming increasingly repressive and impoverished domestically.

An attempt by the authorities on 16 Dec. 1989 to evict a Protestant pastor, László Tökés, from his home in Timişoara, provoked a popular protest which escalated into a mass demonstration against the government. Despite the use of armed force against the demonstrators, the uprising spread to other areas. On 21 Dec. the government called for an official rally in Bucharest, but this turned against the régime. A state of emergency was declared but the Army went over to the rebels and Nicolae and Elena Ceauşescu fled the capital. A dissident group which had been active before the uprising, the National Salvation Front (NSF), proclaimed itself the provisional government.

The Ceauşescus were captured and after a secret two hour trial by military tribunal, summarily executed on 25 Dec. on four charges of genocide, undermining the power of the state, undermining the economy and embezzlement. Fighting by pro-Ceauşescu 'Securitate' forces continued until 27 Dec. It is estimated that 7,689 people were killed in the uprising.

On 26 Dec. 1989 Ion Iliescu, leader of the National Salvation Front, and Petre Român, were sworn in as President and Prime Minister respectively. But the Iliescu-led administration, while committed to reform, was inhibited by its communist origins. The economy stalled and the debts piled up. After seven years, Iliescu was voted out of office and his government replaced by a four party coalition led by President Emil Constantinescu and Prime Minister Victor Ciorbea. On 30 March 1998 Victor Ciorbea and his Cabinet resigned in the face of concerted pressure from coalition partners, after the passing of the budget had been delayed for over 5 months as a result of a series of disagreements.

INTERNATIONAL RELATIONS

Romania is a member of the UN, the Council of Europe, the Central European Initiative, the NATO Partnership for Peace and is an Associate Partner of the WEU and an Associate Member of the EU.

ECONOMY

Policy. With the change of government, the pace of reform has accelerated. There are more than 80 economic reform laws in the planning stage. Privatization of the banks has begun with the Romanian Development Bank. Foreign investment is actively encouraged. Legislation of 1995 offered 60% of shares in state companies to citizens in exchange for privatization coupons, and 40% to foreign investors.

In 1997 over 1,850 state companies were privatized. Most of the companies still in state hands were to be privatized by the end of 1998. The liquidation of bankrupt state enterprises is proceeding slowly. Even so, the freeing of prices and ending of many subsidies has pushed up inflation to 20% plus. Also, there is the risk of a political breakdown which could damage the fragile economy.

Legislation of Nov. 1995 compensates former owners of 0·2m. nationalized properties. Compensation is limited to the ownership of 1 home if lived in or 50m. lei.

Performance. Real GDP growth was –7·0% in 1997 (4% in 1996), but was forecast to rise to –4·0% in 1998. Services contribute around 47% of GDP and industry 38%.

Budget. Revenue and expenditure (in 1bn. lei) for calendar years:

	1993	*1994*	*1995*	*1996*
Revenue	3,792	8,858	12,886	18,367
Expenditure	4,201	10,696	14,869	21,634

The current account deficit was expected to reach US$3bn., or 7% of GDP, in 1998.

VAT was introduced in July 1993.

Currency. The monetary unit is the *leu*, pl. *lei* (ROL) notionally of 100 *bani*. Foreign exchange reserves were US$3,503m. and gold reserves 3·07m. troy oz. in Feb. 1998. Inflation was 151% in 1997 having been 57% in 1996, but was forecast to be 40% in 1998. Total money supply was 14,912bn. lei in Feb. 1998.

Banking and Finance. The National Bank of Romania (founded 1880, nationalized 1946; *governor*, Mugur Isarescu) is the central bank and bank of issue under the Minister of Finance. It manages monetary policy. In May 1996 total assets of commercial banks were 37,000,000m. lei, 67% of which were controlled by 4 state-owned banks: Bancorex (for foreign trade), Banca Agricola, Romanian Commercial Bank and Romanian Development Bank. Total assets, 1994, 20,415,121m. lei. Savings were 617,692m. lei in 1993.

Landless peasants received a distribution from the residue. There are 74 state farms; peasants receive shares in their equity worth up to 10 ha. KEY HISTORICAL EVENTS

At the end of the 17th century the Russian Empire embraced much of eastern Europe and northern and central Asia. The Empire was governed as an autocracy under the Romanovs who had ruled since 1613.

On 8 March 1917 a revolution broke out. The Duma parties set up a Provisional Committee of the State Duma on 12 March, while the factory workmen and the insurgent garrison of Petrograd elected a Council (Soviet) of Workers' and Soldiers' Deputies. Soviets were also elected by the workmen in other towns, in the Army and Navy and, as time went on, by the peasantry. On 15 March 1917 Tsar Nicholas II abdicated, and the Provisional Committee, by agreement with the Petrograd Soviet, appointed a Provisional Government and, on 14 Sept., proclaimed a republic. However, a political struggle went on between the supporters of the Provisional Government—the Mensheviks and the Socialist Revolutionaries—and the Bolsheviks who advocated the assumption of power by the Soviets. When they had won majorities in the Soviets of the principal cities and of the armed forces on several fronts, the Bolsheviks organized an insurrection through a Military-Revolutionary Committee of the Petrograd Soviet. On 7 Nov. 1917 the Committee arrested the Provisional Government and transferred power to the second All-Russian Congress of Soviets. This elected a new government, the Council of People's Commissars, headed by Lenin.

On 25 Jan. 1918 the third All-Russian Congress of Soviets issued a Declaration of Rights of the Toiling and Exploited People, which proclaimed Russia a Republic of Soviets of Workers', Soldiers' and Peasants' Deputies; and on 10 July 1918 the fifth Congress adopted a constitution for the Russian Soviet Federal Socialist Republic (RSFSR). In the course of the following civil war other Soviet republics were set up in the Ukraine, Belorussia and Transcaucasia. These first entered into treaty relations with the RSFSR and then, in 1922, joined with it in a closely integrated Union.

The Union of Soviet Socialist Republics (USSR) was formed by the union of the RSFSR, the Ukrainian Soviet Socialist Republic, the Belorussian Soviet Socialist Republic and the Transcaucasian Soviet Socialist Republic; the Treaty of Union was adopted by the first Soviet Congress of the USSR on 30 Dec. 1922. In Oct. 1924 the Uzbek and Turkmen Autonomous Soviet Socialist Republics and in Dec. 1929 the Tadzhik Autonomous Soviet Socialist Republic were declared constituent members of the USSR, becoming Union Republics.

From about 1929 Stalin's authority was supreme. Resistance to agricultural collectivization was ruthlessly suppressed. A series of Five-Year Plans (1928, 1933, 1937, 1946 and 1951) transformed the USSR into a powerful industrial state. Opposition in party and government was crushed by the purges of 1933 and 1936-38.

At the eighth Congress of the Soviets on 5 Dec. 1936, a new constitution of the USSR was adopted. The Transcaucasian Republic was split up into the Armenian Soviet Socialist Republic, the Azerbaijan Soviet Socialist Republic and the Georgian Soviet Socialist Republic, each of which became constituent republics of the Union. At the same time the Kazakh Soviet Socialist Republic and the Kirghiz Soviet Socialist Republic, previously autonomous republics within the RSFSR, were proclaimed constituent republics of the USSR.

In Sept. 1939 (under a secret clause of the 10-year non-aggression signed with Nazi Germany on 23 Aug. 1939) Soviet troops occupied eastern Poland as far as the 'Curzon line', which in 1919 had been drawn on ethnographical grounds as the eastern frontier of Poland, and incorporated it into the Ukrainian and Belorussian

Soviet Socialist Republics. In Feb. 1951 some districts of the Drogobych Region of the Ukraine and the Lublin Voivodship of Poland were exchanged.

On 31 March 1940 territory ceded by Finland was joined to that of the Autonomous Soviet Socialist Republic of Karelia to form the Karelo-Finnish Soviet Socialist Republic, which was admitted into the Union as the 12th Union Republic. On 16 July 1956 the Supreme Soviet of the USSR altered the status of the Karelo-Finnish Republic from that of a Union Republic of the USSR to that of an Autonomous (Karelian) Republic within the RSFSR.

On 2 Aug. 1940 the Moldavian Soviet Socialist Republic was constituted as the 13th Union Republic. It comprised the former Moldavian Autonomous Soviet Socialist Republic and Bessarabia (44,290 sq. km, ceded by Romania on 28 June 1940), except for the districts of Khotin, Akerman and Izmail, which together with Northern Bukovina (10,440 sq. km) were incorporated in the Ukrainian Soviet Socialist Republic. The Soviet-Romanian frontier thus constituted was confirmed by the peace treaty with Romania, signed on 10 Feb. 1947. On 29 June 1945 Ruthenia (Sub-Carpathian Russia, 12,742 sq. km) was by treaty with Czechoslovakia incorporated into the Ukrainian Soviet Socialist Republic.

On 3, 5 and 6 Aug. 1940 Lithuania, Latvia and Estonia were incorporated in the Soviet Union as the 14th, 15th and 16th Union Republics respectively. The change in the status of the Karelo-Finnish Republic reduced the number of Union Republics to 15.

After the defeat of Nazi Germany it was agreed by the governments of the UK, the USA and the USSR that part of East Prussia should be embodied in the USSR. The area (11,655 sq. km), which includes the towns of Königsberg (renamed Kaliningrad), Tilsit (renamed Sovyetsk) and Insterburg (renamed Chernyakhovsk), was joined to the RSFSR by decree of 7 April 1946.

By the peace treaty with Finland, signed on 10 Feb. 1947, the province of Petsamo (Pechenga), ceded to Finland on 14 Oct. 1920 and 12 March 1946, was returned to the Soviet Union. On 19 Sept. 1955 the Soviet Union renounced its treaty rights to the naval base of Porkkala-Udd and on 26 Jan. 1956 completed the withdrawal of its forces from Finnish territory.

In 1945, after the defeat of Japan, the southern half of Sakhalin (36,000 sq. km) and the Kurile Islands (10,200 sq. km) were, by agreement with the Allies, incorporated in the USSR. However, Japan has since asked for the return of the Etorofu and Kunashiri Islands as not belonging to the Kurile Islands proper. The Soviet government informed Japan on 27 Jan. 1960 that the Habomai Islands and Shikotan would be handed back to Japan on the withdrawal of American troops from Japan.

Nikita Khruschev, Secretary-General of the Party, criticized the regime of Stalin who died in 1953 at the Twentieth Party Congress in 1956. This encouraged a liberalizing of the Russian-backed communist regimes of Hungary and Poland, and later Czechoslovakia (1968) which the USSR crushed with its forces and those of the Warsaw Pact (established 1955). A policy of 'peaceful co-existence' with the West, especially after the war scare with the USA in 1962 over Cuban missiles, led to years of strained relations with China. After 1985, with Mikhail Gorbachev as Secretary-General of the Communist Party, a new period of *glasnost* (openness) and *perestroika* (reconstruction) was inaugurated; but desperate economic problems helped to accelerate liberalization and in 1991 the Soviet Union broke up into its constituent parts.

After the dissolution of the USSR in Dec. 1991, Russia became one of the founding members of the Commonwealth of Independent States. Boris Yeltsin was elected President in June 1991. A period of confrontation in 1992-93 between President Yeltsin and parliament culminated on 21 Sept. in a presidential decree on 'gradual constitutional reform' which suspended the operations of parliament, called new parliamentary elections for Dec. and assumed emergency executive powers. Parliament and the Constitutional Court rejected this action, and parliament proclaimed Vice-President Rutskoi acting president. The USA, the EC and other countries expressed support for President Yeltsin, as did Ukraine and Belarus. Many deputies refused to leave the parliament building and mounted an armed guard which was cordoned off by pro-Yeltsin forces. Public demonstrations and counter-demonstrations began on 26 Sept. After a week in which deputies remained in the parliament building, some thousands of armed anti-Yeltsin demonstrators assembled

on 3 Oct. and were urged to seize the Kremlin and television centre. Shots were fired and there were fatal casualties. On 4 Oct. troops took the parliament building by storm after a 10-hour assault in which 140 people died. Vice-President Rutskoi and Speaker Khasbulatov were stripped of their offices and arrested.

In Feb. 1994 parliament amnestied not only those arrested after the occupation of the parliament building in Sept.-Oct. 1993, but also the instigators of the failed *coup* against the Soviet government in Aug. 1991.

Boris Yeltsin was re-elected president in 1996. Many took this as a signal of confidence in the new, democratic Russia. But the reality was a state in which democratic institutions were weakened to the point of impotence by cynicism, racketeering and bureaucratic dead-weight. In March 1998, President Yeltsin dismissed his prime minister, Victor Chernomyrdin. His successor, the 35-year-old Sergei Kiriyenko lasted barely six months before President Yeltsin recalled Mr Chernomyrdin, a decision the Duma refused to ratify. Meanwhile, Russia defaulted on its debt, the rouble halved in value, imports fell by 45% and oil revenues slumped. On 17 Aug. the government freed the rouble, in effect devaluing it, imposed currency controls and froze the domestic debt market. In Sept. 1998, Yevgeniy Primakov, formerly head of the secret service and latterly foreign minister, took over as prime minister with Communist support. His reconstituted government gave the dominant voice to anti-reformers. In Oct. the Kremlin signalled that President Yeltsin, known to be in failing health, had withdrawn from day-to-day politics.

TERRITORY AND POPULATION

Russia is bounded in the north by various seas (Barents, Kara, Laptev, East Siberian) which join the Arctic Ocean, and in which is a fringe of islands, some of them large. In the east Russia is separated from the USA (Alaska) by the Bering Strait; the Kamchatka peninsula separates the coastal Bering and Okhotsk Seas. Sakhalin Island, north of Japan, is Russian territory. Russia is bounded in the south by North Korea, China, Mongolia, Kazakhstan, the Caspian Sea, Georgia, the Black Sea and Ukraine, and in the west by Belarus, Latvia, Estonia, the Baltic Sea and Finland. Kaliningrad (the former East Prussia) is an exclave on the Baltic Sea between Lithuania and Poland in the west. Russia's area is 17,075,400 sq. km and has 11 time zones. Its 1989 census population was 147,021,869 (53·3% female), of whom 81·5% were Russians, 3·8% Tatars, 3% Ukrainians, 1·2% Chuvash, 0·9% Bashkir, 0·8% Belorussians, and 0·7% Mordovians. Chechens, Germans, Udmurts, Mari, Kazakhs, Avars, Jews and Armenians all numbered 0·5m. or more. Population estimate, 1998, 147,100,000 (female, 53%; urban, 73%); density, 9 per sq. km.

The UN gives a projected population for 2000 of 146·2m.

In 1995 an estimated 75·9% of the population lived in urban areas. Age structure: 16–29 years, 34%; 30–44, 42%; 45+, 24%.

There were 915,000 immigrants in 1995, mainly from the former Soviet republics. In Jan. 1995 there were 702,451 refugees, mostly from Tajikistan, Georgia, Azerbaijan, Chechnya and Ingushetia.

The 2 principal cities are Moscow, the capital, with a population of 8·6m. and St Petersburg (formerly Leningrad), 4·8m. Administrative breakdown of the Russian Federation, population and territory, 1 Jan. 1997:

CONSTITUTION AND GOVERNMENT

The Russian Soviet Federative Socialist Republic (RSFSR) adopted a constitution in April 1978. In June 1990, pending the promulgation of a new constitution, it adopted a declaration of republican sovereignty by 544 votes to 271. It became a founding member of the CIS in Dec. 1991, and adopted the name 'Russian Federation'. A law of Nov. 1991 extended citizenship to all who lived in Russia at the time of its adoption and to those in other Soviet republics who requested it.

There is a 19-member *Constitutional Court*, whose functions under the 1993 Constitution include making decisions on the constitutionality of federal laws, presidential and government decrees, and the constitutions and laws of the subjects of the Federation. It is governed by a Law on the Constitutional Court, adopted in July 1994. Judges are elected for non-renewable 12-year terms.

At a referendum on 25 April 1993 the electorate was 107·3m.; turn-out was 69·2m. 4 questions were put: Confidence in President Yeltsin (58·7% of votes cast); approval of economic reforms (53% of votes cast); early presidential elections (31·7% of the electorate); early parliamentary elections (43·1% of the electorate). This referendum had no constitutional effect, however.

Voting was held on 12 Dec. 1993 on the adoption of a new constitution and the election of a new parliament for a 2-year term. The electorate was 106,170,335; turn-out was 54·8%. The constitution was approved by 58·4% of votes cast, and came into effect on 24 Dec. 1993.

According to the 1993 Constitution the Russian Federation is a 'democratic federal legally-based state with a republican form of government'. The state is a secular one, and religious organizations are independent of state control. Individuals have freedom of movement within or across the boundaries of the Federation; there is freedom of assembly and association, and freedom to engage in any entrepreneurial activity not forbidden by law. All citizens have a right to housing, to free medical care, and to a free education. The state itself is based upon a separation of powers and upon federal principles, including a Constitutional Court. The most important matters of state are reserved for the federal government, including socio-economic policy, the budget, taxation, energy, foreign affairs and defence. Other matters, including the use of land and water, education and culture, health and social security, are for the joint management of the federal and local governments, which also have the right to legislate within their spheres of competence. A central role is accorded to the *President*, who defines the 'basic directions of domestic and foreign policy' and represents the state internationally. The President is directly elected for a 4-year term, and for not more than 2 consecutive terms; he or she must be at least 35 years old, a Russian citizen, and a resident in Russia for at least the previous 10 years. 1m. signatures are needed to validate a presidential candidate, no more than 7% of which may come from any one region or republic. The President has the right to appoint the prime minister, and (on his nomination) to appoint and dismiss deputy prime ministers and ministers, and may dismiss the government as a whole. In the event of the death or incapacity of the President, the Prime Minister becomes head of state.

Parliament is known as the *Federal Assembly*. The 'representative and legislative organ of the Russian Federation', it consists of 2 chambers: the *Council of the Federation* and the *State Duma*. The Council of the Federation, or upper house, consists of 178 deputies, 2 from each of the 89 subjects of the Federation. The Federation is made up of 21 republics, 1 autonomous region, 10 autonomous areas, 6 territories, 49 regions and 2 federal cities. The State Duma, or lower house, consists of 450 deputies chosen for a 4-year term. 225 of these are elected from single-member constituencies on the first-past-the-post system, the remainder from party lists by proportional representation. To qualify for candidacy an individual must obtain signatures from at least 1% of voters in the constituency; a party or electoral alliance must obtain a minimum of 100,000 supporting signatures from at least 7 regions, but not more than 15% from any one region. There is a 5% threshold for the party-list seats. Parties which gain at least 35 seats may register as a faction, which gives them the right to join the Duma Council and chair committees. Any citizen aged over 21 may be elected to the State Duma, but may not at the same time be a member of the upper house or of other representative bodies, and all deputies work on a 'permanent professional basis'. Both houses elect a chair, committees and commissions. The Council of the Federation considers all matters that apply to the

Federation as a whole, including state boundaries, martial law, and the deployment of Russian forces elsewhere. The Duma approves nominations for Prime Minister, and adopts federal laws (they are also considered by the Council of the Federation, but any objection may be overridden by a two-thirds majority; objections on the part of the President may be overridden by both houses on the same basis). The Duma for its part can reject nominations for Prime Minister, but after the third such rejection it is automatically dissolved. It is also dissolved if it twice votes a lack of confidence in the government as a whole, or if it refuses to express confidence in the government when the matter is raised by the Prime Minister.

National Anthem. 'Patriotic Song'; no words, tune from an opera by Mikhail Glinka, arranged by Andrei Petrov.

RECENT ELECTIONS

Boris Yeltsin became President for a 5-year term at the elections of 12 June 1991, gaining 57·3% of the votes cast against 5 opponents. Presidential elections took place in 2 rounds in 1996. In the first round on 16 June, 11 candidates stood. The electorate was 104m.; turn-out was 69·8%. President Yeltsin won 35·28% of votes cast, Gennadi Zyuganov (Communist) 32·08% and Aleksandr Lebed, 14·52%. In the second run-off round on 3 July turn-out was 68·8%. Yeltsin was re-elected with 53·8% of votes cast.

Elections for the State Duma were held on 17 Dec. 1995. The electorate was 107·5m.; turn out was 64·4%. 2,687 candidates stood representing 43 parties or groups. 4 parties exceeded the 5% threshold for party-list seats: Communist Party, 99 seats; Liberal Democratic Party (of Vladimir Zhirinovsky), 50; Our Home is Russia, 45; Yabloko, 31. Total seats gained: Communist Party, 157 with 22·3% of votes cast (48 with 12·4% in 1993); Our Home is Russia, 55 with 10·13%; Liberal Democratic Party, 51 with 11·18% (64 with 22·92% in 1993); Yabloko, 45 with 6·89% (23 with 7·86% in 1993); Agrarian Party, 20 with 3·78% (33 with 7·99% in 1993); Power to the People, 9 with 1·61%, Russia's Democratic Choice, 9 with 3·86% (70 with 15·51% in 1993); Congress of Russian Communities, 5 with 4·31%; Women of Russia, 3 with 4·61% (23 with 8·13% in 1993); Forward Russia, 3 with 1·94%; Ivan Rybkin's Bloc, 3 with 1·11%; Pamfilova-Gurev-Lysenko, 2 with 1·6%. 78 seats went to independents (141 in 1993) and 10 to minor parties. The Communist Party delegated some seats to the Agrarian Party to enable it to register as a faction. Registered factions (with seats held) in Jan. 1996: Communist Party (149), Our Home is Russia (55), Liberal Democratic Party (51), Yabloko (46), Russian Regions (42), Power to the People (37), Agrarian Party (35).

Local Government. There are 49 provinces, 6 territories, 21 republics (including Chechnya) and 10 autonomous areas. The republics are homelands of non-Russian minorities and as such enjoy a high degree of autonomy including the right to elect a president. Provinces (*oblasts*) and territories (*krais*) are led by governors, formerly presidential appointments but now elected. Local councils include 24,230 rural

settlements, 2,048 urban settlements, 318 urban districts, 1,086 towns and 1,863 sub-regions.

A presidential decree of Oct. 1993 established a new regime for local authorities. Their membership is limited to 50. During 1996, 47 of the 89 federal units held elections for presidents or governors, these being areas where regional heads had been appointed before elections were instituted in 1995.

DEFENCE

The President of the Republic is C.-in-C. of the armed forces. Conscription was raised from 18 months to 2 years in April 1995. There are plans to end conscription by 2005. The START 2 nuclear arms cutting treaty has been held up by the Duma. A presidential decree of Feb. 1997 ordered a cut in the armed forces of 200,000 men, reducing them to an authorized strength of 1·2m. by the end of 1997. This figure included 200,000 staff at the Ministry of Defence and 583,000 paramilitary troops (including 220,000 border troops).

Military expenditure totalled US$64,000m. in 1997 (US$435 per capita), representing 5·8% of GDP. Only the USA spent more on defence in 1997.

Nuclear weapons. Once a major player in the nuclear race, Russia's warhead count is now shrinking and stood at 6,210 in Jan. 1998 according to the Stockholm International Peace Research Institute.

Army. A Russian Army was created by presidential decree in March 1992. In 1997 forces numbered 420,000 (170,000 conscripts). The Army is deployed in 8 military districts and 1 Group of Forces, and comprises: 14 Army and 8 Corps headquarters, 12 tank, 28 motor rifle, 5 airborne, 4 machine gun/artillery and 4 artillery divisions, and some 47 artillery, 4 heavy artillery, 7 airborne, 8 special forces, 23 surface-to-surface missile, 2 independent tank, and 17 independent motor rifle brigades, and 19 anti-tank and 28 surface-to-air missile regiments. Equipment includes some 16,800 main battle tanks, including T-54/-55, T-62, T-64A/-B, T-72L/-M and T-80/-M9, 200 PT-76 light tanks, 1,962 multiple rocket launchers, 144 surface-to-surface nuclear-capable missile launchers and 2,300 surface-to-air missiles.

The Army air element has some 2,450 helicopters in the inventory, including 2,000 Mi-8/17 transport, assault and battlefield electronic countermeasures and electronic intelligence machines and 950 armed Mi-24s. There are a small number of Mi-6 and Mi-26 heavy-lift helicopters as well as a small number of fixed-wing transport and communications aircraft. Funding shortages have reduced serviceability drastically.

Strategic Nuclear Ground Forces. In 1995 there were 5 rocket armies, each with launcher groups, 10 silos and 1 control centre. Inter-continental ballistic missiles numbered 928. Personnel, 100,000 (50,000 conscripts).

Navy. The Russian Navy continues to reduce steadily and levels of sea-going activity remain very low with activity concentrated on a few operational units in each fleet. The safe deployment and protection of the reduced force of strategic missile-firing submarines remains its first priority; and the defence of the Russian homeland its second. The strategic missile submarine force operates under command of the Strategic Nuclear Force commander whilst the remainder come under the Main Naval Staff in Moscow, through the Commanders of the fleets.

The Northern and Pacific fleets count the entirety of the ballistic missile submarine force, all nuclear-powered submarines, the sole operational aircraft carrier and most major surface warships. The Baltic Fleet organization is based in the St Petersburg area and in the Kaliningrad exclave. Some minor war vessels have been ceded to the Baltic republics. The Black Sea Fleet continues to be the object of wrangling between Russia and Ukraine, and remains operationally paralyzed by the dispute. While a political decision has been made to divide the fleet between the nations, the practical and personnel issues remain unresolved. The small Caspian Sea flotilla, formerly a sub-unit of the Black Sea Fleet, has been divided between Azerbaijan (25%), and Russia, Kazakhstan and Turkmenistan, the littoral republics (75%).

The material state of all the fleets is suffering from continued inactivity and lack of spares and fuel. The nuclear submarine refitting and refuelling operations in the Northern and Pacific Fleets remain in disarray, given the large numbers of nuclear

submarines awaiting defuelling and disposal. The strength of the submarine force has now essentially stabilized, but there are still large numbers of decommissioned vessels awaiting their turn for scrapping in a steadily deteriorating state.

The aircraft carrier *Admiral Kuznetsov* is now operational, albeit with a limited aviation capability, and she deployed to the Mediterranean in Dec. 1995.

The overall strength of the Navy at the end of the indicated year was as follows:

Category	*1991*	*1992*	*1993*	*1994*	*1995*	*1996*
Strategic Submarines	59	55	50	46	38	34
Nuclear Attack Submarines	100	95	80	63	66	62
Diesel Submarines	80	75	70	62	55	26

Destroyers	29	26	22	22	21	20
Frigates	146	129	114	112	101	101

The strength of the disputed Black Sea Fleet at the end of 1996 was 12 diesel-powered submarines, 4 cruisers, 3 destroyers and 22 frigates, as well as some 30 mine warfare amphibious ships and 100 support units. The force of Strategic Submarines is constituted as follows:

Class	*No.*	*Tonnage*	*Speed*	*Missiles*	*Other Weapons*
Typhoon	6	27,000	27	20 SS-N-20	Torpedoes
Delta-IV	7	12,350	24	16 SS-N-23	Torpedoes
Delta-III	13	11,900	24	16 SS-N-18	Torpedoes
Delta-II	4	11,500	24	16 SS-N-8	Torpedoes
Delta-I	8	11,000	25	12 SS-N-8	Torpedoes

Some other non-operational strategic submarines continue to be counted to START totals.

The SS-N-20 'Sturgeon' missile carried by the Typhoon carries 6 warheads to a maximum range of 4,500 nautical miles, while the SS-N-23 'Skiff' in the other modern class, the 'Delta-IV', carries 10 warheads over the same range. The other older missiles carry 1 to 3 warheads over ranges varying between 1,300 and 4,000 nautical miles.

The attack submarine fleet comprises a wide range of classes, from the enormous 16,250 tonne 'Oscar' nuclear-powered missile submarine to diesel boats of around 2,000 tonnes. The inventory of anti-ship missile-firing submarines comprises 13 'Oscar I' and 'II' built 1982–1994, 24 SS-N-19 'Shipwreck' missiles, 2 'Charlie-II', 1972–75, 8 SS-N-7 'Starbright'; and 1 'Echo-II', 1961–67, 8 SS-N-3 'Shaddock' or SS-N-12 'Sandbox', all nuclear-propelled. Finally, there are 3 former strategic 'Yankee'-class submarines converted to fire the SS-N-21 'Sampson' land-attack cruise missile, which has a range of 1,600 nautical miles. Torpedo-firing boats currently building are the 'Akula' class, nuclear-powered and of 8,100 tonnes, of which there are 13, and the 'Sierra' class, nuclear-powered, 7,700 tonnes now numbering 4. The 'Victor-III' class, nuclear-powered, 6,400 tonnes, totals 26 units. The diesel-powered 'Kilo' class, of which the Navy operates 17, is still building at a reduced rate mostly for export. There are a further 9 diesel submarines nominally on the active list.

Cruisers (7,500–8,000 tonnes full load and upwards) are divided into 2 categories; those optimized for anti-submarine warfare (ASW) are classified as 'Large Anti-Submarine Ships' and those primarily configured for anti-surface ship operations are classified 'Rocket Cruisers'. The principal surface ships of the Russian Navy include the following classes:

Aircraft Carrier. The *Admiral Kuznetsov* of 65,000 tonnes was completed in 1989, is capable of 30 knots, and armed with 12 SS-N-19 'Shipwreck' anti-ship missiles and SA-N-9 anti-air missiles; it is capable of embarking 25–30 aircraft and 8–10 helicopters. All other aircraft carriers have been decommissioned or scrapped.

Anti-Shipping Rocket Cruisers. The ships of this classification are headed by the 4 ships of the Admiral Ushakov (formerly Kirov) class, the largest combatant warships, apart from aircraft carriers, to be built since the Second World War. *Admiral Ushakov* (1980), *Admiral Lazarev* (1984), *Admiral Nakhimov* (1988) and *Petr Velikii* (1995). They displace 28,400 tonnes and are capable under combined

nuclear and oil-fired steam propulsion of 33 knots and are armed with 20 SS-N-19 anti-ship missiles, 12 batteries of SA-N-6 anti-air missiles, 3 helicopters and a wide range of lesser armaments. There are 4 Slava class: *Slava* (1982), *Marshal Ustinov* (1986), *Chervona Ukraina* (1988) and *Admiral Lobov* (1995), each of 12,700 tonnes capable of 34 knots, and armed with 16 SS-N-12 anti-ship missiles, 8 batteries of SA-N-6 anti-air missiles, 8 torpedo tubes and a single helicopter.

Anti-Submarine Cruisers. There are 4 ships of the Nikolaev ('Kara') class, displacing 9,800 tonnes, capable of 34 knots, completed 1973–79, and armed with SS-N-14 anti-submarine missiles with a secondary anti-ship role, SA-N-3 anti-air missiles, torpedo-tubes and a single helicopter and 12 newer Udaloy class, the first of which entered service in 1981. These displace 8,600 tonnes, are capable of 30 knots and are armed with SS-N-14 missiles, torpedo tubes and 100-mm guns, and carry 2 helicopters.

Smaller ships include the 17 Sovremenny class guided missile destroyers and the single remaining 'modified Kashin' class. There are a further 2 'Kashin', 26 large frigates including the first of a new class, the *Neustrashimy*, and 75 smaller frigates.

The coastal defence force includes 80 missile corvettes, 16 fast missile craft, 25 hydrofoil fast torpedo craft and 15 patrol craft (many more are laid up). Mine warfare forces include 3 minelayers and 33 offshore, 80 coastal and about 65 inshore mine countermeasure vessels.

Amphibious ships include 3 large dock landing ships of the Ivan Rogov class, 22 Ropucha and 7 Alligator class tank landing ships, 20 medium landing ships, and some 80 minor craft. Amphibious landing forces are found from the Naval Infantry, 14,000 strong, units of which are assigned to all fleets. Organized into a single division, 7,000 strong, and 3 active independent brigades, its principal equipment includes 240 main battle tanks, 100 amphibious light tanks, 300 artillery pieces and about 900 armoured personnel carriers. A separate force of 6,000 Coastal Defence troops mans artillery and missile batteries as well as conventional mechanized units positioned to defend the main naval bases and ports.

There is 1 multi-purpose underway replenishment ship, the *Berezina*, an additional 6 dual-purpose stores and fuel replenishment ships, 6 purpose-built tankers, and 18 other tankers converted from a commercial design with limited underway replenishment capability. Second line support is provided by 12 tankers, and about 230 maintenance and logistic ships, 60 electronic intelligence gatherers, 70 other special-purpose auxiliaries, and 210 survey, research and space support ships.

The Russian Naval Air Force includes some 100 bombers, 170 maritime patrol and anti-submarine aircraft, 175 fighter/ground attack aircraft and 280 helicopters. Maritime reconnaissance and anti-submarine tasks are performed by 65 Tu-95 and Tu-142 'Bear' with numerous shorter range aircraft tasked to anti-submarine operations, electronic countermeasures, intelligence gathering, and tankers. The helicopter force includes 200 anti-submarine, 25 combat assault, and 15 mine countermeasures aircraft.

Personnel in 1997 numbered 220,000, of whom 142,000 were conscripts. Some 13,000 serve in the strategic submarine force, 40,000 in naval aviation, 14,000 marines or naval infantry, and 6,000 in coastal artillery and coastal defence troops.

Coastguard, customs and border patrol duties are performed by the substantial maritime element of the Committee for the Protection of State Borders, which operates some 7 large helicopter-carrying frigates of a modified naval 'Krivak' class, 18 small frigates, 40 coastal and 150 inshore patrol craft divided among all the Russian coastal areas.

Air Force. Russia has both Air Force (1997: 130,000 personnel) and Air Defence Forces (170,000). Under the terms of the Conventional Forces in Europe (CFE) treaty, Russia is allowed to have up to 3,450 combat aircraft, 890 helicopters and 300 naval combat aircraft.

The Air Force is organized into 4 main Commands: Long-Range Aviation, Frontal Aviation, Military Transport Aviation and Reserve and Training Command.

Long-Range Aviation is reported to have 10 Tu-160, 100 Tu-22M, 120 Tu-95 bombers, some equipped to carry nuclear weapons. There are 150 MiG-25s and Su-24s equipped for electronic countermeasures and electronic intelligence missions and 30 Il-78 tanker aircraft. Frontal Aviation has over 3,500 combat and 1,800

support aircraft and is divided into 8 Air Armies, 7 in Russia and 1 in Trans-Caucasia. The main bomber type is the Su-24 of which 500 are available. The MiG-23/27, Su-17/20 and Su-25 serve for fighter and attack missions. There are also MiG-29s for air defence duties. The MiG-21 and most older combat aircraft have been withdrawn from service. Military Transport Aviation has over 300 Il-76s, which are replacing An-12s for heavy-lift operations. The other main transport type is the An-2, of which 300 are available, although there are about 100 An-24/26/32 medium transports and 15 An-124 and 30 An-22 very heavy-lift aircraft. 30-plus Il-62, Tu-134, Tu-154 and Yak-40 aircraft are assigned to VIP transport. Reserve and Training Command uses Yak-18 and Yak-52 primary trainers and L-29s and L-39s for jet conversion, plus two-seat models of many front-line types, such as the MiG-23, MiG-25, MiG-29, Su-17/20 and Su-25. It is being reorganized and slimmed down. Strength (1997), 130,000.

The Border Guards have their own aviation component to patrol Russia's borders. It has An-24 fixed-wing aircraft, now being succeeded by armed An-72Ps and Mi-8 and armed Mi-24 helicopters.

INTERNATIONAL RELATIONS

Russia is a member of the UN (Security Council), CIS, the Council of Europe and the NATO Partnership for Peace. On 16 May 1997 NATO ratified a 'Fundamental Act on Relations, Co-operation and Mutual Security' with Russia.

ECONOMY

In Oct. 1991 the President announced an economic programme whose aim was the establishment of a 'healthy mixed economy with a powerful private sector'. As part of this programme the prices of most commodities were freed on 2 Jan. 1992.

A bankruptcy law of Nov. 1992 permits the winding-up of indebted enterprises; further legislation came into force in April 1993. Centralized distribution of resources to enterprises was abolished from 1993.

Privatization is overseen by the State Committee on the Management of State Property, and began with small and medium-sized enterprises. A state programme of privatization of state and municipal enterprises was approved by parliament in June 1992, and vouchers worth 10,000 roubles each began to be distributed to all citizens in Oct. 1992. These may be sold or exchanged for shares. Employees have the right to purchase 51% of the equity of their enterprises. 25 categories of industry (including raw materials and arms) remain in state ownership. The voucher phase of privatization ended on 30 June 1994. A post-voucher stage authorized by presidential decree of 22 July 1994 provides for firms to be auctioned for cash following the completion of the sale of up to 70% of manufacturing industry for vouchers. By Dec. 1997 a total of 127,000 enterprises had been privatized; 59% in trade, public catering and personal services, 33% of which were in manufacturing, construction, transport and communications and 2·4% in agriculture.

Performance. GDP grew by at least 0·4% in 1997, the first expansion since the Soviet Union's collapse in 1991; but many economists believe that the booming informal economy adds over 25% to the value of GDP. Even so, 1998 was a disastrous year for the economy. With oil revenues well down and a collapse of the rouble, Russia defaulted on its debt. For 1998 real GDP growth was estimatd to be 1·0%.

Budget. Budgetary incomes were valued at 459,224bn. roubles in 1996. The main sources of revenue (in roubles) were: taxes on profits (82,365bn.), value added tax (116,222bn.), income tax (49,185bn.), income from foreign trade (37,016bn.) and excise duties (41,281bn.). Budgetary expenditures were valued at 542,060bn. roubles. Items of expenditure (in roubles) included: National economy, 136,500bn.; socio-cultural (including education, health and social security), 121,335bn.; defence, 53,170bn.; foreign trade 18,315bn. In 1997 the budget deficit was 6·1% of GDP. The current account surplus was US$3,336m.

Currency. The unit of currency is the *rouble* (RUR), of 100 *kopeks*. In Jan. 1998 the rouble was redenominated by a factor of a thousand. In 1994 foreign exchange reserves were US$3,976m. Gold reserves were 16·07m. troy oz. in Feb. 1998. In

1997 the rouble was tied to the US dollar on a sliding scale ranging from US$1 = 5,500–6,100 roubles on 1 Jan. 1997 to 6 roubles on 31 Jan. 1998. Inflation was 15% in 1997 and 22% in 1996. It was an annualized 197·4% in 1995 and in that year the total external debt was US$120,461m., most of it inherited from the Soviet Union. Total money supply in Dec. 1997 was 269,363m. roubles.

Banking and Finance. The central bank and bank of issue is the State Bank of Russia (*Governor*, Viktor Gerashchenko). The Russian Bank for Reconstruction and Development and the State Investment Company were created in 1993 to channel foreign and domestic investment. Foreign bank branches have been operating since Nov. 1992.

By 1995 the number of registered commercial banks had increased to around 5,000 but following the Aug. 1997 liquidity crisis, due to the ensuing bankruptcies, mergers and the Central Bank's revoking of licences, the number fell to 2,500. Approximately 80% of the commercial banks in 1997 were state-owned through ministries or state enterprises.

In 1997, the top 6 banks in terms of assets (in US$1m.) were: Sberbank, 29·1; Vneshtorgbank, 3·9; Uneximbank, 3·6; Inkombank, 3·4; National Reserve Bank, 2·0. Sberbank is the only Russian bank to appear in the world top 20.

By Jan. 1995, 166 exchanges were in operation, and 28,700 firms of brokers.

In 1994 all forms of investment were valued at 108,809,000m. roubles, of which 30·3% was invested in industry, 25·5% in housing and 10·9% in transport; 64·2% was provided by enterprises themselves, 13·4% by the federal budget and 10·6% by regional budgets.

In the wake of one of the worst financial crises which Russia's market economy had experienced, the central bank tripled interest rates to 150% in May 1998 in an effort to restore stability to the financial system.

There are stock exchanges in St Petersburg and Vladivostok.

The Chechens and Ingushes were conquered by Russia in the late 1850s. In 1918 each nationality separately established its 'National Soviet' within the Terek Autonomous Republic, and in 1920 (after the Civil War) were constituted areas within the Mountain Republic. The Chechens separated out as an Autonomous Region on 30 Nov. 1922 and the Ingushes on 7 July 1924. In Jan. 1934 the two regions were united, and on 5 Dec. 1936 constituted as an Autonomous Republic. This was dissolved in 1944 and the population was deported en masse, allegedly for collaboration with the German occupation forces. Grozny was bombed and attacked by Russian ground forces at the end of Dec. 1994 and the presidential palace was captured on 19 Jan. 1995, but fighting continued. On 30 July 1995 the Russian and Chechen authorities signed a ceasefire. On 8 Dec. 1995 an agreement between the Russian and Chechen prime ministers amnestied insurgents who laid down their arms. However, hostilities, raids and hostage-taking continued. The Chechen President was killed during fighting in April 1996. A further ceasefire was concluded on 30 Aug. 1996, and it was agreed that the status of Chechnya would be determined by a referendum in 2001. KEY HISTORICAL EVENTS

From the 16th century to 1959 the Tutsi kingdom of Rwanda shared the history of Burundi. In 1959 an uprising of the Hutu destroyed the Tutsi feudal hierarchy and overthrew the monarchy. Elections and a referendum under the auspices of the UN in Sept. 1961 resulted in an overwhelming majority for the republican party, the Parmehutu (*Parti du Mouvement de l'Emancipation du Bahutu*), and the rejection of the monarchy. The republic proclaimed by the Parmehutu on 28 Jan. 1961 was recognized by the Belgian administration (but not by the UN) in Oct. 1961. Internal self-government was granted on 1 Jan. 1962, and by decision of the General Assembly of the UN the Republic of Rwanda became independent on 1 July 1962.

Conflict between the Hutu and Tutsi in 1963 was renewed and again trouble broke out, with much bloodshed, in 1972–73. A coup on 5 July 1973 deposed the first president, Gregoire Kayibanda, and a military government was established. The military leader of this coup, Gen. Juvénal Habyarimana, became president. There was gradual return to civilian rule. In 1978 a new constitution was accepted by a national referendum. President Habyarimana was confirmed in office in elections in 1978 and again in 1983, when candidates from the country's sole political party, the National Revolutionary Democratic Movement, were also returned. However, for much of the time since then the country has contended with the problem of refugees fleeing repression and war in neighbouring Uganda.

In Oct. 1990 rebel Tutsi forces of the Rwandan Patriotic Front (RPF) invaded from Uganda. An agreement was signed on 14 Aug. 1992 to end the civil war, but fighting continued. Rebels and government agreed to merge their forces at peace talks in March 1993. A peace agreement was signed on 4 Aug. 1993 at Arusha (Tanzania). On 5 Oct. the UN Security Council unanimously decided to send a peacekeeping force to oversee the establishment of transitional organs in line with the Aug. agreement. However, President Habyarimana was killed, possibly assassinated, on 6 April 1994. Fatalities in the fighting which broke out included the Prime Minister and UN personnel. Rebel Tutsi forces of the RPF began an attack from the north of the country.

An interim government was formed on 10 April with the Speaker Théodore Sindikubwabo (National Republican Movement for Development; MRND) as President and Jean Kambanda (Democratic Republican Movement; MDR) as Prime Minister.

Most UN forces were withdrawn during the fighting and massacres of April 1994 but following a UN Security Council resolution of 17 May 1994 a new force of 5,500 was sent in. On 22 June 1994 the UN Security Council approved France's dispatch of 2,000 troops on a humanitarian mission. The RPF, however, said it would treat the force as invaders. The French forces maintained a 'safe zone' for refugees in the south-west of Rwanda until their withdrawal on 21 Aug. 1994. Under the aegis of the OAU at Tunis representatives of the Rwandan interim government and the RPF agreed a ceasefire. At the request of the RPF on 6 July 1994 in Brussels Faustin Twagiramungu agreed to form a 22-member government of national unity in which 8 posts were held by the RPF.

It is estimated that more than 1m. Rwandans were killed in 1994 through genocide and the civil war, and that more than 2m. were forced to flee to neighbouring countries.

On 8 Nov. 1994 the UN Security Council resolved by 13 votes (China abstaining and Rwanda opposing) to set up an international tribunal to try crimes of genocide in Rwanda. It was inaugurated on 27 June 1995 and subsequently merged with that for Yugoslavia. UN forces (UNAMIR) left Rwanda on 8 March 1996, and although progress has been made since then, the civil strife between the two factions continues, particularly in the north-west of the country. In Dec. 1997 over 300 Tutsis

were killed at a large refugee camp. In Sept. 1998 Jean Kambanda, the former Prime Minister, was sentenced to life imprisonment for his part in the 1994 genocide.

GNP per capita: (PPP$) 7,310

KEY HISTORICAL EVENTS

The islands of St Kitts (formerly St Christopher) and Nevis were discovered and named by Columbus in 1493. They were settled by Britain in 1623 and 1628 respectively, but ownership was disputed with France until 1783. They formed part of the Leeward Islands Federation from 1871 to 1956, and part of the Federation of the West Indies from 1958 to 1962. In Feb. 1967 the colonial status was replaced by an 'association' with Britain, giving the islands full internal self-government. St Kitts and Nevis became fully independent on 19 Sept. 1983.

In Oct. 1997 the 5-person Nevis legislature voted to end the federation with St Kitts. However, in a referendum held on 10 Aug. 1998 voters rejected independence, only 62% voting for secession when a two-thirds vote in favour was needed.

In Sept. 1998 Hurricane Georges caused devastation, leaving 25,000 people homeless, with some 80% of the houses in the islands damaged.

TERRITORY AND POPULATION

The 2 islands of St Kitts and Nevis are situated at the northern end of the Leeward Islands in the Eastern Caribbean. Nevis lies 3 km to the south-east of St Kitts. Population, census (1991) 40,618. Estimate, 1997, 44,000 (9,000 on Nevis).

In 2000 the population is projected to be 45,000.

ST LUCIA

Capital: Castries
Population estimate, 2000: 161,000
GNP per capita: (PPP$) 4,920
HDI/world rank: 0·839/58

KEY HISTORICAL EVENTS

An island state of the lesser Antilles in the eastern Caribbean, St Lucia is believed to have been settled by the Arawaks, Amerindians who were subsequently driven out by the warlike Caribs. The island was probably discovered by Columbus in 1502. An unsuccessful attempt to colonize by the British took place in 1605, and again in 1638 when settlers were soon murdered by the Caribs who inhabited the island. France claimed the right of sovereignty, and ceded it to the French West India Company in 1642. The French settlers fought constant battles with the Caribs until peace was established in 1660. St Lucia regularly and constantly changed hands between Britain and France, until it was finally ceded to Britain in 1814 by the Treaty of Paris.

Since 1924 the island has had representative government. It was a part of the federal government of the Windward Islands until, in Jan. 1960, along with the colonies in the group, it was given its own administrator. In March 1967 St Lucia gained full control of its internal affairs while Britain remained responsible for foreign affairs and defence; the Administrator became the Governor, and a House of Assembly replaced the Legislative Council. On 22 Feb. 1979 St Lucia achieved independence, opting to remain in the British Commonwealth.

ST VINCENT AND THE GRENADINES

Capital: Kingstown
Population estimate, 2000: 118,000
GNP per capita: (PPP$) 4,160
HDI/world rank: 0·845/55

KEY HISTORICAL EVENTS

These islands in the eastern Caribbean were originally inhabited by the Carib tribes. St Vincent was discovered by Columbus on 22 Jan. (St Vincent's Day) 1498. British and French settlers occupied parts of the islands after 1627.

In 1773 the Caribs recognized British sovereignty and agreed to a division of territory between themselves and the British. Resentful of British rule, the Caribs rebelled in 1795, aided by the French, but the revolt was subdued within a year. Most of the Carib population was deported to islands in the Gulf of Honduras and the surviving population was further reduced by eruptions of the volcano Santiere in 1812 and 1902.

The islands were part of the federal government of the Windward Islands until, in Jan. 1960, along with other colonies in the group, they were given their own Administrator. Universal adult suffrage had been in existence on the islands since 1951. On 27 Oct. 1969 St Vincent became an Associated State with the UK responsible only for foreign policy and defence, while the islands were given full internal self-government. The Administrator became the Governor-General, and a House of Assembly replaced the Legislative Council. On 27 Oct. 1979 the colony acquired full independence as St Vincent and the Grenadines.

SAMOA

O le Malo Tutoatasi o Samoa— Independent State of Samoa

Capital: Apia
Population estimate, 2000: 174,000
Estimated GDP: $415m.
HDI/world rank: 0·694/94

KEY HISTORICAL EVENTS

Polynesians settled in the Samoan group of islands in the southern Pacific from about 1000 BC. Shortly before the European arrival, stratified society with paramount chiefs and fortified settlements developed. Although probably sighted by the Dutch in 1722, the first European visitor was French in 1768. Treaties were signed between the Chiefs and European nations in 1838–39. Continuing strife among the chiefs was compounded by British, German and US rivalry for influence. In the Treaty of Berlin 1889 the three powers agreed to Western Samoa's independence and neutrality. When strife continued, the treaty was annulled and the Samoan group was annexed.

Western Samoa became a German protectorate until in 1914 it was occupied by a New Zealand expeditionary force. The island was administered by New Zealand from 1920 to 1961, at first under a League of Nations Mandate and from 1946 under a United Nations Trusteeship Agreement. In May 1961 a plebiscite held under the supervision of the UN on the basis of universal adult suffrage voted overwhelmingly in favour of independence. In Oct. 1961 the General Assembly of the United Nations passed a resolution to terminate the trusteeship agreement as from 1 Jan. 1962, on which date Western Samoa became an independent sovereign state. In July 1997 the country renamed itself the Independent State of Samoa.

TERRITORY AND POPULATION

Samoa lies between 13° and 15° S. lat. and 171° and 173° W. long. It comprises the two large islands of Savai'i and Upolu, the small islands of Manono and Apolima, and several uninhabited islets lying off the coast. The total land area is 1,093 sq. miles (2,830·8 sq. km), of which 659·4 sq. miles (1,707·8 sq. km) are in Savai'i, and 431·5 sq. miles (1,117·6 sq. km) in Upolu; other islands, 2·1 sq. miles (5·4 sq. km). The islands are of volcanic origin, and the coasts are surrounded by coral reefs. Rugged mountain ranges form the core of both main islands. The large area laid waste by lava-flows in Savai'i is a primary cause of that island supporting less than one-third of the population of the islands despite its greater size than Upolu.

Population at the 1991 census, 161,298.

The UN gives a projected population for 2000 of 174,000.

In 1995, 79% of the population lived in rural areas. The population at the 1986 census was 112,228 in Upolu (including Manono and Apolima) and 44,930 in Savai'i. The capital and chief port is Apia in Upolu (population 32,196 in 1986).

SAN MARINO

Repubblica di San Marino

Capital: San Marino
Population estimate, 2000: 26,800
Estimated GDP: $408m.

KEY HISTORICAL EVENTS
San Marino is a small republic situated on the Adriatic side of central Italy. According to tradition, St Marinus and a group of Christians settled there to escape persecution. By the 12th century San Marino had developed into a commune ruled by its own statutes and consul. Unsuccessful attempts were made to annex the republic to the papal states in the 18th century and when Napoleon invaded Italy in 1797 he respected the rights of the republic and even offered to extend its territories.

In 1815 the Congress of Vienna recognized the independence of the republic. On 22 March 1862 San Marino concluded a treaty of friendship and co-operation, including a *de facto* customs union, with the Kingdom of Italy, thus preserving its ancient independence although completely surrounded by Italian territory. SÃO TOMÉ E PRÍNCIPE

República Democrática de São Tomé e Príncipe

Capital: São Tomé
Population estimate, 2000: 149,000
Estimated GDP: $149m.
HDI/world rank: 0·563/121

KEY HISTORICAL EVENTS

The islands of São Tomé and Príncipe off the west coast of Africa were colonized by Portugal for 5 centuries after being first visited by Portuguese navigators on 21 Dec. 1470. There may have been a few African inhabitants or visitors earlier but most of the population arrived during the centuries when the islands served as an important slave-trading depot for South America and some slaves were kept on the islands to work on the sugar plantations. In the 19th century the islands became the first parts of Africa to grow cocoa. Although in 1876 Portugal abolished slavery in name, in practice it continued thereafter with many Angolans, Mozambicans and Cape Verdians being transported to work on the cocoa plantations. Because the slave-descended population was cut off from African culture, São Tomé had a higher proportion than other Portuguese colonies of *assimilados* (Africans acquiring full Portuguese culture and certain rights).

After becoming an Overseas Province of Portugal in 1951, São Tomé saw serious riots against Portuguese rule in 1953. From 1960 a Committee for the Liberation of São Tomé e Príncipe operated from neighbouring African territories. There was, however, no armed resistance on the islands, where in 1970 Portugal introduced some reforms and formed a 16-member legislative council and a provincial consultative council. Following the Portuguese revolution of 1974, the Movement for the Liberation of São Tomé e Príncipe, headed by Manoel Pinto da Costa, held talks with Portugal. A transitional government was formed later that year and, after a period of tension due to landowners' resistance to decolonization and the temporary retention of Portuguese troops, independence came on 12 July 1975. Pinto da Costa became the first president and was re-elected for a further 5 years in 1985.

Independent São Tomé e Príncipe officially proclaimed Marxist-Leninist policies, but maintained a non-aligned foreign policy and has received aid from Portugal.

TERRITORY AND POPULATION

The republic, which lies about 200 km off the west coast of Gabon, in the Gulf of Guinea, comprises the main islands of São Tomé (845 sq. km) and Príncipe and several smaller islets including Pedras Tinhosas and Rolas. It has a total area of 1,001 sq. km (387 sq. miles). Population (census, 1991) 120,146. Estimate (1997), 147,900; density, 148 per sq. km.

In 2000 the population is projected to be 149,000.

An estimated 57·1% of the population were rural in 1995.

The areas and populations of the 2 provinces:

Príncipe	142	5,639	5,900	São António	1,000

The official language is Portuguese. Lungwa São Tomé, a Portuguese creole, and Fang, a Bantu language, are the spoken languages.

The 1990 constitution was approved by 72% of votes at a referendum of Aug. 1990. It abolished the monopoly of the Movement for the Liberation of São Tomé e Príncipe (MLSTP). The *President* must be over 34 years old, and is elected by universal suffrage for one or two (only) 5-year terms. He or she is also head of government and appoints a Council of Ministers. KEY HISTORICAL EVENTS

In the 6th century AD Makkah, now in western Saudi Arabia, was a thriving commercial centre. Around 610 the Prophet Mohammed began to attract a following. In 622, learning of an assassination plot against him, he led his followers to the town of Yathrib (now Madinah). This was the *Hijrah*, or migration, which marks the beginning of the Islamic calendar. Battles ensued between Mohammed's followers and the pagans of Makkah but by 628 Mohammed had united the tribes so successfully he and his followers entered Makkah without bloodshed. Less than 100 years from the advent of Islam, its empire extended from Spain to areas of India and China. Islamic rule thrived well into the 17th century.

Today the Kingdom of Saudi Arabia is a union of two regions, Nejd and Hejaz. In the 18th century, Nejd was an autonomous region governed from Diriya, the stronghold of the Wahhabis, a puritanical Islamic sect. It subsequently fell under Turkish rule but in 1913 Abdulaziz Ibn Abdul Rahman Al-Saud defeated the Turks and also captured the Turkish province of al Hasa. In 1920 he captured the Asir and in 1921 he added the Jebel Shammar territory of the Rashid family. In 1925 he completed the conquest of the Hejaz.

Great Britain recognized Abdulaziz as an independent ruler, King of the Hejaz and of Nejd and its dependencies, by the Treaty of Jiddah on 20 May 1927. The name was changed to the Kingdom of Saudi Arabia in Sept. 1932. King Abdulaziz ruled until his death in Nov. 1953. During his time there was development of the country's oil resources. Although begun before the Second World War, oil exploitation grew greatly with the support of the USA after 1945.

King Abdulaziz was succeeded by his sons, Saud, Faisal, Khalid and Fahd. Saud succeeded to the throne in 1953 but in March 1964 abdicated in favour of Faisal Ibn Abdulaziz who had carried considerable power during the older brother's reign, being for a time prime minister with control over foreign and economic policy. Faisal was assassinated in 1975 and was succeeded by his brother, Khalid Ibn Abdulaziz. On Khalid's death in 1982, Fahd Ibn Abdulaziz became king. In 1995, after King Kahd suffered a stroke, he appointed his half-brother Crown Prince Abdullah Ibn Abdulaziz to act on his behalf.

TERRITORY AND POPULATION

Saudi Arabia, which occupies nearly 80% of the Arabian peninsula, is bounded in the west by the Red Sea, east by the Arabian/Persian Gulf and the United Arab Emirates, north by Jordan, Iraq and Kuwait and south by Yemen and Oman. An agreement with Qatar of 26 Oct. 1996 provided for the definitive delimitation of their common frontier by 1998. For the border dispute with Yemen *see* YEMEN: Territory and Population. The total area is estimated to be 849,400 sq. miles (2·2m. sq. km). Riyadh is the political, and Makkah the religious, capital.

The total population was (1974 census) 7,012,642, of which 5,128,655 were categorized as settled and 1,883,987 as nomadic. Estimate (1992), 16,929,294 (7,462,753 females), of whom 12,304,835 were Saudi Arabians. 1995 estimate, 17·88m.; density, 8 per sq. km. In 1995, 82·8% of the population lived in urban areas.

The UN gives a projected population for 2000 of 21·66m.

Principal cities with 1991 population estimates (in 1m.): Riyadh, 1·8; Jiddah, 1·5; Makkah, 0·63; Taif, 0·41; Madinah, 0·4; Dammam, 0·35.

The Neutral Zone (3,560 sq. miles, 5,700 sq. km), jointly owned and administered by Kuwait and Saudi Arabia from 1922 to 1966, was partitioned between the two

countries in 1966, but the exploitation of the oil and other natural resources continues to be shared.

The official language is Arabic.

Policy. The sixth 5-year development plan (1995–99) continues the emphasis on developing the private sector, and aims to increase and indigenize the workforce, enhance defence capacity, achieve a balanced economic development and protect the environment. The 1998 budget emphasised expenditure and capital projects such as roads and schools. 80% of the budget goes on public sector salaries.

Performance. Real GDP growth was 1·0% in 1997. The current account surplus stood at US$254m. in 1997.

Budget. In 1986 the financial year became the calendar year. Estimated revenue, 1996: SAR177bn. 1997 budget: Revenue, SAR164bn.; expenditure, SAR181bn. Revenues for 1998 were forecast at SAR178bn., and expenditure at SAR196bn.

Oil sales account for 80% of state income. Estimated 1993 expenditure (in 1m. rials): Defence and security, 61·6; education, 34·1; health and social welfare, 14·1; economic and social subsidies, 9·2; transport and communications, 9·1.

There were 12 commercial banks with 1,160 branches, 5 special credit institutions and a variety of other financial institutions in 1995. Sharia (the religious law of Islam) forbids the charging of interest; Islamic banking is based on sharing clients' profits and losses and imposing service charges. The Saudi Arabian Agricultural Bank, with 70 branches and offices, extended 755m. rials in credit services to farmers during 1989. At 30 Sept. 1995 total assets of commercial banks were 323,900m. rials.

Oil and Gas. Proven reserves (1996) 260,100m. bbls. (26% of world resources). Oil production began in 1938 by Aramco, which is now 100% state-owned and accounts for about 97% of total crude oil production.

Saudi Arabia's 1997 OPEC quota was 8·76m. bbls. a day. In 1996 it produced 12·8% of the world total oil output.

Production comes from 14 major oilfields, mostly in the Eastern Province and offshore, and including production from the Neutral Zone.

Saudi Arabia is dependent on oil earnings for over 70% of budget revenues. In 1996 oil export revenues were SAR130bn. compared to a planned SAR85bn., in 1997 they were SAR155bn. compared to a planned SAR115bn. but in 1998 they were forecast to be only SAR105bn. compared to a planned SAR125bn. In Oct. 1998 US oil companies were invited back to help develop Saudi Arabia's energy resources, nearly 20 years after they had been expelled. In 1998, revenue fell by a third following the collapse of the price of oil.

In 1996, gas reserves were estimated at 190,100,000m. cu. ft.

Water. Efforts are under way to provide adequate supplies of water for urban, industrial, rural and agricultural use. Most investment has gone into sea-water desalination. In 1996, 33 plants produced 1·9m. cu. metres a day, meeting 70% of drinking water needs. Total annual consumption was 18,200m. cu. metres in 1995. Irrigation for agriculture consumes the largest amount, from fossil reserves (the country's principal water source), and from surface water collected during seasonal floods. In 1996 there were 183 dams with a holding capacity of 450m. cu. metres. Treated urban waste water is an increasing resource for domestic purposes; in 1996 there were 2 recycling plants in operation.

Minerals. Production began in 1988 at Mahd Al-Dahab gold mine, the largest in the country, which produces 170,000 oz of gold a year. In 1993, 189,353 tonnes of ore were extracted. In July 1998 plans were announced for the investment of US$98m. to double gold production by 2001. 1997 production totalled 7 tonnes. Deposits of iron, phosphate, bauxite, uranium, silver, tin, tungsten, nickel, chrome, zinc, lead, potassium ore and copper have also been found.

Agriculture. Since 1970 the Government has spent substantially on desert reclamation, irrigation schemes, drainage and control of surface water and of moving sands. Undeveloped land has been distributed to farmers and there are research and extension programmes. Large scale private investment has concentrated on wheat, poultry and dairy production.

In 1994 there were 3·7m. ha of arable land, 100,000 ha of permanent cropland and 120m. ha of permanent pasture. In 1995, 13·9% of the economically active population were engaged in agriculture.

INDUSTRY

The Government encourages the establishment of manufacturing industries. Its policy focuses on establishing industries that use petroleum products, petrochemicals and minerals. Petrochemical and oil-based industries have been concentrated at 8 new industrial cities, with the 2 principal cities at Jubail and Yanbu. In 1996, there were 15 major plants and other industrial facilities, a dedicated desalination plant, a vocational training institute and a college at Jubail, and 3 major refineries, a petrochemical complex and many manufacturing and support enterprises at Yanbu. Products include chemical, plastics, industrial gases, steel and other metals. In 1995 there were 2,234 factories employing 196,000 workers.

KEY HISTORICAL EVENTS

The major ethnic groups of Senegal are the Wolof, Serer, Tukulor (or Toucouleur), Soninke (or Sarakole), Mandinka and Diola peoples. Some of them had important traditional kingdoms. In Fouta Toro in the east there was the state of Tekrur and then an Islamic state founded in 1776 by Muslim Tukulors. Islam reached the Senegal river valley by the 11th century, and later the Fulanis (whose migration all over West Africa began from Senegal) and the related Tukolors helped spread Islam over a large area.

For several centuries, starting in the 14th, the Wolofs had a supreme ruler, the Bourba Jolof, and several important kingdoms under him, notably the kingdom of Kayor (Kajoor) ruled by 30 kings or *damels* from the 16th century to 1886. The last *damel*, the Muslim Lat Dior, was famous for his resistance to French rule.

While in the mid-1400s the Portuguese were the first Europeans to reach the area around the Senegal river estuary; in succeeding centuries the French became the dominant Europeans on the coast in that area, except for the Gambia, where the British were installed. The French founded Saint-Louis in 1659 and also occupied the island of Goree, an important slave-trading depot. By the 18th century Saint-Louis had an important small elite community, partly African, called the *habitants*. In the 19th century French rule, interrupted earlier by occasional British occupation, was confirmed over Saint-Louis and Goree. Free Africans received the vote in 1833, and the franchise was further extended in 1848 when slavery was abolished in all French colonies. The Africans in Saint-Louis and Goree, and also in Dakar and Rufisque, were in the 19th century called the *originaires* and had the rights of French citizens. They elected a deputy to the French national Assembly and voted for local government councils (or *communes*).

From the late 1870s France began a sustained push up the river and into the interior. Here, groundnuts were already being grown for export to France, but African monarchs still ruled, including the new Islamic conqueror, El Hadj Umar and, after his death in 1864, his son Ahmadu. There was strong resistance to the French, notably that led by Lat Dior from 1882 until his death in action in 1886. French rule was established by the mid-1890s, while the British then consolidated their rule inland in The Gambia; French efforts to obtain cession of that territory, entirely surrounded by Senegal, did not succeed.

The normal French colonial system prevailed, one of its features being the breaking up of traditional kingdoms (completed in Senegal by the 1920s). Senegal was part of French West Africa *(Afrique Occidentale Française)* from 1902 and became an autonomous state within the French Community on 25 Nov. 1958. On 4 April 1959 Senegal joined with French Sudan to form the Federation of Mali, which achieved independence on 20 June 1960, but on 22 Aug. Senegal withdrew from the Federation and became a separate independent republic. Senegal was a one-Party state from 1966 until 1974, when a pluralist system was re-established.

TERRITORY AND POPULATION

Senegal is bounded by Mauritania to the north and north-east, Mali to the east, Guinea and Guinea-Bissau to the south and the Atlantic to the west with The Gambia forming an enclave along that shore. CONSTITUTION AND GOVERNMENT

The 1963 constitution was revised in 1991. The head of state is the *President*, elected by universal suffrage for not more than two 7-year terms. For the unicameral, 140-member National Assembly, 70 members are elected in multi-seat and single-seat constituencies and 70 by proportional representation, all for a 5-year term. In Dec. 1995 it was decided that a Senate would be established to represent territorial collectives in parliament. The Senate has 60 members, 45 elected by legislators and local, municipal and regional councillors; 12 appointed by the President; and 3 by Senegalese people living abroad.

In Sept. 1998 parliament passed a law allowing Abdou Diouf, Senegal's president since 1981, to become president-for-life.

At the parliamentary elections of 25 May 1998, candidates from 11 parties stood. The Senegalese Socialist Party (PSS) gained 93 seats (50·2% of votes cast); the Senegalese Democratic Party (PDS) 23 (19·1%); Alliance Jëf-Jël-USD (JJ, centrist) 11 (13·2%); African Party for Democracy and Socialism (AJ, socialist) 4 (5%); Democratic League (LD, communist) 3; Convent of Democrats and Patriots (CDP, socialist) 1; Front for Socialism and Democracy (FSD, social-democratic) 1; Senegalese Democratic Party-Renewal (PDS-R, centrist) 1; Party of Independence and Work (PIT, communist) 1; National Democratic Rally (RND, extreme left) 1; Bloc of Centrists (BC) 1.

Fraud and the electoral system tend to favour the ruling party. The ruling Socialist Party split in March 1998, leading to the creation of the new Democratic Party for Renewal.

The Senate was elected on 24 Jan. 1999. All 45 elected members are members of the PSS.

KEY HISTORICAL EVENTS

The Seychelles were first colonized by the French in 1756 in order to establish plantations for growing spices to compete with the Dutch monopoly. The islands were captured by the English in 1794. During discussions before the Treaty of Paris was signed, Britain offered to return Mauritius and its dependencies which included the Seychelles to France if that country would renounce all claims to her possessions in India. France refused and the Seychelles were formally ceded to Britain as a dependency of Mauritius. In Nov. 1903 the Seychelles archipelago became a separate British Crown Colony. Internal self-government was achieved on 1 Oct. 1975 and independence as a republic within the British Commonwealth on 29 June 1976.

The first president, James Mancham, was deposed in a *coup* on 5 June 1977 and replaced by his prime minister, Albert René. The National Assembly was dissolved and the constitution suspended. A new constitution came into force on 5 June 1979, under which the Seychelles People's Progressive Front became the sole legal party and nominates all candidates for election. There were several attempts to overthrow the regime, but in 1979 and 1984 Albert René was the only candidate in the presidential elections. Under the new constitution approved in June 1993, President René was re-elected against two opponents with 59·5% of the vote.

TERRITORY AND POPULATION

The Seychelles consists of 115 islands in the Indian Ocean, north of Madagascar, with a combined area of 175 sq. miles (455 sq. km) in two distinct groups. The Granitic group of 32 islands cover 92 sq. miles (239 sq. km); the principal island is Mahé, with 59 sq. miles (153 sq. km) and 59,500 inhabitants at the 1987 census, the other inhabited islands of the group being Praslin, La Digue, Silhouette, Fregate and North, which together had 7,100 inhabitants.

The Outer or Coralline group comprises 83 islands spread over a wide area of ocean between the Mahé group and Madagascar, with a total land area of 83 sq. miles (214 sq. km) and a population of about 400. The main islands are the Amirante Isles (including Desroches, Poivre, Daros and Alphonse), Coetivy Island and Platte Island, all lying south of the Mahé group; the Farquhar, St Pierre and Providence Islands, north of Madagascar; and Aldabra, Astove, Assumption and the Cosmoledo Islands, about 1,000 km south-west of the Mahé group. Aldabra (whose lagoon covers 55 sq. miles), Farquhar and Desroches were transferred to the new British Indian Ocean Territory in 1965, but were returned by Britain to the Seychelles on the latter's independence in 1976. Population, 76,400 (1996); 54·4% urban (1995).

There is a unicameral People's Assembly consisting of 33 seats, of which 22 are directly elected and 11 are allocated on a proportional basis, and an executive president directly elected for a 5-year term. A constitutional amendment of Dec. 1991 legalized other parties. A commission was elected in July 1992 to draft a new constitution. The electorate was some 50,000; turn-out was 90%. The SPPF gained 14 seats on the commission, the Democratic Party, 8; the latter, however, eventually withdrew. At a referendum in Nov. 1992 the new draft constitution failed to obtain the necessary 60% approval votes. The commission was reconvened in Jan. 1993. At a further referendum on 18 June 1993 the constitution was approved by 73·6% of votes cast.

SIERRA LEONE

Republic of Sierra Leone

Capital: Freetown
Population estimate, 2000: 4·87m.
GNP per capita: (PPP$) 510
HDI/world rank: 0·185/174

KEY HISTORICAL EVENTS

The Colony of Sierra Leone originated in 1787, when English settlers bought a piece of land intended as a home for natives of Africa who were waifs in London. The land was later used as a settlement for Africans rescued from slave-ships. The hinterland was declared a British protectorate on 21 Aug. 1896.

The first constitution was introduced in 1951 and this removed the political component from the privileged status of the Creoles of the colony by giving power to the majority. Sierra Leone became independent as a member state of the British Commonwealth on 27 April 1961. In a general election in March 1967, Dr Siaka Stevens' All People's Congress came to power and was installed despite a military coup to prevent his taking office. Sierra Leone became a republic on 19 April 1971, with Dr Siaka Stevens as executive president.

Following a referendum in June 1978, a new constitution was instituted under which the ruling All People's Congress became the sole legal party.

Stevens remained president until 1985 when he handed over to Maj.-Gen. Dr Joseph Saidu Momoh, the army C.-in-C., who was the only candidate in the presidential election that year and received 99% of the votes cast.

A military coup on 29 April 1992 deposed the president and set up a National Provisional Ruling Council. The chairman of this, Captain Valentine Strasser, was in turn deposed in a bloodless military coup on 16 Jan. 1996, and Gen. Julius Maada Bio assumed power. Presidential and parliamentary elections in Feb.–March 1996 resulted in a new government led by President Ahmed Tejan Kabbah. In May 1997 a group of junior officers led by Maj. Johnny Paul Koroma mounted a successful coup and ousted President Kabbah. The group, calling themselves the Armed Forces Ruling council (AFRC), in alliance with the Revolutionary United Front (RUF), a rebel gang that had terrorized the south-east of the country in the early 1990s, maintained the Kabbah had lost all credibility by encouraging tribalism and sectionalism. In Feb. 1998 a Nigerian-led intervention force launched an air and artillery offensive against the military junta. For the first time a group of African states were joining together to eject a regime and try to restore a democratically-elected president. On 10 March President Kabbah returned from exile in Guinea, promising a 'new beginning'. But in Jan. 1999, the country again erupted into civil war. On 6 Jan. the rebels entered Freetown setting fire to many buildings. Nigeria sent troops to support President Kabbah but having lost control of the diamond fields and with no other resources, the government was powerless. The war, which has been on and off for nearly 10 years, has reduced Sierra Leone to one of the poorest countries in the world.

"One of the war's worst aspects is that many of these locally recruited fighters, on both sides, are children. Some are "voluntary" recruits. Others are seduced by promises of wealth if they win, or are straightforwardly forced into service. To cut them off from their roots, they may be told to kill their parents or the local chieftain. Some are inducted into the secret societies common in Sierra Leone, many of which involve cannibalism. Outcast, illiterate and brainwashed, they become dependent solely on their guns." (*The Economist*, 9 Jan. 1999)

KEY HISTORICAL EVENTS

Singapore Island became part of the Javanese Majapahit Empire in the 14th century. The Portuguese established hegemony in the area in the 16th century, followed by the Dutch a hundred years later. In 1819 Sir Thomas Stamford Raffles, the British East India Administrator, established a trading settlement there. The original lease of the site of a factory to the British East India Company by the Sultan of Johore was followed by the treaty of 2 Aug. 1824 ceding the entire island in perpetuity to the company. In 1826 Penang, Malacca and Singapore were combined as the Straits Settlements in an Indian presidency. On 1 April 1867 the settlements were transferred from the control of the Indian government to that of the British Secretary of State for the Colonies. With the opening of the Suez Canal in 1869 and the advent of the steamship, an era of prosperity began for Singapore. Growth continued with the export of tin and rubber from the Malay peninsula.

Thought to be impregnable by land, Singapore fell to the Japanese in 1942 whose occupation continued until the end of the Second World War. In 1945 Singapore became a Crown Colony, being separated from Penang and Malacca. In June 1959 the state was granted complete internal self-government. When the Federation of Malaysia was formed in Sept. 1963, Singapore became one of the 14 states of the newly created country.

On 7 Aug. 1965, by agreement with the Malaysian government, Singapore left the Federation of Malaysia and became an independent sovereign state. The name of the state was changed to 'Republic of Singapore' with a president as its head. Singapore and Malaysia agreed to enter into a treaty for external defence and mutual assistance. The British military presence was withdrawn from Singapore in 1971. Continuing economic prosperity has made Singapore a powerful influence in ASEAN.

TERRITORY AND POPULATION

The Republic of Singapore consists of Singapore Island and some 63 smaller islands. Singapore Island is situated off the southern extremity of the Malay peninsula, to which it is joined by a 1·1 km causeway carrying a road, railway and water pipeline across the Strait of Johor and by a 1·9 km bridge at Tuas, opened on 2 Jan. 1998. The Straits of Johore between the island and the mainland are 914 metres wide. The island is 647·8 sq. km in area, including the offshore islands.

Census of population (1990): 2,089,400 Chinese, 380,600 Malays, 191,000 Indians and 29,200 others; total 2,690,200. In June 1997 Chinese residents numbered 2,394,200 (77·2%), Malays 437,900 (14·1%), Indians 230,600 (7·4%) and others 40,800 (1·3%); total 3,103,500. 1997 estimate, 3,736,700; density, 5,768 per sq. km.

The projected population for 2000 is 3·95m.

CONSTITUTION AND GOVERNMENT

Singapore is a republic with a parliamentary system of government. The organs of state—the executive, the legislature and the judiciary—are provided for by a written constitution. The Constitution is the supreme law of Singapore and any law enacted after the date of its commencement, which is inconsistent with its provisions, is automatically void.

The Head of State is the President. The administration of the Government is vested in the Cabinet headed by the Prime Minister. The Prime Minister and the other Cabinet Members are appointed by the President from among the Members of Parliament (MPs). The Cabinet is collectively responsible to Parliament.

Parliament is unicameral consisting of 83 elected members, elected by secret ballot from single-member and group representation constituencies. With the customary exception of those serving criminal sentences, all citizens over 21 are eligible to vote. Voting in an election is compulsory. Group representation constituencies may return up to 6 Members of Parliament (4 before 1996), one of whom must be from the Malay community, the Indian or other minority communities. To ensure representation of parties not in the government, provision is made for the appointment of 3 (or up to a maximum of 6) Non-Constituency Members of Parliament (NCMPs). The number of NCMPs is reduced by one for each opposition candidate returned.

A Presidential Council to consider and report on minorities' rights was established in 1970. The particular function of this council is to draw attention to any Bill or to any subsidiary legislation which, in its opinion, discriminates against any racial or religious community.

As 2 members from opposition parties were returned, a further non-constituency seat was awarded to the Workers' Party.

KEY HISTORICAL EVENTS

The Czechoslovak State came into existence on 28 Oct. 1918, when the Czech *Národni Výbor* (National Committee) took over the government of the Czech lands upon the dissolution of Austria-Hungary. Two days later the Slovak National Council manifested its desire to unite politically with the Czechs. On 14 Nov. 1918 the first Czechoslovak National Assembly declared the Czechoslovak State to be a republic with T. G. Masaryk as President (1918-35). The Treaty of St Germain-en-Laye (1919) recognized the Czechoslovak Republic, consisting of the Czech lands (Bohemia, Moravia, part of Silesia) and Slovakia. To these lands were added, as a trust, the autonomous province of Subcarpathian Ruthenia. This territory was broken up for the benefit of Germany, Poland and Hungary by the Munich agreement (29 Sept. 1938) between UK, France, Germany and Italy.

In March 1939 the German-sponsored Slovak government proclaimed Slovakia independent and Germany incorporated the Czech lands into the Reich as the 'Protectorate of Bohemia and Moravia'. A government-in-exile, headed by Dr Beneš, was set up in London in July 1940. Liberation by the Soviet Army and US Forces was completed by May 1945. Territories taken by the Germans, Poles and Hungarians were restored to Czechoslovak sovereignty. Subcarpathian Ruthenia was transferred to the USSR. Elections were held in May 1946 at which the Communist Party obtained about 38% of the votes. A coalition government under a Communist Prime Minister, Klement Gottwald, remained in power until 20 Feb. 1948, when 12 of the non-Communist ministers resigned in protest against infiltration of Communists into the police. In Feb. a predominantly Communist government was formed by Gottwald. In May elections resulted in an 89% majority for the government and President Beneš resigned.

In 1968 pressure for liberalization culminated in the overthrow of the Stalinist leader, Antonín Novotný, and his associates. Under Alexander Dubček's leadership the so-called 'Prague Spring' began to take shape, and the outlines of a new political system described as 'socialism with a human face' began to appear as the Communist Party introduced an 'Action Programme' of far-reaching reforms. Soviet pressure to abandon this programme was exerted between May and Aug. 1968 and finally Warsaw Pact forces occupied Czechoslovakia on 21 Aug. The Czechoslovak government was compelled to accept a policy of 'normalization' (*i.e.*, abandonment of most reforms) and the stationing of Soviet forces.

Mass demonstrations demanding political reform began in Nov. 1989. After the authorities' use of violence to break up a demonstration on 17 Nov. , the Communist leader resigned. On 30 Nov. the Federal Assembly abolished the Communist Party's sole right to govern, and a new Government was formed on 3 Dec. The protest movement continued to grow and on 10 Dec. another Government was formed. Gustáv Husák resigned as President, and was replaced by Václav Havel on the unanimous vote of 323 members of the Federal Assembly on 29 Dec.

At the June 1992 elections the Movement for Democratic Slovakia led by Vladimír Meciar campaigned on the issue of Slovak independence, and on 17 July the Slovak National Council adopted a declaration of sovereignty by 113 to 24 votes. President Havel resigned as Federal president on 20 July. On 1 Sept. 1992 the Slovak National Council adopted, by 114 votes to 16 with 4 abstentions (and a boycott by the Hungarian deputies), a Constitution for an independent Slovakia to come into being on 1 Jan. 1993. Economic property was divided between Slovakia and the Czech Republic in accordance with a Czechoslovakian law of 13 Nov. 1992. Real estate became the property of the republic in which it was located. Other property was divided by specially-constituted commissions in the proportion of 2 (Czech Republic) to 1 (Slovakia) on the basis of population size. Military materiel

was divided on the 2:1 principle. Regular military personnel were invited to choose which armed force they would serve in.

An application to join the EU was made in June 1995. A referendum on whether Slovakia should apply to join NATO took place on 23–24 May 1997. Turn-out was 9·8% and the results were declared invalid. 55% of votes cast were against participation.

Slovakia has had a long-standing dispute with Hungary over the Gabčíkovo-Nagymaros Project, involving the building of dam structures in both countries for the production of electric power, flood control and improvement of navigation on the Danube as agreed in a treaty signed in 1977 between Czechoslovakia and Hungary. The International Court of Justice delivered judgment on the case in Sept. 1997.

ECONOMY

Policy. By the end of 1992, 503 large joint stock companies had been privatized by the voucher scheme, and 330 large firms and 9,676 small businesses had been sold off. 3·2m. persons had invested in privatization vouchers by the end of 1994. Legislation of July 1995 ended privatization by vouchers, which became exchangeable instead against state securities. At the end of 1995 the private sector share of total GDP reached 64·9%.

New economic policy in 1998 had the key aims of the substantial reduction of the fiscal deficit, an increase in regulated prices towards international levels and the acceleration of the restructuring of state-owned banks and enterprises.

Performance. Real GDP growth was 6·9% in 1996 and 6% in 1997 (estimate). Preliminary data for 1998 suggests this rate was being sustained, making Slovakia's

one of the fastest growing economies in Europe. At May 1998 the current account balance stood at US$-1·3bn.

Budget. In 1997, revenue was Ks. 180,825m. and expenditure, Ks. 192,847m.

Banking and Finance. The central bank and bank of issue is the Slovak National Bank, founded in 1993 (*Governor*, Vladímir Masár). It has an autonomous statute modelled on the German Bundesbank, with the duties of maintaining control over monetary policy and inflation, ensuring the stability of the currency, and supervising commercial banks. However, it is now proposed to amend the central bank law to allow the government to appoint half the members of the board and force the bank to increase its financing of the budget deficit.

In Oct. 1998 the Slovak National Bank abandoned its fixed exchange rate system, whereby the crown's value was fixed within a fluctuation band against a number of currencies, and chose to float the currency.

Decentralization of the banking system began in 1991, and private banks began to operate. Foreign investors may acquire up to 25% of major banks' assets (100% of small banks), but no single investor may acquire more than 10%. There were 26 commercial banks in 1993, and 9 foreign bank branches. Total subscribed bank capital was Ks. 11,800m. in 1993. Savings accounts totalled Ks. 94,859m. in 1992.

An agreement of Dec. 1992 with the Czech Republic, Hungary and Poland abolishes tariffs on raw materials and goods where exports do not compete directly with locally-produced items, and envisaged tariff reductions on agricultural and industrial goods in 1995–97.

Tax holidays of up to 7 years are available to foreign investors.

Foreign debt was US$12bn. gross (62% of GDP) in Dec. 1998. The net figure amounted to just under 30%. By Sept. 1994 total foreign investments since 1990 amounted to US$416m.

Imports and Exports. While keen to join the EU, Slovakia is currently excluded from Brussels' list of east European countries scheduled for early negotiations because of 'shortcomings' in the functioning of its democracy.

SOCIAL INSTITUTIONS

Justice. The post-Communist judicial system was established by a federal law of July 1991. This provided for a unified system of 4 types of court: civil, criminal,

commercial and administrative. Commercial courts arbitrate in disputes arising from business activities. Administrative courts examine the legality of the decisions of state institutions when appealed by citizens. In addition, there are military courts which operate under the jurisdiction of the Ministry of Defence. There is a Supreme Court, and a hierarchy of courts under the Ministry of Justice at republic, region and district level. District courts are courts of first instance. Cases are usually decided by senates comprising a judge and 2 associate judges, though occasionally by a single judge. (Associate judges are citizens in good standing over the age of 25 who are elected for 4-year terms). Regional courts are courts of first instance in more serious cases and also courts of appeal for district courts. Cases are usually decided by a senate of 2 judges and 3 associate judges, although again occasionally by a single judge. The Supreme Court interprets law as a guide to other courts and functions also as a court of appeal. Decisions are made by senates of 3 judges. The judges of the Supreme Court are nominated by the President; other judges are appointed by the National Council.

Religion. A federal Czechoslovakian law of July 1991 provides the basis for church-state relations and guarantees the religious and civic rights of citizens and churches. Churches must register to become legal entities but operate independently of the state. A law of 1993 restored confiscated property to churches and religious communities unless it had passed into private hands, co-operative farms or trading companies. An official poll of Oct. 1995 showed that 73% of the population were religious. Of these, 75% were Roman Catholic, 12% Protestant and 7% Uniate.

KEY HISTORICAL EVENTS

The lands originally settled by Slovenes in the 6th century were steadily encroached upon by Germans. Slovenia developed as part of Austria-Hungary, after the defeat of the latter in the First World War becoming part of the Kingdom of the Serbs, Croats and Slovenes (Yugoslavia) on 1 Dec. 1918.

In Oct. 1989 the Slovene Assembly voted a constitutional amendment giving it the right to secede from Yugoslavia. On 2 July 1990 the Assembly adopted a 'declaration of sovereignty' by 187 votes to 3, and in Sept. proclaimed its control over the territorial defence force on its soil. At a referendum on 23 Dec., 88·5% of participants voted for independence. On 25 June 1991 Slovenia declared independence, but agreed to suspend this for 3 months at peace talks sponsored by the EU. Federal troops moved into Slovenia on 27 June to secure Yugoslavia's external borders, but after some fighting withdrew by the end of July. After the agreed 3-month moratorium Slovenia (and Croatia) declared their independence from the Yugoslav Federation on 8 Oct. 1991.

Capital: Mogadishu
Population estimate, 2000: 11·53m.
Estimated GDP: $3·6bn.

KEY HISTORICAL EVENTS

The origins of the Somali people can be traced back 2,000 years when they migrated to the region, displacing and absorbing an earlier Arabic people. They converted to Islam in the 10th century and were organized in loose Islamic states by the 19th century. The northern part of Somaliland was created a British protectorate in 1884. The southern part belonged to two local rulers who, in 1889, accepted Italian protection for their lands. The Italian invasion of Ethiopia in 1935 was launched from Somaliland and in 1936 Somaliland was incorporated with Eritrea and Ethiopia to become Italian East Africa. In 1940 Italian forces invaded British Somaliland but in 1941 the British, with South African and Indian troops, recaptured this territory as well as occupying Italian Somaliland. After the Second World War British Somaliland reverted to its colonial status and ex-Italian Somaliland became the UN Trust Territory of Somaliland, administered by Italy.

The independent Somali Republic came into being on 1 July 1960 as a result of the merger of the British Somaliland Protectorate, which first became independent on 26 June 1960, and the Italian Trusteeship Territory of Somaliland. Aden Abdullah Osman was elected president of the new republic, and the legislatures of the two territories were merged to create a single national assembly.

On 21 Oct. 1969 Maj.-Gen. Mohammed Siyad Barre, the C.-in-C. of the armed forces, took power in a *coup.* He suspended the constitution and formed a Supreme Revolutionary Council to administer the country, which was renamed the Somali Democratic Republic.

Various insurgent forces combined to oppose the Barre regime in a bloody civil war. Barre fled on 27 Jan. 1991. Ali Mahdi Muhammad, of the United Somali Congress, became president in Aug. 1991, but interfactional fighting continued. In Aug. 1992 a new coalition government agreed a UN military presence to back up relief efforts to help the estimated 1·5–2m. victims of famine. In accordance with a unanimous UN Security Council resolution of 3 Nov. 1992, troops from the USA and other countries mounted a mission to ensure the supply of aid to victims of the civil war and drought. On 11 Dec. 1992 the leaders of the two most prominent of the warring factions, Ali Mahdi Muhammad and Muhammad Farah Aidid, agreed to a peace plan under the aegis of the UN, and a pact was signed on 15 Jan. 1993. At the end of March, the warring factions agreed to disarm and form a 74-member National Transitional Council.

Following the killing of 24 Pakistani soldiers of the UN 29-nation peacekeeping force on 17 June 1993, UN troops attacked and seized the stronghold of Muhammad Aidid and sought his arrest. After an escalation of violence in which hundreds of Somalis were killed, an envoy from the US President negotiated the release of hostages from Gen. Aidid and it was agreed to set up an independent commission of enquiry. After Dec. 1993 various national contingents began to leave the peace-keeping force, including US forces in March 1994. A unanimous UN National Security Council resolution of 4 Feb. 1994 laid stress on the need for reconciliation and the promotion of democratic government, and scaled down the number of UN forces in the country. On 4 Nov. 1994 the UN Security Council unanimously decided to withdraw UN forces; the last of these left on 2 March 1995.

The principal insurgent group in the north of the country, the Somali National Movement, declared the secession of an independent **'Somaliland Republic'** on 17 May 1991, based on the territory of the former British protectorate, with a capital at Hargeisa and a port at Berbera. Its president is Muhammad Ibrahim Egal. The

Somalian government rejected the secession. Clan warfare broke out in Hargeisa in Nov. 1994, and Muhammad Aidid's forces launched a campaign to reoccupy the 'Republic' in Jan. 1996.

Muhammad Farah Aidid was assassinated in July 1996 and succeeded by his son Hussein Aidid (b. 1965). Fighting between the Ali Mahdi Muhammad and the Hussein Aidid factions broke out in Dec. 1996 in Mogadishu, but on 20 Jan. 1997 the factions agreed to unify the city.

KEY HISTORICAL EVENTS

The Dutch first established a trading post at the Cape in 1652. The hinterland was then inhabited by the Khoisan peoples and, further east and north, by Bantu-speaking peoples. There was some white settlement over the next century. During the Napoleonic Wars, Britain took possession of the Cape and later many Boer (Dutch) settlers migrated north-east in the Great Trek. In the mid-19th century Britain ruled the Cape Colony and Natal along the coast of southern Africa, while in the interior the Afrikaners or Boers, descendants of Dutch settlers, established their own independent republics in the Transvaal and the Orange Free State. Some Bantu African peoples remained unconquered, notably the Xhosas east of the Cape Colony and, north of Natal, the Zulus, whose leader Shaka (died 1828) had formed a powerful kingdom in a great political and demographic upheaval called the *Mfecane*. The Sothos, who formed another new state under Moshoeshoe, resisted the Boers' encroachment on their land, until in 1868 Britain granted Moshoeshoe's request for a protectorate over Basutoland. Meanwhile, British settlers emigrated to Cape Colony and Natal in the 19th century, and from the 1860s many Indians were brought to Natal as indentured labourers on the sugar plantations. The population of the Cape Colony included many Afrikaners as well as the 'Coloured' community, descendants of Dutch settlers and indigenous Khoisan women and of Malay slaves. Most coloureds spoke Afrikaans, the offshoot of Dutch spoken by the Boers.

Britain annexed the Transvaal in 1877, and fought in 1879 with the Zulus who, under King Ketshwayo, won a victory at Isandhlwana, but were then defeated at Ulundi. Britain restored independence to the Transvaal (South African Republic) in 1884 and annexed Zululand in 1887. Both the British and the Boers fought African resistance for many years, the last major rising being in Natal in 1906. However, the British and Boers were also rivals for supremacy, especially after the discovery of diamonds at Kimberley in 1867 and of gold in the Transvaal in 1884. This led to an economic boom and wealth for many, of whom Cecil Rhodes, for a time prime minister of the Cape, was the dominant entrepreneurial figure.

In the South African War of 1899–1902 the British defeated and annexed the Boer republics. The Boer republics were given self-government again in 1907, and on 31 May 1910 Cape Colony, Natal, the Transvaal and the Orange Free State combined to form the Union of South Africa, a self-governing dominion under the British Crown. The Union was ruled by the white minority; the franchise accorded to some non-whites in Cape Colony was kept, but not extended to the other three provinces.

The Union's economy was based on gold and diamond mining, for which there was organized recruitment of migrant African labourers from Union territory and other parts of Africa. Pass Laws were in operation, controlling Africans' movements in the towns and industrial areas, where they were regarded officially as temporary residents and segregated in 'townships'. By an Act of 1913, 87% of the land was reserved for white ownership only, much of it being owned by white farmers, while Africans farmed as tenants or squatters.

African protests at segregation and lack of political rights were led by the African National Congress (ANC). From 1918 there were also many African labour protests. African rights were further suppressed after the coming to power in 1924 of the Afrikaner Nationalist Party, led by J. B. Hertzog. Hertzog's government secured recognition of full independence for South Africa by the Statute of Westminster on

11 Dec. 1931. It also promoted the status of the Afrikaans language and introduced new segregation measures. From 1948 the National Party government reinforced the segregation system, developing it into the system of Apartheid, enforced under prime ministers Malan (1948–54), Strijdom (1954–58), Verwoerd (1958–66) and Voerster (1966–78). The shooting by police of protesters against the Pass Laws at Sharpeville on 21 March 1960 led to a major crisis from which, however, the government emerged only stronger. The ANC and the Pan African Congress were banned, and the leaders forced to operate from exile after internal ANC leaders, including Nelson Mandela, were jailed in 1964.

On 31 May 1961 South Africa became a Republic outside the Commonwealth.

When P. W. Botha became prime minister in 1978, elements of the Apartheid system were modified. Africans were allowed to form legal trade unions, creation of Black local government authorities in cities was enacted, and the Acts banning marriage and sexual relations between people of different races were repealed.

A new constitution, approved in a referendum of white voters on 2 Nov. 1983 and in force from 3 Sept. 1984, created a new three-part parliament, with a House of Assembly for the Whites, a House of Representatives for the Coloureds, and a House of Delegates for the Indians; Africans remained without representation. At the same time an executive presidency was created, to which Botha was elected. Boycotts ensured low polls in the elections for the Coloured and Indian houses held on 22 and 28 Aug. 1984 respectively. The Whites retained their House of Assembly as elected in 1981 with its massive National Party majority.

From late 1984 Blacks in the cities and industrial areas staged large-scale protests, including strikes. Largely spontaneous—though the jailed ANC leader Mandela was seen as the Africans' hero—the protests involved large-scale violence. In June 1986 a state of emergency was imposed. Foreign condemnation of this led to the first economic sanctions against South Africa, imposed by a number of countries including the USA.

By 1989 the restrictions of Apartheid began to be removed, and the government announced its willingness to consider the extension of Black South Africans' political rights. In Feb. 1990 a 30-year ban on the African National Congress (ANC) was lifted and its leader, Nelson Mandela, released from prison.

At the Whites-only referendum on 17 March 1992, on the granting of constitutional equality to all races, turn-out was 85·6%. 1,924,186 (68·7%) votes were in favour; 875,619 against.

On 22 Dec. 1993 parliament approved (by 237 votes to 45) a Transitional Constitution paving the way for a new multi-racial parliament which was elected on 26–29 April 1994, and South Africa rejoined the Commonwealth. On 9 May 1994 Nelson Mandela was elected President and sworn in the following day. A new Constitution was signed into law in Dec. 1996. Also in Dec. 1996, South Africa set up the Truth and Reconciliation Commission which reported in Oct. 1998, concluding that most gross human rights violations committed by the former state had been through its security forces.

This area includes the uninhabited Prince Edward Island (41 sq. km) and Marion Island (388 sq. km), lying 1,900 km south-east of Cape Town and taken possession of in Dec. 1947. In 1994 Walvis Bay was ceded to Namibia, and Transkei, Bophuthatswana, Venda and Ciskei were re-integrated into South Africa.

At the census of 1996 the population was 40,583,573 (21,062,685 females), consisting of: African/Black, 31,127,631 (76·7% of total population); White, 4,434,697 (10·9%); Coloured, 3,600,446 (8·9%); Indian/Asian, 1,045 (2·6%).

The UN gives a projected population for 2000 of 46·26m.

Urban population (Oct. 1996 census) was 21,781,807.

Of the 5,407 immigrants in 1996, 2,315 were from Europe (of whom 1,052, UK); 1,020 from Asia (of whom 244, Taiwan); 1,549 from Africa, 257 from the Americas and 86 from Oceania. Of the 9,708 emigrants in 1996, 3,198 went to Europe (of

whom 2,243 to UK); 3,035 to Oceania (of whom 1,767, Australia); 1,786 to the Americas; 1,151 to Africa and 136 to Asia.

Due to under-registration and the high percentage of late registration, the collection of Black birth information was discontinued in 1981–89. As from 1991 no distinction between racial groups was made. The 1995 live birth figure includes 548,559 late registrations of births which actually took place between 1989–94. Infant mortality, 1990–95, 53 per 1,000 live births; fertility rate, 4·1 births per woman. Divorces in 1996: White, 15,831; African/Black, 7,243; Coloured, 4,190; Indian/Asian, 1,489. Expectation of life, 1990–95, was 60·0 years for males and 66·0 for females.

CLIMATE

There is abundant sunshine and relatively low rainfall. The south-west has a Mediterranean climate, with rain mainly in winter, but most of the country has a summer maximum, though quantities show a decrease from east to west. Pretoria, Jan. 72·5°F (22·5°C), July 52·3°F (11·3°C). Annual rainfall 29·5" (750 mm). Bloemfontein, Jan. 73°F (22·8°C), July 47°F (8·3°C). Annual rainfall 23" (564 mm). CONSTITUTION AND GOVERNMENT

A Transitional Constitution came into effect on 27 April 1994 and was in force until 3 Feb. 1997. Under it, the National Assembly and Senate formed a Constitutional Assembly (chaired by Mr Cyril Ramaphosa of the African National Congress [ANC]) which had the task of adopting a definitive Constitution by a two-thirds majority. This was adopted on 9 May 1996 and signed into law in Dec. 1996. The 1993 Constitution provided for an executive President, elected by Parliament; Deputy Presidents, nominated one each by parties gaining at least 20% of electoral votes; and a Parliament of 2 houses: a *National Assembly* and a *Senate*. The 1996 Constitution defines the powers of the President, Parliament (consisting of the National Assembly and the new National Council of Provinces), the national executive, the judiciary, public administration, the security services and the relationship between the 3 spheres of government. It incorporates a Bill of Rights

pertaining to, *inter alia*, education, housing, food and water supply, security as well as political rights.

A *Constitutional Court*, consisting of a president, a deputy president and 9 other judges, was inaugurated in Feb. 1995. The Court's judges are appointed by the President of the Republic from a list provided by the Judicial Service Commission, after consulting the President of the Constitutional Court and the leaders of parties represented in the National Assembly. A Constitutional Court judge is appointed for a non-renewable term of 12 years but must retire at the age of 70. The Court reviews the actions of the legislature, executive and judiciary in the light of the Bill of Rights, and the Constitution and can overturn legislation. The Court had to certify that the new Constitution conforms with the constitutional principles contained in the 1993 Constitution before it could become law.

The *National Assembly* is a legislature consisting of no fewer than 350 and more than 400 members directly elected for 5 years, 200 from a national list and 200 from provincial lists in the following proportions: Eastern Cape, 28; Free State, 14; Gauteng, 44; KwaZulu-Natal, 42; Mpumalanga, 11; Northern Cape, 4; Northern Province, 25; North-West, 12; Western Cape, 20. Parties gaining at least 5% of votes are entitled to Cabinet representation. In terms of the 1993 Constitution, which still regulates the 1999 elections, the 9 provincial legislatures are elected at the same time and candidates may stand for both. If elected to both, they have to choose between sitting in the national or provincial assembly. In the former case, the runner-up is elected to the Provincial Assembly. The National Council of Provinces (NCOP) consists of 90 members (10 from each province) indirectly elected by the provincial legislatures by proportional representation.

Bills (except money bills) may be introduced in either house but must be passed by both. A money bill may only be introduced in the National Assembly. If a bill is rejected by one house it is referred back to both after consideration by a joint National Asssembly-NCOP committee called the Mediation Committee. Bills relating to the provinces must be passed by the NCOP.

National Anthem. A combination of shortened forms of 'Die Stem van Suid-Afrika'/'The Call of South Africa' (words by C. J. Langenhoven; tune by M. L. de Villiers) and the ANC anthem 'Nkosi sikelel' iAfrika'/'God bless Africa'.

RECENT ELECTIONS

Parliamentary elections were held on 26–28 April 1994 (extended to 29 April in some areas). The electorate was 22·7m.; turn-out was 86%. 19 parties stood. The African National Congress (ANC) gained 252 seats with 62·7% of votes cast, the National Party (NP) 82 with 20·4%, the Inkatha Freedom Party (IFP) 43 with 10·5%, the Freedom Front (FF) 9 with 2·2%, the Democratic Party (DP) 7 with 1·7%, the Pan-Africanist Congress (PAC) 5 with 1·2% and the African Christian Democratic Party (ACDP) 2 with 0·5%. The second all-race elections were to be held on 2 June 1999.

The current state of parties in the National Assembly is as follows: ANC, 252; NP, 82; IFP, 43; FF, 9; DP, 7; PAC, 5; ACDP, 2. The 90 seats in the NCOP are divided as follows: ANC, 60; NP, 17; IFP, 5; FF, 5; DP, 3.

Provincial Government. The 1993 Transitional Constitution provided for 9 provinces, which may with a two-thirds majority adopt a constitution for the province in question. A provincial constitution may not be inconsistent with the provisions of the transitional Constitution except that different legislative and executive structures may be provided for. A provincial constitution only becomes effective after the Constitutional Court has certified that it is in accordance with the provisions of the Constitution. Each province has a provincial legislature in which the legislative authority of that province rests and which accordingly has the power to make laws for the province. A provincial legislature consists of a minimum of 30 and a maximum of 80 members elected by proportional representation. A provincial legislature is elected for 5 years or less in certain circumstances. If a legislature adopts a motion of no-confidence in the executive council of the province, including the Premier, the Premier must resign or dissolve the legislature for an election.

The executive council of a province consists of the Premier as chairperson and a maximum of 10 members who are appointed by the Premier from among the members of the provincial legislature.

Parliament and the provincial legislatures have concurrent legislative competence with regard to, *inter alia*, the following functional area or topics: agriculture, education (excluding tertiary education), health services, welfare services, housing, police, cultural matters, nature conservation (excluding national parks), soil conservation, the environment, animal control and diseases, casinos, racing and gambling, language policy, media services, airports, public transport, road traffic regulation, regional planning and development, tourism, trade and industrial promotion, consumer protection, indigenous law and customary law, traditional leadership, and urban and rural development. A provincial legislature has exclusive legislative competence regarding the following areas: abattoirs, ambulance services, archives (other than national archives), libraries (other than national libraries), liquor licences, museums (other than national museums), provincial planning, provincial cultural matters, provincial recreation and amenities, provincial sport, provincial roads and traffic, and veterinary services (excluding regulation of the profession).

Local Government. The 1996 Constitution envisages a transformation of the local government system, to give it a major role in building democracy and promoting socio-economic development.

The Local Government: Municipal Demarcation Act, 1998 provides for the establishment of an independent Municipal Demarcation Board. The Local Government Structures Act, 1998 makes provision for the division of powers and functions between the different categories of municipalities, and a system for the election of municipal councillors.

The Local Government: Systems Bill, which will provide for issues such as integrated development planning, performance management and credit control, was due to be finalized in 1999. The drafting process for the Local Government: Property Rates Bill, which will provide for a uniform system for the rating of all property in South Africa, has already commenced.

DEFENCE

A Defence Review has been approved by Parliament and the provision of new equipment for the Navy and Air Force is moving ahead. The cost is R29·7bn., against which the countertrade offers amount to R110bn. A Chief of Joint Operations is now responsible for the employment of all forces. There are 4 arms of the Service: the Army, Air Force, Navy and the newly styled Military Health Service. The final strength of the Department of Defence (DoD) is still under discussion. What is certain is that there will be a marked improvement in the ratio of combat troops to support troops, and a substantial reduction in the total force

strength. Part of the downsizing will be accomplished through natural attrition, voluntary severance and the non-renewal of expired contracts. Throughout 1998 the DoD continued to provide support to the SA Police Service in the fight against crime and violence. Defence expenditure totalled US$2,326m. in 1997 (US$60 per capita) and represented 1·8% of GDP.

Army. The Army numbered 54,300 in 1998. There is a paramilitary South African Police Service 140,000 strong.

Navy. Navy personnel in 1998 totalled 8,000.

INTERNATIONAL RELATIONS

South Africa was chairman of the Southern African Development Community and the Non-Aligned Movement in 1999 and is also a member of the UN, the Commonwealth (except during 1961–94) and the OAU.

In Sept. 1998 the Lesotho Prime Minister appealed to the Southern African Development Community for military intervention to restore normality. The SADC instructed South Africa and Botswana to plan for military intervention. All military objectives were achieved, albeit after a fierce firefight at the Makoanyane Base. Some of the forces originally committed have been withdrawn. The remainder are continuing with stabilization operations.

ECONOMY

Policy. A Reconstruction and Development Programme (RDP) was instituted under a government minister in 1994 (since 1996 the Minister of Finance) to run until 1999. Its policy aims are to meet basic needs, develop human resources, build the economy and democratize the state and society, and include as targets: Redistributing 30% of agricultural land; raising the annual number of houses built from 50,000 to 0·3m.; providing safe drinking water for 12m. persons; providing sanitation for 21m.; creating 0·3m. non-agricultural jobs; reversing privatization 'contrary to the public interest'; introducing anti-trust legislation; 'de-racializing' business ownership; improving industrial relations. In 1996 a decision was taken to integrate the RDP Fund into the budgets of the various delivery departments.

In spite of the reversing of privatization 'contrary to the public interest', privatization deals between 1990 and 1996 raised some US$1·2bn., more than in any other African country.

Performance. On account of the international financial crisis the economy slowed down significantly in 1998. After 6 years of growth, output and national income fell in the second half of the year. GDP growth was estimated to be 0·1% in 1998, well below what was expected.

The impact of instability in the global financial markets in 1998 is registered through the balance of payments and the present crisis was initially felt through the capital account. From 1994 to mid-1998, a net surplus, peaking at R34·6bn., was recorded on the capital account. However, from May 1998 investor sentiment changed, leading to an outflow of R5·4bn. in the third quarter. The current account of the balance of payments was expected to register a deficit of 2% in 1998, compared to 1·5% in 1997.

Gross foreign reserves increased in the first half of 1998 as a result of capital inflows. After falling from June to Nov., gross official reserves at the end of Jan. 1999 were R32·6bn., enough to cover 2·4 months' worth of imports. Net official reserves were US$2·4bn. at the end of Jan. 1999.

The economy is projected to grow by 1·8% in the 1999 fiscal year and by 3·2% and 3·8% in 2000 and 2001 respectively. Interest rates are expected to come down further during 1999.

Budget. Total revenue and expenditure of the central government's State Revenue Account in R1bn.:

	1995–96	*1996–97*	*1997–98*	*1998–99*
Revenue	127,269	144,857	161,976	179,000
Expenditure	157,360	173,659	186,747	204,300

The 1999 budget provides for expenditure of R216·8bn. or 30·6% of GDP; revenue, R191·7bn. National government gets R87·7bn. (47% of the total);

provincial governments get R86·3bn. (52%); local government gets R1·7bn. The national share includes R8·8bn. in conditional grants for provinces and local government, mainly in support of health services. R1bn. has been allocated for targeted poverty relief programmes in 1999, giving effect to several Jobs Summit commitments. This rises to R1·2bn. and R1·5bn. in 2000 and 2001.

From Sept. 1991 VAT at 10% replaced the 13% general sales tax. From 7 April 1993 the rate was increased from 10% to 14%. Corporate tax was reduced from 50% to 48% in April 1991, and in March 1993 was lowered from 48% to 40% of taxable income, but an additional tax of 15% on distributed profits was introduced.

Currency. The unit of currency is the *rand* (ZAR) of 100 *cents*. A single free-floating exchange rate replaced the former 2-tier system on 13 March 1995. Inflation fell to 6·9% in 1998, its lowest level in 25 years. In Jan. 1998 foreign exchange reserves were US$4,519m. and in Feb. 1998 gold reserves were 4·04m. troy oz.

Banking and Finance. The central bank and bank of issue is the South African Reserve Bank (established 1920), which functions independently. Its *Governor* is Mr Tito Mboweni. Total deposits, 31 Dec. 1998, R8,955m.; assets, R58,838m.

In 1997, 50 banks, including 9 branches of foreign banks and 4 mutual banks, were registered with the Office of the Registrar of Banks. 60 foreign banks have authorized representative offices in South Africa.

At 31 Dec. 1997, the 54 registered banking institutions collectively employed around 123,000 workers and had combined assets amounting to R550bn. Their offices (including both branches and agencies) totalled 3,272. If the 2,464 post offices through which the Postbank's services are rendered are included, banking services are provided at some 5,736 offices throughout the country. The Postbank receives deposits from but does not provide credit to the public.

The Banks Act, 1990 (Act No. 94 of 1990) governs the operations and prudential requirements of banks. As at 31 Oct. 1997 the minimum capital adequacy requirement was 8%.

There is a stock exchange at Johannesburg (JSE). Foreign nationals have been eligible for membership since March 1996.

Weights and Measures. The metric system is in use.

ENERGY AND NATURAL RESOURCES

Electricity. The total power station nominal capacity was 39,154 MW in 1997. There were 23 coal-fired power stations, 1 nuclear, 1 bagasse, 10 hydro-electric, 3 pumped storage and 11 gas turbine in service in 1996. Production in 1997 was 187,458m. kWh. Consumption per capita was 3,686 kWh in 1997. Eskom, a public utility, generates and sells 98·3% of all the electricity consumed in southern Africa.

In 1997, 63% of households had electricity.

Oil and Gas. With the development of the EM gas field, there are sufficient resources of off-shore natural gas to yield 30,000 bbls. a day as petroleum products until 2006. During 1998, 1,236,259 tonnes of gas and 249,812 tonnes of condensate were brought ashore.

Water. South Africa's average annual rainfall of about 497 mm is well below the world average. The unevenly distributed rainfall and high evaporation rate greatly affects the reliability and variability of river flow. Only about 62% or 33,000m. cu. metres of the mean annual run-off can be exploited economically. In addition about 5,400m. cu. metres may be obtainable from underground sources. Government activities are governed by the Water Act of 1998. They are administered by the Department of Water Affairs and Forestry which manages water quantity and quality as well as the demand for the resource.

A Water Research Commission was established in 1971 to co-ordinate and promote water research. Water availability is distributed poorly in relation to regions of economic growth, and major inter-basin water transfer schemes are therefore a feature of the South African infrastructure. The latest such scheme, the first of which has just been completed, is the Lesotho Highlands Water Project which diverts the Orange River headwaters within Lesotho through tunnels into the Vaal River System, which serves an area where about 60% of the gross domestic product of the country is generated. Lesotho receives royalties in exchange.

Minerals. Value of the main mineral production sales (in R1,000):

	1994	*1995*	*1996*	*1997*
Asbestos	140,238	119,711	100,418	71,988

Platinum-group metals	5,809,613	6,572,506	7,637,913	8,510,766

Total value of all minerals sold, 1996: R65,109m.; 1997: R65,825m.

Mineral production (tonnes) 1997: Coal, 248·6m.; iron ore, 32·7m.; manganese, 3·1m.; chrome ore, 5·7m.; copper, 153,058; limestone, 21·2m.; gold, 492; silver, 144; nickel, 34,830; platinum-group metals, 196; diamonds, 10,041,380 carats.

South Africa is a major producer of gold. Reserves were estimated at 401·54 tonnes in 1997. The value of gold production was R24·9bn. In 1996 the number of persons engaged in the mining industry was 551,677, of which 343,922 were involved in underground gold-mining operations.

Agriculture. The redistribution of 30% of land, expropriated since 1913, is envisaged by the Reconstruction and Development Programme. By 1998, 35,528 households had been reached and 377,347 ha of land had been designated. Dispossessed landowners are entitled to restitution from the state, though the rights of present landowners must be respected and compensation paid.

Much of the land suitable for mechanized farming has unreliable rainfall. Of the total farming area, natural pasture occupies 81% (69·6m. ha) and planted pasture 2·3% (2m. ha). About 13% of South Africa's surface area can be used for crop production. High potential arable land comprises only 22% of the total arable land. Annual crops and orchards are cultivated on 9·9m. ha of dry land and 1·2m. ha under irrigation.

There were some 57,000 commercial farming units in 1996. The following data exist on Black farmers: Smallholders who produce at or near to subsistence level, 1·03m. households; progressive small-scale farmers who consistently market agricultural products but for whom agriculture is not the sole or main source of income, 238,000 households; market-orientated commercial farmers for whom agriculture is the sole or main source of income, 3,100 households.

In 1997 agriculture, forestry and fisheries contributed 4·5% of GDP.

Production (1997, in 1,000 tonnes): Maize, 10,136; sorghum, 433; wheat, 2,478; groundnuts, 106; sunflower seed, 463; sugar cane, 22,155; oranges, 962; potatoes, 1,581; other vegetables, 2,058; grapes, 154; apples, 519.

Livestock, in 1,000 (1997): 13,667 cattle, 29,187 sheep, 6,644 goats, 1,617 pigs.

The 1997 production of red meat was 705,000 tonnes; poultry meat, 922,000 tonnes; wool, 57,268 tonnes; eggs, 282,000 tonnes; milk, 2·7m. tonnes.

Cotton-growing is undertaken by some farmers, the plant being better drought-resistant than either tobacco or maize. Viticulture and fruit-growing are important, and were valued at R5,106m. in 1996.

In 1997 the gross value of agricultural production was R41,745m. (field crops, R13,900m.; livestock products, R18,370m.; horticultural products, R9,475m.).

Forestry. The commercial forest plantations cover about 1·52m. ha, and indigenous high forests about 400,000 ha. At 31 March 1997 there were 797,610 ha of pine plantations, 597,964 ha of eucalyptus, 112,029 ha of wattle and 10,535 ha of other species. Total roundwood sales from the plantations were 18,641 cu. metres valued at R1,746m. Saw logs and veneer contributed 6,122 cu. metres (value R415·1m.) to these amounts; pulpwood, 8,788 cu. metres (R1,187·2m.); mining timber, 2,206 cu. metres (R89·1m.); and others—poles, matchwood, etc.—1,525 cu. metres (R54·5m.).

Fisheries. In 1995 fisheries landed 575,177 tonnes of fish, shellfish, seaweed and guano (almost exclusively from marine waters). Total output, wholesale value, 1995, R1,730m. The fishing fleet consisted of 3,974 vessels in 1995.

INDUSTRY

Net value of sales of the principal groups of industries (in R1m.) in 1997: food and food products, 54,843; beverages, 18,318; vehicles and vehicle parts, 33,829; basic iron and steel products, 24,710; basic precious and non-ferrous metal products, 11,995; petroleum products, 20,392; chemicals and products, 38,486; non-electrical machinery, 18,337; electrical machinery, 11,081; fabricated metal products except machinery, 22,327; printing and publishing, 10,264; wood and wood products, 6,073; clothing, 9,875; paper and products, 17,420; textiles, 10,138; plastic products, 9,128. Total net value including other groups, R360,764m. Manufacturing industry contributed R126,669m. (23·9%) of GDP which totalled R529,557m. in 1997.

Labour. According to the South African Reserve Bank, productivity increased from 107·2 in 1994 to 126·4 in June 1998. In Oct. 1996 the population of economically active age (15–65 years) in employment numbered 9,113,847 (3,631,944 females). Number of unemployed, Oct. 1996, 4,671,647 (2,631,730 females), comprising African/Black, 4,205,992 (2,395,421); Coloured, 299,231 (157,676); White, 89,066 (43,127); Indian/Asian, 50,379 (21,068). Unemployment rate, 1996, 33·9%. Unemployment is getting worse. Each day, some 1,000 people enter the labour market, while the formal sector of the economy sheds 200 jobs.

Of the economically active population, only 3m. are skilled or highly skilled (some 20%) while 7m. are employed in semi-skilled or unskilled jobs (together some 80% of the economically active population). The Skills Development Act, aspects of which came into effect on 2 Feb. 1999, aims to address the shortage of skills. South African professionals constitute fewer than 4% of the labour force; in craft and related trade, the percentage is 12%.

Industrial employment (except mining) at Sept. 1998: Manufacturing employed 1,375,072 workers; construction, 378,018; trade and accommodation services, 680,267. The Employment Standards Act, 1997, shortened the working week to 40 hours.

The Labour Relations Act, 1996 has had a significant impact on South Africa's workplaces and in laying the basis for a more stable and peaceful labour relations environment. It encourages the establishment of workplace forums and imposes collective bargaining in manufacturing industries. The Act set up the *Commission for Conciliation and Arbitration*.

The Government has set 3 broad representation targets for departments and provinces. Two of the targets, to be achieved by 1999, were an increase in black management to 50%, and more than doubling the number of women in middle and senior management from 11% to 30%. By 2005, at least 2% of public servants must be disabled people.

Trade Unions. The number of unionized workers has increased from 2·4m. in 1994 to 3·8m. in 1998. This constitutes almost 77% of workers in registered non-agricultural employment, and approximately 26% of the estimated 14,356,000 economically active population. The Congress of South African Trade Unions (COSATU; *General Secretary*, Sam Shilowa) has formed links with the ANC. It had 1·3m. members in 1994.

INTERNATIONAL TRADE

International sanctions on trade with South Africa were lifted in 1993.

Imports and Exports. South Africa, Botswana, Lesotho, Namibia and Swaziland are members of a customs union and the foreign trade statistics shown below represent the combined imports and exports of these countries. The total value of the imports and exports was as follows (in R1bn.):

Imports		*Exports*	
1995	98·5	1995	101·5
1996	115·5	1996	123·2
1997	129·8	1997	142·4
1998	144·1	1998	141·9

The main exports (in R1m.) in 1998 were: Natural or cultured pearls, 32·6; base metals and articles thereof, 22·0; mineral products, 18·9; chemical and allied products, 8·9; machinery and mechanical appliances, 9·5.

In Oct. 1998 a transshipment facility for containers opened at Kidatu, south-west of Dar es Salaam, Tanzania, providing a link between the 1,067 mm gauge railways of the southern part of Africa and the 1,000 mm gauge lines of the north. With the opening up of new markets for South Africa elsewhere in the continent, it will help to boost trade and facilitate the shipment of cargo to countries to the north.

COMMUNICATIONS

In 1990 Transnet, a public company comprising railways, harbours, pipelines and road transport, was set up, with the government as sole shareholder, as a first step to possible privatization.

Roads. In 1997 there were 361,145 km of non-urban roads (72·2% of these were paved). Of the total road network length, 6,592 km were national roads (5,512 km paved) and 354,553 km were provincial roads (55,710 km paved). In 1996 private firms and local authorities transported 474,409 passengers; Transnet carried 1·8m. tonnes of freight; and private firms, 407,905 tonnes. Motor vehicles in use as at Nov. 1998 included 3,788,847 passenger cars, 1,218,829 light commercial vehicles, 249,659 minibuses, 29,429 buses, 227,976 trucks and 161,976 motor cycles. In 1995 there were 500,233 road accidents with 10,256 fatalities.

Rail. In 1995 there were 20,005 km of 1,065 mm gauge (9,078 km electrified) and 314 km of 762 mm gauge. In 1995 railways carried 6m. long-distance passengers and 175m. tonnes of freight. In 1990 the South African Rail Commuter Corporation was set up to run commuter trains in major cities; it carried 458m. passengers in 1996–97.

Civil Aviation. Responsibility for civil aviation safety and security matters lies with the South African Civil Aviation Authority (CAA) which was established on 1 Oct. 1998. There are 3 international airports—at Cape Town, Durban and Johannesburg, and 6 major domestic passenger airports—at Bloemfontein, East London, George, Kimberley, Port Elizabeth and Upington. These airports are administered by the Airports Company of South Africa (ACSA) which was partially privatized in 1998.

South African Airways (SAA), Sun Air and Nationwide Air operate scheduled international air services within Africa and to Europe, Latin America and the Middle and Far East. Alliance Airlines was founded in Dec. 1994 as a joint venture between SAA and the governments and national carriers of Tanzania and Uganda. In 1995 SAA flew 77·9m. km and carried 4,907,700 passengers (1,402,600 on international flights). In 1998 services were also provided by Aero Zambia, Aeroflot, Aerolíneas Argentinas, Air Afrique, Air Austral, Air Botswana, Air Djibouti, Air France, Air Gabon, Air Madagascar, Air Malaŵi, Air Mauritius, Air Namibia, Air Seychelles, Air Tanzania Corporation, Air Zimbabwe, Alitalia, Alliance Air, American Airlines, Austrian Airlines, Balkan, British Airways, Cameroon Airlines, Cathay Pacific Airways, Congo Airlines, Delta Air Lines, Egyptair, El Al, Emirates, Ethiopian Airlines, Expedition Airways, Ghana Airways, Iberia, Intensive Air, Inter Air, JAL, Kenya Airways, KLM, LAM, Lesotho Airways, Lufthansa, Malaysia Airlines, Metavia Airlines, National Airlines, Olympic Airways, Qantas Airways, Royal Air Maroc, Royal Swazi National Airways Corporation, SABENA, SAS, Saudia, Singapore Airlines, Swissair, TAAG, TAP, Thai Airways International, Turkish Airlines, Uganda Airlines, United Airlines, Varig, Virgin Atlantic, Zambian Express and Zimbabwe Express Airlines.

South Africa has 34 registered carriers (passenger and freight)—14 international and 20 domestic. In 1998 the total number of passengers from South African airports was 8,810,873 (domestic, 6,199,214; international, 2,389,513; regional, 189,994; non-scheduled, 32,152).

Shipping. The South African Maritime Safety Authority (SAMSA) was established on 1 April 1998 as the authority responsible for ensuring the safety of life and property at sea and the prevention of pollution of the marine environment from ships. In 1998, the merchant fleet totalled 321,173 GRT. There are 7 major ports of which 2—Durban and Cape Town—are considered to be major hub ports offering a wide range of terminals and facilities. The 2 deep-water bulk ports are Saldanha and Richards Bay. The latter is situated on the east coast north of Durban and is the

world's largest bulk coal terminal. Saldanha, which is situated on the west coast north of Cape Town, handles both bulk oil and ore. The other major ports—at Mossel Bay, Port Elizabeth and East London—are multi-purpose ports. During 1998 the major ports handled a total of 186,500,391 tonnes of cargo, and a total of 13,559 ships calls were registered.

Telecommunications. Telkom SA Ltd officially came into being on 1 Oct. 1991. It is the second largest listed industrial company in South Africa and accounts for 2·2% of GDP. Some 96·5% of the network is digital. In 1997, there were 5·3m. installed telephones and 4·3m. installed exchange lines. In 1998, 35% of homes had telephones. In 1995 there were 535,000 cellular phone subscribers (13 per 1,000 persons), 1,100,000 PCs (27 per 1,000 population) and 75,000 fax machines, and in 1994, 7,300 telex subscribers. There were 1·04m. Internet users in Nov. 1998, around 2·3% of the population.

Postal Services. In 1997 there were 2,469 post offices and postal agencies, with plans to increase the network to 2,761. In 1997 around 8m. postal items were handled by the Post Office each working day, in excess of 2,400m. a year. South Africa has joined the Pan African Postal Union, a specialized agency of the OAU.

SOCIAL INSTITUTIONS

Justice. The common law of the republic is the Roman–Dutch law—that is, the uncodified law of Holland as it was at the date of the cession of the Cape in 1806. The law of England as such is not recognized as authoritative, though by statute the principles of English law relating to evidence and to mercantile matters, e.g., companies, patents, trademarks, insolvency and the like, have been introduced. In shipping and insurance, English law is followed in the former Cape Province, and it has also largely influenced civil and criminal procedure throughout the republic. In all other matters, family relations, property, succession, contract, etc., Roman–Dutch law rules, English decisions being valued only so far as they agree therewith.

The Judicial system in South Africa is constituted as follows: (a) the Constitutional Court, consisting of a President, Deputy President and 9 other judges; (b) the Supreme Court of Appeal, consisting of a Chief Justice, a Deputy Chief Justice and the number of judges of appeal determined by an Act of Parliament. It is the highest court of appeal, except in constitutional matters; (c) the High Courts, including any high court of appeal that may be established by an Act of Parliament to hear appeals from the High Courts. The High Courts may decide any constitutional matter, except a matter that only the Constitutional Court may decide, or a matter which is assigned to another court of a status similar to a High Court by an Act of Parliament. The Judge President of a provincial division may divide the area under his jurisdiction into circuit districts. In each such district there shall be held at least twice in every year and at such times and places determined by the Judge President, a court which shall be presided over by a judge of the division in which that district is situated. Such a court is known as the circuit local division for the district in question and is deemed to be a local division. The judges hold office till they attain the age of 70 years. A judge is expected to be available to perform service for an aggregate of 3 months a year until the age of 75. No judge can be removed from office except by the President after the National Assembly (at least two-thirds support from its members) has called for such judge to be removed on the grounds of incapacity, incompetence or gross misconduct. (d) Magistrates' Courts; and (e) any other court established or recognized in terms of an Act of Parliament, including any court of a status similar to either the High Courts or the Magistrates' Courts. The Magistrates' Court and all other courts may decide any matter determined by an Act of Parliament but a court of a status lower than a High Court may not enquire into or rule on the constitutionality of any legislation or any conduct of the President.

The 9 provinces are further divided into 435 magisterial districts each with a magistrates' court having a prescribed civil and criminal jurisdiction. In 1998, 1,566 were magistrates appointed. From this court there is an appeal to the provincial division of the High Court and then to the Court of Appeal. Magistrates' convictions carrying above a prescribed limit are subject to automatic review by a judge.

Magisterial districts have been grouped into 14 clusters headed by Chief Magistrates and in a few cases by Senior Magistrates. This system streamlined, simplified and provided uniform court management systems applicable throughout South Africa.

All criminal and civil cases are dealt with by judges (in the High Court) and magistrates (in the low court). Judges and magistrates are entitled to take judicial cognizance of customary (indigenous) laws and must, where relevant, apply them. A limited civil and criminal jurisdiction is conferred upon the courts of traditional leaders over his own tribe.

In 1998 there were 121 small claims courts, which have been introduced in a number of areas since 1984. These courts (where Commissioners preside) have jurisdiction only, limited by the quantum of damages and the nature of the claim.

The death penalty was abolished in June 1995. No executions have taken place since 1989.

The *Land Claims Court*, established under the Restitution of Land Rights Act of 1994 have jurisdiction throughout the Republic and have all such powers in relation to matters falling within its jurisdiction as are possessed by a High Court having jurisdiction in civil proceedings at the place where the land in question is situated, including the powers of a High Court, in relation to any contempt of court; and all the ancillary powers necessary or reasonably incidental to the performance of its functions, including the power to grant interlocutory orders and interdicts. The Courts have the power: to determine a right to restitution of any right in land accordance with this Act; to determine or approve compensation payable in respect of land owned by or in possession of a private person upon expropriation or acquisition of such land; to determine the person entitled to title to land; at the instance of any interested person and in its discretion, to grant a declaratory order on a question of law relating to matters in respect of which the Court has jurisdiction, notwithstanding that such person might not be able to claim any relief consequential upon the granting of such order; to determine whether compensation or any other consideration received by any person at the time of any dispossession of a right in land was just and equitable; to determine any matter involving the interpretation or application of this Act or the Land Reform (Labour Tenants) Act, 1996; to decide any constitutional matter in relation to this Act or the Land Reform (Labour Tenants) Acts, 1996; and to determine all other matters which require to be determined in terms of this Act.

The Labour Court established under the Labour Relations Act, 1995 is a superior court that has authority, inherent powers and standing, in relation to matters under its jurisdiction, equal to that which a court of a provincial division of the High Court has in relation to matters under its jurisdiction.

Spending on police, prisons and justice services will amount to R23·5bn. in 1999.

Religion. Almost 80% of the population in South Africa professes the Christian faith. Other major religious groups are the Hindus, Muslims and Jews. A sizeable minority of the population does not belong to any of the major religions but regard themselves as traditionalists or of no specific religious affiliation. Freedom of worship is guaranteed by the Constitution and official policy is one of non-interference in religious practices. In 1992 the Anglican Church of Southern Africa voted by 79% of votes cast for the ordination of women.

Education. The South African Schools Act, 1996 became effective on 1 Jan. 1997 and provides for: compulsory education for learners between the ages of 7 and 15 years of age, or learners reaching the ninth grade, whichever occurs first; two categories of schools, namely public schools and independent schools and the establishment and maintenance of public schools on private property; conditions of admission of learners to public schools; governance and management of public schools, the election of governing bodies and their functions; funding of public schools.

The process of review and renewal in South African education began in Aug. 1995 in response to the need to normalize and transform teaching and learning in a new democratic South Africa. From the outset, emphasis was placed on a shift from the traditional content-driven approach to outcomes-based education. It was announced that a new curriculum would be phased in—Curriculum 2005.

The R40bn. education budget accounted for 21·3% of the Government's total 1997-98 expenditure. This equals 6·5% of GDP. Tertiary education was allocated R5,431bn., with R4,934bn. going directly to universities and technikons. An amount of R300m. was set aside for the National Student Financial Aid Scheme, of which R200m. came from the Government and the rest from donors. The Government increased its spending on adult education from R6·5m. to R131·1m.

South Africa has 21 fully fledged universities, 2 of which are mainly non-residential institutions offering distance tuition. At present, only 1 of the 129 technical colleges in South Africa offers distance education.

The adult literacy rate in 1995 was 81·8% (81·9% among males and 81·7% among females). The female literacy rate is the highest in Africa.

Health. In 1998 the Interim South African Medical and Dental Council had registered the following personnel: 29,020 medical practitioners of whom 8,568 had specialist qualifications, 4,298 dentists, 365 dental specialists, 9,774 pharmacists and 87,783 nurses and midwives. In 1998 there were 596 hospitals with 140,218 beds, of which 27% were provided by private medical care.

Treatment in the public health service covers 75–80% of the population and is free of charge for the indigent, children under 6 years and pregnant mothers. Other patients are charged on a sliding scale based on their means. 60% of private health care is funded by medical insurance schemes and the remainder by privately paying patients. The free medical treatment scheme amounts to about R500m.

South Africa's first-of-its-kind telemedicine site has been launched to improve primary health care. Telemedicine, a stated Government priority for 1999, enables the remote diagnosis of patients at a distance through the transmission of the patient's medical data via telephone lines, microwave or satellite.

Welfare. The Government's most effective poverty alleviation programme is the payment of grants and pensions to about 2·9m. South Africans every month. Funded entirely by the state, this programme of social assistance amounted to R16·7bn. in the 1998-99 financial year. R50m. was allocated to 1,133 poverty alleviation projects in 1997-98. Child-support grants to care-givers of more than 23,823 children are paid out every month.

This welfare programme includes the payment of old age pensions, disability grants and foster care grants. In April 1998 a new grant—the child support grant—was introduced to assist poor households in caring for young children under the age of 7. It is envisaged that this grant will reach about 3m. children within 5 years.

The social assistance programme also includes social relief to applicants of a pension or grant as an interim measure.

South Africa's re-admission to world bodies has meant the ratification of international instruments such as the Convention on the Rights of the Child and reporting under the Convention on the Elimination of Discrimination Against Women.

The provision of welfare service—including care and protection services—is based on a partnership between government and private welfare organizations. These organizations receive financial support from Government.

Legislation was passed to amend the Child Care Act so as to promote the best interests of the child and to provide for the registration of shelters for street children, and the establishment of a Child Protection Register. A national protocol on the abuse and neglect of children has been finalized in all 9 provinces.

The rights of fathers of children born out of wedlock has also been upgraded in legislation to provide them with an opportunity to participate in adoption proceedings. The law provides for their consent to be given or for them to withhold such consent.

A Drug Master Plan has been finalized which will assist in curbing substance abuse, the trafficking in illegal drugs and will establish a Central Drug Authority.

Several pilot projects to test aspects of a new child and youth care system were completed and are being expanded in line with the policy guidelines which were developed. These aspects include youth justice services, professional foster care, residential care and wilderness outreach programmes for young people.

Pilot projects to test community-based models of care for older persons were also completed. This is in line with the new approach to ageing. Legislation has also been

passed which makes abuse of the elderly a criminal offence and which seeks to ensure that there is no racial discrimination in the admission of persons to old-age homes.

Welfare is responsible for the Victim Empowerment Programme (VEP) which seeks to offer support services to victims of crime and violence and ensure that victims' rights are enshrined in a victim's charter.

As part of the Department of Welfare, the National Population Unit (NPU) is tasked with ensuring that population concerns are integrated into the development planning of government.

CULTURE

Broadcasting. Broadcasting is supervized by the Independent Broadcasting Authority (IBA), set up in 1994 to establish a system free from political control. The IBA has granted licences to 76 community radio broadcasters and 12 private radio stations. The South African Broadcasting Corporation (SABC) as the public broadcaster has 16 radio services and 16m. listeners. The SABC offers 3 television channels in 11 languages, namely SABC1, SABC2 and SABC3. Midi Television with its E-TV channel was awarded the first private free-to-air television licence on 30 March 1998. M-Net (Electronic Media Network Limited), South Africa's first private subscription television service, was launched in 1986. Today, it is the premier pay-TV service with almost 1·2m. subscribers in 37 countries across the African continent.

In 1998, 85% of the population was able to receive a television signal.

Cinema. In 1990 there were approximately 1,200 cinemas.

Press. Initiated by the political and cultural changes, black empowerment of the media was assisted by the largely white ownership of the bigger media groups. Of the more important ones were control over *Sowetan* (circulation, 1997, 225,987), the largest daily of the former Argus Newspapers, by New Africa Investments Limited (Nail) of the Prosper Africa Group (1994); and *CityPress* (circulation, 258,3350) of Nasionale Pers through Ukhozi Media of the Ukhozi Investments Group (1996). Since 1996, local newspapers, 'freebies' and corporate newspapers have ventured into reporting in black languages.

There are 17 dailies and 12 weeklies. More than 100 provincial or country newspapers, most of which are weekly tabloids, serve particular towns or districts. Most are bilingual (English and Afrikaans).

Tourism. South Africa has moved up from the 55th most popular tourist destination in the world in 1990 to the 25th in 1998. There has been a 10% growth in the number of tourists over the last 3 years. The travel and tourism industry represents 7% of total employment with more than 730,000 South Africans directly involved in tourism. In 1997, 5,189,430 foreign tourists visited South Africa, of whom 3,724,940 were from African countries and 916,400 from Europe (332,790 from the UK and 192,280 from Germany), and contributed 4·6% to GDP.

Festivals. Best-known arts festivals: the Grahamstown Arts Festival in Eastern Cape province, is held in June/July; the Kleinkaroo Festival (Oudtshoorn, Western Cape), which has a strong Afrikaans component, is held in April; the Potchefstroom Arts Festival, in North-West province, is held in October; and the Manguang African Cultural Festival (Macufe) is held in September in Bloemfontein.

Libraries. There are 2 national libraries and hundreds of public (municipal) libraries, special libraries, government libraries, and university and college libraries.

There are 5 legal deposit libraries—the State Library, the South African Library, the Library of Parliament, the Bloemfontein Public Library and the Natal Society Library in Pietermaritzburg. South Africa's previous 2 national libraries—the South African Library in Cape Town and the State Library in Pretoria—have been amalgamated into the National Library of South Africa.

National Theatre and Opera. The 4 regional councils are the Performing Arts Council of the Transvaal (Pact), the Cape Performing Arts Board (Capab), the Performing Arts Council of the Orange Free State (Pacofs) and the KwaZulu-Natal Playhouse Company. Each of these councils operates from its own theatre

complex—Pact from the State Theatre in Pretoria; Pacofs from the Sand du Plessis Theatre complex in Bloemfontein; Capab from the Nico Malan Theatre centre in Cape Town; and the KwaZulu-Natal Playhouse Company from the Natal Playhouse, Durban.

Museums and Galleries. Almost half of the approximately 1m. museums in Africa are situated in South Africa. The biggest museums are situated in Johannesburg, Pretoria, Cape Town, Durban, Pietermaritzburg and Bloemfontein. Art galleries include: South African National Gallery, Cape Town; Johannesburg Art Gallery; Pretoria Art Museum; William Humphreys Art Gallery, Kimberley.

SOUTH AFRICAN PROVINCES

In 1994 the former provinces of the Cape of Good Hope, Natal, the Orange Free State and the Transvaal, together with the former 'homelands' or 'TBVC countries' of Transkei, Bophuthatswana, Venda and Ciskei, were replaced by 9 new provinces. Transkei and Ciskei were integrated into Eastern Cape, Venda into Northern Province, and Bophuthatswana into Free State, Mpumalanga and North-West.

The administrative powers of the provincial governments in relation to the central government are set out in the 1999 Constitution after a revision of the original text demanded by the Constitutional Court in 1996.

EASTERN CAPE

TERRITORY AND POPULATION

The area is 169,600 sq. km and the population at the Oct. 1996 census was 6,302,525, the third largest population in South Africa. Of that number: female, 3,394,469; African/Black, 5,448,495 (86% of the population); White, 330,294 (5%); Coloured, 468,532 (7%); Indian/Asian, 19,356 (0·3%). 37% of the population lived in urban areas. At the 1996 census, 83·8% spoke IsiXhosa as their home language, 9·6% Afrikaans, 3·7% English and 2·2% Sesotho.

Eastern Cape comprises 77 administrative districts (including Umzimkulu district, an enclave within KwaZulu-Natal).

CONSTITUTION AND GOVERNMENT

The provincial capital is Bisho. There is a 56-seat provincial legislature.

RECENT ELECTIONS

At the provincial elections held 27–29 April 1994, 48 seats were won by the ANC (with 84·6% of votes cast), 6 by the NP (with 9·9%), 1 by the DP (with 2·1%) and 1 by the PAC (with 2·0%).

CURRENT ADMINISTRATION

In Jan. 1999 the Executive Council comprised:

KEY HISTORICAL EVENTS

The modern Spanish state was founded with the marriage in 1469 of the heirs of the crowns of Castile and Aragón, respectively Isabel I and Fernando V. Under their joint reign Spain recovered Granada, the last Islamic territory in the Iberian peninsula and sponsored the modern discovery of America, both events in 1492. This dynasty ended in 1700 and subsequently the French Bourbon dynasty was enthroned, with Felipe V as its first king; the present monarch, Juan Carlos I, installed in 1975, is his direct descendant.

Queen Isabel II, who came to the throne in 1833, was deposed and exiled in 1868 by a liberal revolution. A provisional government, headed by the Duke de la Torre, established universal male suffrage and convened a constituent election for Jan. 1869. The Cortes (Parliament) approved a new constitution and the deputies chose as the new king Amadeo I of the then reigning Italian dynasty of Savoy. Unable to adapt to Spanish politics, he abdicated on 11 Feb. 1873. The Cortes immediately proclaimed a republic.

The first brief republican experience saw great instability. On 29 Dec. 1874, in Sagunto, Gen. Martínez Campos led a *coup* and restored the Bourbon monarchy, with Alfonso XII, the son of the exiled Queen Isabel II, as king. A general election took place early in 1876 and the new Cortes approved a constitution which was effective until 1923. This period, known as the Restoration, saw the reimposition of a restricted suffrage (universal suffrage was not re-established until 1890), and was dominated by two parties, Conservative and Liberal, led respectively by A. Cánovas del Castillo and P. M. Sagasta, both of whom served as prime minister several times in the last quarter of the 19th century. Alfonso XII died in 1885. His wife María Cristina of Hapsburg was regent till their son, Alfonso XIII, reached his majority in 1902.

During the period of the Restoration, Spain still had a very backward economy and very low standards of living. At the same time Spain was embroiled in external conflicts, with wars in northern Morocco and in the remaining colonies of Cuba and the Philippines. The US intervention led to the cession of Philippines, Puerto Rico and Guam, and also of Cuba which formally became independent in 1901.

Spain was neutral in the First World War, leading to a boom in industry and trade. A new industrial working class was then emerging, amidst a climate of industrial unrest which also showed itself in opposition to conscription for the war in the north of Morocco. In Sept. 1923 Gen. Primo de Rivera led a *coup* and abolished the 1876 constitution, closed down the Cortes and governed by decree until his resignation in Jan. 1930. During his dictatorship the war in the Spanish Protectorate in Morocco came to an end.

An interim period followed until the municipal elections of 12 April 1931, which were won by a republican-socialist coalition in Madrid, provincial capitals and other urban areas. Two days later Alfonso XIII exiled himself and the republic was proclaimed a second time. In June a new Cortes was elected; it drafted a new constitution, which was in force by Dec. 1931. Complete religious freedom and an agrarian reform were the significant landmarks of this period. An election in 1932, for the first time with female suffrage, established a very conservative coalition government, which resulted in serious rioting in Oct. 1934. An election in Feb. 1936 gave power to the Popular Front, a coalition of all left parties, including the then tiny Communist party.

On 18 July 1936 the colonial army in northern Morocco, led by Gen. Francisco Franco, and some other military units rebelled against the government. The rebellion was crushed in a few days in Madrid, Barcelona, Valencia and almost all industrial and mining areas. But the rural regions were easily controlled by the rebels who

received substantial help in men, tanks and aircraft from Germany, Italy and Portugal. The government, however, suffered from the 'non-intervention' policy declared by the democracies, notably Britain and France. The International Brigades, a volunteer force, and conditional aid from the USSR were the only significant foreign support received by the Spanish republic. Franco's forces finally overcame all resistance and the war ended on 1 April 1939. Gen. Franco was chief of state till his death on 20 Nov. 1975. His brutal régime was modelled on those of the Axis countries. Nevertheless, Franco's Spain did not take part in the Second World War. The 15 years following the Civil War saw extremely depressed economic conditions.

A nominal monarchy existed from 1947 but with a vacant throne until 1969 when the francoist state accepted the future succession in favour of Juan Carlos de Borbón, grandson of Alfonso XIII. Franco recognized the independence of Morocco in 1956 and ceded the small Spanish protectorate to the Moroccan Government. Spain also withdrew from Equatorial Guinea in 1968 but continued to occupy Western Sahara until 1976.

On 22 Nov. 1975, following Gen. Franco's death, Juan Carlos was proclaimed king. A gradual return to democracy began. A referendum held in Dec. 1976 endorsed some key reforms making possible a free election on 15 June 1977. The elected bicameral Cortes drafted a new constitution which came into force on 29 Dec. 1978.

In the Basque region terrorist activity by the separatist organisation ETA has brought a reaction from the local population in the form of a strong peace movement. In 1994 it was believed that 10 ETA units were operational in Spain. ETA announced an indefinite ceasefire in Sept. 1998.

[1]Ceuta and Melilla gained limited autonomous status in 1994.

The capitals of the autonomous communities are: *Andalusia*: Seville; *Aragón*: Zaragoza (Saragossa); *Asturias*: Oviedo; *Baleares*: Palma de Mallorca; *Basque Country*: Vitoria; *Canary Islands*, dual and alternative capital, Las Palmas and Santa Cruz de Tenerife; *Cantabria*: Santander; *Castilla-La Mancha*: Toledo; *Castilla y León*: Valladolid; *Catalonia*: Barcelona; *Extremadura:* Mérida; *Galicia*: Santiago de Compostela; *Madrid*: Madrid; *Murcia*: Murcia (but regional parliament in Cartagena); *Navarra*: Pamplona; *La Rioja*: Logroño; *Valencian Community*: Valencia.

The capitals of the provinces are the towns from which they take the name, except in the cases of Álava (capital, Vitoria), Asturias (Oviedo), Baleares (Palma de Mallorca), Cantabria (Santander), Guipúzcoa (San Sebastián), La Rioja (Logroño), Navarra (Pamplona) and Vizcaya (Bilbao).

The islands which form the Balearics include Majorca, Minorca, Ibiza and Formentera. Those which form the Canary Archipelago are divided into 2 provinces, under the name of their respective capitals: Santa Cruz de Tenerife and Las Palmas de Gran Canaria. The province of Santa Cruz de Tenerife is constituted by the islands of Tenerife, La Palma, Gomera and Hierro; that of Las Palmas by Gran Canaria, Lanzarote and Fuerteventura, with the small barren islands of Alegranza, Roque del Este, Roque del Oeste, Graciosa, Montaña Clara and Lobos.

Places under Spanish sovereignty in Morocco (Alhucemas, Ceuta, Chafarinas, Melilla and Peñón de Vélez) constitute the 2 provinces of Ceuta and Melilla.

Languages. The Constitution states that 'Castilian is the Spanish official language of the State', but also that 'All other Spanish languages will also be official in the corresponding Autonomous Communities'. At the last census (1991) Catalan (an official EU language since 1990) was spoken in Catalonia by 68% of people, Baleares (66·9%), Valencian Community (51%, where it is frequently called Valencian), and in Aragón, a narrow strip close to the Catalonian and Valencian Community boundaries. Galician, a language very close to Portuguese, was spoken by a majority of people in Galicia (91%); Basque by a significant and increasing minority in the Basque Country (26·3%), and by a small minority in north-west Navarra (12%). It is estimated that one-third of all Spaniards speaks one of the other 3 official languages as well as standard Castilian. In bilingual communities, both Castilian and the regional language are taught in schools and universities.

CLIMATE

Most of Spain has a form of Mediterranean climate with mild, moist winters and hot, dry summers, but the northern coastal region has a moist, equable climate, with rainfall well distributed throughout the year, mild winters and warm summers, and less sunshine than the rest of Spain. The south, in particular Andalusia, is dry and prone to drought. At the Earth Summit in New York in 1997, the President of the Spanish Government, José María Aznar, highlighted the problem of desertification in Spain and the need to combat it.

CONSTITUTION AND GOVERNMENT

Following the death of General Franco in 1975 and the transition to a democracy, the first democratic elections were held on 15 June 1977. A new Constitution was approved by referendum on 6 Dec. 1978, and came into force 29 Dec. 1978. It established a parliamentary monarchy.

The reigning king is **Juan Carlos I**, born 5 Jan. 1938. The eldest son of Don Juan, Conde de Barcelona, Juan Carlos was given precedence over his father as pretender to the Spanish throne in an agreement in 1954 between Don Juan and General Franco. Don Juan, who resigned his claims to the throne in May 1977, died on 1 April 1993. King (then Prince) Juan Carlos married, in 1962, Princess Sophia of Greece, daughter of the late King Paul of the Hellenes and Queen Frederika. *Offspring:* Elena, born 20 Dec. 1963, married 18 March 1995 Jaime de Marichalar; Cristina, born 13 June 1965, married 4 Oct. 1997 Iñaki Urdangarín; Felipe, Prince of Asturias, Heir to the throne, born 30 Jan. 1968.

The King receives an allowance, part of which is taxable, approved by parliament each year. In 1997 it was 990m. pesetas. There is no formal court; the (private) *Diputación de la Grandeza* represents the interests of the aristocracy.

Legislative power is vested in the *Cortes Generales*, a bicameral parliament composed of the Congress of Deputies (lower house) and the Senate (upper house). The *Congress of Deputies* has not less than 300 nor more than 400 members (350 in the general election of 1996) elected in a proportional system under which electors choose between party lists of candidates in multi-member constituencies.

The *Senate* has 257 members of whom 208 are elected by a majority system: the 47 mainland provinces elect 4 senators each, regardless of population; the island provinces 5 (Baleares, Las Palmas) or 6 (Santa Cruz de Tenerife); and Ceuta and Melilla, 2 senators each. To these are added 49 senators elected by the parliaments of the autonomous communities as regional representatives. Deputies and senators are elected by universal secret suffrage for 4-year terms. The Prime Minister is elected by the Congress of Deputies.

The *Constitutional Court* is empowered to solve conflicts between the State and the Autonomous Communities; to determine if legislation passed by the Cortes is contrary to the Constitution; and to protect the constitutional rights of individuals violated by any authority. Its 12 members are appointed by the monarch: 4 on the proposal of the Congress of Deputies; 4 on the proposal of the Senate; 2 on the proposal of the General Council of the Judicial Power (*see under* JUSTICE, *below*); and 2 on the proposal of the cabinet. It has a 9-year term, with a third of the membership being renewed every 3 years.

European Parliament. Spain has 64 representatives. At the June 1994 elections turn-out was 59·1%. The PP won 28 seats with 40·2% of votes cast (political affiliation in European Parliament: European People's Party); the PSOE, 22 with 30·6% (European Socialist Party); the IU, 9 with 13·4% (European United Left); the CiU, 3 with 4·6% (European People's Party; European Liberal Democratic and Reformist Group); the Nationalist Coalition, 2 with 2·8% (European People's Party).

National Anthem. 'Marcha Real' ('Royal March'); no words, tune anonymous.

RECENT ELECTIONS

The last general election took place on 3 March 1996; 67 parties presented candidates. The electorate was 24,985,343; turn-out was 78·06%. In the *Congress of Deputies* the Popular Party (PP) won 156 seats with 38·2% of votes cast; the Spanish Workers' Socialist Party (PSOE), 141 with 37·4%; the Communist-led United Left Coalition (IU), 21 with 10·5%; Convergence and Union (CiU; Catalan nationalists), 16 with 4·6%; Basque Nationalist Party (PNV), 5 with 1·2%; Canarian Coalition (CC), 4 with 0·8%; Galician Nationalist Bloc (BNG), 2 with 0·8% (first time in Parliament); the Basque separatist Herri Batasuna Party (HB), 2 with 0·7%; the Catalan separatist Esquerra Republicana de Catalunya (ERC), 1 with 0·6%; the non-radical Basque separatist Eusko Alkartasuna Party (EA), 1 with 0·4%; Valencian Union (UV), 1 with 0·3%. In the *Senate*, the Popular Party won 112 seats; PSOE, 81; CiU, 8; PNV, 4; CC, 1; others, 1 each.

Parliamentary elections are due to take place no later than March 2000.

CURRENT ADMINISTRATION

A government was formed in May 1996. José María Aznar, leader of the democratic right-wing Popular Party, was appointed President of the *Council of Ministers* at the

head of a minority PP government supported by 3 regionalist parties, from Catalonia, the Basque Country and Canary Islands, of which the most decisive is the Catalan nationalist coalition, the CiU. In March 1999 the government comprised:

President of the Council and Prime Minister: José María Aznar López (b. 1953; PP; elected 3 March 1996; sworn in 5 May 1996).

Deputy Vice-President and Minister of the Prime Minister's Office: Francisco Álvarez Cascos Fernandez (PP). *Deputy Vice-President and Minister of Economy and Finance:* Rodrigo Rato Figaredo (PP). *Foreign Affairs:* Abel Juan Matutes (PP). *Justice:* Margarita Mariscal de Gante y Mirón (ind). *Defence:* Eduardo Serra i Rexach (ind). *Interior:* Jaime Mayor Oreja (PP). *Development, Public Works:* Rafael Arias-Salgado y Montalvo (PP). *Education and Culture:* Esperanza Aguirre y Gil de Biedma (PP). *Labour and Social Affairs:* Javier Arenas Bocanegra (PP). *Industry, Energy and Tourism:* Josep Piqué i Camps (ind). *Agriculture, Fisheries and Food:* Loyola de Palacio del Valle-Lersundi (PP). *Public Administration:* Mariano Rajoy Brey (PP). *Health and Consumer Affairs:* José Manuel Romay Beccaría (PP). *Environment:* Isabel Tocino Biscarolasaga (PP).

The *Speaker* (and President) of the Congress of Deputies is Federico Trillo (PP); the *Speaker* (and President) of the Senate is José Ignacio Barrero (PP).

The IU (United Left Coalition) adopted 6 resolutions in Sept. 1997 which effectively provoked the break-up of the coalition and the distancing from it of its former regionalist elements, among them the Catalan Left.

Local Government. The Constitution of 1978 establishes a semi-federal system of regional administration, with the Autonomous Community (*Comunidad Autónoma*) as its basic element. There are 17 autonomous communities, each of them having a Parliament elected by universal vote, and a regional government; all possess exclusive legislative and executive power in many matters, as listed in the national Constitution and in their own fundamental law (*estatuto de autonomía*). The 17 communities comprise 50 provinces (established by the administrative division of 1833): 7 communities (Asturias, Baleares, Cantabria, La Rioja, Madrid, Murcia and Navarra) are composed of 1 province only; the other 10 are formed by 2 or more.

In Sept. 1994 Ceuta and Melilla gained limited autonomous status, with legislative assemblies replacing their municipal councils. In 1997, 10 Communities (Aragón, Asturias, Baleares, Cantabria, Castilla-La Mancha, Castilla y León, Extremadura, Madrid, Murcia, La Rioja) gained authority (not previously held) over matters such as health and education, under new statutes (Art 143 of the Constitution); and an all-party initiative to re-examine the constitutional status of the Basque Country and neighbouring part-Basque province of Navarra was mooted. This was following a year during which the government consolidated a tough approach to Basque separatist terrorism after national outrage in July over ETA's assassination of a young local councillor.

Date of last elections and party composition of the autonomous communities: *Andalusia* (March 1996), PSOE 52, PP 40, IU, 13, Andalusian Party 4. *Aragón* (May 1995), PP 27, PSOE 19, Aragonese Regionalist Party 14, IU 5, others 2. *Asturias* (May 1995), PP 21, PSOE 17, IU 6, others 1. *Baleares* (May 1995), PP 30, PSOE 16, nationalists 6, IU 3, others 4. *Basque Country* (Oct. 1998), PNV 21, PSE-Euskadiko Ezquerra/PSOE 14, HB 14, PP 16, EA 6, IU-EB (United Left-Ezker Batua) 2, UAL 2. *Canary Islands* (May 1995), PP 18, PSOE 16, CC 22, others 4. *Cantabria* (May 1995), PP 13, PSOE 10, regionalists 6, IU 3, others 7. *Castilla-La Mancha* (May 1995), PSOE 24, PP 22, IU 1. *Castilla y León* (May 1995), PP 50, PSOE 27, IU 5, others 2. *Catalonia* (Nov. 1995), CiU 60, PSOE 34, PP 17, ERC 13, Iniciativa per Catalunya 11. *Extremadura* (May 1995), PSOE 31, PP 27, IU 6, others 1. *Galicia* (Oct. 1997), PP 42, PSdG/EG/OV 15, BNG 18. *La Rioja* (May 1995), PP 17, PSOE 12, regionalists 2, IU 2. *Madrid* (May 1995), PP 54, PSOE 32, IU 17. *Murcia* (May 1995), PP 26, PSOE 15, IU 4. *Navarra* (May 1995), PP 17, PSOE 11, regionalists 10, HB 5, EA 2, IU 5. *Valencian Community* (May 1995), PP 42, PSOE 32, UV 5, IU 10.

The Provincial Council (*Diputación Provincial*) is the administrative organ of the province, except in the 7 autonomous communities composed of only one province, where there are only the regional legislative and executive powers. The provincial council is indirectly elected, except in the 3 Basque provinces where they are elected by universal suffrage every 4 years. Each of the 7 main islands of the Canaries has a

directly elected corporation, the *Cabildo Insular*, to rule its special interests; in the main islands of the Balearics there is an elected *Consell Insular*.

The provinces are constituted by the association of municipalities (8,095 in 1997). Municipalities are autonomous in their own sphere. At their head stands the Municipal Council *(ayuntamiento)*, members of which are elected in a universal ballot every 4 years, and they, in turn, elect one amongst them as Mayor *(alcalde)*. In 1997, 6,462 municipalities had fewer than 3,000 inhabitants (3,713 less than 500). Resource-poor municipalities may form associations (*mancomunidades*) to share services. Elections were held in May 1995 for 65,732 municipal councillors. The electorate was 32,019,932. Turn-out was 69·79%. The Popular Party won 35·2% of votes cast (25·1% in 1991), the PSOE 30·8% (38·5%), the IU coalition 11·6% (8·5%).

DEFENCE

Conscription is for 9 months. Civilian service may be offered as an alternative. Recruits to the national police are exempt from conscription. Since 1989 women have been accepted in all sections of the armed forces. In 1996 the government began the phased abolition of conscription (starting with males born in 1984).

In 1997 defence expenditure totalled US$7,671m. (US$196 per capita), representing 1·4% of GDP.

The Army is divided into 8 Regional Operation Commands (including 2 overseas) and consists of 1 mechanized division, 2 armoured cavalry, 1 mountain, 3 light infantry, 1 airborne, 1 artillery, 1 engineer and 1 air-portable brigade; 3 island garrisons, 3 special operations battalions and the Spanish Legion. A Rapid Reaction Force is formed from the Spanish Legion and the airborne and air-portable brigades. There is also an Army Aviation brigade. Her air group comprises 8 AV-8S Matador, 8 Sea King anti-submarine helicopters, 2 Sea King early warning helicopters and about 4 AB-212 light helicopters. There are also 8 French-designed submarines (4 Daphne class, 4 Agosta class), 6 US-design Santa María guided missile frigates with Standard SM-1 surface-to-air missiles, 5 other guided missile frigates, and 6 smaller frigates, 5 offshore patrol vessels, 10 coastal and 16 inshore patrol craft, 4 ocean minesweepers, 8 coastal minesweepers, 2 amphibious troop transports, 2 tank landing ships and 13 landing craft. The Naval Air Service operates 20 AV-8S Matador and EAV-8B Harrier-II attack aircraft, 34 S-70B Seahawk, Sea King, SH 60B, AB-212 and Hughes 500 anti-submarine helicopters, 3 radar early warning Sea Kings and a few additional training and utility aircraft. The Air Force operates 7 Orion maritime patrol aircraft on anti-submarine tasks.

There are 8,000 marines, who provide 1 amphibious regiment and garrison regiments at the main bases. Main naval bases are at Ferrol, Rota, Cádiz, Cartagena, Palma de Mallorca, Mahón and Las Palmas (Canary Islands).

In 1997 personnel totalled 39,000 (13,500 conscripts) including the marines and 1,000 naval air arm.

Air Force. The Air Force is organized as an independent service, dating from 1939. It is administered through 4 operational commands. These are geographically oriented following a reorganization in 1991 and comprise Central Air Command, Straits Air Command, Eastern Air Command and Air Command of the Canaries.

The Tactical Air Command has 2 fighter-bomber squadrons of Spanish-built Northrop SF-5s and 1 aero-naval co-operation squadron with P-3 Orion anti-submarine aircraft. Air Combat Command has 1 squadron of RF-4C Phantom IIs, 4

squadrons of F-18 Hornets and 3 squadrons of Mirage F-1s. 2 Boeing 707 and 5 KC-130H tankers support the fighter squadrons. 3 wings of Air Transport Command operate C-130 Hercules, CN-235s and Spanish-built CASA Aviocars. Air Command of the Canaries has 3 squadrons, equipped with Aviocar transports, Mirage F1 fighter-bombers, F27 Maritime aircraft and Super Puma helicopters for search and rescue. Other equipment includes 3 Boeing 707s, 8 Falcons and helicopters for VIP transport; and aircraft for photographic, firefighting, target towing and research duties. Air-sea rescue units have Aviocars and Super Puma helicopters.

American-built F33 Bonanza and Chilean-built Pillan piston-engined aircraft are used for basic training, after which pupil pilots progress to CASA C-101 jet aircraft. Two-seat versions of operational types are used as advanced trainers. Other training types include Hughes 300 and S-76 helicopters.

Strength (1997) 30,000 (13,000 conscripts).

INTERNATIONAL RELATIONS

Spain is a member of the UN, the Council of Europe, NATO, WEU, the EU, OSCE and OECD, and is a signatory to the Schengen Accord (*see* EUROPEAN UNION *under* MAJOR POLICY AREAS, *above*).

ECONOMY

Performance. Spain's current account on its balance of payments came out of deficit in 1995 for the first time since the mid-1980s. The balance showed a surplus of 586,500m. pesetas for the first 9 months of 1997. Real GDP growth (forecast 1998), 3·7%; (estimate, 1997), 3%—up from 2·1% in 1996. Total GDP (estimate 1997, in US$1): 604,400m. Government debt (1996, % of GDP): 69·5%. Foreign debt (1995, in US$1): 277,500m.

A privatization programme has led to the selling of profitable state concerns but loss makers such as the Iberian airline absorb a disproportionate amount of public money.

Budget. A Convergence Plan covering 1997-2000 envisages an annual GDP growth of 3·2%, a reduction of public debt to 1·6% of GDP, the limitation of inflation to below 2·5%, and the creation of 1m. jobs by deregulating and increasing the flexibility of the economy and redistributing taxes. Government expenditure (1996, % of GDP): 43·1% (1997 estimate: 41·6%).

Currency. On 1 Jan. 1999 the euro (EUR) became the legal currency in Spain and the *peseta* became a subdivision of it; irrevocable conversion rate 166·386 pesetas to 1 euro. The euro, which consists of 100 cents, will not be in circulation until 1 Jan. 2002. There will be 7 euro notes in different colours and sizes denominated in 500, 200, 100, 50, 20, 10 and 5 euros, and 8 coins denominated in 2 and 1 euros, then 50, 20, 10, 5, 2 and 1 cents. Even though notes and coins will not be introduced until 1 Jan. 2002 the euro can be used in banking; by means of cheques, travellers' cheques, bank transfers, credit cards and electronic purses. Banking will be possible in both euros and pesetas until the peseta is withdrawn from circulation—which must be by 1 July 2002.

The *peseta* is notionally divided into 100 *céntimos*, though they have not been in use since 1984. In Feb. 1998 foreign exchange reserves were US$65,773m. and gold reserves were 15·63m. troy oz. Inflation in 1997 was 2% (3·2% in Dec. 1996), with a forecast of 2% for 1998. Total money supply in Feb. 1998 was 23,491bn. pesetas.

Banking and Finance. The central bank is the Bank of Spain (*Governor*: Luis Ángel Rojo) which gained autonomy under an ordinance of 1994. Its governor is appointed for a 6-year term. The Banking Corporation of Spain, *Argentaria*, groups together the shares of all state-owned banks, and competes in the financial market with private banks. In 1993 the government sold 49·9% of the capital of Argentaria; the remainder in 2 flotations ending on 13 Feb. 1998.

In terms of assets held in Nov. 1997 (in 1m. pesetas), the main banks were: Grupo Santander, 12,277,367; Banco Bilbao Vizcaya, 13,077,448; Banco Central Hispano, 10,444,037; Banco Popular, 2,433,008; Banesto, 5,305,252; Argentaria (no consolidated balance). On 31 Oct. 1997 Spanish banks deposits (in 1,000m. pesetas) amounted to 17,721 (private banks, 10,178; government banks, 7,543); foreign banks, 1,667; savings banks, 24,525; rural (farmers) savings banks, 3,235.

There are stock exchanges in Madrid, Barcelona, Bilbao and Valencia. The flotation in 1997 of public-sector holdings brought some 2m. new domestic investors into the Spanish equity market; privatization receipts in 1997 were expected to total 1,600,000m. pesetas.

Weights and Measures. The metric system was introduced in 1859.

ENERGY AND NATURAL RESOURCES

Electricity. Installed capacity was 39·58m. kW in 1995. Nuclear and hydro-electric power stations provided just over half of Spain's electricity in 1990. The government announced in 1991 that no new nuclear power stations (there were 9 in 1997) would commence operating before 2000. The total electricity output in 1996 amounted to 175,604m. kWh, of which 41,619m. was hydro-electric, 56,204m. nuclear, and 77,781m. other (carbon, natural gas, petroleum). Consumption per capita in 1995 was an estimated 3,752 kWh.

In Feb. 1997 the government disposed of a 25% stake in Endesa, the country's main electricity generator and distributor, reducing its shareholding in the group to 41%; full privatization was due for completion in 1999. The Electrical Protocol drawn up between the government and electricity utilities to meet EU requirements is to be completed over a 10-year period, and will largely dismantle the highly regulated, interventionist structure which preceded it. This should provide for a more open market; construction of new generators will be liberalized and prices are expected to fall in real terms by 25-30% over 5 years. Industry analysts forecast a market which will favour hydro- and gas-powered generators.

Oil and Gas. Spain is heavily dependent on imported oil; Mexico is its largest supplier. Crude oil production (1996), 554,000 tonnes.

The government sold its remaining stake in the oil, gas and chemicals group Repsol in 1997. Natural gas production (1996) totalled 596m. cu. metres. Efforts are being made to increase consumption; on 1 Nov. 1996 Spain opened the Algerian gas link (Maghreb-Europe Pipeline), which is expected to supply 6,200m. cu. metres by 2000.

Minerals. Spain has a relatively wide range of minerals; the mining sector accounted for 1% of GDP in 1994. Coal production (1995), 13m. tonnes; other principal minerals (1992, in 1,000 tonnes): anthracite, 6,177; lignite, 18,689; iron, 1,334; pyrites, 406; copper, 9; lead, 30; zinc, 205; fluorspar, 97; potassium salts, 594; (1992, in tonnes) uranium, 862; tin, 7. In 1995 a large mercury deposit was found in southern Spain which could raise mercury levels to within a quarter of proven world reserves. A modern gold mine in Asturias (opened Oct. 1996) is expected to produce about 1,000 troy oz a year.

Agriculture. There were 1,384,000 farms in Spain in 1998. Agriculture contributed about 3% of GDP and employed about 9·3% of the workforce in 1998. It accounts for 15·8% of exports and 15·6% of imports. Crop production accounted for 62·2% of total agricultural production in 1990; animal production for 37·8%.

19,354,700 ha were under cultivation in 1995, including 4,372,600 ha under irrigation and 6,434,000 ha under pasture. There were (1994) 789,747 tractors, 280,989 motor ploughs (1992) and 49,080 harvesters in use.

Spain has more land dedicated to the grape than any other country in the world and is ranked third among wine producers (behind Italy and France). Wine exports increased in value by nearly 600% from 1991-97. Total export receipts in 1996 totalled some £600m. A large part of Spain's output goes to Italy for bottling. In 1992, 1,333,000 ha were under vines. Production of wine (1996), 32,720,000 hectolitres; of grapes, 3.3m. tonnes.

The area under onions in 1996 was 28,200 ha, yielding 1,018,100 tonnes; of tomatoes, 58,400 ha, 3,224,800 tonnes (21% of EU production).

In fruit, Spain contributes a fifth of EU total harvest, and more than half of all citrus fruits. Fruit production (1996, in tonnes; ha, 1992): Oranges and mandarins, 3·5m. (201,282 ha); lemons, 433,100 (45,022 ha); apples, 893,600; peaches, 892,300.

Production of olive oil (1996), 670,000 tonnes. EU policy to reform the complex aid system for olive oil (based on hand-outs per tree rather than oil production) is strongly opposed in all 5 EU olive oil-producing countries, nowhere more than Spain which, in Andalusia, has the world's largest producing zone. In 1997 Spain's olive growers marched on Madrid in protest over the reforms, which have provoked fear of plantation neglect and loss of employment.

Other important products are esparto, flax, tobacco, hemp and pulse; raw cotton production (1995): 88,000 tonnes.

Livestock (1995): Cattle, 5·51m.; sheep, 21·32m.; goats, 2·60m.; pigs, 18·16m.; laying hens, 45·72m.; horses, 0·24m; asses and mules (1992), 0·25m. Livestock density per 100 ha is among the lowest in the EU. Livestock products (1995 in 1,000 tonnes): Pork, 2,174; beef, 508·49; mutton, 227·12; poultry meat, 924·31; goat, 14·93; rabbit, 110·88; milk, 6,580; honey, 28; eggs, 6,940.

Forestry. In 1995 the area under forests was 8·39m. ha, or 16·8% of the total land area. In 1995 timber production was 15·12m. cu. metres. Other forest products (1992, in tonnes): Resins, 1,771; cork, 72,090; esparto, 792. Total value of forest products (1992): 127,815m. pesetas.

Fisheries. Spain is the second largest fishing country in the EU after Denmark. Its annual catch is around 1·3m. tonnes and accounts for a fifth of the EU's annual catch. Fish-farming output (1991), 222,427 tonnes, of which 200,922 were molluscs and shellfish, 21,505 fish; Spain supplies around half of total EU mussel production. Fishing vessels had a total tonnage of 524,602 tonnes in 1995 (596,441 GRT in 1994); fleets have been gradually reduced from 20,558 boats in 1991 to 18,091 in 1996. Total catch in 1995 amounted to 1,320,000 tonnes, of which more than 97% were sea fish.

INDUSTRY

The industrial sector represented 28·1% of GNP in 1995. In 1996-97 industrial production was up by 3·3% on the previous 12 months, and industry accounted for 22·9% of the labour force (29·7% in 1994).

The number of vehicles manufactured in 1995 was 2,333,785 of which 1,958,789 were passenger cars and 374,998 commercial. In 1996, 1·39m. refrigerators and freezers, 2·6m. cookers, hotplates and microwaves, and 1·53m. washing machines, dishwashers and clothes driers were manufactured; number of TV sets (1993), 3·8m. There are also important toy and shoe industries.

Labour. The economically active population numbered 16·12m. in 1997 (16·03m. in 1996). Of these, 12·76m. were employed: 1·07m. in agriculture and fishing, 2·58m. in industry, 1·27m. in construction and 7·87m. in trade, transport and other public and personal services. Post-Franco legislation brought radical changes to the labour market, including the legalization in 1984 of fixed-term contracts. A third of Spain's wage earners were on temporary contracts by 1998. The monthly minimum wage for adults (1998) was 68,040 pesetas; the average monthly wage for workers in industry and services was 190,500 pesetas (1,331 pesetas an hour); average hourly earnings increased by 4% in 1997. The retirement age is 65 years.

In terms of unemployment, Spain has the highest rate among developed countries. 18·7% of the active population was unemployed at the end of 1998. On 17 Sept. 1997, the Council of Ministers passed the Multi-Year Employment Plan co-ordinating the actions of 9 ministries with the aim of creating 1m. jobs to bring unemployment down to 17% by the year 2000. The scheme represents a 20% increase in budget spending for job creation.

Trade Unions. The Constitution guarantees the establishment and activities of trade unions provided they have a democratic structure.

The most important trade unions are *Unión General de Trabajadores* (UGT) and *Comisiones Obreras* (CO). In Jan. 1997 the UGT and CO and employers' associations signed an agreement to be in force until 2000 providing for compulsory mediation before strike action; in April, employers' associations and trade unions reached an agreement covering 1997-2000 to combat job insecurity and reform collective bargaining. A National Employment Committee was subsequently set up to oversee the workings of the agreement.

INTERNATIONAL TRADE

In the first quarter of 1997 exports were up by 15%, imports by 8%. The economy recorded a foreign trade surplus of 302,000m. pesetas and a 32% reduction in the trade deficit (1997 estimate in US$1: 16,000m.).

COMMUNICATIONS

Roads. In 1996 the total length of highways and roads was 344,847 km; the main network comprised 7,747 km of motorways, 23,131 km of highways/national roads and 138,969 km of secondary roads. 90% of all roads in Spain were paved in 1996. Travel by road accounted for 90·6% of internal passenger traffic in 1995; and for 77·24% of freight. Number of cars (1996), 14,754,000; trucks and vans, 3,057,000; buses, 48,000; motor cycles, 1,308,000. In 1996, 3,998 persons were killed in road accidents.

Rail. The total length of the state railways in 1995 was 13,060 km, mostly broad (1,668-mm) gauge (6,736 km electrified). State railways are run by the National Spanish Railway Network (RENFE). There is a high-speed standard-gauge (1,435-mm) railway from Madrid to Seville. In 1995 freight carried was 26m. tonnes (4·2% of total freight) and 464·8m. passengers (5·9% of internal passenger traffic). There are metros in Madrid (112 km), Barcelona (72 km) and Bilbao (26 km), and a light railway in Valencia.

Civil Aviation. There are international airports at Madrid (Barajas), Barcelona (Prat del Llobregat), Alicante, Almería, Bilbao, Gerona, Gran Canaria, Ibiza, Lanzarote, Málaga, Palma de Mallorca, Santiago de Compostela, Seville, Tenerife (Los Rodeos and Reina Sofía), Valladolid, Valencia and Zaragoza. There are 43 airports open to civil traffic. A small airport in Seo de Urgel operates in Andorra. The national carrier is Iberia Airlines (99·8% state-owned but scheduled for privatization in 1999). There are 2 other regular carriers: Air Europa and Spanair. Services are also provided by about 70 foreign airlines.

In 1995 Iberia flew 179·8m. km, carrying 14,228,300 passengers (6,240,500 on international flights). Aircraft movements in 1996, 1,027,920: 449,943 internal and 577,977 international. In 1996, 79,945,244 passengers (32·64m. internal and 47·3m. international) and 451,663 tonnes of freight were carried. Madrid was the busiest airport in 1996, handling 21,269,637 passengers (10,172,246 on international flights) and 237,337 tonnes of freight. Palma de Mallorca was the second busiest in 1996 for passenger traffic, with 15,266,958 (11,338,114 on international flights) and Barcelona the second busiest for freight, with 76,623 tonnes.

Shipping. The merchant navy in 1995 had 1,101 vessels with a gross tonnage of 637,000; shipyards launched 219,673 GRT in 1996. In 1994, 107,595 ships entered Spanish ports; 7·08m. passengers disembarked and 7·24m. embarked; total cargo discharged and loaded, 248m. tonnes.

Telecommunications. In 1997 Telefonica was operating 15,854,400 main telephone lines (403·2 per 1,000 persons). The government disposed of its remaining 21% stake in Telefonica in Feb. 1997, bringing 1·4m. shareholders into the company's

equity base. A second operator, Rétévision, is expected to account for 10% of the domestic market, which was scheduled to be wholly deregulated by the end of 1998. The cellular phone business was deregulated in 1995; the market is shared by Telefonica and Airtel.

Spain had 966,000 cellular phone subscribers in 1995 (25 for every 1,000 persons), 3,200,000 PCs (82 per 1,000 persons) and 215,000 fax machines. There were 2,247,000 Internet users in Oct. 1998.

Postal Services. There were 4,527 post offices in 1995. Receipts (1994) totalled 137,626m. pesetas; expenses, 201,581m. pesetas. In 1995 a total of 4,295m. pieces of mail were processed, or 110 items per person.

SOCIAL INSTITUTIONS

Justice. Justice is administered by Tribunals and Courts, which jointly form the Judicial Power. Judges and magistrates cannot be removed, suspended or transferred except as set forth by law. The Constitution of 1978 established the *General Council of the Judicial Power*, consisting of a President and 20 magistrates, judges, attorneys and lawyers, governing the Judicial Power in full independence from the state's legislative and executive organs. Its members are appointed by the *Cortes Generales*. Its President is that of the Supreme Court (*Tribunal Supremo*), who is appointed by the monarch on the proposal of the General Council of the Judicial.

The Judicature is composed of the Supreme Court; 17 Higher Courts of Justice, 1 for each autonomous community; 52 Provincial High Courts; Courts of First Instance; Courts of Judicial Proceedings, not passing sentences; and Penal Courts, passing sentences.

The Supreme Court consists of a President, and various judges distributed among 7 chambers: 1 for civil matters, 3 for administrative purposes, 1 for criminal trials, 1 for social matters and 1 for military cases. The Supreme Court has disciplinary faculties; is court of appeal in all criminal trials; for administrative purposes decides in first and second instance disputes arising between private individuals and the State; and in social matters makes final decisions.

A new penal code came into force in May 1996, replacing the code of 1848. It provides for a maximum of 30 years imprisonment in specified exceptional cases, with a normal maximum of 20 years. Sanctions with a rehabilitative intent include fines adjusted to means, community service and weekend imprisonment. The death penalty was abolished by the 1978 Constitution. The prison population in 1996 was 43,033 (39,051 men, 3,982 women); 901,696 criminal offences were reported in 1994.

A juvenile criminal law of 1995 lays emphasis on rehabilitation. It raised the age of responsibility from 12 to 14 years. Criminal conduct on the part of children under 14 is a matter for legal protection and custody. 14- and 15-year-olds are classified as 'minors'; 16- and 17-year-olds as 'young persons'; and the legal majority for criminal offences is set at 18 years. Persons up to the age of 21 may, at the courts' discretion, be dealt with as juveniles.

A jury system commenced operating in Nov. 1995 in criminal cases (first trials in May 1996). Juries consist of 9 members. In Sept. 1997 at the opening ceremony of the Judicial Year, presided over by the king, the President of the General Council of the Judicial Power called for a general agreement from Parliament and the government on legal reform for solving the problems in the administration of justice, namely its slowness and esoteric nature.

The *Audiencia Nacional* deals with terrorism, monetary offences and drug-trafficking where more than 1 province is involved. Its president is appointed by the General Council of the Judicial Power.

There is an Ombudsman (*Defensor del Pueblo*), who in 1994 received 18,594 complaints.

Religion. There is no official religion. Roman Catholicism is the religion of the majority. There are 11 metropolitan sees and 52 suffragan sees, the chief being Toledo, where the Primate resides. The archdioceses of Madrid-Alcalá and Barcelona depend directly from the Vatican. There are about 0·25m. other Christians, including several Protestant denominations, about 60,000 Jehovah's Witnesses and 29,000 Latter-day Saints (Mormons), and 0·45m. Moslems, including Spanish Moslems in

Morocco. The first synagogue since the expulsion of the Jews in 1492 was opened in Madrid in 1959. The number of people of Judaist faith is estimated at about 15,000.

Education. In 1991 the General Regulation of the Educational System Act came into force. This Act gradually extends the school-leaving age to 16 years and determines the following levels of education: Infants (3–5 years of age), primary (6–11), secondary (12–15) and baccalaureate or vocational and technical (16–17). Primary and secondary levels of education are now compulsory and free. Religious instruction is optional.

In Sept. 1997 a joint declaration with trade unions, parents' and schools' associations was signed in support of a new finance law guaranteeing that spending on education will reach 6% of GDP within 5 years, thus protecting it from changes in the political sphere. In 1993 total expenditure on education came to 4·7% of GNP.

A new compulsory secondary education programme has replaced the Basic General Education programme which was in force since 1970. In addition, university entrance exams underwent reform in 1997, resulting in greater emphasis now being placed on the teaching of Humanities at secondary level.

In 1997–98 pre-primary education (under 6 years) was undertaken by 2,522 schools, with 1,123,003 pupils; primary or basic education (6–14 years): 13,037 schools, with 2,607,602 pupils. There were 215,584 teachers in pre-primary and primary schools. Secondary education (14–17 years), including high schools and technical schools, was conducted at 5,449 schools, with 3,492,726 pupils and 150,220 teachers.

In 1997–98 there were 60 universities: 40 public state universities, 3 polytechnic universities, 13 private universities (including 3 Catholic); plus 4 Open universities. In 1997–98 there were 1,571,300 students at state universities; 64,423 at private universities.

Adult literacy rate, 1995, 97·1% (male 98·2%; female 96·1%).

Health. In 1995 there were 162,089 doctors (3·8 per 1,000 inhabitants), 13,242 dentists, 40,323 pharmacists and 167,957 nurses (including 6,105 midwives). Number of hospitals (1992), 801, with 161,537 beds.

Welfare. The social security budget was 12,134,637m. pesetas in 1997. The budget for 1998 was: for pensions, 8,356,100m. pesetas; health, 3,822,000m.; social benefits and incapacity, 1,554,000m.; unemployment, 1,495,400m. The minimum monthly pension in 1996 was 53,435 pesetas.

In 1997 the system of contributions to the social security and employment scheme was: For pensions, sickness, invalidity, maternity and children, a contribution of 28·3% of the basic wage (23·6% paid by the employer, 4·7% by the employee); for unemployment benefit, a contribution of 7·8% (6·2% paid by the employer, 1·6% by the employee). There are also minor contributions for a Fund of Guaranteed Salaries, working accidents and professional sicknesses, and for vocational training.

KEY HISTORICAL EVENTS

In the 18th century the central kingdom, Kandy, was the only surviving independent state on the island of Ceylon. The Dutch, who had obtained their first coastal possessions in 1636, had driven out the preceding Portuguese interests to become the dominant power in most of the island. The Dutch attacked Kandy but were unable to hold it. The interior terrain was mountainous and thickly forested and the king of Kandy's forces were well trained to make use of it as guerrillas.

The king attracted British attention by asking for help against the Dutch. In 1796 the British East India Company sent a naval force to Ceylon (as the British then called it). The Dutch surrendered their possessions, which left the British in control of the maritime areas surrounding Kandy. These areas were at first attached to the Madras Presidency of India, whence the naval force had come, but in 1802 they were constituted a separate colony under the Crown.

Once the British began to develop their new territory they came to see Kandy as a threat. An attack in 1803 failed, but by 1815 the chiefs of Kandy were discontented with their king who was of alien (south Indian) stock and a despot. The chiefs approached the British, who invaded Kandy with their help. The king was deposed and the British crown succeeded him as sovereign.

The Kandyan Convention of 1815 annexed Kandy to British Ceylon while recognizing most of the traditional rights of the chiefs. However, in 1817, dissatisfied with the terms, the chiefs rebelled. The rebellion was suppressed and the rights established by the Convention were abolished.

Ceylon was then united for the first time since the 12th century. The British (like the preceding Dutch and Portuguese) built up a plantation economy. Coffee was dominant until an outbreak of *Hoemilia vastatrix* fungus destroyed the plants in 1870. Spices, cocoa and rice all followed but tea became the main cash crop after successful experiments in the 1880s.

Foreign rule served to subdue the traditional hostility between northern Tamils and southern Sinhalese, providing as it did a new frame of reference to an alien culture. The Ceylon National Congress, formed in 1919, contained both Sinhalese and Ceylon Tamil groups. (The Indian Tamils brought in as a labour force for the tea estates were a separate community.) Tamil national feeling, however, was expressed over the issue of the use of Tamil languages in schools.

On 4 Feb. 1948 the Ceylon Independence Act took effect, and Ceylon became a Dominion of the Commonwealth. UK defence forces were to be allowed to remain as mutually agreeable, although it was later decided that all UK bases should be transferred or withdrawn by 1962.

In 1956 Solomon Bandaranaike became prime minister at the head of the People's United Front, advocating neutral foreign policy and the promotion of Sinhalese national culture at home. In Sept. 1959 he was murdered; his widow Sirimavo Bandaranaike succeeded him in July 1960 at the head of an increasingly socialist government. Agreements were made with India (in 1964 and 1974) for the repatriation of Indian nationals. In May 1972 Ceylon became a republic and adopted the name Sri Lanka.

In July 1977 Mrs Bandaranaike's government fell, mainly because of economic failures and the repression of non-Sinhalese elements. The United National Party (dominant until 1956) returned to power and in 1978 a new constitution provided a presidential system with the United National Party leader Junius Jayawardene as the first executive president. Economic problems were approached through large-scale investment of foreign capital.

The problem of communal unrest remained unsolved and Tamil separatists were active. In 1983 the Tamil United Liberation Front members of parliament were asked to renounce their objective for a separate Tamil state. They refused and withdrew from parliament. Militant Tamils then began armed action which developed into civil war.

A state of emergency ended on 11 Jan. 1989, but violence continued. President Ranasinghe Premadasa was assassinated on 1 May 1993. A ceasefire was signed on 3 Jan. 1995, but fighting broke out again in April. The 'Liberation Tigers of the Tamil Eelam' stronghold of Jaffna was captured by government forces in Dec. 1995 and by mid-1997 was under government control; but the army has still not opened a safe route to Jaffna from the south of the island. 1998 saw some of the fiercest fighting in the 15-year civil war which has claimed up to 50,000 lives.

KEY HISTORICAL EVENTS

In 1821 the area that is now Sudan was conquered by the Egyptians. In 1881 Muhammad Ahmad, proclaiming himself the Mahdi, led an uprising and gained control until, in 1899, an Anglo–Egyptian army defeated the Mahdi and established an Anglo–Egyptian condominium.

On 19 Dec. 1955 the Sudanese parliament passed unanimously a declaration that a fully independent state should be established forthwith and that a Council of State should assume the duties of head of state. The UK and Egypt gave their assent on 31 Dec. 1955 and on 1 Jan. 1956 Sudan was proclaimed a sovereign independent republic. In 1958 there was a coup that established a military government until the end of 1964 when a civilian government was re-established. On 8 July 1965 the Constituent Assembly elected Ismail al-Azhari as President of the Supreme Council but the government was faced with constant difficulties from the southern provinces which considered themselves dominated by the north. Rebellions began in 1965.

On 23 April 1969 the prime minister, Muhammad Ahmed Mahgoub, resigned; and on 25 May the government was taken over by a 10-man Revolutionary Council under Col. Jaafar al-Nemery. The Council was dissolved in 1972 and a new constitution was introduced in 1973. Legislative power was placed with a National Assembly, an elected body; and some measure of self-government was granted to the southern provinces. However, discontent in these latter provinces continued and in addition Nemery met considerable opposition in his attempts to make Sudan a formal Islamic state. On 6 April 1985 he was deposed in a military coup led by Gen. Abel-Rahman Swar al-Dahab, who established a Military Council to which the Cabinet was responsible prior to the promised re-establishment of civilian rule. Elections were held, although they were suspended in parts of the southern provinces, in April 1986. On 30 June 1989 Brig.-Gen. (later Lieut.-Gen.) Omar Hassan Ahmad al-Bashir overthrew the civilian government in a military coup.

The rebel Sudan People's Liberation Army (SPLA), consisting of non-Moslem southerners, maintains guerrilla activities in the south while the National Democratic Alliance (NDA), northern Moslems opposed to the ruling National Islamic Front, and non-Moslem southerners of the SPLA fight on in the north. Fighting also erupted in Jan. 1997 along the border with Ethiopia. On 9 July 1997 at a meeting attended by representatives of Djibouti, Eritrea, Ethiopia, Kenya and Uganda the Sudanese government accepted a 'Declaration of Principles' as a framework for negotiations to end the civil war, including the separation of state and religion and self-determination for the south of Sudan.

After 14 years Sudan's civil war has killed some 1·3m. people and reduced the south to a level barely above subsistence. Some 12,000 tons of food were airlifted between mid-April and the end of July 1998 as famine hit southern areas of the country. The severe shortage of food was made even worse by the late arrival of the rains which affected the harvest of Oct. 1998. On 20 Aug. 1998 the USA launched cruise missile attacks against a plant in Khartoum which the USA claimed was being used to make nerve gas ingredients. The attacks were carried out in response to the bombings of the US embassies in Kenya and Tanzania earlier in the month in which 263 people had been killed.

TERRITORY AND POPULATION

Sudan is bounded in the north by Egypt, north-east by the Red Sea, east by Eritrea and Ethiopia, south by Kenya, Uganda and the Democratic Republic of the Congo, west by the Central African Republic and Chad, and north-west by Libya. Its area is 967,500 sq. miles (2,505,813 sq. km). Population (1993 census), 24,940,683; estimate, 1997, 27,953,000, giving a density of 11 per sq. km.

The UN gives a projected population for 2000 of 29·82m.

An estimated 68·6% of the population were rural in 1995.

In Feb. 1994 the former 9 regions were subdivided to form 26 federal states as follows:

CLIMATE

Lying wholly within the tropics, the country has a continental climate and only the Red Sea coast experiences maritime influences. Temperatures are generally high throughout the year, with May and June the hottest months. Winters are virtually cloudless and night temperatures are consequently cool. Summer is the rainy season inland, with amounts increasing from north to south, but the northern areas are virtually a desert region. On the Red Sea coast, most rain falls in winter. CONSTITUTION AND GOVERNMENT

The constitution was suspended after the 1989 coup and a 12-member Revolutionary Council then ruled. A 300-member Provisional National Assembly was appointed in Feb. 1992 as a transitional legislature pending elections. These were held in March 1996. The President is elected for a 5-year term by the people. The National Assembly (*Majlis Watani*) now has 400 members, 275 of whom are directly elected for 4 years in single-seat constituencies, 125 indirectly elected by national conference.

The law administered is 'justice, equity and good conscience' in all cases where there is no special enactment. Procedure is governed by the Civil Justice Ordinance.

Justice for the Moslem population has always been administered by the Islamic law courts, which form the Sharia Divisions of the Court of Appeal, High Courts and Kadis Courts; President of the Sharia Division is the Grand Kadi. In Dec. 1990 the government announced that Sharia would be applied in the non-Moslem southern parts of the country as well.

Criminal Justice is administered by the courts constituted under the Code of Criminal Procedure, namely major courts, minor courts and magistrates' courts. Serious crimes are tried by major courts, which are composed of a President and 2 members and have the power to pass the death sentence. Major Courts are, as a rule, presided over by a Judge of the High Court appointed to a Provincial Circuit or a Province Judge. There is a right of appeal to the Chief Justice against any decision or order of a Major Court, and all its findings and sentences are subject to confirmation by him.

Lesser crimes are tried by Minor Courts consisting of 3 Magistrates and presided over by a Second Class Magistrate, and by Magistrates' Courts.

KEY HISTORICAL EVENTS

The first Europeans to reach the area were the Spanish in 1499 but it was the British who established a colony in 1650. At the peace of Breda (1667) between Great Britain and the United Netherlands, the area known as Suriname was assigned to the Netherlands in exchange for the colony of New Netherland in North America. This was confirmed by the treaty of Westminster of Feb. 1674. Suriname was twice in British possession during the Napoleonic Wars in 1799-1802 (when it was restored to the Batavian Republic at the peace of Amiens) and 1804-16, when it was returned to the Netherlands.

On 25 Nov. 1975 Suriname gained full independence and was admitted to the UN on 4 Dec. 1975. On 25 Feb. 1980 the government was ousted in a *coup* and a National Military Council (NMC) established. A further *coup* on 13 Aug. replaced several members of the NMC and the State President. Other attempted *coups* took place in 1981 and 1982, with the NMC retaining control. In Oct. 1987 a new constitution was approved by referendum; following elections in Nov. Suriname returned to democracy in Jan. 1988 but on 24 Dec. 1990 a further military coup deposed the government. KEY HISTORICAL EVENTS

The Swazi migrated into the country to which they have given their name in the last half of the 18th century. They settled first in what is now southern Swaziland, but moved northwards under their chief, Sobhuza—known also to the Swazi as Somhlolo. Sobhuza died in 1838 and was succeeded by ·Mswati. The further order of succession has been Mbandzeni and Bhunu, whose son, Sobhuza II, was installed as King of the Swazi nation in 1921 after a long minority.

The independence of the Swazis was guaranteed in the conventions of 1881 and 1884 between the British Government and the Government of the South African Republic. In 1890, soon after the death of Mbandzeni, a provisional government was established with representatives of the Swazis, the British and the South African Republic Governments. In 1894 the South African Republic was given powers of protection and administration. In 1902, after the conclusion of the Boer War, a special commissioner took charge, and under an order-in-council in 1903 the Governor of the Transvaal administered the territory, through the special commissioner. Swaziland became independent on 6 Sept. 1968.

On 25 April 1967 the British Government gave the country internal self-government, changing the country's status to that of a protected state. The Ngwenyama, Sobhuza II, was recognized as King of Swaziland and head of state. King Sobhuza died on 21 Aug. 1982. On 25 April 1986, King Mswati III was installed as King of Swaziland. Despite a secret pact with the Republic of South Africa concluded in 1982 and providing for joint operations against guerrillas fighting apartheid, the South Africans launched an armed raid into Swaziland in Aug. 1986, aimed at the (South African) African National Congress. There is conflict within the Swazi government over the role of the royal family and relations with the Republic of South Africa.

KEY HISTORICAL EVENTS

Sweden was organized as an independent unified state in the 10th century when the Swedes in the north of the country and the Goths in the south were united by Olof. Finland was acquired in the 13th century. In the 14th century Sweden was joined with Norway and Denmark in the Kalmar Union; however, under Gustavus Vasa, Sweden regained her independence in 1523. Under Gustavus Adolphus (1611-32) Sweden became a first rank military power and, at the close of the Thirty Years War in 1648, was in possession of Pomerania and of extensive territories on the eastern shores of the Baltic. But war with Russia and her allies in the early 18th century ended disastrously for Sweden. By the treaty of Nystad (1721) Sweden lost her Baltic empire. In 1810 the French marshal, Bernadotte, was made crown prince. With the fall of Napoleon, Norway was taken from Denmark and attached to Sweden. Bernadotte became King in 1818. Sweden became a constitutional monarchy in 1809, in which year she also ceded Finland to Russia. Norway became independent in 1905. Sweden remained neutral during the two world wars of 1914-18 and 1939-45.

From 1932 to 1976, Sweden was governed by the Social Democratic Party which set the model for welfare reform, combined with rapid economic growth. But high taxation brought a reaction in the 1970s when the Centre Party (representing chiefly small farmers and traders) and the Conservatives staged a comeback which brought them to power in coalition with the Liberal Party in 1976. However, in 1981 the Social Democrat leader, Olaf Palme, became prime minister with support from the Communist Party. On 28 Feb. 1986 Palme was assassinated in Stockholm by unknown assailants; Ingvar Carlsson succeeded him as prime minister.

In 1991 a Conservative-led coalition took over the government at a time of recession. Austerity measures helped in the revival of the Social Democrats who returned to power in 1994 but with a commitment to economic stringency. Although the Social Democrats won the 1998 election, they saw their support fall to its lowest level since the First World War.

TERRITORY AND POPULATION

Sweden is bounded in the west and north-west by Norway, east by Finland and the Gulf of Bothnia, south-east by the Baltic Sea and south-west by the Kattegat. The area is 449,964 sq. km. At the 1990 census the population was 8,587,353. Estimate, July 1997, 8,865,051; density 20 per sq. km.

Under the 1975 Constitution Sweden is a representative and parliamentary democracy. The King is Head of State, but does not participate in government. Parliament is the single-chamber *Riksdag* of 349 members elected for a period of 4 years in direct, general elections.

The manner of election to the *Riksdag* is proportional. The country is divided into 29 constituencies. In these constituencies 310 members are elected. The remaining 39 seats constitute a nationwide pool intended to give absolute proportionality to parties that receive at least 4% of the votes. A party receiving less than 4% of the votes in the country is, however, entitled to participate in the distribution of seats in a constituency, if it has obtained at least 12% of the votes cast there.

A parliament, the *Sameting*, was instituted for the Sami (Lapps) in 1993.

National Anthem. 'Du gamla, du fria' ('Thou ancient, thou free'); words by R. Dybeck; folk-tune.

In 1997 military expenditure totalled US$5,481m. (US$619 per capita), representing 2·4% of GDP. Defence spending is to be cut by more than 10% (4bn. kr.) per year following a decline in possible military threats in the Nordic and Baltic Sea region since the collapse of Soviet communism. A reduction in army brigades, airforce divisions and naval vessels is due to come into effect in 2002.

On mobilization to a war footing the Field Army comprises 3 divisional HQs, 4 infantry, 3 Arctic, 1 mechanized Arctic and 5 mechanized brigades and 3 artillery regiments. Anti-aircraft units, engineers and supply are included as well as units to support command and control. There are also Territorial Defence units. Each branch is represented in Sweden's different coastal areas. The Coastal Artillery have 2 main tasks: Fixed coastal defence and mobile coastal defence. The fixed coastal defence is organized in Coast Artillery Regiments consisting of artillery up to 120-mm calibre and land-sea missiles. The mobile element consists of 2 Mobile Coastal Artillery Battalions, 1 Heavy Coastal Missile Battery and 6 Amphibious Battalions. The Coastal Artillery operates 8 coastal and 12 small patrol craft and some 140 small amphibious craft. The Naval Air Arm comprises 14 Boeing Vertol Kawasaki KV 107 helicopters and 10 AB-206 Jet-Ranger helicopters, and 1 Aviocar for anti-submarine warfare and electronic surveillance.

The personnel of the Navy in 1998 totalled 12,700 (including 3,100 reservists and 4,000 conscripts). The Navy can mobilize about 45,000.

A separate civil Coast Guard, 600-strong, operates some 70 inshore cutters, patrol boats and service craft, and 4 aircraft.

SAS has a joint paid-up capital of 14,241m. Sw. kr. Capitalization of SAS Sverige AB, 5,560m. Sw. kr., of which 50% is owned by the Government and 50% by private enterprises.

In 1997, the total distance flown was 109·0m. km; passenger-km, 8,893·7m.; goods, 294·7m. tonne-km. These figures represent the Swedish share of the SAS traffic (Swedish domestic and three-sevenths of international traffic). Malmö Aviation and Skyways AB, both Sweden-based carriers, operate some international as well as domestic flights. In 1998 services were also provided by Aer Lingus, Aeroflot, Air Baltic, Air Canada, Air China, Air Express, Air France, Air Lithuania, Air Malta, Air Ukraine, Airborne of Sweden, Alitalia, American Airlines, Austrian Airlines, Balkan, Belavia, Braathens, British Airways, Continental Airlines, Croatia Airlines, Czech Airlines, Delta Air Lines, Deutsche BA, Egyptair, El Al, Estonia Air, Falcon Air, Finnair, Flying Enterprise, Guard Air, Iberia, Icelandair, Interimpex-Avioimpex, Iran Air, JAT, Kenya Airways, KLM, KLM UK, Lithuanian Airlines, LOT, Lufthansa, Maersk Air, Malév, Minskavia, Muk Air, Royal Air Maroc, Ryanair, SABENA, Skargardsflyg, Swedeways Air Lines, Swissair, Syrian Arab Airlines, TAP, Thai Airways International, Trans Travel Airlines, Turkish Airlines, Tyrolean Airways, United Airlines, West Air Sweden and Wideroe's Flyveselskap.

More than 43% of Swedes are mobile telephone subscribers—a penetration rate only exceeded in Finland. There were 1,700,000 PCs in 1995 (193 per 1,000 population) and 329,000 fax machines. In Nov. 1998 there were 2·9m. Internet users, or nearly a third of the total population.

Postal Services. There were 1,853 post offices at the end of 1995. A total of 4,533m. pieces of mail were processed in 1995, equivalent to 513 per person.

SOCIAL INSTITUTIONS

Justice. The administration of justice is independent. The Attorney-General (appointed by the Government) and 3 Ombudsmen exercise a check on judicial affairs administration. In 1995–96 the Ombudsmen received altogether 5,121 cases, of which 125 were instituted on their own initiative.

Sweden has no constitutional court. However, in each particular case the courts do have a certain right to ascertain whether a statute meets the standards set out by superordinate provisions.

The courts can be divided into general or ordinary courts and special courts. There are 2 general court organizations: the courts of general jurisdiction and the administrative courts. These organizations are, in all essentials, parallel and are structured as a triple instance system. The general courts handle criminal cases and civil disputes between individuals. The general administrative courts primarily deal with cases which relate to matters between the community at large and a private individual. A number of courts of special jurisdiction exist beside the courts, such as the labour court.

There is a 3-tier hierarchy of courts: The Supreme Court; 6 intermediate courts of appeal; and 97 district courts. Of the district courts 27 also serve as real estate courts and 6 as water rights courts. When a permanent judge is appointed by the government, he cannot, in principle, be dismissed.

District courts are courts of first instance and deal with both civil and criminal cases. Petty cases are tried by 1 judge. Civil and criminal cases are tried as a rule by 3 to 4 judges or in minor cases by 1 judge. Disputes of greater consequence relating to the Marriage Code or the Code relating to Parenthood and Guardianship are tried by a judge and a jury of 3–4 lay assessors. More serious criminal cases are tried by a judge and a jury of 5 members (lay assessors) in felony cases, and of 3 members in misdemeanour cases. The cases in courts of appeal are generally tried by 4 or 5 judges.

Those with low incomes can receive free legal aid out of public funds. In criminal cases a suspected person has the right to a defence counsel, paid out of public funds.

The Attorney-General and the Judicial Commissioner for the Judiciary and Civil Administration (Ombudsman) supervise the application in the public sector of acts of Parliament and regulations.

There were 76 penal and correctional institutions for offenders in 1996 with an average population of 6,000 inmates (including offenders in remand prison).

Religion. The national church is the Swedish Lutheran Church, due to be disestablished in 2000. It is headed by Archbishop Karl Gustaf Hammar (b. 1943) and has its metropolitan see at Uppsala. In 1996 there were 13 bishoprics and 2,544 parishes. The clergy are chiefly supported from the parishes and the proceeds of the church lands. Other denominations, in 1996: Pentecostal Movement, 91,939 members; The Mission Covenant Church of Sweden, 70,072; Salvation Army, 26,089; Orebo Missionary Society, 22,801; Swedish Evangelical Mission, 26,089; The Baptist Union of Sweden, 18,548; Swedish Alliance Missionary Society, 12, 846; Holiness Mission, 6,393. There were also 164,015 Roman Catholics (under a Bishop resident at Stockholm).

Education. In 1995–96 there were 640,797 pupils in primary education (grades 1–6 in compulsory comprehensive schools); secondary education at the lower stage (grades 7–9 in compulsory comprehensive schools) comprised 297,743 pupils. In

secondary education at the higher stage (the integrated upper secondary school), there were 66,561 pupils in Oct. 1995 (excluding pupils in the fourth year of the technical course regarded as third-level education). The folk high schools, 'people's colleges', had 37,148 pupils in courses of more than 10 weeks in 1994–95.

In municipal adult education there were 155,971 students in 1995.

There are also special schools for pupils with visual and hearing handicaps (766 pupils in 1995) and for those who are mentally retarded (13,417 pupils).

In 1994–95 there were in integrated institutions for higher education 269,815 students enrolled for undergraduate studies. The number of students enrolled for postgraduate studies in 1995 was 16,079.

In 1995 total expenditure on education came to 8·1% of GNP and represented 11·6% of total government expenditure.

Health. In 1996 there were 23,000 doctors, 14,300 dentists, 73,600 nurses and midwives and 38,139 hospital beds. In 1994 the total cost of healthcare was 112,983m. kr., representing 7% of GDP.

Welfare. Social insurance benefits are granted mainly according to uniform statutory principles. All persons resident in Sweden are covered, regardless of citizenship. All schemes are compulsory, except for unemployment insurance. Benefits are usually income-related. Most social security schemes are at present undergoing extensive discussion and changes. Recent proposals include the introduction of a new pension scheme.

KEY HISTORICAL EVENTS

The history of Switzerland can be traced back to Aug. 1291 when the Uri, Schwyz and Unterwalden entered into a defensive league. In 1353 the league included 8 members and in 1515, 13. Various territories were acquired either by single cantons or by several in common and in 1648 the league became formally independent of the Holy Roman Empire. No addition was made to the number of cantons until 1798 in which year, under the influence of France, the unified Helvetic Republic was formed. This failed to satisfy the Swiss and in 1803 Napoleon, in the Act of Mediation, granted a new constitution and increased the number of cantons to 19. In 1815 the perpetual neutrality of Switzerland and the inviolability of her territory were guaranteed by Austria, France, Great Britain, Portugal, Prussia, Spain and Sweden, and the Federal Pact, which included 3 new cantons, was accepted by the Congress of Vienna. In 1848 a new constitution was passed. The 22 cantons set up a federal government (consisting of a federal parliament and a federal council) and a federal tribunal. This constitution, in turn, was on 29 May 1874 superseded by the present constitution, which also combines the federal principle with a national and local use of referendums. Female franchise dates only from Feb. 1971. In a national referendum held in Sept. 1978, 69·9% voted in favour of the establishment of a new canton, Jura, which was established on 1 Jan. 1979.

Switzerland was neutral in both world wars. After the First World War, it joined the League of Nations, which was based in Geneva. But after the Second World War neutrality was thought to conflict with membership of the UN, though Switzerland participates in its agencies, and since 1948 has been a contracting party to the Statute of the International Court of Justice.

In 1994 there were 3,591,600 females and 1,331,600 resident foreign nationals. In 1995, 61% of the population lived in urban areas. Population density in 1997 was 172 per sq. km.

The UN gives a projected population for 2000 of 7·41m.

German, French and Italian are the official languages; Romansch (spoken mostly in Graubünden), hitherto a national language, was upgraded to 'semi-official' in 1996. German is spoken by the majority of inhabitants in 19 of the 26 cantons, French in Fribourg, Vaud, Valais, Neuchâtel, Jura and Geneva, and Italian in Ticino. At the 1990 census 63·6% of the population gave German as their mother tongue, 19·2% French, 7·6% Italian, 0·6% Romansch and 8·9% other languages. 1997 statistics are 65% German, 18·4% French, 9·8% Italian, and 0·8% Romansch.

CONSTITUTION AND GOVERNMENT

The Constitution dates from 29 May 1879. Switzerland is a republic. The highest authority is vested in the electorate, i.e., all Swiss citizens over 18. This electorate, besides electing its representatives to the Parliament has the voting power on amendments to, or on the revision of, the Constitution. It also takes decisions on laws and international treaties if requested by 50,000 voters or 8 cantons (facultative referendum), and it has the right of initiating constitutional amendments, the support

required for such demands being 100,000 voters (popular initiative). The Swiss vote in more referendums—3 or 4 a year—than any other nation. Between 1971 and 1997, 68 initiatives were put to the vote; but only 5 were adopted. Turn-out has dropped from a peak of 80% in 1947 to 42% in 1999.

The Federal Government is supreme in matters of peace, war and treaties; it regulates the army, the railway, telecommunication systems, the coining of money, the issue and repayment of banknotes and weights and measures. It also legislates on matters of copyright, bankruptcy, patents, sanitary policy in dangerous epidemics, and it may create and subsidize, besides the Polytechnic School at Zürich and at Lausanne, 2 federal universities and other educational institutions. There has also been entrusted to it the authority to decide on matters concerning public works for the whole or great part of Switzerland, such as those relating to rivers, forests and the construction of national highways and railways. By referendum of 13 Nov. 1898 it is also the authority in the entire spheres of common law. In 1957 the Federation was empowered to legislate on atomic energy matters and in 1961 on the construction of pipelines of petroleum and gas.

The legislative authority is vested in a parliament of 2 chambers: the Council of States (*Ständerat/Conseil des États*) and the National Council (*Nationalrat/Conseil National*). The Council of States is composed of 46 members, chosen and paid by the 23 cantons of the Confederation, 2 for each canton. The mode of their election and the term of membership depend on the canton. 3 of the cantons are politically divided–Basle into Town and Country, Appenzell into Outer-Rhoden and Inner-Rhoden, and Unterwalden into Obwalden and Nidwalden. Each of these 'half-cantons' sends 1 member to the State Council.

The National Council has 200 members directly elected for 4 years, in proportion to the population of the cantons, with the proviso that each canton or half-canton is represented by at least 1 member. The members are paid from federal funds. The parliament sits for 16 three-day sessions annually.

The 200 members are distributed among the cantons as follows:

Zürich	35	Appenzell—Outer- and Inner-Rhoden	3
Berne	29	St Gallen (St Gall)	12
Lucerne	9	Graubünden (Grisons)	5
Uri	1	Aargau (Argovie)	14
Schwyz	3	Thurgau (Thurgovie)	6
Unterwalden—Upper and Lower	2	Ticino (Tessin)	8
Glarus (Glaris)	1	Vaud (Waadt)	17
Zug	2	Valais (Wallis)	7
Fribourg (Freiburg)	6	Neuchâtel (Neuenburg)	5
Solothurn (Soleure)	7	Geneva	11
Basel (Bâle)—town and country	13	Jura	2
Schaffhausen (Schaffhouse)	2		

A general election takes place by ballot every 4 years. Every citizen of the republic who has entered on his 18th year is entitled to a vote, and any voter who is not a clergyman may be elected a deputy. Laws passed by both chambers may be submitted to direct popular vote, when 50,000 citizens or 8 cantons demand it; the vote can be only 'Yes' or 'No'. This principle, called the *referendum*, is frequently acted on.

The chief executive authority is deputed to the *Bundesrat*, or Federal Council, consisting of 7 members, elected from 7 different cantons for 4 years by the *United Federal Assembly*, i.e., joint sessions of both chambers. On 7 Feb. 1999 there was a referendum to decide whether to eliminate the condition that each cabinet minister come from a different one of the 26 cantons. 74·7% of votes cast were in favour of the proposal to change the conditions. The members of this council must not hold any other office in the Confederation or cantons, nor engage in any calling or business. In the Federal Parliament legislation may be introduced either by a member, or by either chamber, or by the Federal Council (but not by the people). Every citizen who has a vote for the National Council is eligible to become a member of the executive.

The *President* of the Federal Council (called President of the Confederation) and the Vice-President are the first magistrates of the Confederation. Both are elected by the United Federal Assembly for 1 calendar year from among the Federal Councillors, and are not immediately re-eligible to the same offices. The Vice-

President, however, may be, and usually is, elected to succeed the outgoing President.

The 7 members of the Federal Council act as ministers, or chiefs of the 7 administrative departments of the republic. The city of Berne is the seat of the Federal Council and the central administrative authorities.

National Anthem. 'Trittst im Morgenrot daher'/'Sur nos monts quand le soleil'/'Quando il ciel' di porpora' ('Step into the rosy dawn'); German words by Leonard Widmer, French by C. Chatelanat, Italian by C. Valsangiacomo, tune by Alberik Zwyssig.

RECENT ELECTIONS

On 22 Oct. 1995 elections were held for both chambers of the federal parliament; turn-out was 42%. In the Council of States, the Radical Democratic Party (RDP) gained 17 seats (18 in 1991); the Christian Democratic Party (CDP), 16 (16); the Swiss Socialist Party (SSP), 5 (nil); the Swiss People's Party or Democratic Centre Union (SPPDCU), 5 (4); others, 3. In the National Council, SSP gained 54 seats (41 in 1991); RDP, 45 (44); CDP, 34 (35); SPPDCU, 29 (25); others, 38. Parliamentary elections are scheduled for Oct. 1999.

At the presidential election held in the United Federal Assembly on 9 Dec. 1998, Ruth Dreifuss was elected, thus becoming Switzderland's first female president.

CURRENT ADMINISTRATION

President of the Confederation and Chief of the Department of the Interior, 1999: Ruth Dreifuss, b. 1940 (SSP).

Vice President and Chief of the Department of Military Affairs: Adolf Ogi (SPPDCU).

In March 1999 the Federal Council comprised:

Minister of Foreign Affairs: Flavio Cotti (CDP). *Justice and Police:* Arnold Koller (CDP). *Finance:* Kaspar Villiger (RDP). *Public Economy:* Pascal Couchepin. *Transport, Communications and Energy:* Moritz Leuenberger (SSP).

Local Government. Each of the 26 cantons and demi-cantons is sovereign, so far as its independence and legislative powers are not restricted by the federal constitution; all cantonal governments, though different in organization (membership varies from 5 to 11, and terms of office from 1 to 5 years), are based on the principle of sovereignty of the people.

In 21 cantons a body chosen by universal suffrage, usually called the *Great Council*, or *Canton Council*, exercises the functions of a parliament. In all the cantonal constitutions except those of the 5 cantons which have a *Landsgemeinde*, the referendum has a place. By this principle, where it is most fully developed, as in Zürich, all laws and concordats, or agreements with other cantons, and the chief matters of finance, as well as all revisions of the Constitution, must be submitted to the popular vote. In the 5 cantons of Appenzell, Glarus and Unterwalden the people exercise their powers direct in the *Landsgemeinde*, i.e., the assembly in the open air of all citizens of full age. In all the cantons the *popular initiative* for constitutional affairs, as well as for legislation, has been introduced, except in Lucerne, where the *initiative* exists only for constitutional affairs. In most cantons there are districts (*Amtsbezirke*) consisting of a number of communes grouped together, each district having a Prefect (*Regierungsstatthalter*) representing the cantonal government. In the larger communes, for local affairs, there is an Assembly (legislative) and a Council (executive) with a president, mayor or syndic, and not less than 4 other members. In the smaller communes there is a council only, with its officials.

DEFENCE

There are fortifications in all entrances to the Alps and on the important passes crossing the Alps and the Jura. Large-scale destruction of bridges, tunnels and defiles are prepared for an emergency.

In 1997 military expenditure totalled US$3,837m. (US$544 per capita), representing 1·5% of GDP.

Army. There are about 3,400 regular soldiers, but some 360,000 conscripts undergo training annually in the following phases: At 20 years of age, 15 weeks recruit training; between 21 and 32, reservist refresher training (*Auszug*); between 33 and

42, 39 days training for the Militia (*Landwehr*). Proposals ('Army 95') implemented in 1995 envisaged a more flexible army to protect the population against military or natural catastrophes, combat terrorism and take part in international peacekeeping. The conscript sign-off age was reduced to 42 years, the number of conscripts reduced to 360,000, and the number of regular soldiers (including women) increased.

The Army is divided into 3 field corps, each of 1 armoured and 2 infantry divisions and support groups, a corps with 3 mountain divisions, and independent redoubt-, fortress- and territorial-brigades. The administration of the Swiss Army is partly in the hands of the Cantonal authorities, who can promote officers up to the rank of captain. But the Federal Government is concerned with all general questions and makes all the higher appointments. In peace-time the Army has no general; in time of war the Federal Assembly in joint session of both Houses appoints a general. Equipment includes about 370 Leopard, 186 Pz-68 and 186 Pz-68/88 main battle tanks.

Air Corps. The Air Corps is part of the Army. It has 3 flying regiments. The fighter squadrons are equipped with Swiss-built F-5E Tiger IIs (6 squadrons), Mirage IIIS supersonic interceptor/ground-attack (2 squadrons), Mirage IIIRS fighter/reconnaissance (3 squadrons); and Bloodhound surface-to-air missile batteries are operational. Training aircraft are Pilatus PC-7 Turbo-Trainers and Hawks; there are also communications and transport aircraft and helicopters. Personnel (1996), 32,600 on mobilization, with 150 combat aircraft.

INTERNATIONAL RELATIONS

Switzerland is a member of OECD, EFTA, the Council of Europe and the NATO Partnership for Peace, and applied to join the EU on 26 May 1992. In referendums in 1986 the electorate voted against joining the UN, and in Dec. 1992 the European Economic Area.

Money laundering was made a criminal offence in Aug. 1990. Complete secrecy about clients' accounts remains intact, but anonymity was abolished in July 1991.

The stock exchange system has been reformed under federal legislation of 1990 on securities trading and capital market services. The 4 smaller exchanges have been closed and activity concentrated on the major exchanges of Zürich, Basle and Geneva, which harmonized their operations with the introduction of the Swiss Electronic Exchange (EBS) in Dec. 1995. Zürich is a major international insurance centre.

In Aug. 1998 Crédit Suisse and UBS AG agreed a deal to pay US$1·25bn. (£750m.) to Holocaust survivors over a 3-year-period in an out-of-court settlement. The deal brought to an end the issue of money left in Holocaust victims' Swiss Bank accounts which were allowed to remain dormant after the war.

The Tribunal has original and final jurisdiction in suits between the Confederation and cantons; between different cantons; between the Confederation or cantons and corporations or individuals;

between parties who refer their case to it; in such suits as the constitution or legislation of cantons places within its authority; and in many classes of railway suits. It is a court of appeal against decisions of other federal authorities, and of cantonal authorities applying federal laws. The Tribunal comprises 2 courts of public law, 2 civil courts, a chamber of bankruptcy, a chamber of prosecution, a court of criminal appeal, a court of extraordinary appeal, a federal criminal court, and a criminal chamber for cases of treason (sits very rarely). The jurors who serve in the Assize Courts are elected by the people, and are paid a daily allowance.

A Federal Insurance Court sits in Lucerne, and comprises 9 judges and 9 supplementary judges elected for 6 years by the Federal Assembly.

A federal penal code replaced cantonal codes in 1942. It abolished capital punishment except for offences in wartime; this latter proviso was abolished in 1991.

There were 64,151 adult criminal convictions in 1992 (13·4% female; 44·4% foreign).

Compulsory education consists of 4 (Berne, Basel-Town, Jura, Vaud), 5 (Aargau, Basel-Country, Neuchâtel) or 6 (other cantons except Ticino, which has 9) years of primary education, and the balance in Stage I secondary education. This may be followed by 5 years of Stage II secondary education of general or vocational schools. Tertiary education is at universities, higher vocational schools and advanced vocational training institutes.

Welfare. The Federal Insurance Law against illness and accident, of 13 June 1911, entitles all citizens to insurance against illness; foreigners may be admitted to the benefits. Compulsory insurance against illness does not exist, but cantons and communities are entitled to declare insurance obligatory for certain classes or to establish public benefit (sick fund) associations, and to make employers responsible for the payment of the premiums of their employees.

KEY HISTORICAL EVENTS

Syria was under Turkish control from the 12th century, and part of the Ottoman Empire from the 16th century until the First World War. Following the defeat of the Turks in that war, the League of Nations granted to France a mandate for Syria from 1920. On 27 Sept. 1941, Gen. Catroux, the Free French C.-in-C., in the name of the Allies, proclaimed the independence of Syria at Damascus. On 27 Dec. 1943 an agreement was signed between representatives of the French National Committee of Liberation and of Syria, by which most of the powers and capacities exercised hitherto by France under mandate were transferred as from 1 Jan. 1944 to the Syrian government. The evacuation of all foreign troops in April 1946 marked the complete independence of Syria, but the political situation was unsettled and military *coups* were staged in Dec. 1949 and in Feb. 1954.

Syria merged with Egypt to form the United Arab Republic from 2 Feb. 1958 until 29 Sept. 1961, when Syrian independence was resumed following a *coup* the previous day. Following the fifth *coup* of the decade, Lieut.-Gen. Hafez al-Assad became prime minister on 13 Nov. 1970, and assumed the presidency on 22 Feb. 1971.

A new constitution, approved by plebiscite on 12 March 1973, confirmed the Arab Socialist Renaissance (Ba'ath) Party as the 'leading party in the state and society'.

KEY HISTORICAL EVENTS

At the end of the 17th century the inhabitants of Zanzibar drove out the Portuguese with the assistance of the Arabs of Oman. Thereafter an Arab governor from Oman was sent to Zanzibar but the government of the interior remained in the hands of a local ruler. In 1832 Seyyid Said bin Sultan, ruler of Oman, established his capital at Zanzibar. Arab merchants explored the mainland in search of slaves and ivory, and soon the whole of that island and the island of Pemba together with a large strip of the east African mainland coast came under his effective rule. Seyyid Said died in 1856. Five years later his former African possessions were subject to an arbitration award made by the British Governor-General of India and declared to be independent of Oman. In 1887 the Sultan of Zanzibar handed over the administration of his possessions to the north of Vanga on the African continent to the British East Africa Association. These territories eventually passed to the British government and are now part of Kenya. In 1888 a similar concession was granted to the German East Africa Association of the Sultan's mainland territories between the River Umba and Cape Delgado. In 1890 the German government bought these territories outright for 4m. German marks. In 1892 the administration of the Benadir Ports (which had in 1889 been conceded to the British East Africa Association) was, with the consent of the Sultan, transferred to the Italian government in consideration of a quarterly payment of Rs 40,000. In 1886 the Sultan renounced in favour of Portugal all claims to the coast to the south of Cape Delgado.

German East Africa was conquered by the Allies in the First World War and subsequently divided between the Belgians, the Portuguese and the British. Ruanda and Urundi went to the Belgians, the Kionga triangle to Portugal, and Tanganyika to Britain. The country was administered as a League of Nations mandate until 1946, and then as a UN trusteeship territory until 9 Dec. 1961.

Tanganyika achieved responsible government in Sept. 1960 and full self-government on 1 May 1961. On 9 Dec. 1961 Tanganyika became a sovereign independent member state of the Commonwealth of Nations. The first prime minister, Dr Julius Nyerere, resigned in Jan. 1962; but on 9 Dec 1962 the country adopted a republican form of government (still within the British Commonwealth), and Dr Nyerere was elected as the first president.

On 24 June 1963 Zanzibar became an internal self-governing state which achieved independence on 9 Dec. 1963. On 12 Jan. 1964 her sultanate was overthrown by a revolt of the Afro-Shirazi Party leaders who established the People's Republic of Zanzibar. Also in Jan. 1964 there was an attempted *coup* against Nyerere who had to seek British military help. On 26 April 1964 Tanganyika, Zanzibar and Pemba combined to form the United Republic of Tanzania.

Before independence the East Africa High Commission had been administering services of an inter-territorial nature for Kenya, Tanzania and Uganda, and this continued for the East African Community. The Community practically ceased to function after 30 June 1977, chiefly because of the failure to agree a budget and the refusal of President Nyerere to negotiate with President Idi Amin of Uganda. In 1978 Amin attacked Tanzania and the following year Tanzania invaded Uganda, overthrew the Amin régime and remained in occupation until 1981.

In 1991 a presidential commission recommended a multi-party political system. In 1993 regional parliaments for Zanzibar and mainland Tanzania (Tanganyika) were set up. The first multi-party elections were held in 1995.

Gradual recovery is expected and a modest economic growth of 3·5% is projected. Headline inflation rate is down to 12·2%, compared with a high of 29·8% in 1995. KEY HISTORICAL EVENTS

The Thais migrated to the present territory from Nan Chao in the Yunnan area of China in the 8th and 9th centuries. Thais today look back to the state of Sukhothai, a Buddhist kingdom which grew up in the central plain of Thailand in the 13th century, as their first historical state. A hundred years later Sukhothai was succeeded by the new kingdom of Ayutthaya, which served until the Burmese invasion of 1767. After some years of confusion Thailand's leading general, Chao Phraya Chakkri, assumed the throne in 1782, thus establishing the dynasty which still heads the Thai state.

Siam, as Thailand was called until 1939, remained an independent state ruled by an absolute monarchy until 24 June 1932. Discontented with the social, political and economic stagnation of the country, a group of rebels calling themselves the People's Party and headed by a young lawyer, Pridi Phanomyong, precipitated a bloodless *coup*. The rebels seized control of the army, imprisoned many royal officials and persuaded the king to accept the introduction of constitutional monarchy.

When, the following year, the king tried to dissolve the newly appointed General Assembly, the army moved to prevent him, thus becoming the dominant force behind the government, which they have remained ever since. Nationalism dominated political life through the 1930s. In 1939 Field Marshal Pibul Songgram became premier and embarked on a pro-Japanese irridentist policy that eventually brought Thailand into the Second World War on Japan's side.

After 1945 political life was characterized by periods of military rule interspersed with short attempts at democratic, civilian government. Thus, three years of civilian rule from 1945 to 1948 were brought to an end when Songgram came back to power for a nine-year period. In 1957 power was seized from him by another army leader, Sarit Thanarat, who abolished the constitution and ruled without outside interference until his death in 1963, when he was replaced by the new Commander-in-Chief, Thano Kittikachon. Democratic government was reintroduced for a short time after 1963, when 100 students were killed in clashes with the army, and again from 1969 to 1971 when another successful military *coup* was staged, aimed at checking the high crime rate and the growth of Communist insurgence. A new, moderately democratic constitution was introduced in 1978.

On 23 Feb. 1991 a military junta seized power, deposing the prime minister. Following the appointment of Gen. Suchinda Kraprayoon as Prime Minister on 17 April 1992 there were massive anti-government demonstrations over several weeks in the course of which many demonstrators were killed. Gen. Suchinda resigned, and in May the legislative assembly voted that future prime ministers should be elected by its members rather than appointed by the military. A new government was elected on 13 Sept. led by Chuan Leekpai of the Democratic Party (DP). The 1995 election was fought against a background of political and financial corruption. The result was a coalition government which proved as ineffective as its predecessor in coming to grips with fundamental problems in the country. After the 1996 election a new constitution was drafted allowing for the separation of the executive, legislative and judicial branches of government.

ECONOMY

Policy. The financial crisis that spread across south-east Asia in 1997 started as a result of the devaluation of the baht (the Thai currency) in July and hit Thailand with particular force. Over 50 finance companies suspended business, the Thai stock exchange lost 82% of its 1995 peak value and the baht devalued by 40% in the second half of 1997. An IMF rescue package of US$17·2bn. gained time to put reforms in place, including tighter budgetary control, the merging of banks, and the restructuring of the country's outmoded financial system.

In May 1998 the government agreed to adopt a strategy for the eventual privatization of the four commercial banks nationalized earlier in the year.

Performance. Real GDP growth was 7·8% in 1996 (8·6% in 1995). In 1997 and 1998 it was estimated to be –1% and –8% respectively.

KEY HISTORICAL EVENTS

The Africans of Togo are of several tribes, including the Ewes of the south (also living in Ghana and Benin), and the Kabres, Dagombas, Tyokossis and others in the north. They had small pre-colonial states but were dominated by the powerful kingdoms of Ashanti to the west and Dahomey to the east. Europeans, beginning with the Portuguese who first visited the area in 1471-72, traded on the coast for centuries, especially in slaves, but the area between the Gold Coast forts and Whydah was for long relatively unimportant for them. In the 19th century, however, palm oil exports flourished at Anecho, Agoue and Porto Seguro, where British, French and German traders operated. Several prominent Togolese families of partly Brazilian or Portuguese origin, still important among the coastal African élite, arose at that time. Protestant and Catholic missions began working before the establishment of colonial rule. Despite the important rival influences of Britain and France in the area, it was Germany that established colonial rule on the coast in 1884.

German control was then extended inland but encountered strong resistance from the Kabres, Konkombas and other peoples, and only in 1912 was the colony fully subdued.

German Togo was overrun by the Allies in 1914. It was partitioned in 1919 into British and French Mandated Territories under the League of Nations. After the Second World War French Togo and British Togoland became Trust Territories under the United Nations. In British Togoland a referendum was held on 9 May 1956, in which a majority voted for union with Gold Coast, although most people in the south voted for union with French Togo. The whole territory was merged with what soon afterwards became independent Ghana, but many Togolese objected. In French Togo partial self-government was granted in 1956. On 27 April 1960 the country became independent and Sylvanus Olympio was elected president.

On 13 Jan. 1963 the President Olympio was murdered by soldiers. His successor, Nicolas Grunitzky, was deposed in a bloodless military coup in Jan. 1967 and on 14 April 1967, Gen. (then Col.) Gnassingbé Eyadéma assumed the Presidency. Following a general strike in June 1991 the government agreed to hold a National Conference, and this elected an interim Supreme Republican Council. A new constitution was approved in 1992.

TONGA

Kingdom of Tonga

Capital: Nuku'alofa
Population estimate, 2000: 110,000
Estimated GDP: $228m.

KEY HISTORICAL EVENTS

The Tongatapu group of islands in the south western Pacific Ocean was discovered by Tasman in 1643. The Kingdom of Tonga attained unity under Taufa'ahau Tupou (George I) who became ruler of his native Ha'apai in 1820, of Vava'u in 1833 and of Tongatapu in 1845. By 1860 the kingdom had become converted to Christianity (George himself having been baptized in 1831). In 1862 the king granted freedom to the people from arbitrary rule of minor chiefs and gave them the right to the allocation of land for their own needs. These institutional changes, together with the establishment of a parliament of chiefs, paved the way towards the democratic constitution under which the kingdom is now governed.

The kingdom continued up to 1899 as a neutral region in accordance with the Declaration of Berlin of 6 April 1886. By the Anglo-German Agreement of 14 Nov. 1899, subsequently accepted by the USA, the Tonga Islands were left under the Protectorate of Great Britain. A protectorate was proclaimed on 18 May 1900 and a British Agent and Consul appointed. The Protectorate was dissolved on 4 June 1970 when Tonga, the only ancient kingdom surviving from the pre-European period in Polynesia, achieved complete independence within the Commonwealth.

The islands are split up into the following groups (reading from north to south): The Niuas, Vava'u, Ha'apai, Tongatapu and 'Eua. The 3 main groups, both from historical and administrative significance, are Tongatapu in the south, Ha'apai in the centre and Vava'u in the north.

GNP per capita: (PPP$) 6,100
HDI/world rank: 0·880/40

KEY HISTORICAL EVENTS

Trinidad and Tobago lie just off the coast of Venezuela in the Caribbean Sea. When Columbus visited Trinidad in 1498 the island was inhabited by Arawak Indians. Tobago was occupied by the Caribs. Trinidad remained a neglected Spanish possession for almost 300 years until it was surrendered to a British naval expedition in 1797. The main crop on the island was tobacco.

The British first attempted to settle Tobago in 1721 but the French captured the island in 1781 and transformed it into a sugar-producing colony. In 1802 the British acquired Tobago and in 1899 it was administratively combined with Trinidad. When slavery was abolished in the late 1830s, the British subsidized immigration from India to replace plantation labourers. Sugar and cocoa declined towards the end of the 19th century. Oil and asphalt became the dominant sources of income.

On 31 Aug. 1962 Trinidad and Tobago became an independent member state of the Commonwealth. A Republican Constitution was adopted on 1 Aug. 1976.

During an attempted coup in July 1990 by a Moslem sect, the prime minister was taken hostage and wounded.

Altogether, the islands cover 5,124 sq. km (1,978 sq. miles), of which Trinidad (including the islets) has 4,821 sq. km (1,861 sq. miles) and Tobago 303 sq. km (117 sq. miles). KEY HISTORICAL EVENTS

Settled by the Phoenicians, this area of the north African coast developed into the Carthaginian Empire and was later incorporated into the Roman Empire. It became a powerful state under the dynasty of the Berber Hafsids (1207-1574).

Tunisia was nominally a part of the Ottoman Empire from the end of the 17th century and descendants of the original Ottoman ruler remained Beys of Tunis until the modern state of Tunisia was established. A French protectorate since 1883, Tunisia saw considerable anti-French activity in the late 1930s including a general strike in 1938 led by the *Néo-Destour* party (renamed *Parti Socialiste Destourien*—PSD—in 1964) under Habib Bourguiba. Tunisia did, however, support the Allies in the Second World War and was the scene of heavy fighting.

France granted internal self-government in 1955 and Tunisia became fully independent on 20 March 1956. A constitutional assembly was established and Habib Bourguiba became prime minister. A republic was established in 1957, the Bey deposed and the monarchy was abolished; Bourguiba became president. In 1975 the constitution was changed so that Bourguiba could be made President-for-life.

Tunisia was a one-party (PSD) state until 1981. When elections were held on 2 Nov. 1986 all seats in the national assembly were won by *Front National*, an alliance of the PSD and the *Union générale des travailleurs tunisiens*. All other parties boycotted the elections.

Bourguiba was overthrown in a bloodless *coup* in 1987. His successor as president, Zine El Abidine Ben Ali, introduced democratic reforms but a long running struggle with Islamic fundamentalists has been marked by sporadic violence, and the suspension of political rights.

TERRITORY AND POPULATION

Tunisia is bounded in the north and east by the Mediterranean Sea, west by Algeria and south by Libya. The area is 154,530 sq. km. The 1996 official estimate put the total population at 9,092,000; density, 59 per sq. km.

The UN gives a projected population for 2000 of 9·84m.

KEY HISTORICAL EVENTS

In the 13th century the kingdom of Othman I became the dominant power in Asia Minor (now the Asian part of Turkey). In 1453 the Turks captured Constantinople and destroyed the Eastern Roman Empire. Thereafter, the Ottoman Empire expanded to include an area from Morocco to Persia and westwards into the Balkans. From the 17th century, however, the Empire began to decline, its power weakening rapidly in the 19th century.

The Turkish War of Independence (1919-22), following the disintegration of the Ottoman Empire, was led and won by Mustafa Kemal (Atatürk) on behalf of the Grand National Assembly which first met in Ankara on 23 April 1920. On 20 Jan. 1921 the Grand National Assembly voted a constitution which declared that all sovereignty belonged to the people, and vested all power, both executive and legislative, in the Grand National Assembly. The name 'Ottoman Empire' was later replaced by 'Turkey'. On 1 Nov. 1922 the Grand National Assembly abolished the office of Sultan, and Turkey became a republic on 29 Oct. 1923. Religious courts were abolished in 1924, Islam ceased to be the official state religion in 1928, women were given the franchise and western-style surnames were adopted in 1934.

On 27 May 1960 the Turkish Army, directed by a National Unity Committee under the leadership of Gen. Cemal Gürsel, overthrew the government of the Democratic Party. The Grand National Assembly was dissolved and party activities were suspended. Party activities were legally resumed on 12 Jan. 1961. A new constitution was approved in a referendum held on 9 July 1961 and general elections were held the same year.

On 12 Sept. 1980, the Turkish armed forces overthrew the Demirel Government (Justice Party). Parliament was dissolved and all activities of political parties were suspended. The Constituent Assembly was convened in Oct. 1981, and prepared a new constitution which was enforced after a national referendum on 7 Nov. 1982.

In the face of mounting Islamicization of government policy, the Supreme National Security Council convened on 28 Feb. 1997 and reaffirmed its commitment to the secularity of the state. On 6 March Prime Minister Neçmettin Erbakan, leader of the pro-Islamist Welfare Party, agreed to sign a list of measures to combat Moslem fundamentalism. In June he was forced to resign by a campaign led by the Army. On 16 Jan. 1998 a Constitutional Court ruling ordered the closure of the Welfare Party. In Feb. Neçmettin Erbakan and 5 other party members were expelled from parliament and banned from political office for 5 years.

There are quarrels with Greece over the division of Cyprus, oil rights under the Aegean and ownership of uninhabited islands close to the Turkish coast.

Kurdish rebels are active in the south-east, occupying a large part of the Turkish army.

TERRITORY AND POPULATION

Turkey is bounded in the west by the Aegean Sea and Greece, north by Bulgaria and the Black Sea, east by Georgia, Armenia and Iran, and south by Iraq, Syria and the Mediterranean. The area (including lakes) is 779,452 sq. km (300,947 sq. miles). At the 1990 census the population was 56,473,035. A census is scheduled for 2000. Population estimate (July 1997), 63,528,225; density, 82 per sq. km.

The UN gives a projected population for 2000 of 65·73m.

In 1995, 69·2% of the population lived in urban areas.

Turkish is the official language. Kurdish and Arabic are also spoken.

Some 12m. Kurds live in Turkey. Limited use of the Kurdish language (not in schools or publications) was sanctioned in Feb. 1991.

Capital: Ashgabat
Population estimate, 2000: 4·48m.
GNP per capita: (PPP$) 2,010
HDI/world rank: 0·660/103

KEY HISTORICAL EVENTS

Descended from the Oghuz tribes who migrated to Central Asia in the 10th century, the Turkmen were conquered by the Russians in the 1860s. In 1866 Tashkent (now Toshkent) was occupied and in 1868 Samarkand (now Samarqand) and subsequently further territory was conquered and united with Russian Turkestan. In the 1870s Bokhara was subjugated, the emir, by an agreement of 1873, recognizing the suzerainty of Russia. In the same year Khiva became a vassal state to Russia. Until 1917 Russian Central Asia was divided politically into the Khanate of Khiva, the Emirate of Bokhara and the Governor-Generalship of Turkestan.

In the summer of 1919 the authority of the Soviet Government became definitely established in these regions. The Khan of Khiva was deposed in Feb. 1920 and a People's Soviet Republic was set up, the medieval name of Khorezm being revived. In Aug. 1920 the Emir of Bokhara suffered the same fate, and a similar regime was set up in Bokhara. The former Governor-Generalship of Turkestan was constituted an Autonomous Soviet Socialist Republic within the RSFSR on 11 April 1921.

In the autumn of 1924 the Soviets of the Turkestan, Bokhara and Khiva Republics decided to redistribute the territories of these republics on a nationality basis; at the same time Bokhara and Khiva became Socialist Republics. The redistribution was completed in May 1925 when the new states of Uzbekistan (now Uzbekiston), Turkmenistan and Tadzhikistan were accepted into the USSR as Union Republics.

Following the break-up of the Soviet Union, Turkmenistan declared independence in Oct. 1991. It became a member of the CIS in Dec. 1991.

TUVALU

Capital: Fongafale
Population estimate, 2000: 11,000
Estimated GDP: $7·8m.

KEY HISTORICAL EVENTS

Formerly known as the Ellice Islands, Tuvalu is a group of nine islands in the western central Pacific. Traditions recorded by missionaries in the 19th century indicate Samoa or Tonga as the original home of Tuvalu's first Polynesian settlers. Tuvaluan language supports this and genealogical data suggests settlement dates back to 1325. A number of castaways and beachcombers settled and intermarried with the Tuvuluans during 1820–70, when whalers frequented the surrounding seas.

In 1892 when the British established the Gilbert Islands Protectorate, the Tuvalu islanders were encouraged to join. They became the Gilbert and Ellice Islands colony in 1916.

After the Japanese occupied the Gilbert Islands in 1942, US forces occupied the Ellice Islands and built airstrips on 3 islands. Many Tuvaluans emigrated to Tarawa in the Gilberts after the Second World War for employment; rivalry between them and the Kiribatians set the stage for separation. On the recommendation of a commissioner, appointed by the British Government to consider requests that the island group be separated from the Gilbert islands, a referendum was held in 1974. There was a large majority in favour of separation and this took place in Oct. 1975. Independence was achieved on 1 Oct. 1978. Early in 1979 the USA signed a treaty of friendship with Tuvalu and relinquished its claim to the four southern islands in return for access to its Second World War bases, and the right to veto any other nation's request to use any of Tuvalu's islands for military purposes.

TERRITORY AND POPULATION

Tuvalu lies between 5° 30' and 11° S. lat. and 176° and 180° E. long. and comprises Nanumea, Nanumanga, Niutao, Nui, Vaitupu, Nukufetau, Funafuti (administrative centre; 1991 population, 3,432), Nukulaelae and Niulakita. Population (census 1991) 9,043, excluding an estimated 1,500 who were working abroad, mainly in Nauru and Kiribati. Estimate, 1995, 10,500, of whom 1,000 were working abroad. Area approximately 9½ sq. miles (24 sq. km). Density, 1995, 396 per sq. km.

In 2000 the population is projected to be 11,000.

In 1995 an estimated 53·2% of the population lived in rural areas. The population is of a Polynesian race.

Population estimate, 2000: 22·21m.
GNP per capita: (PPP$) 1,030
HDI/world rank: 0·340/160

KEY HISTORICAL EVENTS

The Luo (a Nilotic-speaking people) invaded the territory of present-day Uganda in the late 15th and 16th centuries and while assimilating with the existing Bantu-speaking inhabitants, also founded several strong centralized kingdoms. Buganda was the most prominent of these and prospered through the 19th century, assisting British forces in the conquest of its neighbours. Uganda became a British Protectorate in 1894, the province of Buganda being recognized as a native kingdom under its Kabaka. In 1961, Uganda was granted internal self-government with federal status for Buganda.

Uganda became a fully independent member of the Commonwealth on 9 Oct. 1962 after nearly 70 years of British rule. Full sovereign status was granted by the Ugandan Independence Act 1962. The post of Governor-General was on 9 Oct. 1963 replaced by that of President as head of state, elected by the National Assembly for a five-year term. Uganda became a republic on 8 Sept. 1967. President Milton Obote set about returning land given to the Buganda by the British in 1900 to its original Bunyoro owners. He also abolished Buganda's federal status and autonomy in the country. A rebellion by Buganda was quelled, but in 1971 Obote was overthrown by troops under Gen. Idi Amin. Amin's rule was characterized by widespread repression and in 1972, the expulsion of Asian residents. In April 1979, a force of the Tanzanian Army and Ugandan exiles advanced into Uganda, taking Kampala on 11 April. Amin fled into exile. On 14 April, Dr Yusuf Lule was sworn in as president and the country was administered, initially, by the Uganda National Liberation Front.

The former Attorney-General, Godfrey Lukonwa Binaisa QC, was appointed president by the National Consultative Council on 20 June 1979. Dr Lule subsequently left the country. Dr Binaisa was overthrown in May 1980 by the Military Commission, the military arm of the Uganda National Liberation Front. In Dec. 1980, following elections, Dr Obote again became president, but on 27 July 1985 was overthrown. The constitution was suspended and the borders closed. Lieut. Gen. Tito Okello became head of state on 29 July but on the following day the National Resistance Army (NRA) was not prepared to co-operate with the new régime. After an abortive ceasefire between the NRA and government forces on 17 Dec. 1985, the NRA, later known more usually as the National Resistance Movement, fought its way into Kampala, and Yoweri Museveni was installed as President on 27 Jan. 1986.

There is insurgent activity near Gulu and Kitgun in Northern Uganda. Rebels belonging to a religious sect, the Lords Resistance Army, are covertly supported by Sudan.

Many of the Asians expelled by Gen. Idi Amin in 1972 returned to Uganda in the second half of the 1990s, bringing with them both capital and much-needed skills.

TERRITORY AND POPULATION

Uganda is bounded in the north by Sudan, in the east by Kenya, in the south by Tanzania and Rwanda, and the west by the Democratic Republic of the Congo. Total area 241,038 sq. km, including 43,938 sq. km of water.

In 1999 the population was estimated to be 21,619,700 (10,708,000 male, 10,911,000 female); density, 90 per sq. km. The largest towns are Kampala, the capital (890,800), Jinja (397,600), Mbale (931,500), Masaka (1,038,400), Gulu (455,400), Soroti (657,000) and Mbarara (1,012,400).

The projected population for 2000 is 22·21m.

An estimated 84·5% of the population lived in rural areas in 1999.

The country is administratively divided into 39 districts, which are grouped in 4 geographical regions (which do not have administrative status). Area and estimated population of the regions in 1999:

Region	*Area in sq. km*	*Population in 1,000*
Central Region	61,510	6,046·0
Eastern Region	39,953	5,469·5
Western Region	54,917	5,997·7
Northern Region	84,658	4,106·5

The official language is English, but Kiswahili is used as a lingua franca. About 70% of the population speak Bantu languages; Nilotic languages are spoken in the north and east.

Uganda is host to around 500,000 refugees from a number of neighbouring countries, and internally displaced people. Probably in excess of 100,000 southern Sudanese fled to Uganda during 1996.

SOCIAL STATISTICS

Births, 1995, 1,004,000; deaths, 421,000. Rates per 1,000 population, 1995: Birth, 51·0; death, 21·4. Uganda's life expectancy at birth in 1998 was 41 years, down from 47 in 1985. It had last been 41 in the late 1950s. The sharp decline is largely attributed to the huge number of people in the country with HIV. Population growth in 1996–97 was an estimated 2·8%. Infant mortality, 1990–95, 122 per 1,000 live births; fertility rate, 7·1 births per woman.

CLIMATE

Although in equatorial latitudes, the climate is more tropical, because of its elevation, and is characterized by 2 distinct rainy seasons, March-May and Sept.-Nov. June-Aug. and Dec.-Feb. are comparatively dry. Temperatures vary little over the year. Kampala, Jan. 74°F (23·3°C), July 70°F (21·1°C). Annual rainfall 46·5" (1,180 mm). Entebbe, Jan. 72°F (22·2°C), July 69°F (20·6°C). Annual rainfall 63·9" (1,624 mm).

CONSTITUTION AND GOVERNMENT

The *President* is head of state and head of government, and is elected for a 5-year term by adult suffrage.

Having lapsed in 1966, the kabakaship was revived as a ceremonial office in 1993. Ronald Muwenda Mutebi (b. 13 April 1955) was crowned Mutebi II, 36th Kabaka, on 31 July 1993.

Until 1994 the national legislature was the 278-member National Resistance Council, but this was replaced by a 276-member *Constituent Assembly* in March 1994, 214 of whose members are elected in single-seat constituencies, 39 (women) indirectly elected by women's associations, and 23 set aside for indirectly elected representatives of the army (10), the disabled (5), youth (5) and trade unions (3). KEY HISTORICAL EVENTS

Kyiv (formerly Kiev) was the centre of the Rus principality in the 11th and 12th centuries and is still known as the Mother of Russian cities. In the 13th century the area was invaded by Tatar-Mongols and the western Ukraine principality of Galicia was annexed by Poland in the 14th century. At about the same time, Kyiv and the Ukrainian principality of Volhynia were conquered by Lithuania, before being absorbed by Poland. Poland, however, could not subjugate the Ukrainian cossacks, who allied themselves with Russia. The lands east of the Dnepr River were ceded to Russia in 1667 (some parts of Ukraine had been annexed by Muscovy much earlier), and the remainder of Ukraine, except for Galicia (part of the Austrian Empire, 1772-1919), was incorporated into the Russian Empire after the second partition of Poland in 1793.

The Ukrainians under Austrian rule in Galicia and Bukovina, and in the region of Hungary known as the Carpatho-Ukraine, preserved their identity as a separate group and engendered a forceful nationalist movement. In 1917, following the Bolshevik revolution, the Ukrainians in Russia established an independent republic. Austrian Ukraine proclaimed itself a republic in 1918 and was federated with its Russian counterpart. The Allies ignored Ukrainian claims to Galicia, however, and in 1918 awarded that area to Poland. In 1919 the Russian Ukrainian republic, under the leader Simon Petlyura, declared war on Poland. In the same year Ukrainian Communists established a second government and declared the existence of the Ukrainian SSR. In 1920 the advance of the Russian Bolshevik armies caused the Petlyura government and Poland to become allies but they were unable to prevent the Soviet government from taking control of the country.

From 1922 to 1932, drastic efforts were made by the USSR to suppress Ukrainian nationalism. Ukraine suffered from the forced collectivization of agriculture and the expropriation of foodstuffs; the result was the famine of 1932-33 when more than 7m. people died.

Following the Soviet seizure of eastern Poland in Sept. 1939, Polish Galicia was incorporated into the Ukrainian SSR. When the Germans invaded Ukraine in 1941 hopes that an autonomous or independent Ukrainian republic would be set up under German protection were disappointed. Ukraine was re-taken by the USSR in 1944. Parts of Bessarabia and northern Bukovina were added to Ukraine together with the Ruthenian region of Czechoslovakia. The Crimean region was joined to Ukraine in 1954.

On 5 Dec. 1991 the Supreme Soviet unanimously repudiated the 1922 Treaty of Union and declared Ukraine's independence. Ukraine was one of the founder members of the CIS in Dec. 1991. After independence, political tension developed in Ukraine over several domestic and international issues. Crimea, which was part of Russia until 1954, became a source of contention between Moscow and Kyiv. Shortly after Ukrainian independence in 1991, a Russian-led movement to secede from Ukraine was formed in Crimea, which succeeded in changing the status of the Crimean *oblast* to an autonomous republic. Crimea also issued a declaration of independence, which was rescinded in May 1992. In the same month, however, the Supreme Soviet of Russia declared the 1954 transfer of Crimea null and void. The Russian Supreme Soviet laid claim to the Crimean port city of Sevastopol, the home port of the 350-ship Black Sea Fleet, despite an agreement to divide the fleet which was signed by President Kravchuk and Russian President Boris Yeltsin in Aug. 1992. Conflict between Ukraine and Russia also developed over possession and transfer of nuclear weapons, delivery of Russian fuel to Ukraine, the division of Soviet assets, and military and political integration within the CIS.

A second separatist movement developed in eastern Ukraine, where coal miners and other workers went on strike in June 1993 to protest against the poor state of the

economy. A political crisis developed within the government over the pace of economic reform in 1993. In May 1993, Prime Minister Leonid Kuchma threatened to resign if he was not granted additional powers. In response, President Kravchuk urged the Ukrainian parliament to submit. But parliament rejected Kuchma's resignation and most of Kravchuk's proposals, although it did grant Kravchuk the power to rule by decree on some economic issues. Leonid Kuchma was elected President in 1994.

CONSTITUTION AND GOVERNMENT
In a referendum on 1 Dec. 1991, 90·3% of votes cast were in favour of independence. Turn-out was 83·7%.

A new Constitution was adopted on 28 June 1996. It defines Ukraine as a sovereign, democratic, unitary state governed by the rule of law and guaranteeing civil rights. The head of state is the *President*. Parliament is the 450-member unicameral *Supreme Council*, elected by universal suffrage for 4-year terms. For an election to be valid, turn-out in an electoral district must reach 50%. The Prime Minster is nominated by the President with the agreement of more than half the Supreme Council. There is an 18-member *Constitutional Court*, 6 members being appointed by the President, 6 by parliament and 6 by a panel of judges. Constitutional amendments may be initiated at the President's request to parliament, or by at least one third of parliamentary deputies. The Communist part was officially banned in the country in 1990, but was renamed the Socialist party of Ukraine and has retained political control. Hard-line Communists protested the ban, which was rescinded by the Supreme Council in May 1993. Several important democratic institutions have recently appeared in Ukraine, however, including a free press, a new constitution, and several popular opposition groups, such as Rukh and New Ukraine.

Navy. The former Soviet Black Sea Fleet continues to be the object of wrangling between Russia and Ukraine, and is financially and operationally paralyzed by the dispute. In 1996, the undisputed Ukrainian elements numbered 16,000, including 7,000 Naval Aviation and 4,000 in coastal defence, with fleet units based at Sevastopol and Odesa. INTERNATIONAL RELATIONS

Ukraine is a member of the UN, CIS, the Council of Europe, the Central European Initiative and the NATO Partnership for Peace.

ECONOMY

Policy. After considerable delay, the process of economic reform began in Ukraine. Prices on food, transportation and other services were deregulated in Jan. 1993, although food prices remained low in comparison to prices in neighbouring countries. The government issued privatization certificates and set up the western city of Lviv as a model for future privatization. The country's leadership attempted

to re-establish close economic ties with former Soviet republics, supporting economic co-operation between the member states of the CIS. In July 1993 Ukraine also agreed in principle to establish an economic and customs union with Russia and Belarus. Although privatization began in 1994, foreign participation has been very limited and the larger industrial sector enterprises are still for the most part state-owned. In Feb. 1998 a 10-year economic agreement was signed between Ukraine and Russia; but economic crisis in Russia inevitably had its impact on Ukraine. The hryvna lost half of its value in Sept. 1998 and though the IMF, EU and World Bank advanced more than US$700m., interest rates were pushed up to 82%.

Performance. Real GDP growth was –3·2% in 1997.

Budget. 1997 budget (in 1,000m. hryvna): Revenue, 28,112·0; expenditure, 34,312·7. Sources of revenue included: VAT, 8,242·3; profits tax, 5,792·1. Expenditure included: Welfare, 15,949·3; population social protection, 5,607·7; defence, 1,738·9; administration, 2,974·9.

Currency. The unit of currency is the *hryvna* of 100 *kopiykas*, which replaced karbovanets on 2 Sept. 1996 at 100,000 karbovanets = 1 hryvna. Inflation was 16% in 1997, down from 80% in 1996. Foreign exchange reserves in Feb. 1998 were US$2,023m. and gold reserves 60,000 troy oz.

Banking and Finance. A National Bank was founded in March 1991. It operates under government control, its Governor being appointed by the President with the approval of parliament. Its *governor* is Viktor Yushchenko. There were 219 banks in all in 1996.

There is a stock exchange in Kyiv.

ENERGY AND NATURAL RESOURCES

Electricity. Installed capacity was 53·9m. kW in 1997. In 1997 production was 178bn. kWh and consumption per capita 3,487 kWh. In 1997 there were 5 nuclear power stations producing 44·6% of output. A Soviet programme to greatly expand nuclear power-generating capacity in the country was abandoned in the wake of the 1986 accident at Chernobyl.

Oil and Gas. In 1997 output of crude oil and gas concentrate was 4·1m. tonnes, and of natural gas 18,100m. cu. metres.

Water. In 1997 water consumption totalled 15,623m. cu. metres.

Minerals. Ukraine's industrial economy, accounting for more than a quarter of total employment, is based largely on the republic's vast mineral resources. The Donetsk Basin contains huge reserves of coal, and the nearby iron-ore reserves of Kryvy Rih are equally rich. Among Ukraine's other mineral resources are manganese, bauxite, nickel, titanium and salt. Coal accounts for roughly 30% of the country's energy production. Coal and lignite production, 1994, 94·4m. tonnes; iron ore production, 1996, 48·0m. tonnes.

Agriculture. Agriculture accounted for 13% of GDP in 1996. Ukraine has extremely fertile black-earth soils in the central and southern portions, totalling nearly two-thirds of the territory. The original vegetation of the area formed three broad belts that crossed the territory of Ukraine latitudinally. Mixed forest vegetation occupied the northern third of the country, forest-steppe the middle portion and steppe the southern third of the country. Now, however, much of the original vegetation has been cleared and replaced by cultivated crops. Ukraine is a major producer and exporter of a wide variety of agricultural products, including wheat and sugar-beets. Other crops include potatoes, vegetables, fruit, sunflowers, flax, buckwheat, cotton, tobacco, soya, hops and the rubber plant kok-sagyz. Livestock raising is also important. Agricultural production has suffered greatly since independence, however, and domestic food consumption has decreased. In 1997 there were 41·8m. ha of land under cultivation.

State farm members may leave and receive a portion of land free; the land may be resold.

Output (in 1,000 tonnes) in 1997: Grain, 35,472; sugar-beet, 17,633; potatoes, 16,701; vegetables, 5,168; fruit and berries, 2,793; meat, 1,875; milk, 13,800. 8,242m. eggs were produced. At 1 Jan. 1998 there were 12·3m. cattle, 9·5m. pigs, 2·4m. sheep and goats, 136m. chickens (1995) and 20m. ducks (1995).

Forestry. The area of forestry fund of Ukraine in 1995 was 10·78m. ha. In 1991, 7·8m. cu. metres of timber were produced. In 1997 there were 24 national parks and reservations with a total area of 761,800 ha.

Fisheries. In 1995 the catch totalled 424,812 tonnes, of which 372,474 tonnes were from sea fishing. The total catch in 1988 was 1,144,339 tonnes.

INDUSTRY

In 1997 there were 9,989 industrial enterprises. It was occupied by Tatars in 1239, conquered by Ottoman Turks in 1475 and retaken by Russia in 1783. In 1921 after the Communist revolution it became an autonomous republic, but was transformed into a province (*oblast*) of the Russian Federation in 1945, after the deportation of the Tatar population in 1944 for alleged collaboration with the German invaders in the Second World War. It was transferred to Ukraine in 1954 and became an autonomous republic in 1991. About half the surviving Tatar population of 0·4m. had returned from exile by mid-1992.

KEY HISTORICAL EVENTS

From Sha'am, 35 miles south-west of Ras Musam dam, for nearly 400 miles to Khor al Odeid at the south-eastern end of the peninsula of Qatar, the coast, formerly known as the Trucial Coast, of the Gulf (together with 50 miles of the coast of the Gulf of Oman) belongs to the rulers of the 7 Trucial States. In 1820 these rulers signed a treaty prescribing peace with the British Government. This treaty was followed by further agreements providing for the suppression of the slave trade, and by a series of other engagements, of which the most important were the Perpetual Maritime Truce (May 1853) and the Exclusive Agreement (March 1892). Under the latter, the sheikhs, on behalf of themselves, their heirs and successors, undertook that they would on no account enter into any agreement or correspondence with any power other than the British Government, receive foreign agents, or cede, sell or give for occupation any part of their territory save to the British Government.

British forces withdrew from the Gulf at the end of 1971 and the treaties whereby the UK had been responsible for the defence and foreign relations of the Trucial States were terminated, being replaced on 2 Dec. 1971 by a treaty of friendship between the UK and the United Arab Emirates. The United Arab Emirates (formed 2 Dec. 1971) consists of the former Trucial States: Abu Dhabi, Dubai, Sharjah, Ajman, Umm al Qaiwain, Ras al-Khaimah (joined in Feb. 1972) and Fujairah. The small state of Kalba was merged with Sharjah in 1952.

About one-tenth are nomads. Population density, 28 per sq. km.

The UN gives a projected population for 2000 of 2·44m.

In 1995, 83·8% of the population lived in urban areas.

KEY HISTORICAL EVENTS

The United Kingdom may be said to date from 1707 when the parliament of England and Scotland were united but the name was not adopted until 1800 when the government of Ireland was incorporated. Ireland was governed by English law through a nominally independent parliament. The people, mainly Catholic, rebelled in 1798. The settlement proposed was legislative union and Catholic emancipation; the latter was delayed until 1828–29 (when Nonconformists also received full civic rights) but the union took effect in 1801, as the United Kingdom of Great Britain and Ireland.

With the accession of the Hanoverian George I (1714), the system of Parliamentary party government took hold. In 1721 Sir Robert Walpole began his long spell in office as Britain's first prime minister, adopting a peace policy that stressed the benefits of trade.

Walpole left office in 1742 and for the next 40 years none of his successors, with the exception of Lord North, enjoyed long periods of power. The greatest of them was William Pitt. In the Seven Years War with France which broke out in 1756, Pitt put new life into the military, and his policy contributed greatly to substantial imperial gains, notably Canada and much of India.

Relations between Parliament and Crown went through an unsettled period in the reign of George III. He and Lord North, as prime minister, took the blame for the loss of the American colonies. The War of Independence ended with Britain's recognition of American right to self-government in 1783. The humiliation was softened by economic development at home where the Industrial Revolution was in full swing.

In 1793 revolutionary France declared war, and was not finally defeated until 1815. The demands of war stimulated the new, steam-powered industries. After 1815 there was frequent unrest as an increasingly urban and industrial society found its interests poorly represented by a parliament composed chiefly of landowners.

The Reform Act of 1832 improved representation in Parliament, and further acts (1867, 1884, 1918 and 1928) led gradually to universal adult suffrage.

The accession of Victoria in 1837 was the beginning of an era of unprecedented material progress. There were many causes but the most potent were the creation of a modern banking system, new means of communication, railways and steamships, and the use of the same power, steam, to build a factory system to produce consumer goods on an enormous scale.

Early industrial development produced great national wealth but its distribution was extremely uneven and the condition of the poor improved slowly. Legislation to improve working conditions, education and public health did not keep pace with the growth of industrial cities. The 1840s saw much immigration from Ireland (where there was famine) and from areas of political unrest in continental Europe; a second wave of immigration from the continent occurred after 1880, including Jewish refugees.

Abroad, there was war with Russia in the Crimea (1854–56); most wars, however, were fought to conquer or pacify colonies. The 19th-century empire included India, Canada, Australasia, and vast territories in Africa and Eastern Asia. After 1870 the Suez Canal enabled Britain to control the empire more efficiently; she became a 40% shareholder in 1875 and the controlling power in Egypt in 1882.

The most serious imperial wars were the Boer Wars of 1881 and 1899–1902. British opinion was deeply divided, and the Liberal government elected in 1905

negotiated a Union of South Africa, by which South Africa enjoyed the same autonomy which had been agreed for Canada (1867), Australia (1901) and later New Zealand (1907). The 'dominion status' of these countries was clarified by the Statute of Westminster (1931).

Whereas early Victorian reforms were responses to obvious distress, governments after 1868 were more inclined towards preventive state action. The budget of 1910 was designed largely to finance a programme of welfare; its rejection in Parliament by the House of Lords led to the Parliament Act (1911) which ended the Lords' power to veto bills.

On 3 Aug. 1914 Germany invaded Belgium, and Britain was obliged by treaty to retaliate by declaring war.

At this time, a rebellion was staged in Ireland, born of the failure of successive attempts to agree a formula for Irish Home Rule. The issue was complicated by factional disagreement in southern Ireland and the wish of northern Ireland to remain in the United Kingdom. In 1920 after four years' conflict the Government of Ireland Act partitioned the country. The northern six counties remained British, a parliament was created and a Unionist government took office. The southern 26 counties moved by stages to complete independence as the Republic of Ireland.

After the First World War there followed a long period of economic decline and industrial difficulty. There was an unsuccessful General Strike in 1926. In 1931 a coalition National Government was formed to deal none too successfully with the impact of world depression.

Germany revived as a military power in the 1930s, and invaded Poland on 1 Sept. 1939. Britain, bound once more by treaty, declared war.

The Second World War ended with German and Japanese defeat in 1945. It was a time of great social upheaval. In the 1945 election a Labour government was returned with a large majority, and a socialist programme which emphasized wealth distribution above wealth creation. Subsequent governments modified but generally accepted the changes then introduced. After 1979, however, Conservative governments reversed much of this legislation before Labour regained power in 1997 on a free-market manifesto which promised better economic management and job creation.

Beginning with the independence and partition of India and Pakistan in 1947, there was rapid progress to independence for all the colonies. The new concept was of a Commonwealth of freely associated states, recognizing the British monarch as symbolic Commonwealth head (some states chose to retain the monarch as head of state).

The Second World War all but bankrupted Britain, but it was at least a decade before her politicians began to realize that they could no longer play the world stage on a par with leaders from the USA and USSR. The option of joining other European countries in moves towards unity was resisted in favour of a 'special relationship' with the USA. It was not until 1961 that economic reality persuaded Britain of the need to join the European Economic Community. The application was rebuffed by France where President Charles de Gaulle was suspicious of 'Anglo-Saxon' motives. A second application was successful in 1973. Membership of the Community was endorsed by referendum in 1975.

In April 1996, 29 new unitary authority areas came into being: Aberdeen City, Aberdeenshire, Angus, Argyll and Bute, Clackmannanshire, Dumfries and Galloway, Dundee City, East Ayrshire, East Dunbartonshire, East Lothian, East Renfrewshire, City of Edinburgh, Falkirk, Fife, Glasgow City, Highland, Inverclyde, Midlothian, Moray, North Ayrshire, North Lanarkshire, Perth and Kinross, Renfrewshire, Scottish Borders, South Ayrshire, South Lanarkshire, Stirling, West Dunbartonshire, West Lothian. The Island Authority Areas (Orkney, Shetland, Western Isles) remained as they were.

The birthplaces of the 1991 usually resident population in Scotland were: Scotland, 4,454,065; England, 354,268; Wales, 4,710; Northern Ireland, 26,393; Ireland 22,773; Commonwealth, 59,134; foreign countries, 148,987.

British Citizenship. Under the British Nationality Act 1981 there are 3 main forms of citizenship: Citizenship for persons closely connected with the UK; British Dependent Territories citizenship; British Overseas citizenship. British citizenship is acquired automatically at birth by a child born in the UK if his or her mother or father is a British citizen or is settled in the UK. A child born abroad to a British citizen is a British citizen by descent. British citizenship may be acquired by registration for stateless persons, and for children not automatically acquiring such citizenship or born abroad to parents who are citizens by descent; and, for other adults, by naturalization. Requirements for the latter include 5 years' residence (3 years for applicants married to a British citizen). The Hong Kong (British Nationality) Order 1986 created the status of British National (Overseas) for citizens connected with Hong Kong before 1997, and the British Nationality (Hong Kong) Act 1990 made provision for up to 50,000 selected persons to register as British citizens.

In 1995, 40,500 persons were granted citizenship and a further 26,000 under the Hong Kong Act.

Emigration and Immigration. Immigration is mainly governed by the Immigration Act 1970 and Immigration Rules made under it. British and Commonwealth citizens with the right of abode before 1983 are not subject to immigration control, nor are citizens of European Economic Area countries. Other persons seeking to work or settle in the UK must obtain a visa or entry clearance.

Migration statistics are derived from the government's International Passenger Survey, and exclude the Republic of Ireland.

In 1996 (and 1995) there were 61,730 (55,480) acceptances for settlement in the UK, including from: European Economic Area, 120 (220); rest of Europe, 7,370 (4,030), notably Turkey 3,720 (1,170); Pakistan, 6,250 (6,310); India, 4,620 (4,860); Bangladesh, 2,720 (3,280); USA, 4,030 (3,960); Nigeria, 3,220 (3,260); Sri Lanka, 2,180 (1,370); Australia, 2,120 (2,020); Ghana, 1,970 (1,820); Japan, 1,780 (1,870); Iran, 1,720 (1,120); Iraq, 1,580 (540).

Asylum. In 1996 there were 29,640 applications for asylum (2,905 applications in 1984). While respecting its obligations to political refugees under the UN Convention and Protocol relating to the status of Refugees, the Government has powers under the Asylum and Immigration Act 1996 to weed out applicants seeking entry for non-political reasons and to designate certain countries as not giving risk of persecution. 6% of applicants were accepted in 1995.

The Queen's legal title rests on the statute of 12 and 13 Will. III, ch. 3, by which the succession to the Crown of Great Britain and Ireland was settled on the Princess Sophia of Hanover and the 'heirs of her body being Protestants'. By proclamation of 17 July 1917 the royal family became known as the House and Family of Windsor. On 8 Feb. 1960 the Queen issued a declaration varying her confirmatory declaration of 9 April 1952 to the effect that while the Queen and her children should continue to be known as the House of Windsor, her descendants, other than descendants entitled to the style of Royal Highness and the title of Prince or Princess, and female descendants who marry and their descendants should bear the name of Mountbatten-Windsor.

Lineage to the throne: 1) Prince of Wales. 2) Prince William of Wales. 3) Prince Henry of Wales. 4) Duke of York. 5) Princess Beatrice of York. 6) Princess Eugenie of York.

For the Royal Style and Titles of Queen Elizabeth *see* Commonwealth section. By letters patent of 30 Nov. 1917 the titles of Royal Highness and Prince or Princess are restricted to the Sovereign's children, the children of the Sovereign's sons and the eldest living son of the eldest son of the Prince of Wales.

Provision is made for the support of the royal household, after the surrender of hereditary revenues, by the settlement of the Civil List soon after the beginning of each reign. The Civil List Act of 1 Jan. 1972 provided for a decennial, and the Civil List (Increase of Financial Provision) Order 1975 for an annual review of the List, but in July 1990 it was again fixed for one decade.

The Civil List of 1991–2000 provided for an annuity of £7,900,000 to the Queen; £360,000 to Prince Philip; £640,500 to Queen Elizabeth (the Queen Mother); £230,500 to the Princess Royal; £220,000 to the Princess Margaret; £250,000 to the Duke of York; £100,000 to Prince Edward; £90,000 to Princess Alice. However, since April 1993 only the Queen, Prince Philip and the Queen Mother have received payments from the Civil List. The income of the Prince of Wales derives from the Duchy of Cornwall. The Civil List was exempted from taxation in 1910. The Queen has paid income tax on her private income since April 1993.

The supreme legislative power is vested in Parliament, which consists of the Crown, the House of Lords and the House of Commons, and dates in its present form from the middle of the 14th century. A Bill which is passed by both Houses and receives Royal Assent becomes an Act of Parliament and part of statute law.

Parliament is summoned, and a General Election is called, by the sovereign on the advice of the Prime Minister. A Parliament may last up to 5 years, normally divided into annual sessions. A session is ended by prorogation, and all Public Bills which have not been passed by both Houses then lapse. A Parliament ends by dissolution, either by will of the sovereign or by lapse of the 5-year period.

Under the Parliament Acts 1911 and 1949, all Money Bills (so certified by the Speaker of the House of Commons), if not passed by the Lords without amendment, may become law without their concurrence within 1 month of introduction in the Lords. Public Bills, other than Money Bills or a Bill extending the maximum duration of Parliament, if passed by the Commons in 2 successive sessions and rejected each time by the Lords, may become law without being passed by the Lords provided that 1 year has elapsed between Commons second reading in the first session and third reading in the second session, and that the Bill reaches the Lords at least 1 month before the end of the second session. The Parliament Acts have only been used twice since 1949, in 1991 for the War Crimes Act and for the European Parliamentary Elections Act of 1999.

Peerages are created by the sovereign, with no limits on their number. There are 4 types of Lord: 1) *Lords Spiritual*, comprising 2 archbishops and 24 diocesan bishops of the Church of England, who leave the House when they retire; 2) *hereditary peers*—in Jan. 1999 there were 750 peers who had succeeded to a peerage on the death of a relative and 9 who had themselves been granted a hereditary peerage; 3) *life peers*—there were 480 lords who had been given a peerage for their own lifetime only under the Life Peerages Act 1958; 4) *Lords of Appeal* (both active and retired)—there were 29 peers, granted a peerage for life under the Appellate Jurisdiction Act 1876, in order to enable them to hear appeal cases in the House of Lords. The full House thus consists of 1,294 lords, of whom 103 are women. The average attendance at each sitting of the House is approximately 417.

In Jan. 1999 the Government brought forward a Bill to fulfill its election manifesto pledge to remove the voting and sitting rights of the hereditary peers.

The House of Commons consists of members (of both sexes) representing constituencies determined by the Boundary Commissions. Persons under 21 years of age, Clergy of the Church of England and of the Scottish Episcopal Church, Ministers of the Church of Scotland, Roman Catholic clergymen, civil servants, members of the regular armed forces, policemen, most judicial officers and other office-holders named in the House of Commons (Disqualification) Act are disqualified from sitting in the House of Commons. No peer eligible to sit in the House of Lords can be elected to the House of Commons unless he has disclaimed his title, but Irish peers and holders of courtesy titles, who are not members of the House of Lords, are eligible.

The Representation of the People Act 1948 abolished the business premises and University franchises, and the only persons entitled to vote at Parliamentary elections are those registered as residents or as service voters. No person may vote in more than one constituency at a general election. Persons may apply on certain grounds to vote by post or by proxy. Elections are held on the first-past-the-post system, in which the candidate who receives the most votes is elected.

All persons over 18 years old and not subject to any legal incapacity to vote and who are either British subjects or citizens of Ireland are entitled to be included in the register of electors for the constituency containing the address at which they were residing on the qualifying date for the register, and are entitled to vote at elections held during the period for which the register remains in force.

Members of the armed forces, Crown servants employed abroad, and the wives accompanying their husbands, are entitled, if otherwise qualified, to be registered as 'service voters' provided they make a 'service declaration'. To be effective for a particular register, the declaration must be made on or before the qualifying date for that register. In certain circumstances, British subjects living abroad may also vote.

The Parliamentary Constituencies Act 1986, as amended by the Boundary Commissions Act 1992, provided for the setting up of Boundary Commissions for England, Wales, Scotland and Northern Ireland. The Commissions' last reports were made in 1995, and thereafter reports are due at intervals of not less than 8 and not more

than 12 years; and may be submitted from time to time with respect to the area comprised in any particular constituency or constituencies where some change appears necessary. Any changes giving effect to reports of the Commissions are to be made by Orders in Council laid before Parliament for approval by resolution of each House. The Parliamentary electorate of the United Kingdom and Northern Ireland in the register in 1998 numbered 44,296,793, of whom 36,885,805 were in England, 2,230,451 in Wales, 3,992,502 in Scotland and 1,188,034 in Northern Ireland. In 1991 it was officially estimated that 7·1% of eligible voters failed to register on the electoral roll.

At the UK general election held in 1997, 659 members were returned, 529 from England, 72 from Scotland, 40 from Wales and 18 from Northern Ireland. Every constituency returns a single member.

One of the main aspects of the Labour Government's programme of constitutional reform is Scottish and Welsh devolution. In the referendum on Scottish devolution on 11 Sept. 1997, 1,775,045 votes (74·3%) were cast in favour of a Scottish parliament and 614,400 against (25·7%). The turn-out was 60·4%, so around 44·8% of the total electorate voted in favour. For the second question, on the Parliament's tax-raising powers, 1,512,889 votes were cast in favour (63·5%) and 870,263 against (36·5%). This represented 38·4% of the total electorate.

On 18 Sept. 1997 in Wales there were 559,419 votes cast in favour of a Welsh assembly (50·3%) and 552,698 against (49·7%). The turn-out was 51·3%.

In Aug. 1911 provision was first made for the payment of a salary of £400 per annum to members of the Commons, other than those already in receipt of salaries as officers of the House, as Ministers or as officers of Her Majesty's household. For current salaries *see below*. Members of the House of Lords are unsalaried but may recover expenses incurred in attending sittings of the House within maxima for each day's attendance of £33·50 for day subsistence, £75·50 for night subsistence and £32·50 for secretarial and research assistance and office expenses. Additionally, Members of the House who are disabled may recover the extra cost of attending the House incurred by reason of their disablement. In connection with attendance at the House and parliamentary duties within the UK, Lords may also recover the cost of travelling to and from home.

The executive government is vested nominally in the Crown, but practically in a committee of Ministers, called the Cabinet, which is dependent on the support of a majority in the House of Commons. The head of the Cabinet is the *Prime Minister*, a position first constitutionally recognized in 1905. The Prime Minister's colleagues in the Cabinet are appointed on his recommendation.

Ministers receive a severance payment of 3 months' salary.

The Prime Minister is entitled to a salary of £102,750 in addition to the parliamentary salary of £45,066, but decided to accept the pre-election salary of £60,167 (giving the total of £105,233). Cabinet ministers are entitled to salaries of £61,650 (Commons) and £80,107 (Lords), but they also decided to accept the pre-election rates of £45,201 and £60,495. Cabinet ministers in the Commons receive

the parliamentary salary of £45,066, to give a total of £90,267; those in the Lords do not receive the parliamentary salary.

The Privy Council: Before the development of the Cabinet System, the Privy Council was the chief source of executive power, but now its functions are largely formal. It advises the monarch to approve Orders in Council and on the issue of royal proclamations, and has some independent powers such as the supervision of the registration of the medical profession. It consists of all Cabinet members, the Archbishops of Canterbury and York, the Speaker of the House of Commons and senior British and Commonwealth statesmen. There are a number of advisory Privy Council committees. The Judicial Committee is the final court of appeal from courts of the UK dependencies, the Channel Islands and the Isle of Man, and some Commonwealth countries.

Local Government. Local Administration is carried out by 4 different types of bodies, namely: (i) local branches of some central ministries, such as the Departments of Health and Social Security; (ii) local sub-managements of nationalized industries; (iii) specialist authorities such as the National Rivers Authority; and (iv) the system of local government described below. The phrase 'local government' has come to mean that part of the local administration conducted by elected councils. There are separate systems for England, Wales and Scotland.

The Local Government Act 1992 established a Local Government Commission, which completed its report in 1996 on whether the two-tier local government structure should be replaced by unitary authorities in some areas. Following its recommendations, 27 new unitary councils had been established by April 1997. The Commission is currently reviewing electoral arrangements.

Local authorities have statutory powers and claims on public funds. Relations with central government are maintained through the Department of the Environment in England, and through the Welsh and Scottish Offices. In England the Home Office and the Department of Education and Employment are also concerned with some local government functions. (These are performed by departments within the Welsh and Scottish Offices). Ministers have powers of intervention to protect individuals' rights and safeguard public health, and the Government has power to cap (i.e. limit) local authority budgets.

Local government is conducted by elected councils at different levels of administration. England, Wales and Scotland have different systems. See under 'Local Government' in England, Scotland and Wales for more details.

Resident citizens of the UK, Ireland, a Commonwealth country or an EU country may (at age 18) vote and (at age 21) stand for election. In England, councils are elected for 4 years, except that in the metropolitan and one-third of the other districts, one-third of councillors are elected in each of the 3 years that no county council election is held. Counties are divided into electoral divisions and districts into wards. In Wales, elections for the full councils are held every 4 years, and in Scotland every 3 years. The chair of the council is one of the councillors elected by the rest. In boroughs and cities his or her title is Mayor. Mayors of cities may have

the title of Lord Mayor conferred on them. 51 towns in England and Wales and 4 in Scotland have the status of city. This status is granted by the personal command of the monarch and confers no special privileges or powers. In Scotland, the chair of city councils is deemed Lord Provost, and is elsewhere known as Convenor or Provost. In Wales, the chair is called Chairman in counties and Mayor in county boroughs. Any parish or community council can by simple resolution adopt the style 'town council' and the status of town for the parish or community. Basic and other allowances are payable to councillors (except Scottish community councillors).

Functions. Legislation in the 1980s initiated a trend for local authorities to arrange for the provision of services by, or in collaboration with, commercial or voluntary bodies rather than provide them directly. Savings in expenditure are encouraged by compulsory competitive tendering. In England, county councils are responsible for strategic planning, transport planning, non-trunk roads and regulation of traffic, personal social services, consumer protection, disposal of waste, the fire and library services, and partially for education. District councils are responsible for environmental health, housing, local planning applications (in the first instance) and refuse collection. Unitary authorities combine the functions of both levels.

Finance. Revenue is derived from the Council Tax, which supports about one-fifth of current expenditure, the remainder being funded by central government grants and by the redistribution of revenue from the national non-domestic rate (property tax). Capital expenditure is financed by borrowing within government-set limits and sales of real estate.

Election Results. Elections for one third of the seats on the councils of the 32 London boroughs, 36 metropolitan districts and 118 non-metropolitan districts were held on 5 May 1994. The Labour Party gained control of 93 councils; the Liberal Democratic Party, 19; the Conservative Party, 15; ind, 5. There was no overall majority in 54 councils.

Elections were held outside the metropolitan areas ('the shires') on 4 May 1995. Labour made a net gain of 155 councils, the Liberal Democrats 45 and the Conservatives lost 51.

At the elections of 2 May 1996 for 32 metropolitan and 114 non-metropolitan and unitary councils, Labour took control of 84 councils and gained 431 seats, the Liberal Democrats took control of 23 councils and gained 142 seats, the Conservatives took control of 3 councils and lost 534 seats, and independents took control of 3 councils and lost 29 seats. In 33 councils no party gained an absolute majority.

On 6 April 1995 elections were held for the 29 newly-created unitary councils. 1,161 seats were contested. Labour won 614 seats with 47% of votes cast, and gained control of 20 of the councils; the Scottish National Party won 181 seats with 26% and gained 3 councils; the Liberal Democrats won 123 seats with 10%; the Conservative Party won 81 seats with 11%. Independents gained control of 3 councils, and 3 councils had no overall control.

County council elections and those for 19 further new unitary authorities took place on 1 May 1997. Elections for the 1,014 seats on the unitary authorities created shadow councils whose job was to prepare the area for transfer to the new status in April 1998. Councillors for these areas did not stand for election but stepped down in April 1998 leaving those elected on 1 May 1997 in charge.

The next local government elections were scheduled for 6 May 1999.

DEFENCE

The Defence Council was established on 1 April 1964 under the chairmanship of the Secretary of State for Defence, who is responsible to the Sovereign and Parliament for the defence of the realm. Vested in the Defence Council are the functions of commanding and administering the Armed Forces. The Secretary of State heads the Department of Defence. There are 3 subordinate Ministers; 2 Ministers of State and 1 Parliamentary Under-Secretary of State.

Defence Council membership comprises the Secretary of State, the 3 Ministers mentioned above, the Chief of the Defence Staff, the 3 single Service Chiefs of Staff, the Vice-Chief of Defence Staff, the Chief of Defence Procurement, the Chief

Scientific Adviser, the Permanent Under-Secretary of State and the Second Permanent Under Secretary of State.

There are 3 Service Boards, each of which enjoys delegated powers for the administration of matters relating to the naval, military and air forces respectively.

Defence policy decision-making is a collective Governmental responsibility. Important matters of policy are considered by the full Cabinet or, more frequently, by the Defence and Overseas Policy Committee under the chairmanship of the Prime Minister. Other members of this Committee include the Secretary of State for Defence, the Foreign and Commonwealth Secretary and the Home Secretary.

The Procurement Executive is responsible for procurement of equipment and supplies.

The ban on homosexuals serving in the armed forces was upheld by a House of Commons vote in May 1996.

Defence Budget: 1996–97, £21,425m. Estimates for 1997–98, £21,923m.; 1998–99, £22,624m. In 1997 per capita defence expenditure totalled US$611 (US$803 per capita in 1985). As a percentage of GDP, spending was 2·8% in 1997, down from 5·2% in 1985).

Nuclear weapons: Having carried out its first test in 1952, there have been 45 tests in all. The nuclear arsenal consisted of approximately 260 warheads in Jan. 1998 according to the Stockholm International Peace Research Institute.

Arms Trade: The UK is the world's second largest exporter of arms after the USA, with sales in 1997 worth US$8·5bn., or 18·5% of the world total. In 1987 sales had been worth US$7·4bn., but had only represented 8·3% of the total. The UK is the third largest importer of arms, after Saudi Arabia and Taiwan, spending US$2·5bn. in 1997, up from US$2·4bn. in 1996.

Army. Control of the British Army is vested in the Defence Council and is exercised through the Army Board. The Secretary of State for Defence is Chairman of the Army Board. The other civilian members are the 3 subordinate Ministers and the Second Permanent Under Secretary of State.

The Military members of the Army Board are the Chief of the General Staff, the Adjutant General, the Quartermaster General, the Master General of the Ordnance, the C.-in-C. Land Command and the Assistant Chief of General Staff. The Chief of the General Staff is the professional head of his Service and the professional adviser to Ministers on the Army aspects of military matters. He is responsible for the fighting efficiency of his Service; for Army advice on the conduct of operations; and for the issuing of such single Service operational orders as may be appropriate resulting from defence policy decisions. He is also responsible for the Territorial Army. The Chief of the General Staff is a member of the Chiefs of Staff Committee which is chaired by the Chief of the Defence Staff, who is responsible to HM Government for professional advice on strategy and military operations, and on the military implication of defence policy. The Adjutant-General is responsible for recruiting and selection of army manpower; for the administration and individual training of military personnel; for the discipline of the Army; for pay and allowances and pensions; for legal services; for the veterinary and remount services; for the Army Cadet Forces; for questions of Army welfare and education including school children overseas; and for resettlement and sports. The Quartermaster-General is responsible for logistic planning for the Army; for the storage, distribution, maintenance, repair and inspection of equipment, stores and ammunition; for development of stores; for supply, transport and accommodation; for the development, production and inspection of clothing; for military movements and transportation; for the Army postal, catering, salvage and fire services; and for questions connected with canteens, institutes and military labour. The Master General of the Ordnance is a member of both the Army Board and of the Procurement Executive Management Board. He is responsible to the Chief of Defence Procurement for the financial and technical management of the approved programme for the procurement of service equipment for the Armed Services, and to the Army Board for the co-ordination of the Army's total equipment programme.

The Field Army is run from Headquarters Land Command, based at Wilton. This consists of 2 operational divisions, 3 reserve divisions, 2 districts and United Kingdom Support Command (Germany) (UKSC(G)). 1 (UK) Armoured Division, based in Germany, has 3 armoured brigades each consisting of 2 tank regiments, 2

armoured infantry battalions, and supported by artillery, engineers, aviation, air defence and logistics units. 3 (UK) Division, based in the UK, consists of 2 mechanized and 1 airborne brigade, together with artillery, engineers, aviation, air defence and logistics units. Other forces assigned to NATO's Rapid Reaction Corps (ARRC) include 24 Airmobile Brigade, a reconnaissance Brigade, intelligence and Electronic Warfare units, signals regiments, a depth artillery brigade, air defence regiments, engineers and some general duty infantry battalions.

The Ministry of Defence retains direct control of units in Northern Ireland, although day-to-day military responsibility is given to the Chief of the General Staff. The Permanent Joint Headquarters, recently formed at Northwood, is responsible for overseas garrisons, which include the Falkland Islands, Cyprus and Brunei.

The established strength of the Regular Army in 1998 was 114,000, which includes soldiers under training and Gurkhas. In addition there were some 4,000 Royal Irish Home Service soldiers. The strengths of the Regular Reserves was 212,000 in 1998.

The role of the Territorial Army (TA) is to act as a general Reserve for the Army by reinforcing it as required, with individuals, sub-units and other units, either in the UK or overseas; and by providing the framework and basis for regeneration and reconstruction to cater for the unforeseen in times of national emergency. The TA also provides a nationwide link between the military and civil communities. Strength, 1997, 57,700. In addition, men who have completed service in the Regular Army normally have some liability to serve in the Regular Reserve. All members of the TA and Regular Reserve may be called out by a Queen's Order in time of emergency of imminent national danger, and most of the TA and a large proportion of the Regular Reserve may be called out by a Queen's Order when warlike operations are in preparation or in progress. The Home Service Battalions of the Royal Irish Regiment are only liable for service in Northern Ireland.

Men, women and juniors enlist in the Army for up to 22 years' active service and reserve service up to 45 years of age. Soldiers enlist for a minimum of 3 years and can leave active service thereafter on one year's notice. Bonuses are paid to those who serve for certain periods and there are manning control points at which the Army may require soldiers to terminate their service, again on one year's notice. Those enlisting in certain technical trades must agree to serve for a minimum of 3 years. Recruits under the age of 17½ on reaching the age of 18 are entitled either to confirm their original engagement or to reduce their period of service to 3 years.

Equipment includes 426 Challenger, 36 Challenger 2 and 79 Chieftain main battle tanks, 8 Scorpion light tanks, 1,225 armoured fighting vehicles, 524 artillery pieces, 63 multiple rocket launchers, 880 anti-tank guided weapons and 562 surface-to-air missiles.

Women serve throughout the Army in the same regiments and corps as men. There are only a few roles in which they are not employed such as the Infantry and Royal Armoured Corps.

Navy. Control of the Royal Navy is vested in the Defence Council and is exercised through the Admiralty Board, chaired by the Secretary of State for Defence. The other civilian members are the Ministers of State for the Armed Forces and Defence Procurement, the Parliamentary Under Secretary for Defence and the Second Permanent Under Secretary of State. The naval members are the Chief of Naval Staff (First Sea Lord) responsible for management, fighting efficiency, planning and operational advice; the combined Second Sea Lord and C.-in-C. Naval Home Command, responsible for the manning of the Fleet and all personnel aspects; the Controller of the Navy, responsible for procurement of ships, their weapons and equipment; the Chief of Fleet Support, responsible for logistic support, stores, fuels and transport, naval dockyards and the auxiliary services; the C.-in-C. Fleet, and the Assistant Chief of Naval Staff, responsible for co-ordinating advice on certain policy and operational matters. The Navy Board, an executive sub-committee of the Admiralty Board, is responsible for the professional management of the service.

In 1996, the changes in management structure, reductions in strength, base closures and rationalization initiated in 1994 began to approach completion. The

Chief of Fleet Support and Controller of the Navy are now located in the Bristol area and their various support agencies rationalized. The naval bases at Rosyth and Portland closed in 1995. Although the dockyards at Rosyth and Devonport remain largely committed to naval refit work, both yards have now been sold to commercial operators.

The C.-in-C. Fleet, headquartered at Northwood, is responsible for the command of the fleet, while command of naval establishments in the UK is exercised by the C.-in-C. Naval Home Command from Portsmouth. Main naval bases are at Devonport, Portsmouth and Faslane, with a minor base overseas at Gibraltar.

The Royal Naval Reserve (RNR) and the Royal Marines Reserve (RMR) are volunteer forces which together in 1996 numbered 3,450. The RNR provides trained personnel in war to supplement regular forces. The main roles of the RMR are reinforcement and other specialist tasks with the UK-Netherlands Amphibious Force. In addition, men who have completed service in the Royal Navy and the Royal Marines have a commitment to serve in the Royal Fleet Reserve, currently 23,000-strong.

Royal Navy and Queen Alexandra's Royal Naval Nursing Service (QARNNS) ratings, both male and female, and Royal Marine ranks enlist on the 'Open Engagement' to complete 22 years active service with the option to leave at 18 months notice on completion of a minimum of 2½ years productive service. Those who leave before completing 22 years have a liability for up to 3 years service in the Royal Fleet Reserve.

The roles of the Royal Navy are first, to deploy the national strategic nuclear deterrent, second to provide maritime defence of the UK and its dependent territories, third to contribute to the maritime elements of NATO's force structure and fourth to meet national maritime objectives outside the NATO area. Personnel strength has reduced steadily over the past 5 years and is now stabilizing at about 47,500 (including Royal Marines) in 1997, with operational strength at 12 nuclear attack submarines, 2 aircraft carriers and about 35 destroyers and frigates.

The strategic deterrent is now borne principally by the new Trident submarines, of which the first 3 of 4, *Vanguard, Victorious* and *Vigilant*, each of 15,250 tonnes, and deploying 16 US-built Trident-2 D5 UGM-133A missiles with up to 96 British warheads per operational load, are now operational. The fourth ship, *Vengeance*, is scheduled to be operational in 1999. The last missile submarine of the Resolution class, *Renown*, deploying Polaris missiles, decommissioned in Aug. 1996.

The strength of the fleet's major units at the end of the respective years:

Destroyers	12	12	12	12	12	12
Frigates	33	30	25	24	23	23

[1]Following Government policy, of the 3 Carriers held, only 2 are kept in operational status.

The nuclear-powered submarine force numbers 12, of 2 classes, armed with torpedoes and Harpoon anti-ship missiles. There are 7 Trafalgar class, (5,300 tonnes) completed 1983–1991 and 5 Swiftsure (4,900 tonnes) completed 1973–79. The 4 diesel-electric submarines of the Upholder class were decommissioned in 1994 but remain serviceable awaiting a possible purchaser.

The principal surface ships are the Light vertical/short take-off and landing Aircraft Carriers of the Invincible class (*Invincible, Illustrious* and *Ark Royal*), 20,900 tonnes, completed 1980–85, embarking an air group of 8 Sea Harrier vertical/short take-off and landing fighters, 9 anti-submarine Sea King and 3 radar early-warning Sea King helicopters, armed with 1 twin Sea Dart surface-to-air missile system. 2 of these ships are maintained in the operational fleet, with the third (currently *Ark Royal*) either in refit or reserve.

The 12 destroyers are all Type 42 (completed 1976–85), armed with 1 twin Sea Dart surface-to-air missile system. Frigates comprise 10 Type 22 (completed 1979–89) and 13 Norfolk class (Type 23) completed 1989–96.

The lightly armed patrol force comprises 1 ice patrol ship, 16 other offshore patrol vessels and 16 inshore patrol craft mostly employed in training. Mine counter-

measures capability is provided by 13 offshore hunter/sweepers and 5 coastal minehunters. Amphibious lift for the Royal Marines is provided by 1 dock landing ship (with a second in reserve) and 5 tank landing ships (civil manned, and in peacetime employed on army freighting), supported by about 32 small amphibious craft. A new Helicopter Carrier, specifically designed for amphibious operations, *HMS Ocean*, 16,000 tonnes, has completed initial sea trials and was due to fit out for entry into service in 1998.

Comprehensive support to the fleet is provided by 27 major auxiliaries including 5 replenishment and 4 support tankers, 2 multi-purpose fuel and ammunition ships, 3 ammunition and stores ships, 1 repair ship, 2 ocean tugs, 5 survey ships, 1 trials ship, 1 aviation training ship, 2 armament transports and the Royal Yacht. Second-line support is provided by about 200 harbour and coastal service craft and minor auxiliaries.

The Fleet Air Arm, 5,500-strong in 1996, has some 300 aircraft, in 19 operational, training and search-and-rescue squadrons, including 40 Sea Harrier vertical/short take-off and landing fighter aircraft, 70 Sea King and 76 Lynx anti-submarine helicopters, 10 Sea King airborne early-warning helicopters and 36 Sea King (commando transports) and 70 miscellaneous support and training craft.

The Royal Marines corps, 6,750-strong in 1996, provides a commando brigade comprising 3 commando groups, each approximately 1,000-strong with artillery, air defence, engineering and logistic support, and three light utility helicopter squadrons. The Special Boat Squadron and specialist defence units complete the operational strength. Equipment includes 15 helicopters and 30 light assault craft.

The total number of male and female personnel (including Royal Marines) was (in 1,000) on 31 March: 1993, 59·4; 1994, 55·8; 1995, 50·9; 1996, 48·5 and 1997 (estimated), 47·5.

Air Force. In May 1912 the Royal Flying Corps first came into existence with military and naval wings, of which the latter became the independent Royal Naval Air Service in July 1914. On 2 Jan. 1918 an Air Ministry was formed, and on 1 April 1918 the Royal Flying Corps and the Royal Naval Air Service were amalgamated, under the Air Ministry, as the Royal Air Force (RAF).

In 1937 the units based on aircraft carriers and naval shore stations again passed to the operational and administrative control of the Admiralty, as the Fleet Air Arm. In 1964 control of the RAF became a responsibility of the Ministry of Defence.

The RAF is administered by the Air Force Board, of which the Secretary of State for Defence is Chairman. The Minister of State for the Armed Forces is Vice-Chairman, and normally acts as Chairman on behalf of the Secretary of State. Other members of the Board are the Minister of State for Defence Procurement, the Under-Secretary of State for Defence, the Chief of the Air Staff, Air Member for Personnel, Air Member for Logistics, Air Officer Commanding-in-Chief Strike Command, Controller of Aircraft and the Second Permanent Under Secretary of State.

The RAF is organized into 3 commands: Strike Command, Personnel and Training Command, and Logistics Command.

Strike Command is responsible for all of the RAF's frontline forces, although day-to-day control of most operations is delegated to its 3 Groups. No 1 Group is responsible for strike/attack, offensive air support, support helicopters and reconnaissance. Tornado GR1s, Tornado GR1As and Tornado GR4s are used in the attack and reconnaissance roles, while Tornado GR1Bs also maintain a maritime attack role. Jaguars are used in the attack, reconnaissance and light anti-shipping roles. Battlefield support forces comprise Harrier GR7s, as well as Chinook, Puma and Wessex helicopters. No 1 Group also operates Canberra aircraft in the strategic photographic reconnaissance role. No 11/18 Group controls the air defence forces, Tornado F3 fighters and Boeing E-3D Airborne Early-Warning aircraft, together with ground environment radars, associated communications systems and the Ballistic Missile Early-Warning System at Fylingdales. Maritime air operations, together with the RAF's search and rescue flights, are also under the operational control of No 11/18 Group. A maritime patrol and anti-submarine warfare capability is provided by Nimrod aircraft, which also have a capability against surface ships.

The search and rescue flights are equipped with Sea King helicopters. Additionally No 11/18 Group operates Nimrod Reconnaissance aircraft. No 38 Group is responsible for air-to-air refuelling and strategic air transport, which is carried out by VC10, Tristar and Hercules aircraft. No 38 Group also controls the aircraft of No 32 (The Royal) Squadron, comprising British Aerospace 146 and 125 aircraft and Wessex and Twin Squirrel helicopters. RAF forces in Germany, which are made up of Tornado GR1s, Harrier GR7s and Chinook and Puma helicopters, are under the day-to-day control of No 1 Group. The Military Air Traffic Operations organization also has the status of a Group.

The RAF Regiment, which is under the control of No 38 Group, has field squadrons in service with No 1 Group and short-range air defence squadrons armed with Rapier in service with No 1 Group and No 11/18 Group.

As well as the forces in Germany, the RAF has a flight of Tornado F3s, a flight of Hercules and a combined squadron comprising RAF Chinooks and Royal Navy Sea King helicopters based in the Falkland Islands, and a squadron of Wessex helicopters in Cyprus. In addition, Strike Command forces are deployed overseas in support of UN/WEU, NATO and Coalition operations.

Headquarters RAF Strike Command is based at RAF High Wycombe.

Personnel and Training Command was formed at RAF Innsworth, Gloucester, on 1 April 1994.

Two agencies fall under the Command, the Training Group Defence Agency and the Personnel Management Agency.

The Personnel Management Agency was formed on 1 Feb. 1997 and is responsible for the deployment of manpower throughout the RAF and for developing RAF personnel policy.

The main RAF units within the Command are, for Ground Training: RAF Cosford, RAF Cranwell and RAF Halton; for Flying Training: RAF Cranwell (where the Red Arrows are based), RAF Linton-on-Ouse, RAF Shawbury and RAF Valley. Initial Officer Training for commissioned candidates is undertaken at the RAF College, Cranwell. Further command and staff training for officers takes place at the Joint Service Command and Staff College Bracknell. Airmen aircrew are trained at RAF Cranwell, while recruit training for ground airmen is undertaken at RAF Halton. A single, tri-Service Defence Helicopter Flying School is located at RAF Shawbury.

Personnel and Training Command is equipped with the following aircraft types: Bulldog and Slingsby Firefly as primary trainers, Tucano as basic trainers for fast jet crew, Hawk as advanced fast jet trainers, Jetstreams for multi-engined pilot training, and Dominies for training navigators and other non-pilot aircrew. The Defence Helicopter Training School uses Squirrel and Griffin helicopters.

Logistics Command was formed on 1 April 1994, with its headquarters at RAF Brampton and nearby RAF Wyton. The Command is responsible for providing the full range of logistics support activities to all RAF units worldwide and Joint Service support to Royal Navy and Army units for rationalized equipment ranges. It is responsible for: Support chain management, including the provisioning, storage, distribution and disposal of equipment; repair, overhaul, maintenance and modification programmes at 3rd and 4th line; provision and management of communications and information systems; RAF catering.

RAF personnel, 1 Dec. 1998, 55,523 (including 4,537 women); total trained personnel, 51,891. Since Dec. 1991 women have been eligible to fly combat aircraft.

ECONOMY

The economy is expected to grow by 1·25 % in 1999 and 2·5% in 2000.

Although the overall growth forecast was unchanged from the Pre-Budget Report (PBR) of Nov. 1998, the Treasury was expecting in March 1999 that manufacturers and exporters would be hit harder than had been envisaged.

Manufacturing output was forecast to decline by 1·25% in 1999. Export growth in 1999 was projected in the March 1999 budget to be 0·5%, compared with 3% in the PBR. The balance of payments deficit is forecast to widen from £2bn. in 1998 to £10bn. in 1999. In Nov. 1998 the Treasury was forecasting a current account deficit of £7·5bn. These more pessimistic projections reflect the deterioration in European growth prospects and the fragility of many world markets.

Performance. Real GDP growth in 1997 was 3·1%. Depending on an improvement in labour market performance, GDP was forecast to grow 2–2·5% in 1998. The

outlook for exports in the traded goods sector was problematic, with the effect of sterling's 25% appreciation compounded by financial developments in Asia. Consumer spending was forecast to grow 3·75–4% in 1998. Growth in 1999 was projected at 1·75–2·25%. The savings ratio is assumed to decline to 9% by 2000.

Currency. The unit of currency is the *pound sterling* (£; GBP) of 100 *pence* (p.). (Before decimalization on 15 Feb. 1971 £1 = 20 shillings (*s*) of 12 pence (*d*). A gold standard was adopted in 1816, the sovereign or twenty-shilling piece weighing 7·98805 grammes 0·916⅔ fine. Currency notes for £1 and 10*s*. were first issued by the Treasury in 1914, replacing the circulation of sovereigns. The issue of £1 and 10*s*. notes was taken over by the Bank of England in 1928. 10*s*. notes were withdrawn in 1970 and £1 notes (in England and Wales) in 1988. The UK is a member of the EU European Monetary System (EMS), but on 16 Sept. 1992 it suspended its membership of the Exchange Rate Mechanism (ERM), which it had entered on 8 Oct. 1990.

Inflation. Inflation was 2·8% in Dec. 1998 (3·6% in Dec. 1997). The average annual inflation rate over the period 1990–96 was 3·3%.

The Treasury envisaged in March 1999 that the inflation target, set for the retail price index less mortgage interest payments (RPIX), will be met for both the final quarters of 1999 and 2000. In 1999, RPIX inflation will dip below the target of 2·5% as import prices remain weak and domestically generated inflation moderates. However, the Treasury expected import prices to recover gradually in the latter part of 1999, offsetting the reduction in home-grown inflation.

Coinage. Coins in circulation at 31 Dec. 1997: £1, 1,142m.; 50p, 581m.; 20p, 1,687m.; 10p, 1,464m.; 5p, 3,216m.; 2p, 4,609m.; 1p, 7,496m.

Banknotes. The Bank of England issues notes in denominations of £5, £10, £20 and £50 up to the amount of the fiduciary issue. Under the provisions of the Currency Act 1983 the amount of the fiduciary issue is limited, but can be altered by direction of HM Treasury on the advice of the Bank of England. Since Nov. 1998 the limit has been £34,300m.

All current series Bank of England notes are legal tender in England and Wales. Some banks in Scotland (Bank of Scotland, Clydesdale Bank and the Royal Bank of Scotland) and Northern Ireland (Bank of Ireland, First Trust Bank, Northern Bank and Ulster Bank) have note-issuing powers.

The total amount of Bank of England notes issued at 30 Dec. 1998 was £25,730m., of which £25,722m. represented notes with other banks and the public, and £8m. notes in the Banking Department of the Bank of England.

Foreign exchange reserves in Jan. 1998 were US$27,001m. and gold reserves 18·42m. troy oz.

Banking and Finance. The Bank of England, Threadneedle Street, London, is the Government's banker and the 'banker's bank'. It has the sole right of note issue in England and Wales and manages the National Debt. It was founded by Royal Charter in 1694 and nationalized in 1946. The capital stock has, since 1 March 1946, been held by HM Treasury. The *Governor* (appointed for 5-year terms) is Eddie George (b. 1938; took office 1993).

The statutory Bank Return is published weekly. End-Dec. figures for the past 4 years are as follows (in £1m.):

	Notes in circulation	*Notes and coin in Banking Department*	*Public deposits (government)*	*Other deposits*[1]
1995	21,717	3	1,281	5,281

The value of paper-based credit transfers for 1993 was 432·2m. (volumes); of paperless credit transfers, 935·7m. (volumes); of direct debits, 1,046m. (volumes).

Major British Banking Groups' statistics at 31 Dec. 1998: Total deposits (sterling and currency), £901,176m.; sterling market loans, £179,877m.; market loans

(sterling and currency), £255,765m.; advances (sterling and currency), £586,180m.; sterling investments, £56,196m.

In 1996 there were 520 overseas banks from 76 countries.

In May 1997 the power to set base interest rates was transferred from the Treasury to the Bank of England. The government continues to set the inflation target but the bank has responsibility for setting interest rates to meet the target. Base rates are now set by a 9-member Monetary Policy Committee at the Bank; members include the Governor. Membership of the Court (the governing body) was widened. Responsibility for supervising banks was transferred from the Bank to the Financial Services Authority (FSA).

Interest is earned on each whole pound on deposit for complete calendar months.

The amount due to depositors on Ordinary Accounts on 1 Jan. 1998 was £1,416,556,595 and in Investment Accounts £9,220,546,660.

There are stock exchanges in Belfast, Birmingham, Glasgow and Manchester which function mainly as representative offices for the London Stock Exchange (called International Stock Exchange until May 1991). In July 1991 the 91 shareholders voted unanimously for a new memorandum and articles of association which devolves power to a wider range of participants in the securities industry, and replaces the Stock Exchange Council with a 14-member board.

Weights and Measures. Conversion to the metric system, which replaced the imperial system, became obligatory on 1 Oct. 1995. The use of the pint for milk deliveries and bar sales, and use of miles and yards in road signs, is exempt indefinitely, and the use of the pound (weight) in selling greengrocery is exempt until 1999.

ENERGY AND NATURAL RESOURCES

Electricity. The Electricity Act of 1989 implemented the restructuring and transfer to the private sector of the electricity supply industry.

The Office of Electricity Regulation ('Offer') was set up under the Act to protect consumer interests following privatization.

Generators. Under the provisions of the 1989 Electricity Act, National Power and PowerGen took over the fuel-fired and hydro-electric power stations, and were privatized in 1991. Nuclear Electric, responsible for operating the 12 nuclear power stations, and Scottish Nuclear, were merged as a single holding company in 1996 with 2 new operating subsidiaries, Magnox Electric and British Energy. These were privatized in 1996. Under licence, generating companies may also be involved in electricity supply.

A levy (Non-Fossil Fuel Obligation) is being imposed on generators until 1998 to fund the decommissioning of ageing nuclear plant and finance renewable energy sources, mainly wind generation, which in 1995 supplied 2% of demand.

Suppliers. The 12 Area Electricity Boards were replaced under the 1989 Electricity Act by 12 successor companies which were privatized in 1990. These are Eastern

Electricity; East Midlands Electricity; London Electricity; Manweb; Midlands Electricity; Northern Electric; NORWEB; SEEBOARD; Southern Electric; SWALEC; South Western Electricity; Yorkshire Electricity. The companies are responsible for maintaining and operating their local distribution networks, and have a statutory duty to supply electricity to their tariff customers. Their main business, therefore, is in electricity supply. Some of the companies are involved in the retailing of electrical goods and electrical contracting. Some have diversified into other business activities.

The *Electricity Association* is the trade association of the UK electricity companies, providing a forum for members to discuss matters of common interest, a collective voice for the electricity industry when needed, and specialist research and professional services. It publishes an annual *Electricity Industry Review*, which contains detailed information on the development of the industry during the previous year.

The National Grid Company is responsible for operating the transmission system and for co-ordinating the operation of power stations connected to it. The company also operates the cross-Channel link with France and the interconnection with the Scottish power system.

In Scotland there are 3 main electricity companies. ScottishPower and Scottish Hydro-Electric are vertically integrated companies carrying out generation, transmission, distribution and supply of electricity within their areas. Scottish Nuclear, responsible for operating the 2 Scottish nuclear power stations, was merged with Nuclear Electric in 1996.

The electricity industry contributes about 1·7% of the UK's Gross Domestic Product. The installed capacity of all UK power stations as at the end of March 1998 was 72,498 MW. 34% of electricity generated was coal-fired, 25% was nuclear, 30% was gas and 2% was hydro-electric and other renewables. Imports accounted for the remaining 9%. 301,300 GWh were supplied to 27m. customers in 1997, of which domestic users took 35%, industrial users 31% and commercial and other users 34%. The net total electricity supplied in 1997 was 317,486 GWh. The average domestic consumption per capita in 1997 was 4,250 kWh.

The reform of the old nationalized gas industry began with the Gas Act of 1986, which paved the way for the privatization later that year of the British Gas Corporation, and established the Director General of Gas Supply (DGSS) as the independent regulator. This had a limited effect on competition, as Britsh Gas retained a monopoly on tariff (domestic) supply. Competition progressively developed in the industrial and commercial (non-tariff) market.

The Gas Act 1995 amended the 1986 Act to prepare the way for full competition, including the domestic market. It created 3 separate licences—for Public Gas Transporters who operate pipelines, for Shippers (wholesalers) who contract for gas to be transported through the pipelines, and for Suppliers (retailers) who then market gas to consumers. It also placed the DGSS under a statutory duty to secure effective competition.

The domestic market was progressively opened to full competition from 1996 until May 1998. Over 2m. customers have taken the opportunity to change supplier.

In 1997 British Gas took a commercial decision to de-merge its trading business. Centrica plc (a new company) was formed to handle the gas sales, gas trading, services and retail businesses of BG, together with the gas production businesses of the North and South Morecambe Field. The remaining parts of the business, including transportation and storage and the international downstream activities, remain part of BG plc.

In 1998 a new Director General of Gas Supply (Callum McCarthy) was appointed for a 5-year term. In recognition of the increasing convergence between the gas and

electricity markets, he was also appointed as Director General of Electricity Supply from Jan. 1999.

A European Directive introducing rules for the internal market in natural gas entered into force in Aug. 1998 (98/80/EC). Member states have 2 years to give effects to its provisions. A pipeline linking the UK and European gas grids opened in Oct. 1998. It has an export capacity of 20bn. cu. metres a year and an import capacity of 8·5bn. cu. metres a year.

Gas reserves are some 765,000m. cu. metres. Production was 1,000,700 GWh in 1997, 39% of which was used by domestic users and 27% by electricity generators.

The *Office of Gas Supply ('Ofgas')* is the regulator charged with protecting gas consumers' interests.

Wind. In 1997 there were 55 wind farms with a capacity of 132·29 MW for electricity generation.

Water. The Water Act of Sept. 1989 privatized the 10 water authorities in England and Wales: Anglian; North West; Northumbrian; Severn Trent; South West; Southern; Thames; Welsh; Wessex; Yorkshire. The Act also inaugurated the National Rivers Authority, with environmental and resource management responsibilities, and the 'regulator' *Office of Water Services ('Ofwat')*, charged with protecting consumer interests.

In Scotland water supply is the responsibility of the Regional and Island local authorities. 7 river purification boards are responsible for environmental management.

Minerals. Legislation to privatize the coal industry was introduced in 1994 and a new Coal Authority has taken over from British Coal. The Coal Authority is the owner of coal reserves; it licenses private coal-mining and deals with claims in former mining areas and disposes of unworked assets. In 1995 there were 15 British Coal collieries and 32 large deep mines in the private sector, employing some 13,500 mineworkers. Total production from deep mines was 32·2m. tonnes in 1996 (35·2m. in 1995). 91 opencast sites were operating in 1996. Output, 1996, 16·3m. tonnes; 1995, 16·4m. tonnes. In 1996 inland coal consumption was 71·4m. tonnes, of which 54·9m. tonnes was used by electricity generators, 8·6m. tonnes by coke ovens and 2·7m. tonnes by domestic consumers.

Output of non-fuel minerals in Great Britain, 1996 (in 1,000 tonnes): Limestone, 82,442; sandstone, 12,581; igneous rock, 43,731; clay and shale, 11,804; industrial sand, 4,861; chalk, 9,239; china clay, 2,654; sand and gravel, 81,997.

Steel and metals. There were 33 steel furnaces in 1997. Steel production in recent years (in 1m. tonnes):

1993	16·6
1994	17·3
1995	17·6
1996	18·0
1997	18·5
1998	17·3

Deliveries of finished steel products from UK mills in 1998 were worth £7bn. in product sales and comprised 8·6m tonnes to the UK domestic market and 8·0m. tonnes for export. About two-thirds of UK steel exports go to other EU countries. Exports have grown from 20% of total mill output to nearly 50% over the last 20 years. UK steel imports in 1998 were about 6·9m. tonnes. The UK steel industry's main markets are construction (31%), automotive (21%), engineering (17%) and metal goods (14%). British Steel is the UK's largest steel producer (and the fourth largest steel company in the world) and produces about 85% of UK crude steel. The UK steel industry has improved productivity nearly 5-fold over the past 20 years and invests about £350m. a year on new technology and a further £65m. a year on employee training and development.

Agriculture. Land use in 1996: Agriculture, 77%; urban, 10%; forests, 10%; other, 3%. In 1996 (and 1995) agricultural land in the UK totalled (in 1,000 ha) 18,401 (18,406), comprising common grazing, 1,237 (1,248), and agricultural holdings, 17,164 (17,158). Land use of the latter (in 1,000 ha): All grasses 6,665 (6,697); crops, 4,721 (4,544); rough grazing, 4,489 (4,516); bare fallow, 35 (40); other, 745

Farmers receiving financial support under the EU's Common Agricultural Policy are obliged to 'set-aside' land in order to control production. In 1995 such set-aside totalled 633,000 ha (728,000 ha in 1994).

The number of workers employed in agriculture in the UK was, in June 1995 (in 1,000), 243·4. Of these, 159·4 (12·9 females) were engaged full-time, 56·2 (24·3 females) part-time, and 84 (27·2 females) were seasonal or casual workers. In addition, there were in 1995, 170,000 full-time and 112,000 part-time farmers, partners, directors, and 75,000 of their spouses, engaged in farm work. There were some 234,900 farm holdings in 1995, about 66% owner-occupied. Average size of holdings, 72·4 ha.

Agriculture accounts for 1% of GDP, 7·3% of exports and 11·4% of imports.

In July 1997 there were 285,000 vacancies at Jobcentres.

In 1998 there were 3·7m. businesses in the UK of which 1·32m. were registered at Companies House. 12,000 were public limited companies and just 2,450 had their shares listed on the Stock Exchange. The sector comprising the most companies was property and business services with 23·3% of the total number, followed by retail with 13·1%, construction 10·6% and production 10·1%. Over 200,000 new companies were created in 1998, up from just 100,000 in 1984.

It was fixed at £3.20 an hour in 1999.

Trade Unions. In Jan. 1998 there were 76 unions affiliated to the Trades Union Congress (TUC) with a total membership of 6,754,245 (6,756,544 in 1997) (2·6m. of them women). The unions affiliated to the TUC in 1998 ranged in size from UNISON with 1·3m. members, to the Sheffield Wool Shear Workers' Union with 11 members. The 4 largest unions, however, account for more than half the total membership. In 1997, 61% of public-sector employees and 21% of private-sector employees were unionized. 46% of employees were in workplaces where trade unions were recognized for collective bargaining.

The TUC's executive body, the General Council, is elected at the annual Congress. Congress consists of representatives of all unions according to the size of the organization, and is the principal policy-making body.

The General Secretary (John Monks, b. 1945) is elected by the Congress but is not subject to annual re-election. The TUC draws up policies and promotes and publicizes them. It makes representations to government, employers and international bodies. The TUC also carries out research and campaigns, and provides a range of services to unions including courses for union representatives.

The TUC is affiliated to the International Confederation of Free Trade Unions, the Trade Union Advisory Committee of OECD, the Commonwealth Trade Union Council and the European Trade Union Confederation. The TUC provides a service of trade union education. It provides members to serve, with representatives of employers, on the managing boards of such bodies as the Health and Safety Commission and the Advisory, Conciliation and Arbitration Service.

Until 1992 all overseas trade statistics were compiled from Customs declarations. With the inception of the Single Market on 1 Jan. 1993, however, the requirement for Customs declarations in intra-EU trade was removed.

In 1998 the UK's trade with non-EU countries was: Imports, US$12,202·6m.; exports, US$9,559·3m. (1997 figures were imports US$12,015·6m. and exports US$10,510·9m.).

In 1996 other European Union members accounted for 51·2% of the UK's foreign trade, compared with 25·2% in 1956. Asia accounted for 14·2%, down from 21·3% in 1956, the USA 12·4%, up from 9·1% in 1956, and the rest of the world 22·2%, down from 44·4% in 1956.

Roads. Responsibility for the construction and maintenance of trunk roads belongs to central government (in England, the Department of Transport; in Wales the Welsh Office; and in Scotland the Scottish Office). Roads not classified as trunk roads are the responsibility of county or unitary councils.

In 1996 there were 368,820 km of public roads, classified as: Motorways, 3,225 km; trunk roads, 12,359 km; principal roads, 35,856 km; others, 317,380 km.

Motor vehicles for which licences were current at 31 Dec. 1996, numbered (in 1,000) 26,302, including 21,172 private cars, 609 mopeds, scooters and motor cycles, 77 public transport vehicles and 413 goods vehicles. The average distance travelled by a passenger car in the year 1995 was 15,000 km. New vehicle registrations in 1996, 2,410. Driving tests, 1996 (in 1,000): Applications, 1,741·3; tests held, 1,685·4; tests passed, 748·4; pass rate, 44%. The driving test was extended in 1996 to include a written examination.

Road casualties in Great Britain, 1994, 315,189 including 3,650 killed; in 1995, 310,506 including 3,621 killed; in 1996, 320,302 including 3,598 killed (the lowest figure since records began in 1926).

Inter- and intra-urban bus and coach journeys average 44,000m. passenger-km annually. Passenger journeys by public road transport, 1994–95, 5,050m., including 4,420m. by local bus services. For London buses *see* London Transport *under* RAILWAYS, *below*.

Rail. In 1994 the nationalized railway network was restructured to allow for privatization. Ownership of the track, stations and infrastructure was vested in a government-owned company, Railtrack, which was privatized in May 1996.

Passenger operations were reorganized into 25 train-operating companies, wholly owned subsidiaries of the British Railways Board, and all had been transferred to the private sector by Feb. 1997. These pay Railtrack for access to the rail network, and lease their rolling stock from 3 private-sector companies. All freight operations have

also now been privatized. Eurotunnel PLC holds a concession from the government to operate the Channel Tunnel (49·4 km), through which vehicle-carrying and Eurostar passenger trains are run in conjunction with French and Belgian railways. A new dedicated high-speed line is planned to connect the Channel Tunnel to London St Pancras. This line will be used by both international and domestic trains. Construction is being undertaken in 2 sections and the line should be completed in 2007.

In 1997 total route length was 16,666 km (5,176 km electrified). For the year 1997–98, passenger journeys totalled 845·7m. (34,200m. passenger km). Freight moved in 1997–98 amounted to 16·9bn. freight tonne-km, an increase of 12% over the previous year.

London Transport is responsible to the Secretary of State for the Environment, Transport and the Regions for the operations of the capital's metro, London Underground, and for the planning and procurement of bus services. In 1998, London Underground, its wholly owned subsidiary, carried 2·8m. passengers a day to and from 267 stations (including 21 managed by Railtrack) on 12 lines. Some 6,000 buses, run under contract to London Transport by independent companies, carried 3·8m. passengers a day on some 800 routes.

The privately franchised Docklands Light Railway is operated in east inner London.

There are metros in Glasgow and Newcastle, and light rail systems in Manchester and Sheffield.

Civil Aviation. All UK airports handled a total of more than 114·6m. passengers during 1997. Of those, 82·8m. were handled by London area airports (Heathrow, Gatwick, London City, Luton and Stansted). The busiest airport in 1996 was Heathrow, which handled 55,731,864 passengers (48,275,300 on international flights) and 1,040,486 tonnes of freight. Gatwick was the second busiest, with 24,101,735 passengers (22,028,832 on international flights) and 267,326 tonnes of freight. More international passengers use Heathrow than any other airport in the world.

Following the Civil Aviation Act 1971, the Civil Aviation Authority (CAA) was established as an independent public body responsible for the economic and safety regulation of British civil aviation. A CAA wholly owned subsidiary, National Air Traffic Services, operates air traffic control. Highlands and Islands Airports Ltd is owned by the Scottish Office and operates 8 airports.

Operating and traffic statistics of UK airlines on scheduled services during the calendar year 1997 (and 1996): Aircraft–km flown, 809m. (735m.); revenue passengers carried, 56·3m. (51·1m.); cargo (freight and mail) carried 782,855 (690,806) tonnes. Air transport movements between UK airports and international destinations in 1997 (and 1996) on all services totalled 1,081,605 (1,019,267).

There were 15,594 civil aircraft registered in the UK at 31 Dec. 1997.

British Airways is the largest UK airline, with a total of 226 aircraft at 31 Dec. 1997. It operates long- and short-haul international services, as well as an extensive domestic network. British Airways also has franchise agreements with other UK operators: British Mediterranean, British Regional Airways, Brymon Airways, City Flyer Express, GB Airways, Loganair and Maersk Air. Other airlines operating scheduled flights in 1997 (with numbers of aircraft): Air Belfast (3); Air UK (39); British Midland Airways (33); British World Airlines (19); Channel Express (13); Jersey European Airways (18); Manx and British Regional Airways (40); Monarch Airlines (17); Virgin Atlantic Airways (20). In 1997 British Airways flew 478·67m. km and carried 29,466,683 passengers (24,273,681 on international flights). British Midland flew 44·91m. km in 1997 and carried 5,671,971 passengers (3,152,072 on international flights). British Airways carried more passengers on international flights in 1997 than any other airline.

Shipping. The UK-owned merchant fleet (trading vessels over 100 GT) in June 1998 totalled 617 ships of 10·1m. DWT and 7·7m. GT. The UK-owned and registered fleet totalled 347 ships of 2·2m. DWT.

The average age of the UK-owned fleet was 17·8 years, while that of the world fleet was 14·3 years. Total gross international revenue in 1997 was £4,815m. The net

contribution to the UK balance of payments was £910m.; there were import savings of £1,247m., giving a total contribution of £2,157m. The container and roll-on-roll-off (RoRo) shipping sectors are the leading revenue earners. The net output of the UK water transport sector was £1·9bn. in 1996.

The principal ports are (with 1m. tonnes of cargo handled in 1997): London (55·7), Grimsby and Immingham (48·0), Forth (43·1), Milford Haven (34·5), Southampton (33·1), Sullom Voe (32·1), Liverpool (30·8), Felixstowe (28·9), Dover (19·1), Medway (13·8), Port Talbot (13·1), Belfast (12·3), Orkneys (10·5) and Hull (10·0). All ports in the UK carried 558·5m. tonnes.

Inland Waterways. There are approximately 3,500 miles of navigable canals and river navigations in Great Britain. Of these, the publicly-owned British Waterways (BW) is responsible for some 385 miles (620 km) of commercial waterways (maintained for freight traffic) and some 1,160 miles (1,868 km) of cruising waterways (maintained for pleasure cruising, fishing and amenity). BW is also responsible for a further 450 miles (732 km) of canals, some of which are not navigable. BW's external turnover for the year to 31 March 1997 was £46·8m. This comprised principally: Freight Activities (£2·1m.), Leisure (£10·9m.), the Estate (£19·5m.) and Water Charges (£3·4m.). Additionally, British Waterways was in receipt of Department of the Environment grants of £51·8m.

River navigations and canals managed by other authorities include the Thames, Great Ouse and Nene, Norfolk Broads and Manchester Ship Canal.

Telecommunications. In 1997 there were 148 licensed telecommunications operators: 125 cable operators, 19 national and regional public telecommunications operators and 4 mobile telephone (cellular) operators. Fixed-link telephone services were offered by BT, Mercury Communications, Kingston Communications (Hull), most of the cable operators and the public telecommunications operators. BT (then British Telecom) was established in 1981 to take over the management of telecommunications from the Post Office. In 1984 it was privatized as British Telecommunications plc, changing its trading name from British Telecom to BT in 1991.

In 1998, all of the BT system was served by digital exchanges. Almost 3·5m. km of optical fibre have been installed. In 1997 there were 31,878,000 main telehone lines (equivalent to 540 peer 1,000 population). In 1996, 76% of the lines were residential and 24% business. There were 138,000 public payphones, 200,000 private rented payphones and 20,000 UK telex connections in 1996. BT handles a daily average of 103m. telephone calls a day and 22m. calls to emergency fire, police or ambulance services a year. In 1995 there were 1·8m. fax receivers. Electronic services include electronic mail ('email') and a complete corporate global messaging network. BT telephone, television and business services are carried by 15–20 satellites. In 1995 BT had some 20 offices worldwide and employed 137,561 persons.

In 1997 there were more than 7m. mobile telephone users.

Telecommunications services are regulated by OFTEL in the interests of consumers.

Internet. In Oct 1998 there were 7·5m. Internet users in the UK, or nearly 13% of the total population. 42% of users were at home and 38% at work. In 1995 there were 10·9m. PCs (186 per 1,000 persons) and by 1999 around 27% of homes in the UK had a PC.

Postal Services. The Post Office operates as a group of 4 distinct businesses: Royal Mail (letter delivery), Parcelforce Worldwide (parcel delivery), Post Office Counters Ltd (retailing and agency services) and SSL (telemarketing). Every area of the country is served by regional offices for each of the businesses. Royal Mail collects and delivers 75m. letters a day to the 26m. UK addresses. Other services include electronic mail, guaranteed mail deliveries (same-day and overnight to UK addresses), and Swiftair deliveries to 140 other countries and territories. The British Postal Consultancy Service provides advice to administrations abroad.

In 1998 there were almost 19,000 post offices, over 600 operated directly by The Post Office, the remainder (sub-post offices) on a franchise or agency basis; and 120,000 posting points. Staff numbered 193,000 in 1997–98. 18·4bn. letters were posted in 1997–98.

The Post Office has a monopoly on the carriage of letters within the UK, but the government has suspended this, subject to a minimum delivery charge of £1, and licensed mail transferred between document exchanges. Private services are permitted to handle door-to-door deliveries subject to the minimum fee of £1.

SOCIAL INSTITUTIONS

Justice. England and Wales. The legal system of England and Wales, divided into civil and criminal courts has at the head of the superior courts, as the ultimate court of appeal, the House of Lords, which hears each year a number of appeals in civil matters, including a certain number from Scotland and Northern Ireland, as well as some appeals in criminal cases. In order that civil cases may go from the Court of Appeal to the House of Lords, it is necessary to obtain the leave of either the Court of Appeal or the House itself, although in certain cases an appeal may lie direct to the House of Lords from the decision of the High Court. An appeal can be brought from a decision of the Court of Appeal or the Divisional Court of the Queen's Bench Division of the High Court in a criminal case provided that the Court is satisfied that a point of law 'of general public importance' is involved, and either the Court or the House of Lords is of the opinion that it is desirable in the public interest that a further appeal should be brought. As a judicial body, the House of Lords consists of the Lord Chancellor, the Lords of Appeal in Ordinary, commonly called Law Lords, and such other members of the House as hold or have held high judicial office. The final court of appeal for certain of the Commonwealth countries is the Judicial Committee of the Privy Council which, in addition to Privy Counsellors who are or have held high judicial office in the UK, includes others who are or have been Chief Justices or Judges of the Superior Courts of Commonwealth countries.

Civil Law. The main courts of original civil jurisdiction are the High Court and county courts.

The High Court has exclusive jurisdiction to deal with specialist classes of case e.g. Judicial Review. It has concurrent jurisdiction with county courts in cases involving contract and tort although it will only hear those cases where the issues are complex or important. The High Court also has appellate jurisdiction to hear appeals from lower tribunals.

The judges of the High Court are attached to one of its 3 divisions: Chancery, Queen's Bench and Family; each with its separate field of jurisdiction. The Heads of the 3 divisions are the Lord Chief Justice (Queen's Bench), the Vice-Chancellor (Chancery) and the President of the Family Division. In addition there are 99 High Court judges (92 men and 7 women). For the hearing of cases at first instance, High Court judges sit singly. Appellate jurisdiction is usually exercised by Divisional Courts consisting of 2 (sometimes 3) judges, though in certain circumstances a judge sitting alone may hear the appeal. High Court business is dealt with in the Royal Courts of Justice and by over 130 District Registries outside London.

County courts can deal with all contract and tort cases, and recovery of land actions, regardless of value. They have upper financial limits to deal with specialist classes of business such as equity and Admiralty cases. Certain county courts have been designated to deal with family, bankruptcy, patents and discrimination cases.

There are about 260 county courts located throughout the country each with its own district. A case may be heard by a Circuit Judge or by a District Judge, (the latter generally being restricted to cases valued at £5,000 or less). County courts have a small claims jurisdiction for actions for money worth £3,000 or less; this is an informal procedure where parties are encouraged to present cases without the need for legal representation.

The Restrictive Practices Court was set up in 1956 under the Restrictive Trade Practices Act and is responsible for deciding whether a restrictive trade agreement is in the public interest. It is presided over by a High Court judge, but laymen sit on the bench also. Another specialist court is the Employment Appeal Tribunal, with similar composition, which hears appeals in employment cases from lower tribunals.

The Court of Appeal (Civil Division) hears appeals in civil actions from the High Court and county courts, and certain special courts such as the Restrictive Practice Court and Employment Appeal Tribunal. Its President is the Master of the Rolls, aided by up to 35 Lords Justices of Appeal (as at 1 Jan. 1999) sitting in 6 or 7 divisions of 2 or 3 judges each.

Civil proceedings are instituted by the aggrieved person, but as they are a private matter, they are frequently settled by the parties through their lawyers before the matter comes to trial. In very limited classes of dispute (e.g. libel and slander), a party may request a jury to sit to decide questions of fact and the award of damages.

Criminal Law. At the base of the system of criminal courts in England and Wales are the magistrates' courts which deal with over 97% of criminal cases. In general, in exercising their summary jurisdiction, they have power to pass a sentence of up to six months imprisonment and to impose a fine of up to £5,000 on any one offence. They also deal with the preliminary hearing of cases triable at the Crown Court. In addition to dealing summarily with over 2·3m. cases, which include thefts, assaults, drug abuse, etc, they also have a limited civil and family jurisdiction.

Magistrates' courts normally sit with a bench of 3 lay justices. Although unpaid they are entitled to loss of earnings and travel and subsistence allowance. They undergo training after appointment and they are advised by a professional justices' clerk. In central London and in some provincial areas full-time stipendiary magistrates have been appointed. Generally they possess the same powers as the lay bench, but they sit alone. On 1 Jan. 1999 the total strength of the lay magistracy was 30,260 including 14,699 women. Justices are appointed on behalf of the Queen by the Lord Chancellor, except in Greater Manchester, Merseyside and Lancashire, where they are appointed by the Chancellor of the Duchy of Lancaster.

Justices are selected and trained specially to sit in Youth and Family Proceedings Courts. Youth Courts deal with cases involving children and young persons up to the age of 18 charged with criminal offences (other than homicide and other grave offences). These courts normally sit with 3 justices, including at least one man and one woman, and are accommodated separately from other courts.

Family Proceedings Courts deal with matrimonial applications, Children Act matters, including care, residence and contact and adoption. These courts normally sit with three justices including at least one man and one woman.

Above the magistrates' courts is the Crown Court. This was set up by the Courts Act 1971 to replace quarter sessions and assizes. Unlike quarter sessions and assizes, which were individual courts, the Crown Court is a single court which is capable of sitting anywhere in England and Wales. It has power to deal with all trials on indictment and has inherited the jurisdiction of quarter sessions to hear appeals, proceedings on committal of persons from the magistrates' courts for sentence, and certain original proceedings on civil matters under individual statutes.

The jurisdiction of the Crown Court is exercisable by a High Court judge, a Circuit judge or a Recorder or Assistant Recorder (part-time judges) sitting alone, or, in specified circumstances, with justices of the peace. The Lord Chief Justice has given directions as to the types of case to be allocated to High Court judges (the more serious cases) and to Circuit judges or Recorders respectively.

Appeals from magistrates' courts go either to a Divisional Court of the High Court (when a point of law alone is involved) or to the Crown Court where there is a complete re-hearing on appeals against conviction and/or sentence. Appeals from the Crown Court in cases tried on indictment lie to the Court of Appeal (Criminal Division). Appeals on questions of law go by right, and appeals on other matters by leave. The Lord Chief Justice or a Lord Justice sits with judges of the High Court to constitute this court. Thereafter, appeals in England and Wales can be made to the House of Lords.

There remains as a last resort the invocation of the royal prerogative exercised on the advice of the Home Secretary. In 1965 the death penalty was abolished for murder.

All contested criminal trials, except those which come before the magistrates' courts, are tried by a judge and a jury consisting of 12 members. The prosecution or defence may challenge any potential juror for cause. The jury decides whether the accused is guilty or not. The judge is responsible for summing up on the facts and explaining the law; he sentences convicted offenders. If, after at least 2 hours and 10 minutes of deliberation, a jury is unable to reach a unanimous verdict it may, on the judge's direction, provided that in a full jury of 12 at least 10 of its members are agreed, bring in a majority verdict. The failure of a jury to agree on a unanimous verdict or to bring in a majority verdict may involve the retrial of the case before a new jury.

The Employment Appeal Tribunal. The Employment Appeal Tribunal which is a superior Court of Record with the like powers, rights, privileges and authority of the High Court, was set up in 1976 to hear appeals on questions of law against decisions of employment tribunals and of the Certification Officer. The appeals are heard by a High Court Judge sitting with 2 members (in exceptional cases 4) appointed for their special knowledge or experience of industrial relations either on the employer or the trade union side, with always an equal number on each side. The great bulk of their work is concerned with the problems which can arise between employees and their employers.

Military Courts. Offences committed by persons subject to service law under the Army Act 1955, the Air Force Act 1955 or the Naval Discipline Act 1957 may be dealt with either summarily or by courts-martial.

The Personnel of the Law. All judicial officers are independent of Parliament and the Executive. They are appointed by the Crown on the advice of the Prime Minister or the Lord Chancellor, and hold office until retiring age. Under the Judicial Pensions and Retirement Act 1993 judges normally retire by age 70 years.

The legal profession is divided; barristers, who advise on legal problems and can conduct cases before all courts, usually act for the public only through solicitors, who deal directly with the legal business brought to them by the public and have rights to present cases before certain courts. The distinction between the 2 branches of the profession has been weakened since the passing of the Courts and Legal Services Act 1990, which has enabled solicitors to obtain the right to appear as advocates before all courts. Long-standing members of both professions are eligible for appointment to most judicial offices.

For all judicial appointments up to and including the level of Circuit Judge (except for Recordership, which is achieved on promotion from assistant Recordership), it is necessary to apply in writing to be considered for appointment. Vacancies are advertised. A panel consisting of a judge, an official and a lay member decide whom to invite for interview and also interview the shortlisted applicants. They make recommendations to the Lord Chancellor, who retains the right of final recommendation to the Sovereign or appointment, as appropriate.

Legal Aid. Broadly there are 3 kinds of legal aid available in England and Wales. Firstly there is legal advice and assistance, otherwise known as the 'Green Form' scheme. This includes advice and assistance on almost any question of English law, both civil and criminal, but does not normally cover any form of representation before a court or tribunal. Qualification for 'Green Form' is dependent on the means of the applicant. As an extension of the scheme, however, assistance by way of representation is available for certain proceedings, chiefly family matters, in magistrates' courts. Assistance by way of representation is also means-tested. In 1997–98 there were 1·6m. payments under the Legal Advice and Assistance Scheme. The net cost to the Legal Aid Fund of this part was £186·4m., of which £12·2m. was accounted for by assistance by way of representation. Legal advice and assistance also provides for duty solicitor schemes at magistrates' courts and police stations. Under the magistrates' courts scheme, initial advice, and representation where necessary, is available to unrepresented defendants at court from duty solicitors either in attendance at courts or on call. The scheme covers advice to a defendant in custody, making a bail application, representing a defendant in custody on a guilty plea, and certain other cases. The advice and assistance at police stations scheme enables any person who has been arrested and taken to a police station, or who is assisting the police with their enquiries, to receive advice and assistance, from either a duty solicitor or the person's own solicitor. The cost of these schemes, which are not subject to means test or contribution, is met from the Legal Aid Fund and in 1997–98 amounted to £115·1m. Secondly, under Part IV of the Legal Aid Act 1988, there is legal aid for civil court proceedings. Under regulations, aid is available to those of low or moderate means either free or subject to a contribution, depending on means. In 1997–98, 319,432 civil legal aid certificates were issued. The cost of legal aid is met from *(a)* contributions from assisted persons; *(b)* the operation of the statutory charge which gives the Legal Aid Board a first charge on money or property recovered or preserved for an assisted person; *(c)* costs recovered from opposing parties and *(d)* a grant from the Exchequer. The net cost of civil legal aid to the state (excluding administration costs of the scheme) in 1997–98 amounted

to £634m. Thirdly under Part V of the Legal Aid Act 1988 a court dealing with criminal proceedings may order legal aid to be given if it considers it is desirable in the interests of justice and if it also considers that the defendant (or appellant) requires financial assistance in meeting the costs he or she may incur. The factors to be taken into account when determining whether it is in the interests of justice that criminal legal aid be granted are defined by statute to include cases where, for example, the defendant is likely to be deprived of his or her liberty, consideration of a substantial question of law may be involved, or the defendant may be unable to understand the proceedings or to state his or her case due to inadequate knowledge of English, mental illness or other mental or physical disability. Legal aid must be granted, subject to means, in the following circumstances: Where a person is committed for trial on a charge of murder, where the prosecutor appeals or applies for leave to appeal from the criminal division of the Court of Appeal or the Courts-Martial Appeal Court to the House of Lords, and in certain circumstances where the court is considering depriving a defendant of his liberty.

The costs of legal aid in criminal proceedings are paid by the central government, but courts have power to require legally aided persons to contribute towards the cost of legal aid given to them. The net cost of legal aid in criminal proceedings in 1997–87 was £591m. Of this total, £349m. was for legal aid in the higher courts which is paid for out of the Lord Chancellor's vote, and £242m. for legal aid in the magistrates' courts which is paid from the Legal Aid Fund.

Legislation is currently before Parliament (the Access to Justice Bill) which will bring changes to legal aid. The proposed reforms will create a Legal Services Commission, which will replace the Legal Aid Board. The Commission will establish a Community Legal Service which will fund civil and family cases, and a Criminal Defence Service for all criminal matters.

Police. In England and Wales, excluding London, there are 41 police forces each maintained by a police authority typically comprising 9 local councillors, 3 magistrates and 5 independent members. London is policed by the Metropolitan Police Service (responsible to the Home Secretary) and the City of London Police. In April 1995 the Home Office gave up central control of police manpower and authorized establishments of police no longer exist. Instead, chief constables recruit according to their budgets. The Home Office collates police strength in March and Sept. each year. Provisional figures show that the total strength of the police service in England and Wales at 30 Sept. 1998 was 126,266 (including 19,876 women). In addition there were 17,296 special constables (including 5,965 women). The net total revenue expenditure on the police service for 1997–98 was £6,870m.

Religion. The Anglican Communion has originated from the Church of England and parallels in its fellowship of autonomous churches the evolution of British influence beyond the seas from colonies to dominions and independent nations. The Archbishop of Canterbury presides as *primus inter pares* at the decennial meetings of the bishops of the Anglican Communion at the Lambeth Conference and at the biennial meetings of the Primates and the Anglican Consultative Council. The last Conference was held in Canterbury in 1998 and was attended by 743 bishops.

The Anglican Communion consists of 41 member Churches or Provinces. These are: The Anglican Church of Aotearoa, New Zealand and Polynesia; The Anglican Church of Australia; The Church of Bangladesh; The Episcopal Anglican Church of Brazil; The Church of the Province of Burundi; The Anglican Church of Canada; The Church of the Province of Central Africa; The Anglican Church of the Central America Region; The Church of Ceylon (Sri Lanka) Extra Provincial; The Province of the Anglican Church of the Congo; The Church of England; Hong Kong Sheng Kung Hui; The Church of the Province of the Indian Ocean; The Church of Ireland; The Holy Catholic Church in Japan; The Episcopal Church in Jerusalem and the Middle East; The Church of the Province of Kenya; The Anglican Church of Korea; The Church of the Province of Melanesia; The Anglican Church of Mexico; The Church of the Province of Myanmar (Burma); The Church of the Province of Nigeria; The Church of North India; The Church of Pakistan; The Anglican Church of Papua New Guinea; The Philippine Episcopal Church; The Lusitanian Church of Portugal; The Province of the Episcopal Church of Rwanda; The Scottish Episcopal Church; The Spanish Reformed Episcopal Church; The Church of the Province of South East Asia; The Church of the Province of Southern Africa; The Anglican Church of the Southern Cone of America; The Church of South India; The Episcopal Church of the Sudan; The Church of the Province of Tanzania; The Church of the Province of Uganda; The Episcopal Church in the United States of America; The Church in Wales; The Church of the Province of West Africa; and The Church in the Province of the West Indies. There are Extra Provincial Dioceses of Bermuda, Cuba, Puerto Rico and Venezuela, and new provinces are also currently in formation. Churches in Communion include the Mar Thoma Syrian Church, the Philippine Independent Church, and some Lutheran and Old Catholic Churches in Europe. The Church in China is known as a 'post denominational' Church whose formation included Anglicans in the Holy Catholic Church in China.

England and Wales. The established Church of England, which baptizes about 25% of the children born in England (i.e. excluding Wales but including the Isle of Man and the Channel Islands), is Anglican. Civil disabilities on account of religion do not attach to any class of British subject. Under the Welsh Church Acts, 1914 and 1919, the Church in Wales and Monmouthshire was disestablished as from 1 April 1920, and Wales was formed into a separate Province.

The Queen is, under God, the supreme governor of the Church of England, with the right, regulated by statute, to nominate to the vacant archbishoprics and bishoprics. The Queen, on the advice of the First Lord of the Treasury, also appoints to such deaneries, prebendaries and canonries as are in the gift of the Crown, while a large number of livings and also some canonries are in the gift of the Lord Chancellor.

There are 2 archbishops (at the head of the 2 Provinces of Canterbury and York), and 42 diocesan bishops including the bishop of the diocese in Europe, which is part of the Province of Canterbury. Dr George Carey was enthroned as *Archbishop of Canterbury* in April 1991. Each archbishop has also his own particular diocese, wherein he exercises episcopal, as in his Province he exercises metropolitan, jurisdiction. In Dec. 1997 there were 68 suffragan and assistant bishops, 40 deans and provosts of cathedrals and 110 archdeacons. The *General Synod*, which replaced the Church Assembly in 1970 in England, consists of a House of Bishops, a House of Clergy and a House of Laity, and has power to frame legislation regarding Church matters. Each House has a veto over the others. The first two Houses consist of the members of the Convocations of Canterbury and York, each of which consists of the diocesan bishops and elected representatives of the suffragan bishops, 6 for Canterbury province and 3 for York (forming an Upper House); deans, provosts, and archdeacons, and a certain number of proctors elected as the representatives of the inferior clergy, together with, in the case of Canterbury Convocation, 4 representatives of the Universities of Oxford, Cambridge, London and the Southern Universities, and in the case of York 2 representatives for the Universities of Durham and Newcastle and the other Northern Universities, and 3 archdeacons to the Armed Forces, the Chaplain General of Prisons and 2 representatives of the Religious Communities (forming the Lower House). The House of Laity is elected by the lay members of the Deanery Synods but also includes 3 representatives of the Religious Communities and *ex-officio* appointed members of the Archbishops' Council, Church Commissioners and Ecclesiastical Judges. Every Measure passed by the General Synod must be submitted to the Ecclesiastical Committee, consisting of 15 members of the House of Lords nominated by the Lord Chancellor and 15 members of the House of Commons nominated by the Speaker. This committee reports on each Measure to Parliament, and the Measure receives the Royal Assent and becomes law if each House of Parliament resolves that the Measure be presented to the Queen.

Parochial affairs are managed by annual parochial church meetings and parochial church councils. At 30 June 1996 there were 12,982 ecclesiastical parishes, inclusive of the Isle of Man and the Channel Islands. These parishes do not, in many cases, coincide with civil parishes. Although most parishes have their own churches, not every parish nowadays can have its own incumbent or priest. Over 2,000 non-stipendiary clergy hold a bishop's licence to officiate at services.

In Dec. 1997 there were 5,590 beneficed clergy excluding dignitaries, 1,881 other clergy of incumbent status and 1,661 assistant curates working in the parishes.

Women have been admitted to Holy Orders (but not the Episcopate) as deacons since 1987 and as priests since 1994. At 31 Dec. 1997 there were 919 full-time stipendiary women clergy, 871 of whom were in the parochial ministry. In July 1995 the General Synod stated that 304 clergymen had left the Church of England because they disagreed with the ordination of women, and that perhaps 75% of these had joined the Roman Catholic Church.

Private persons possess the right of presentation to over 2,000 benefices; the patronage of the others belongs mainly to the Queen, the bishops and cathedrals, the Lord Chancellor, and the colleges of the universities of Oxford and Cambridge. In addition to the dignitaries and parochial clergy already identified there were, in 1997, 119 cathedral and 285 non-parochial clergy working within the diocesan framework, giving a total of 9,798 full-time stipendiary clergy working as at Dec. 1997. Although these figures account for the majority of active clergy in England, there are many others serving in parishes and institutions who cannot be quantified with any certainty. They include some 1,300 full-time hospital, Forces, prison, industrial, and school and college chaplains.

Of the 40,397 buildings registered for the solemnization of marriages at 30 June 1994, (statistics from the Office of Population Censuses and Surveys) 16,538 belonged to the Established Church and the Church in Wales, and 23,859 to other religious denominations (Methodist, 6,739; Roman Catholic, 3,331; Baptist, 3,109; United Reformed, 1,689; Congregational, 1,264; Calvinistic Methodist, 1,093; Jehovah's Witnesses, 786; Brethren, 744; Salvation Army, 737; Unitarians, 165; other Christian, 3,857; Sikhs, 129; Moslems, 90; other non-Christian, 126). Of the 283,012 marriages celebrated in 1995 (291,069 in 1994), 83,685 were in the

Established Church and the Church in Wales, 43,837 in other denominations, and 155,490 were civil marriages in Register Offices.

Roman Catholics in England and Wales were estimated at 4,174,418 in 1997. There are 22 dioceses in 5 provinces. There are 5 archbishops, 17 diocesan bishops and 8 auxiliary or assistant bishops. There are 5,178 priests in active ministry and 2,843 parish churches. There are 1,295 convents of female religious, who number 9,655.

Membership of other denominations in the UK in 1991 (and 1975): Presbyterians, 1,291,672 (1·65m.); Methodists, 483,387 (0·61m.); Baptists, 241,842 (0·27m.); other Protestants, 123,677; independent churches, 408,999; Orthodox, 265,258 (0·2m.); Afro-Caribbean churches, 69,658; Latter-day Saints (Mormons) (1997), 170,500; Jehovah's Witnesses, 0·12m.; Spiritualists, 60,000; Moslems, 0·99m. (0·4m.); Sikhs, 0·39m. (0·12m.); Hindus, 0·14m. (0·1m.); Jews, 108,400 (0·11m.).

The Salvation Army is established in 94 countries. In 1991 in the UK and Ireland it had 1,792 ministers, 55,000 members and 837 churches.

There is a 400-member Board of Deputies of British Jews.

There were approximately 2·5m. visits to Westminster Abbey in 1997, 2m. to both St Paul's Cathedral and York Minster, and 1·6m. to Canterbury Cathedral.

Education. (England and Wales). *The Publicly Maintained System of Education:* Compulsory schooling begins at the age of 5 and the minimum leaving age for all pupils is 16. No tuition fees are payable in any publicly maintained school (but it is open to parents, if they choose, to pay for their children to attend other schools). The post-school or tertiary stage, which is voluntary, includes universities, further education establishments and other higher education establishments (including those which provide courses for the training of teachers), as well as adult education centres and the youth service. Financial assistance (grants and loans) is generally available to students on higher education courses in the university and non-university sectors, and to some students on other courses in further education.

National Curriculum. The Education Reform Act 1988 established a National Curriculum for gradual introduction into primary and secondary schools. It was revised in 1995. Statutory subjects at 5 to 11 years: English (and Welsh in Wales), mathematics, science (core subjects); design and technology, information technology, geography, history, physical education, art and music. At 11 to 14 years a foreign language is added. Statutory subjects at 14 to 16: English, mathematics, science, technology, a foreign language and physical education. Religious education and, at secondary level, sex education, are not prescribed in the curriculum but are requirements; parents may withdraw their children from these lessons. Careers education is also statutory at secondary level.

Nursery Education. Provision for children under 5 is made in either nursery schools or in nursery or infant classes in primary schools. In the public sector no fees are payable.

Primary Schools. These provide for pupils from the age of 5 up to the age of 11. In 1997–98 there were 23 pupils per teacher at primary schools in the United Kingdom as a whole.

Middle Schools. A number of local education authorities operate a middle school system. These provide for pupils from the age of 8, 9 or 10 up to the age of 12, 13 or 14.

Secondary Schools. These usually provide for pupils from the age of 11 upwards. In Jan. 1998 there were 3,190 secondary schools in England and 229 in Wales. In England some local authorities have retained selection at age 11 for entry to grammar schools, of which there were 157 in 1998. There were a small number of technical schools in 1998 which specialise in technical studies. There were 113 secondary modern schools in 1998 providing a general education up to the minimum school leaving age of 16, although exceptionally some pupils stay on beyond that age.

Almost all local education authorities operate a system of comprehensive schools to which pupils are admitted without reference to ability or aptitude. In Jan. 1997 there were 2,882 such schools in England with over 2·6m. pupils. With the development of comprehensive education, various patterns of secondary schools have come into operation. Principally these are: 1) All-through schools with pupils aged 11 to 18 or 11 to 16; pupils over 16 being able to transfer to an 11 to 18 school or a sixth form college providing for pupils aged 16 to 19. (There were 115 sixth form colleges in England in 1992). 2) Local education authorities operating a three-tier system involving middle schools where transfer to secondary school is at ages 12, 13 or 14. These correspond to 12 to 18, 13 to 18 and 14 to 18 comprehensive schools respectively. 3) In areas where there are no middle schools a two-tier system of junior and senior comprehensive schools for pupils aged 11 to 18, with optional transfer to these schools at age 13 or 14.

Grant Maintained Schools. Local education authority maintained secondary, middle and primary schools can apply for Grant Maintained (GM) status as self-governing state schools. Under GM status, schools receive funding directly from the Funding Agency for Schools or, in Wales, from the Welsh Office. Their governing bodies are responsible for all aspects of school management, including the deployment of funds, employment of staff and provision of most of the educational support services for staff and pupils. The first GM primary schools were incorporated in 1991.

Specialist Schools. Technology Colleges, Language Colleges, Art Colleges and Sports Colleges. A programme to help existing maintained secondary schools to specialize in a particular area of the curriculum, while continuing to cover the full National Curriculum. To be included in the programme, schools must raise sponsorship and then prepare development plans, in competition with other schools, to seek extra government funding. They must demonstrate how they will share their resources and expertise with local schools and the wider community. The first Technology Colleges operated from Sept. 1994. By Sept. 2001 the government expect there to be 500 Specialist Schools.

City Technology Colleges. 15 independent all-ability secondary schools established in partnership between government and business sponsors, under the Education Reform Act 1988. They teach the full National Curriculum but give special emphasis to technology, science and mathematics. Government meets all recurrent costs.

Assisted Places Scheme. The Government is phasing out the assisted places scheme and is using the money saved to reduce infant class sizes in the maintained sector. The Education (Schools) Act 1997, which came into force on 1 Sept. 1997, has the effect of preventing any further intakes to assisted places after the start of the 1997–98 school year. However, the Government has made a commitment to provide continued support for existing assisted pupils for the remainder of the current phase of their education. Children in receipt of secondary education will continue to hold their assisted places until the completion of their secondary education. Children in receipt of primary education will normally hold their place until the completion of their primary education.

Music and Ballet Scheme. The 'Aided Pupil Scheme' for boys and girls with outstanding talent in music or ballet helps parents with the fees and boarding costs at seven specialist private schools. This scheme provides a specialist provision not readily available in the maintained sector and will therefore continue to operate.

Special Education. Under the Education Act 1996 children have special educational needs if they have a learning difficulty which calls for special educational provision to be made for them. It has been estimated that, nationally, some 20% of the school population will have special educational needs at some time during their school career. In a minority of cases, perhaps just over 2% of children, the Local Education Authority will need to make a statutory assessment of special educational needs under the Education Act 1996, which may ultimately lead to a 'statement'.

The Education Act 1996 and regulations made thereunder build upon the principles and practices first set out in the 1981 Education Act. They place duties and responsibilities on Local Education Authorities and schools, and all those who help them work with children with special educational needs. Maintained schools

must use their best endeavours to make provision for such pupils. The Code of Practice on the Identification and Assessment of Special Educational Needs, which came into force on 1 Sept. 1994, gives practical guidance to these bodies as to how they fulfill their duties. Provision for all children with special educational needs will be made by the most appropriate agency, which in most cases will be the child's mainstream school. The Code of Practice recognizes that there is a continuum of needs and a continuum of provision, which may be made in a variety of different forms. However, even before reaching statutory school age, a child may have special educational needs requiring the intervention of the Local Education as well as the Health Authority.

Some pupils with 'statements' remain in school after the age of 16. Local Education Authorities remain responsible for such pupils until they are 19. Others with statements leave school at 16, moving perhaps to a college within the further education sector, or to social services provision.

Ancillary Services. Local Education Authorities (LEAs) and the governing bodies of GM schools may provide registered pupils at schools maintained by them with meals, milk and other refreshment and make such charges as they think fit. However, they must charge the same price for the same quantity of the same item. It is for LEAs and GM schools to decide on the presentation and content of school meals. They must provide meals free of charge to pupils whose parents receive income support or income-based jobseekers' allowance, or to pupils who receive income support in their own right. Where LEAs or GM schools decide to provide milk, it must be free to these categories of pupils. The provision of free meals and milk must be made in the middle of the day.

Further Education (Non-University). The Further Education Funding Council (FEFC) is statutorily required to secure the provision of: sufficient facilities for the full-time education of 16–18 year olds; and adequate facilities for part-time education of those over 16; and for the full-time education of those over 18, where such education falls within schedule 2 of the Further and Higher Education Act 1992.

The Council funds further education at 435 further education (FE) sector colleges (including sixth form colleges) and certain other designated institutions. Provision of further education is also funded at other institutions that have been franchised or sponsored by FE sector colleges. In 1997–98 some 3·5m. students, funded by the FEFC, were attending colleges and institutions in England, studying for a total of 5·8m. qualifications.

Local education authorities are required to secure and keep under review the adequate provision of those categories of further education outside the Council's duty.

The Youth Service. The Youth Service forms part of the education system and is mainly concerned with the provision of personal and social education for young people to enable them to become responsible citizens. The Youth Service is chiefly provided by Local Education Authorities (the statutory sector) and a wide range of voluntary organizations. The priority age group for the service is usually regarded as 13-19 years old but this target age group extends to 11–25-year-olds. A duty is laid upon Local Education Authorities by the provision of the (Consolidation) Education Act 1996 which has superseded earlier Education Acts, to secure adequate provision of further education which includes the Youth Service. Provision is usually in the form of a wide range of leisure-time activities or through 'detached' or outreach work aimed at young people at risk. The Department for Education and Employment awards grants to the headquarters of national voluntary youth organizations through its Grant Scheme. The 1999–2000 Scheme has 2 main aims: to combat social exclusion and inequality through targeting priority groups; and to raise the standard and quality of youth work undertaken by youth organizations. Some 60 organizations are being funded to pursue approved programmes of work concerned with the social and personal education of young people, particularly those aged 13-19. The Scheme aims to widen access to the youth services especially for those who are disadvantaged, who have disabilities, who come from minority ethnic groups or inner city or rural areas, and for girls and young women. It also places priority on

work which aims to contribute to crime prevention and health education, and to encourage the involvement of volunteers.

Independent/State School Partnerships Grant Scheme. The aim of this scheme is to promote collaborative working between the independent and state school sectors to raise standards in education. In its first year, 47 projects worth almost £600,000 were funded. £250,000 of this was provided by the Sutton Trust, an educational charity established to provide educational opportunities for young people from non-privileged backgrounds. A further £1·2m. is available for 1999–2001, including £200,000 from the Sutton Trust, and schools have been invited to apply for funding.

Awards to Students. Local Education Authorities in England and Wales are currently responsible for making mandatory awards to eligible students enrolled on designated full-time or sandwich courses leading to a first degree or comparable qualification, and on certain courses of initial teacher-training for existing students. These awards cover fees and maintenance but the maintenance grants are subject to the income of the student and his or her parents or spouse. For new students in 1998–99, awards to cover both fees (up to £1,000 a year) and maintenance will depend on income. In addition studentships may be available both from universities and other sources. The authorities may also give discretionary awards to students who are not eligible for mandatory awards including those taking non-degree level courses. In 1998–99 loans will form about three-quarters and grants about a quarter of the grant and loan package. Loans will not be available to help contribute towards tuition fees. Support for students through grants and loans rose in line with inflation, resulting in a 2·5% increase over the 1996–97 levels. In 1996–97 the Government provided further and higher education institutions with £27·7m. in Access Funds to help students with severe financial difficulties.

The Student Loans scheme was introduced by the Government in 1990 to supplement mandatory awards. Eligible students apply for loans to the Student Loans Company which is funded wholly by the Government. On leaving higher education former students begin to repay loans over a 5-year period when they reach an income threshold of 85% of average earnings. New students in 1998–99 will have new repayment arrangements once they have graduated and their income is at least £10,000 a year. They will begin to pay back their loans on an income-contingent basis. In the academic year 1997–98 about 64% of those estimated to be eligible took out a student loan; average loan was £1,530.

Awards known as state studentships are offered on a competitive basis by the British Academy and the Students Awards Agency for Scotland to candidates considered by the universities and other higher education institutions to be qualified for postgraduate studies in the humanities; similar awards, tenable at universities or other higher education institutions are offered by the Research Councils to students studying topics within the broad spectrum of agriculture and food; the biological sciences; man's natural environment; science and engineering, and the social sciences at postgraduate level.

In the academic year 1996–97, the latest year for which data are available, the 6 Research Councils made over 16,000 awards, of which 7,000 were new awards. In the same year the British Academy made almost 2,000 awards (of which just under half were new awards) and the Department for Education and Employment made almost 800 awards (of which just under100 were new awards).

Career Development Loans (CDLs) were introduced by the Government in 1988 to provide wider opportunities for adults to acquire and improve vocational skills. The loans are aimed at those who would otherwise not have reasonable or adequate access to the funds required to train. Loans of between £300 and £8,000 can support up to 2 years of education or training, plus up to 1 year's practical work experience where it forms part of the course. Loans to pay for training are available through 4 high street banks (Barclays, The Co-operative, Clydesdale and the Royal Bank of Scotland). The Department of Education and Employment pays the interest on the loan for the period of the training and for 1 month afterwards. Borrowers may apply to the bank to defer payments for up to a further 18 months after completing their course if they are unemployed, employed and receiving certain benefits, or need to extend their training.

By March 1998 nearly £325m. had been advanced to over 102,000 applicants since the programme began.

Teachers. In order to teach in a maintained school or a non-maintained special school in England or Wales, it is first necessary to achieve qualified teacher status. This is generally achieved by successfully completing an undergraduate or postgraduate course of initial teacher training.

Those who are recognized as qualified teachers in Scotland or Northern Ireland are also entitled to qualified teacher status. Teachers who are nationals of participating member states of the European Economic Area who are recognized as qualified in their own countries may also be entitled to qualified teacher status if they meet the requirements on the mutual recognition of qualifications.

Those who have trained overseas in a country outside of the European Economic Area or candidates over 24 who have successfully completed two or more years of higher education may be eligible to train on the job through what are known as 'employment-based' routes. These are the Graduate Teacher Programme (for graduates) and the Registered Teacher Programme (for those with two years of higher education).

In 1997–98 there were about 53,700 students on initial teacher training courses; this figure includes students on the Open University and school-centred courses.

On 1 Jan. 1997, 420,908 full-time equivalent teachers were employed by Local Education Authorities in maintained (including grant-maintained) nursery, primary and secondary schools in England and Wales.

Finance. Total current and capital expenditure on education in England from public funds is estimated at £28,111m. for 1994–95. In 1993–94 total expenditure on education came to 5·2% of GDP.

See also SCOTLAND.

Independent Schools. All independent schools in England (and Wales) are required to be registered by the Department for Education and Employment (and the Welsh Office). Just over half of all independent schools belong to an association affiliated to the Independent Schools Council (ISC). Independent schools which belong to an association affiliated to the Independent Schools Council are now subject to a new inspection regime agreed between the Government and the ISC. These arrangements provide for inspections which are broadly comparable with the OFSTED framework for inspections of maintained schools and to the same 6-year cycle. They result in publicly available reports which enable parents and others to have information about the general quality and standards achieved in ISC schools. Independent schools which belong to an association account for approximately 80% of the total independent school pupil population. Non-association schools will continue to be inspected by HM inspectors from OFSTED on a 5–6 year cycle.

The earliest of the schools were founded by, and attached to, medieval churches. Many were founded as 'grammar' (classical) schools in the 16th century, receiving charters from the reigning sovereign. Reformed mainly in the middle of the 19th century, among the best-known are Eton College, founded in 1440 by Henry VI; Winchester College (1394), founded by William of Wykeham, Bishop of Winchester; Harrow School, founded in 1560 as a grammar school by John Lyon, a yeoman; and Charterhouse (1611). Among the earliest foundations are King's School, Canterbury, founded 600; King's School, Rochester (604) and St Peter's, York, (627).

Higher Education. Higher education has been through considerable changes over the last 30 years. There are now over 1·7m. students studying in higher education institutions in the UK; they study at 111 universities and 60 higher education colleges. The number of male and female students is roughly equal.

Total revenue for higher education institutions was around £11·1bn. in 1996–97. Approximately 63% of this comes from UK or European Union governments. Higher education institutions are funded by 4 UK funding bodies, one each for England, Scotland, Wales and Northern Ireland. They are responsible to Parliament for higher education. Their roles include: allocating funds for teaching and research; promoting high-quality education and research; advising Government on the needs of higher education; informing students about the quality of higher education available; and ensuring the proper use of public funds.

The *Open University* received its Royal Charter on 1 June 1969 and is an independent, self-governing institution, awarding its own degrees at undergraduate and postgraduate level. It is financed by the Government through the HEFCE and by the receipt of students' fees. Tuition is by means of correspondence textbooks, audio and video cassettes, radio and television broadcasts and, for some courses, residential schools and access to a personal computer. There are also 311 local study centres where face-to-face tutorials may be offered. No formal qualifications are required for entry to undergraduate courses. Residents from most countries of Western Europe aged 18 or over may apply, though some courses are not available outside the UK. There are over 130 undergraduate courses; many are available on a one-off basis. In 1998 there were over 112,000 undergraduates, and over 29,000 postgraduate level students, The university has some 3,000 full-time staff working at its Milton Keynes headquarters, and in 13 regional centres throughout the country. There are over 6,000 part-time associate lecturers.

One university is independent of the state system, the *University of Buckingham*, which opened in 1976 and received a Royal charter in 1983. It offers 2-year courses towards its own honours degrees, the academic year commencing in Jan. or July and consisting of four 10-week terms. There are 4 areas of study: Business; Humanities; Law; and Sciences. In 1999 there were 583 full-time and 45 part-time undergraduate students and 79 full-time and 14 part-time postgraduate students. There were 75 teachers (3 part-time).

All universities charge fees, but financial help is available to students from several sources (*see Awards to Students* above), and the majority of students receive some form of financial assistance.

The British Council. The British Council promotes cultural, educational and technical co-operation between Britain and other countries. Established in 1934 and incorporated by Royal Charter in 1940, it is Britain's principal agency for cultural relations overseas. An independent, non-political organization, it is represented in 109 countries, running a mix of offices, libraries, resource centres and English-teaching operations. Its headquarters are in London and Manchester, with further centres in Belfast, Cardiff and Edinburgh.

The British Council's total expenditure in 1997–98 was £413·9m. This was made up of government grants (£133·9m.), revenues from English-language teaching and client-funded education services (£141·3m.), and development programmes, principally in education and training, which are managed on behalf of the British Government and other clients (£136·0m.).

The purpose of the British Council is to enhance the reputation of the UK as a forward-looking democracy, to advance the use of the English language and to reinforce the country's role in the international community.

Health. The National Health Service (NHS) in England and Wales started on 5 July 1948 under the National Health Service Act, 1946. There is a separate Act for Scotland.

The NHS is a charge on the national income in the same way, e.g., as the armed forces. Every person normally resident in the UK is entitled to use any complete part of the services, and no insurance qualification is necessary.

Since 1948 a weekly NHS contribution has been payable by employees and the self-employed. In 1957 this contribution was extended to employers. For convenience this contribution is collected with the National Insurance contribution and amounts to 1·05% of the latter for employees and 0·9% for employers. The NHS is funded 12·1% by these contributions, 82% by general taxation and 2·3% by charges for drugs and dental treatment, and the rest from other receipts. Health authorities may raise funds from voluntary sources; hospitals may take private, paying patients.

Organization. The National Health Service and Community Care Act, 1990, provided for a major restructuring of the NHS. From 1 April 1991 health authorities became the purchasers of healthcare, concentrating on their responsibilities to plan

and obtain services for their local residents by the placement of health service contracts with the appropriate units. Day-to-day management tasks became the responsibility of hospitals and other units, with whom the contracts are placed, in their capacity as providers of care.

In April 1996 the Regional Health Authorities were replaced by 8 regional offices of the NHS Executive. The District Health Authorities and Family Health Service Authorities were replaced by comprehensive Health Authorities directly financed by central governments Hospital and Community Health Services funds. The budget for 1996–97 was £2,260m.

The key responsibility of Health Authorities is to ensure that the health needs of their local communities are met. They have the purchasing power to commission hospital and community health services for their residents. In doing so they have a duty to ensure that high standards are maintained and that they are securing the best possible value for money.

The Health Authorities manage the Family Doctor (or General Medical) Service and also organize the general dental, pharmaceutical and ophthalmic services for their areas. Any doctor may take part in the Family Doctor Service, and are paid for their NHS work; they may also take private fee-paying patients.

NHS Trusts are established as self-governing units within the NHS. Trusts are responsible for the ownership and management of the hospitals or other establishments or facilities vested in them, and for carrying out the individual functions set out in their establishment orders. In April 1996 there were 520 Trusts, representing most hospitals.

General practitioners (GPs) may apply for fundholding status, responsible for their own NHS budget for a specified range of goods and services. There are 2 types of fundholder: Standard fundholders for practices with at least 5,000 patients in England and 4,000 in Wales and Scotland, who purchase the full range of in- and out-patient services; and Community fundholders, for smaller practices of at least 3,000 patients, who purchase only community nursing services and diagnostic tests. In 1996 there were some 14,000 fundholding GPs in 3,300 practices, covering 47% of the population.

Services. The NHS broadly consists of hospital and specialist services, general medical, dental and ophthalmic services, pharmaceutical services, community health services and school health services. All these services are free of charge except for such things as prescriptions, spectacles, dental and optical examination, dentures and dental treatment, amenity beds in hospitals, and for some of the community services, for which charges are made with certain exemptions.

The total cost of the NHS was estimated at £42,600m. for 1996–97.

In 1996 there were 26,855 GPs in England with an average of 1,885 patients each, 1,736 in Wales with 1,724 patients and 3,573 in Scotland with 1,488. There were 15,280 general dental practitioners in England, 834 in Wales and 1,772 in Scotland. In hospitals in Great Britain, in 1996, there were 59,592 medical staff and 356,109 nurses and midwives (excluding agency staff). In 1996 provision of beds in the UK was 47 per 10,000 population.

In the UK in 1995 there were 193 public and private hospices for the terminally ill with 2,982 beds.

Personal Social Services. Under the Local Authority Social Services Act, 1970, and in Scotland the Social Work (Scotland) Act, 1968, the welfare and social work services provided by local authorities were made the responsibility of a new local authority department—the Social Services Department in England and Wales, and Social Work Departments in Scotland headed by a Director of Social Work, responsibility in Scotland passing in 1975 to the local authorities. The social services thus administered include: the fostering, care and adoption of children, welfare services and social workers for people with learning difficulties and the mentally ill, the disabled and the aged, and accommodation for those needing residential care services. Legislation of 1996 permits local authorities to make cash payments as an alternative to community care. In Scotland the Social Work Departments' functions also include the supervision of persons on probation, of adult offenders and of persons released from penal institutions or subject to fine supervision orders.

Personal Social Services staff numbered 233,655 in 1996. The total cost of these services was estimated at £8,849m. for 1995–96. Expenditure is reviewed by the

Social Services Inspectorate and the Audit Commission (in Scotland by the Social Work Services Inspectorate and the Accounts Commission).

Welfare. The National Insurance Act 1946 came into operation on 5 July 1948, repealing the existing schemes of health, pensions and unemployment insurance. This Act, along with later legislation, was consolidated as the National Insurance Act 1965. The scheme now operates under the Social Security Contributions and Benefits Act 1992 and the Social Security Administration Act 1992.

Since 1975 Class 1 contributions have been related to the employee's earnings and are collected with PAYE income tax, instead of by affixing stamps to a card. Class 2 and Class 3 contributions remain flat-rate, but, in addition to Class 2 contributions, those who are self-employed may be liable to pay Class 4 contributions, which for the year 1997–98 are at the rate of 6% on profits or gains between £7,010 and £24,180, which are assessable for income tax under Schedule D. The non-employed and others whose contribution record is not sufficient to give entitlement to benefits are able to pay a Class 3 contribution of £6·05 per week in 1997–98 voluntarily, to qualify for a limited range of benefits. Class 2 weekly contributions for 1997–98 for men and women are £6·15. Class 1A contributions are paid by employers who provide employees with a car and fuel for their private use.

From 6 April 1978 the Social Security Pensions Act 1975 introduced earnings-related retirement, invalidity and widows' pensions. Members of occupational pension schemes may be contracted out of the earnings-related part of the state scheme relating to retirement and widows' benefits. Employee's national insurance contribution liability depends on whether he/she is in contracted-out or not contracted-out employment.

Full-rate contributions for non-contracted-out employment in 1997–98:

Weekly Earnings (in £1)	*Yearly earnings (in £1)*	*Employee pays*	*Employer pays*
Nil–62	Nil–3,223	Nil	Nil
62–109	3,223–5,719	10%[1]	3%
110–154	5,720–8,059	10%[1]	5%
155–209	8,060–10,919	10%[1]	7%
210–464	10,920–24,180	10%[1]	10%
Over 465	Over 24,180	£41·54	10%

[1]Plus 2% of £62.

Where earnings exceed £62 per week the employee contributes 2% of earnings up to £62 and 10% thereafter.

For contracted-out employment the employees' contributions are as above, but 8·2% on weekly earnings of £62–£465. The employer's rates are reduced by 3%.

From April 1996 employers who engage a trainee, or a person who has been unemployed for at least 2 years are eligible for a year's rebate of contributions.

Contributions together with interest on investments form the income of the *National Insurance Fund* from which benefits are paid. A Treasury grant was instituted in 1993. 24,810,000 persons (10,780,000 women) paid contributions in 1994–95, including 21,790,000 employees at standard rate.

Receipts, 1995–96 (in £1m.), 52,756, including: Contributions, 40,874·58; compensation from Consolidated Fund for recoveries, 474·7; investment income, 459·22. Disbursements (in £1m.), 37,088·12, including: Unemployment Benefit, 1,131·37; Sickness Benefit, 14·71; Invalidity Benefit, 599·83; Maternity Allowances, 29·9; Widow's Benefit, 1,050·69; Guardian's Allowances, 1·84; Retirement Pensions, 32,619·57; Pensioners' Lump Sums, 127·19; Redundancy Payments, 155·07; transfers to Northern Ireland, 125; administration, 1,218·77. Total benefit expenditure, 1995–96, £88,787m.

Statutory Sick Pay (SSP). Employers are responsible for paying statutory sick pay (SSP) to their employees who are absent from work through illness or injury for up to 28 weeks in any 3-year period. Basically, all employees aged between 16 and 65 (60 for women) with earnings above the Lower Earnings Limit are covered by the scheme whenever they are sick for 4 or more days consecutively. The weekly rate is £54·55. For most employees SSP completely replaces their entitlement to state

incapacity benefit which is not payable as long as any employer's responsibility for SSP remains.

Pregnant working women may be eligible to receive statutory maternity pay directly from their employer for a maximum of 18 weeks. There are 2 rates: Where a woman has been working for the same employer for at least 26 weeks, she is entitled to 90% of her average weekly earnings for the first 6 weeks and to the lower rate of £54·55 a week for the remaining 12 weeks. Employers are reimbursed by the state for 92% of the amount they pay.

Women who are not eligible for statutory maternity pay, those who are self-employed, have recently changed jobs or given up their job, may qualify for a weekly maternity allowance of £54·55 for employees and £47·35 for the self- or non-employed, which is payable for up to 18 weeks.

All pregnant employees have the right to take 14 weeks' maternity leave.

A payment of £100 from the Social Fund may be available if the mother or her partner are receiving income support, family credit or disability working allowance. It is also available if a woman adopts a baby.

Contributory benefits. Qualification for these depends upon fulfilment of the appropriate contribution conditions, except that persons who are incapable of work as the result of an industrial accident may receive incapacity benefit followed by invalidity benefit without having to satisfy the contributions conditions.

Jobseekers' Allowance. This replaced unemployment benefit on 7 Oct. 1996. Unemployed persons claiming the allowance must sign a 'Jobseekers' Agreement' setting out a plan of action to find work. The allowance is not payable to persons who left their job voluntarily or through misconduct. Claimants with sufficient National Insurance contributions are entitled to the allowance for 6 months regardless of their means; otherwise, recipients qualify through a means test and the allowance is fixed according to family circumstances, at a rate corresponding to Income Support for an indefinite period. In 1996, there were some 397,800 recipients of Unemployment Benefit at any one time.

Incapacity benefit. This replaced the former sickness benefit and invalidity benefit on 13 April 1995. Entitlement begins when entitlement to SSP (if any) ends. There are 3 rates: A lower rate for the first 28 weeks; a higher rate between the 29th and 52nd week; and a long-term rate from the 53rd week of incapacity. It also comprises certain age additions and increases for adult and child dependants. A more objective medical test of incapacity for work was introduced for incapacity benefit as well as for other social security benefits paid on the basis of incapacity for work. This test applies after 28 weeks' incapacity for work and assesses ability to perform a range of work-related activities rather than the ability to perform a specific job. Benefit is taxable after 28 weeks. Some 1,910,000 claims were being met at any one time in 1996.

Maternity Benefit. Women who do not qualify for statutory maternity pay may be entitled to maternity allowance if they satisfy a test of recent work and contributions paid. Maternity allowance can be paid for up to 18 weeks. Payment can start at the earliest 11 weeks before the expected week of confinement but the woman has some choice in deciding when to give up work and still retains title to the full 18 weeks. There were some 12,000 beneficiaries in 1995–96.

Widow's Benefits. From 11 April 1988 the three main widow's benefits are: Widow's payment, widowed mother's allowance, widow's pension.

A widow cannot get any widow's benefits based on her husband's National Insurance contributions (NIC) if: She had been divorced from the man who has died; or she was living with the man as if she were married to him, but without being legally married to him; or she is living with another man as if she is married to him; or she was in prison or held in legal custody. A widow can only get widow's benefits if her husband has paid enough NIC. *Widow's Payment* is a single tax-free payment of £1,000. A widow may be able to get this benefit if her husband has paid enough NIC and she was under 60 when her husband died; or her husband was not getting a State Retirement Pension when he died. *Widowed Mother's Allowance:* A widow may be able to get a widowed mother's allowance if her husband has paid enough NIC and she is receiving child benefit for one of her children, or her

husband was receiving child benefit, or she is expecting her husband's baby, or if she was widowed before 11 April 1988 and has a young person under 19 living with her for whom she was receiving Child Benefit. A widow entitled to a widowed mother's allowance will get an amount based on her husband's NIC. She will also get benefit for her eldest dependent child and further higher benefit for each subsequent child, and she may also get an additional pension based on her husband's earnings since 1978. Widowed mother's allowance is usually paid as long as the widow is getting child benefit. It is taxable. *Widow's Pension:* A widow may be able to get a widow's pension if her husband has paid enough NIC. She must be 45 or over (40 or over if widowed before 11 April 1988) when her husband died or when her widowed mother's allowance ends. A widow cannot get a widow's pension at the same time as a widowed mother's allowance. A widow who is entitled to a widow's pension will get an amount that depends on her age when her husband died or when her widowed mother's allowance ends. If she was 55 or over (50 or over if widowed before 11 April 1988) she will get the full rate of widow's pension. She may also get an additional pension based on her husband's earnings since 1978. If her late husband was a member of a contracted-out occupational scheme or a personal pension scheme, that scheme is responsible for paying the whole or part of the additional pensions. Widow's pension is usually paid until the widow is entitled to state retirement pension, when she is 60 or older. Widow's pension is taxable. There were some 311,600 pensioners in 1996 at any one time.

Retirement Pension. The state retirement ('old-age') pension scheme has 2 components: A basic pension and an earnings-related pension (State Earnings Related Pension—SERPS). The amount of the first is subject to National Insurance contributions made; SERPS is 1·25% of average earnings between the lower weekly earnings limit for Class I contribution liability and the upper earnings limit for each year of such earnings, building up to 25% in 20 years. For individuals reaching pensionable age after 6 April 1999, changes in the way pensions are calculated will be phased in over 10 years to include a lifetime's earnings with an accrual rate of 20%. Pensions are payable to women at 60 years of age and men at 65, but the age differential will be progressively phased out starting in April 2010. Women born before 6 April 1950 will be unaffected; women born after 5 March 1955 will receive their pension at 65; pension age for women between these dates will move up gradually from 60 to 65. There are standard rates for single persons and for married couples, the latter being 159% of 2 single-person rates. Proportionately reduced pensions are payable where contribution records are deficient.

Employees in an occupational scheme may be contracted out of SERPS provided that the occupational scheme provides a pension not less than the 'guaranteed minimum pension'. Self-employed persons, and also employees, may substitute personal pension schemes for SERPS. An independent statutory body, the Occupational Pension Board, is responsible for supervising contracted-out schemes.

Self- and non-employed persons may contribute voluntarily for retirement pension.

Persons who defer claiming their pension during the 5 years following retirement age are paid an increased amount, as do men and women who had paid graduated contributions. Although no further graduated contributions have been paid after April 1975, pension already earned will be paid along with the basic pension in the normal way. In 1996 some 10,814,600 persons were receiving pensions at any one time. Since 1 Oct. 1989 the pension for which a person has qualified may be paid in full whether a person continues in work or not irrespective of the amount of earnings.

At the age of 80 a small age addition is payable. In addition non-contributory pensions are now payable, subject to residence conditions, to persons aged 80 and over who do not qualify for a retirement pension or qualify for one at a low rate. These pensions are financed by Exchequer funds.

Pensioners whose pension is insufficient to live on may qualify for Income Support.

Non-Contributory Benefits.

Child Benefit. Child benefit is a tax-free cash allowance for children normally paid to the mother. The weekly rates are highest for the eldest qualifying child and less

for each other child. Child benefit is payable for children under 16, for 16- and 17-year-olds registered for work or training, and for those under 19 receiving full-time non-advanced education. Some 12,993,000 children in 7,251,600 families received benefit in 1995–96 at any one time.

One Parent Benefit is a tax-free cash allowance for certain people bringing up children alone. It is payable for the first or only child in the family in addition to child benefit. There were some 1,067,000 beneficiaries in 1995–96.

Child Support Agency. The Agency, which started work in April 1993, is gradually replacing the court system for obtaining maintenance for children being brought up by single parents. The Agency is responsible for assessing, collecting and enforcing child maintenance payments and for tracing absent parents. Assessments are made using a formula which takes into account each parent's income and essential outgoings. Changes to the child support arrangements were introduced in Feb. 1994 to take account of concerns raised by members of the public and MPs. These are designed to reduce the amount of child maintenance that many absent parents are required to pay, and to give some families more time to adjust to increased bills. Legislation of 1995 introduced the possibility of fixing maintenance alongside the formula-assessment method. Appeals on points of law may be made to the Child Support Commissioners. In 1994–95 the Agency took on 398,584 new cases and completed 568,149 assessments.

Family Credit. Family Credit is a tax-free benefit for working families with children. To be able to get Family Credit there must be at least one child under 16 in the family (or under 19 if in full-time education up to, and including, A level or equivalent standard). The claimant or partner (if there is one) must be working at least 16 hours a week to qualify. They may be employed or self-employed, a lone parent or a couple. The claim should be made by the woman in two-parent families. The amount of Family Credit payable depends on the income of the claimant and partner, how many children there are in the family and their ages. The same rates of benefit are paid for one-parent families as for two-parent families. There are adult rates as well as a rate for each child varying with age, payable if the family's income does not exceed a certain limit. The award is reduced by £0·70 for each extra £1 earned. Family Credit is not payable if the claimant (or claimant and partner together) have savings or capital of over £8,000. Benefit is reduced if savings or capital of more than £3,000 is held. Family Credit is paid at the same rate for 26 weeks. The amount of the award will usually stay the same even if earnings, or other circumstances, change during that period. There were some 716,300 recipients in 1996 at any one time.

Earnings Top-up. This was introduced in Oct. 1996 on a pilot basis in 8 areas. Wages for workers with dependent children are topped up. There are different rates for couples and single persons.

Guardian's Allowance. A person responsible for an orphan child may be entitled to a guardian's allowance in addition to child benefit. Normally, both the child's parents must be dead but when they never married or were divorced, or one is missing, or serving a long sentence of imprisonment, the allowance may be paid on the death of one parent only. In 1996 there were 2,300 recipients at any one time.

Attendance Allowance. This is a tax-free Social Security benefit for disabled people over 65 who need help with personal care. The rates are increased for the terminally ill. There were some 1,161,000 recipients in 1996 at any one time.

Invalid Care Allowance. This is a taxable benefit which may be paid to those who forgo the opportunity of full-time work to care for a person who is receiving attendance allowance, constant attendance allowance or the highest or middle-core component of Disability Living Allowance. There is a weekly rate, with increases for dependants. There were some 339,000 recipients in 1995–96.

Disability Living Allowance. This is a non-taxable benefit available to people disabled before the age of 65, who need help with getting around or with personal care for at least 3 months. The mobility component has 2 weekly rates, the care component has 3. There were some 1,786,000 recipients in 1996 at any one time.

Disability Working Allowance. This is a tax-free benefit for people with an illness or disability which puts them at a disadvantage in getting a job. It is income-related and is intended for people who are starting work or already working at least 16 hours a week. The allowance is not payable if assets exceed £16,000. About 8,000 people received the allowance in 1995–96.

Industrial Injuries Disablement and Death Benefits. The Industrial Injuries Act, which also came into operation on 5 July 1948, with its later amending Acts, was consolidated as the National Insurance (Industrial Injuries) Act, 1965. This legislation was incorporated in the Social Security Act, 1975. The scheme provides a system of insurance against 'personal injury by accident arising out of and in the course of employment' and against certain prescribed diseases and injuries due to the nature of the employment. It takes the place of the Workmen's Compensation Acts and covers persons who are employed earners under the Social Security Act. There are no contribution conditions for the payment of benefit. There were 244,800 recipients in 1996 at any one time. Three types of benefit are provided:

Disablement benefit. This is payable where, as the result of an industrial accident or prescribed disease, there is a loss of physical or mental faculty. The loss of faculty will be assessed as a percentage by comparison with a person of the same age and sex whose condition is normal. If the assessment is between 14–100% benefit will be paid as weekly pension; 14–19% are payable at the 20% rate. The rates vary from 20% disabled to 100% disablement. Assessments of less than 14% do not normally attract basic benefit except for certain progressive chest diseases. Pensions for persons under 18 are at a reduced rate. When injury benefit was abolished for industrial accidents occurring and prescribed diseases commencing on or after 6 April 1983, a common start date was introduced for the payment of disablement benefit 90 days (excluding Sundays) after the date of the relevant accident or onset of the disease. The following increases can be paid with disablement benefit: *Constant attendance allowance* – where the disability for which the claimant is receiving disablement benefit is assessed at 100% and is so severe that they need constant care and attention. There are 4 rates depending on the amount of attendance needed. *Exceptionally severe disablement allowance* – where the claimant is in receipt of constant attendance allowance at one of the two higher rates and the need for attendance is likely to be permanent. *Reduced earnings allowance* (REA) is a separate benefit. Entitlement exists if the claimant has not retired and cannot go back to their normal job or do another job for the same pay because of the effects of the disability caused by an accident or disease which occurred on or before 30 Sept. 1990. It can be paid whether or not disablement benefit is paid, providing the disablement benefit assessment is 1% or more (e.g. where disablement is assessed at less than 14%) and on top of 100% disablement benefit. From 1 Oct. 1989, if a claimant is of pensionable age (60 for a woman, 65 for a man) they can continue to receive REA if they are in regular employment, or in some cases if they are receiving Sickness Benefit, Invalidity Benefit or Unemployment Benefit. It will not matter whether or not they receive State Retirement Pension. If they are not in regular employment, then entitlement to REA will cease. In most cases it will be replaced by Retirement Allowance.

Death Benefit. This is payable to the widow of a person who died before 11 April 1988 as the result of an industrial accident or a prescribed disease. Deaths which occurred on or after 11 April 1988—a widow is entitled to full widow's benefits even if her late husband did not satisfy the contribution condition, if he died as a result of an industrial accident or prescribed disease.

Allowances may be paid to people who are suffering from pneumoconiosis or byssinosis or certain other slowly developing diseases due to employment before 5 July 1948. They must not at any time have been entitled to benefit for the disabled under the Industrial Injuries provision of the Social Security Act, or compensation under Workmen's Compensation Acts, or have received damages through the courts.

In certain cases supplementation allowances are payable to people who are getting or are entitled to compensation under the Workmen's Compensation Acts.

War Pensions. Pensions are payable for disablement or death as a result of service in the armed forces, Merchant Navy or Civil Defence during war, or to civilians injured

by enemy action. The amount depends on the degree of disablement. Various supplements may apply. There were some 303,000 recipients in 1996 at any one time.

Severe Disablement Allowance. A severe disablement allowance as well as an age-related addition may be payable to people under pensionable age who have been continuously incapable of work for at least 28 weeks, but who do not qualify for incapacity benefit. Those over 20 who are unable to work and are 80% disabled but do not qualify for the National Insurance invalidity pension because they have not paid sufficient contributions may be entitled to severe disablement allowance. Additions for adult dependants and for children may also be paid. There were some 368,000 beneficiaries in 1995–96.

Housing Benefit. The housing benefit scheme assists persons who need help to pay their rent, using general assessment rules and benefit levels similar to those for the income support scheme. People whose net income is below certain specified levels qualify for housing benefit of up to 100% of their rent. The scheme sets a limit of £16,000 on the amount of capital a person may have and still remain entitled. Restrictions on the granting of benefit to persons under 25 were introduced in 1995. In 1996 some 2,898,300 claims for rent rebate and 1,877,500 for rent allowance were being made at any one time.

Council Tax Benefit. The scheme offers help to those claiming income support and others with low incomes. Subject to rules broadly similar to those governing the provision of income support and housing benefit, people may receive rebates of up to 100% of their council tax. In 1996 some 5,614,200 households received such help at any one time. A person who is liable for the council tax may also claim benefit (called 'second adult rebate') for a second adult who is not liable to pay the council tax and who is living in the home on a non-commercial basis.

Income Support. Under the Social Security Act, 1986, benefit was payable to any persons aged 18 years or over not in full-time work who were without adequate resources. Since 7 Oct. 1996, Income Support has been payable only to persons not required to be available for work whose resources are below a certain level. These include single parents, pensioners, long-term sick or disabled persons, and those caring for them who qualify for the invalid care allowance. Income Support is not payable if the claimant (or claimant and partner together) have savings or capital over £8,000. Benefit is reduced if savings or capital of more than £3,000 is held. A person who is excluded from benefit under the normal rules may receive payments to meet urgent need. Additional sums, known as premiums, are available. There were some 5,778,300 recipients in 1996 (under the 1986 Act) at any one time.

The Social Fund. The Fund makes payments and loans to help recipients meet intermittent expenses. 'Regulated payments' comprise: *Maternity Payments* (a payment of up to £100 for each baby expected, born or adopted, payable to persons receiving income support, income-based jobseekers' allowance, disability working allowance or family credit); *Funeral Payments* (a payment of reasonable funeral expenses up to £500 incurred by persons receiving income support, income-based jobseekers' allowance, housing benefit, Council Tax benefit, disability working allowance or family credit; recoverable from the estate of the deceased); *Cold Weather Payments* (a payment of £8·50 for any consecutive 7 days when the temperature is below freezing to persons receiving income support who are pensioners, disabled or have a child under 5). 'Discretionary Payments' comprise: *Community Care Grants* (payments to help persons receiving income support to move into the community or avoid institutional care); *Budgeting Loans* (interest-free loans to persons receiving income support for expenses difficult to budget for); *Crisis Loans* (interest-free loans to anyone without resources in an emergency where there is no other means of preventing serious risk to health or safety). Savings over £500 (£1,000 for persons aged 60 or over) are taken into account before payments are made.

CULTURE

Millennium celebrations will be focused on London, where there will be the Millennium Dome, a Millennium Wheel, a Millennium Bridge and a Millennium Village. Over £4bn. (US$6·5bn.) is being invested in leisure industries in the capital in the run-up to 2000, with some 50 hotels under construction. The Millennium Dome in Greenwich, the 'official home of world time', opens on 31 Dec. 1999. The scale and ambition of the Dome dwarfs any other monument to the millennium built anywhere on the planet. The Dome's translucent canopy, 1 km in circumference, is suspended by a web of twelve vast steel masts. The interior has an enormous 50m-high canopy creating a vast canvas for special effects.

In Cardiff a Millennium Stadium has been constructed at Cardiff Arms Park in time to host the Rugby World Cup in 1999. Scotland's only landmark project for the millennium is the rebuilding of Glasgow's Hampden Park Stadium.

Broadcasting. Radio and television services are provided by the British Broadcasting Corporation (BBC), by licensees of the Radio Authority and the Independent Television Commission (ITC) and by the Welsh-language Sianel Pedwar Cymru (S4C, Channel 4 Wales). The BBC, constituted by Royal Charter until 31 Dec. 1996, has responsibility for providing domestic and external broadcast services, the former financed from the television licence revenue, the latter by Government grant. The domestic services include 2 national television services, 5 national radio network services and a network of local radio stations. Government proposals for the future of the BBC after 1996 were published in July 1994.

The ITC is responsible for licensing and regulating all non-BBC TV services (except S4C), provided in and from the UK whether analogue or digital. These include ITV (regional and breakfast-time licensees), Channel 4, Channel 5, cable and satellite and additional services, such as teletext, carried on the spare capacity of TV signals. The Radio Authority is responsible for licensing and regulating independent national and local radio services. S4C is transmitted in Wales, and is funded by the government. It acts as both broadcaster and regulator.

The BBC's domestic radio services are available on Long Wave, FM and VHF; those of the Radio Authority on FM and VHF. Television services other than those only on cable and satellite are broadcast at UHF in 625-line definition and in colour (by PAL). The BBC World Service, which started life in 1932 as the Empire Service, broadcast in 42 languages to an audience estimated at 140m. in 1997. As the self-financed BBC Worldwide TV, the BBC is also involved in commercial joint ventures to provide international television services.

The broadcasting authorities, whose governing bodies are appointed (by HM the Queen in the case of the BBC and by the Secretary of State for National Heritage in the case of the ITC, the Radio Authority and S4C) as trustees for the public interest in broadcasting, are independent of government and are publicly accountable to Parliament for the discharge of their responsibilities. Their duties and powers are laid down in the BBC Royal Charter and the Broadcasting Act 1990.

All independent (non-BBC) radio and television services other than S4C are financed by the sale of broadcasting advertising time, commercial sponsorship, or, in some cable and satellite services, by subscription.

The Broadcasting Standards Commission (BSC) was established on 1 April 1997 by the Broadcasting Act 1996, through the merger of the Broadcasting Standards Council and Broadcasting Complaints Commission. Combining the functions of the two predecessor bodies, it acts as a forum for public concern about fairness and taste and decency on television and radio. The Commission considers and reaches findings on taste and decency complaints received from the public and adjudicates upon complaints of unfair or unjust treatment in broadcast programmes, and of unwarranted infringement of privacy in programmes or in their preparation. It also undertakes and commissions research and the monitoring of public attitudes, and must draw up a code of practice on both broadcasting standards and fairness which the broadcasters and regulators are required to reflect in their own programming guidelines. The Commission is half-funded by the Department, half by contributions from the BBC, ITC, Radio Authority and S4C.

The number of television receiving licences in force on 31 March 1997 was 21,305,000, including 20,849,000 for colour. There were 779,461 cable television

subscribers in 1994. In 1995 there were 83·2m. radio receivers, or 1,428 per 1,000 inhabitants—a figure only exceeded in the USA, with 2,122 per 1,000 inhabitants.

Cinema. In 1996 cinemas had 1,744 screens. By 2000 this will have increased to around 2,800. Admissions were 112·1m. in 1996. 127 full-length films were made in 1996.

Press. In 1996 there were 10 national dailies with a combined average daily circulation in June of 13,202,574, and 9 national Sunday newspapers (15,174,032). There were also about 100 morning, evening and Sunday regional newspapers and 2,000 weeklies (about 1,000 of these for free distribution). There were about 6,500 other commercial periodicals and 4,000 professional and business journals. In 1996, an average of 18·3m. newspapers were sold per day, down from over 23m. in 1980.

In Jan. 1991 the Press Complaints Commission replaced the former Press Council. It has 15 members and a chair (Lord Wakeham), including 7 editors. It is funded by the newspaper industry.

In 1996, 101,504 book titles were published, including 89,984 non-fiction. 95,064 titles were published in 1995.

Tourism. In 1997, 133·6m. UK residents made trips within the UK, passing 474m. nights in accommodation and spending £15,075m. Of these, 70·8m. were holiday-makers spending £10,355m. There were 25·5m. overseas visitors in 1997 passing 223m. nights in accommodation and spending £12,244m. UK residents made 46·0m. trips abroad in 1997. The main countries of origin for foreign visitors in 1997 were: France (3·59m.), USA (3·43m.), Germany (2·91m.), Ireland (2·23m.) and the Netherlands (1·65m.).

The leading attraction in 1997 was Blackpool Pleasure Beach, Lancs, with an estimated 7·8m. visits. The leading tourist attractions charging admission in 1997 were Madame Tussaud's in London, with 2,798,801 visits; Alton Towers in Staffordshire, with 2,701,945 visits; and the Tower of London, with 2,615,170 visits.

Festivals. Among the most famous music festivals are the Promenade Concerts or 'Proms', which take place at the Royal Albert Hall in London every year from July to Sept, culminating in the Last Night of the Proms; the Glyndebourne Festival in Sussex (May to Aug.); the Aldeburgh Festival in Suffolk (June); and the Buxton Festival in Derbyshire (July). The annual London Film Festival takes place in Nov. There are major literary festivals at Hay-on-Wye in Powys (late May/early June) and Cheltenham in Gloucestershire (Oct.). The multicultural Notting Hill Carnival in London takes place at the end of Aug.

Museums and Galleries. The museums with the highest number of visitors are all in London. In 1997 there were 6,056,633 visits to the British Museum, 4,809,063 to the National Gallery, 1,793,400 to the Natural History Museum, 1,757,735 to the Tate Gallery and 1,537,151 to the Science Museum.

ENGLAND

KEY HISTORICAL EVENTS

After the withdrawal of the Roman legions, 5th century Celtic Britain was invaded by Scandinavian and Teutonic tribes, collectively called the English. In the course of the next 150 years the English conquered the east and centre of the country, pinning down the Celtic Britons on the higher lands to the west. More than 200 years passed before the prevailing tribes recognized one king.

Then came the Danish invasion, their incomplete defeat by Alfred the Great, the consolidation of the kingdom under Alfred's successors and the Norman Conquest led by William, duke of Normandy, who was crowned king in 1066. When William died in 1087, he left Normandy to his eldest son Robert, thus separating it from England. The French dialect known as Anglo Norman was spoken by the ruling class in England for two centuries after the Conquest.

The Norman heritage was preserved also in the overlap between French and English feudal lords. Henry II, the founder of the Plantagenet dynasty, was feudatory lord of half France. But most of the French possessions were lost by Henry's son John. Thereafter, the Norman baronage came to regard themselves as English.

The ambitions of Edward III began and those of Henry V renewed the Hundred Years War (1338-1453) with France, which ended with the loss of all the remaining French possessions except Calais.

The dynastic struggle between the rival houses of York and Lancaster culminated in the Tudor ascendancy over political and clerical factions. Henry VII was a unifying monarch preparing the way for Henry VIII who forced the Church to submit to lay rule. Tudor power reached its zenith with Elizabeth I when England, allied with other Protestant powers, humbled the Spanish Armada.

Elizabeth's death brought on a great struggle for supremacy between Crown and Parliament. There followed the Civil War, the execution of Charles I, the rule by Protector Cromwell by military dictatorship, and the restoration of the Stuart

monarchy on terms which conceded financial authority and thus decision-making power to Parliament.

The attempt of James II to restore the royal prerogative led to the intervention of William of Orange. James fled the country and the crown was taken by William and his wife Mary as Queen. The accession of William involved England in a protracted war against France but before peace was achieved, the 1688 revolution was confirmed by the Hanoverian succession, and the history of England was merged with that of Great Britain by the union with Scotland in 1707.

TERRITORY AND POPULATION

At the census taken on 21 April 1991 the area of England was 130,423 sq. km and the population 46,382,050. Population density (persons per ha), 1991 census: 3·6. Private households at the 1991 census: 19,984,500. Estimated population of England, mid-1998, 49,558,000 (25,131,000 females and 24,427,000 males), giving a density of 3·8 per ha.

Population (present on census night) at the 4 previous decennial censuses:

The 35 counties are subdivided into 274 districts and the Isles of Scilly. Greater London comprises 32 boroughs and the City of London.

CURRENT ADMINISTRATION

Local Government. Local authorities have statutory powers and claims on public funds. Relations with central government are maintained through the Department of the Environment. Changes introduced by the Local Government Commission set up in 1992 included the introduction of single-tier unitary authorities alongside the previous two-tier county and district administrations. By 1997 there were (*two-tier*) 35 non-metropolitan county councils under which were 274 district councils and the Scilly Isles, and (*single-tier*) 27 unitary authorities, 36 metropolitan district councils and 32 Greater London borough councils. Greater London and the 6 metropolitan counties no longer have councils, the former county functions having devolved to the boroughs and districts, but some services (e.g. fire services) are administered by

joint authorities nominated by the latter. There are also some 10,000 parishes, of which about 800 have elected councils. About 300 are former small boroughs or urban districts which became successor parishes. Parish councils manage local facilities and may act as agents for district council functions.

Resident citizens of the UK, Ireland, a Commonwealth country or an EU country may (at age 18) vote and (at age 21) stand for election. Councils are elected for 4 years, except that in the metropolitan and one-third of the other districts, one-third of councillors are elected in each of the 3 years that no county council election is held. Counties are divided into electoral divisions and districts into wards.

Functions. County councils are responsible for strategic planning, transport planning, non-trunk roads and regulation of traffic, personal social services, consumer protection, disposal of waste, the fire and library services and partially for education. District councils are responsible for environmental health, housing, local planning applications (in the first instance) and refuse collection. Unitary authorities combine the functions of both levels.

Election Results. Across the UK to 1 May 1997: Elections for one third of the seats on the councils of the 32 London boroughs, 36 metropolitan districts and 118 non-metropolitan districts were held on 5 May 1994. The Labour Party gained control of 93 councils; the Liberal Democratic Party, 19; the Conservative Party, 15; ind, 5. There was no overall majority in 54 councils.

Elections were held outside the metropolitan areas ('the shires') on 4 May 1995. Labour made a net gain of 155 councils, the Liberal Democrats 45 and the Conservatives lost 51.

At the elections of 2 May 1996 for 32 metropolitan and 114 non-metropolitan and unitary councils, Labour took control of 84 councils and gained 431 seats, the Liberal Democrats took control of 23 councils and gained 142 seats, the Conservatives took control of 3 councils and lost 534 seats, and independents took control of 3 councils and lost 29 seats. In 33 councils no party gained an absolute majority.

On 6 April 1995 elections were held for the 29 newly-created unitary councils. 1,161 seats were contested. Labour won 614 seats with 47% of votes cast, and gained control of 20 of the councils.

County council elections and those for 19 further new unitary authorities took place on 1 May 1997. Elections for the 1,014 seats on the unitary authorities created shadow councils whose job was to prepare the area for transfer to the new status in April 1998. Councillors for these areas did not stand for election but stepped down in April 1998 leaving those elected on 1 May 1997 in charge.

Local elections were due to take place on 6 May 1999.

SOCIAL INSTITUTIONS

Education. For details on the nature and types of school, see under Education, Great Britain.

In Jan. 1997 there were 544 public-sector nursery and 5,793 primary schools with nursery classes in England; in addition, there were 1,538 independent schools with provision for children under 5. In 1997 there were 50,734 pupils under 5 attending nursery schools and 662,775 pupils under 5 in nursery and infant classes in primary schools. About 48% of all these children were attending part-time.

In Jan. 1998 there were 4,398,381 pupils at 18,117 primary schools in England, of which 2,274 were infant schools providing for pupils up to the age of about 7, the remainder mainly taking pupils from age 5 through to 11. Nearly all primary schools take both boys and girls. 15·2% of primary schools had 100 full-time pupils or less.

In Jan. 1998 there were 572 middle schools in England deemed either primary or secondary according to the age range of the school concerned.

In Jan. 1998 there were 3,190 secondary schools in England. Some local authorities have retained selection at age 11 for entry to grammar schools, of which there were 157 in 1998. There were a small number of technical schools in 1998 which specialize in technical studies. There were 113 secondary modern schools in 1998, providing a general education up to the minimum school leaving age of 16, although exceptionally some pupils stay on beyond that age.

Almost all local education authorities operate a system of comprehensive schools to which pupils are admitted without reference to ability or aptitude. In Jan. 1997 there were 2,882 such schools in England with over 2·6m. pupils. With the development of comprehensive education, various patterns of secondary schools have come into operation. Principally these are: 1) All-through schools with pupils aged 11 to 18 or 11 to 16; pupils over 16 being able to transfer to an 11 to 18 school or a sixth form college providing for pupils aged 16 to 19. (There were 115 sixth form colleges in England in 1992). 2) Local education authorities operating a three-tier system involving middle schools where transfer to secondary school is at ages 12, 13 or 14. These correspond to 12 to 18, 13 to 18 and 14 to 18 comprehensive schools respectively; or 3) In areas where there are no middle schools a two-tier system of junior and senior comprehensive schools for pupils aged 11 to 18 with optional transfer to these schools at age 13 or 14.

Local education authority-maintained secondary, middle and primary schools can apply for Grant Maintained (GM) status as self-governing state schools. By Sept. 1997 there were 1,196 GM schools in England (507 primary, 668 secondary and 21 special schools).

Under the Education Act 1996 children have special educational needs if they have a learning difficulty which calls for special educational provision to be made for them. In a minority of cases, perhaps just over 2% of children, the Local Education Authority will need to make a statutory assessment of special educational needs under the Education Act 1996, which may ultimately lead to a 'statement'. In England the total number of pupils with statements in 1997 was over 234,000. In 1997 there were 1,171 maintained special schools and 68 non-maintained special schools.

Outside the state system of education there were in England about 2,250 independent schools in Jan. 1999, ranging from large prestigious schools to small local ones. Some provide boarding facilities but the majority include non-resident day pupils. There are about 550,000 pupils in these schools, which represent about 7% of the total pupil population in England.

Further Education (Non-University). In 1997–98 some 3·5m. students, funded by the Further Education Funding Council (FEFC), were attending colleges and institutions in England, studying for a total of 5·8m. qualifications.

Higher Education. Polytechnics made into universities by the 1992 Further and Higher Education Act (P = Polytechnic): Anglia P became Anglia P Univ.; Birmingham P, Univ. of Central England in Birmingham; Bournemouth P, Bournemouth Univ.; Brighton P, Univ. of Brighton; Bristol P, Univ. of the West of England, Bristol; City of London P, London Guildhall Univ.; Coventry P, Coventry Univ.; Derby P, Univ. of Derby; Hatfield P, Univ. of Hertfordshire; Huddersfield P, Univ. of Huddersfield; Humberside P, Univ. of Humberside (since re-named Univ.

In England in 1995–96 there were 137 institutions of higher education directly funded by the HEFCE (Higher Education Funding Council for England), of which 70 were universities. The HEFCE allocates public funds for teaching and research to universities and colleges. It works in partnership with the higher education sector and advises the Government on higher education policy. In 1998–99 the HEFCE distributed £3·87bn. in funding: £2,694m. for teaching, £829m. for research, £334m. to special funding and £10m. to flexibility. There were 1,137,000 students in funded institutions, including 727,000 full-time.

CULTURE

Millennium celebrations will be focused on London, where there will be the Millennium Dome, a Millennium Wheel, a Millennium Bridge and a Millennium Village. Over £4bn. (US$6·5bn.) is being invested in leisure industries in the capital in the run-up to 2000, with some 50 hotels under construction. The Millennium Dome in Greenwich, the 'official home of world time', opens on 31 Dec. 1999. The scale and ambition of the Dome dwarfs any other monument to the millennium built anywhere on the planet. The Dome's translucent canopy, 1 km in circumference, is suspended by a web of twelve vast steel masts. The interior has an enormous 50m-high canopy creating a vast canvas for special effects.

Tourism. The leading attraction in 1997 was Blackpool Pleasure Beach, Lancs, with an estimated 7·8m. visits in 1997. The leading tourist attractions charging admission in 1997 were Madame Tussaud's in London, with 2,798,801 visits; Alton Towers in Staffordshire, with 2,701,945 visits; and the Tower of London, with 2,615,170 visits.

SCOTLAND

KEY HISTORICAL EVENTS

Earliest evidence of human settlement in Scotland dates from the Middle Stone Age. Hunters and fishermen on the west coast were succeeded by farming communities who made homes as far north as Shetland. The Romans were active in the first century AD but made so little impact on hostile tribes they built Hadrian's Wall between the Tyne and Solway Firth as their northern frontier. At this time, the Picts with their own language and culture consolidated their strength beyond the Firth of Clyde, but it was the southern Scots, a Celtic people from Ireland, who gave their name to the land.

In 843 Kenneth MacAlpine united the Scots and the Picts to found the kingdom of Scotland. A legal and administrative uniformity was established by David I whose 29-year reign ended in 1153. His successors maintained an understanding with England which allowed for two centuries of peace, but in 1286 Edward I of England asserted his claim as overlord of Scotland and appointed his son nominee to succeed to the crown.

Resistance to English rule was led by Robert Bruce, who turned back the English at Bannockburn. His son, David II, was less successful in the battlefield, but defended independence by clever diplomacy. He died in 1371 and was succeeded by his nephew Robert, the first king of the Stuart line.

The reigns of five James's occupied the century and a half between the death of Robert III in 1406 and the accession of Mary. This was the time when the alliance between France and Scotland was cemented by common hostility to England.

James IV reinforced a peace agreement with Henry VII by marrying his daughter Margaret in 1503. Religious differences put a strain on the alliance, and when Henry VIII invaded France, James attacked England only to be killed in the Battle of Flodden.

The young James V was assailed by conflicting pressures from pro-French and pro-English factions but having secured his personal rule, he entered into two successive French marriages. His second wife, Mary, was the mother of Mary, Queen of Scots, who married the Dauphin in 1558. Protestant opposition to French influence was bolstered by Elizabeth I of England who sent troops. Mary was then in France. Returning to Scotland after her husband's death in 1561 she was beset by religious enemies and forced to take refuge in England, where she was the nearest heir to Elizabeth. Her son James VI survived the animosity between his own and his mother's followers to make an alliance with England. With the execution of his

mother by a nervous Protestant establishment in England, James became heir to the English throne to which he succeeded in 1603.

The crowns of England and Scotland were now worn by the same monarch but for a century more the two countries remained independent. Reflecting the religious and political divisions of the Civil War in England, which led to the execution of Charles I, Scottish armies fought for both sides. The Scots soon united, however, to accept Charles II as their king. Having established dominance in England, Cromwell moved against Scotland forcing Charles II into exile. His restoration in 1660 was welcomed in both kingdoms. His successor James VII of Scotland and James II of Great Britain and Ireland was less astute in managing religious and political differences. The collapse of his regime in 1688 and the arrival of William of Orange confirmed the Protestant ascendency in Scotland and England.

The union of parliament, which followed in 1707, brought Scotland more directly under English authority but in many respects the country retained its own system of government.

The remaining supporters of James VII, the Jacobites, led two abortive risings on behalf of James's son and grandson (the old and new Pretenders) but were defeated decisively at Culloden in 1746.

CONSTITUTION AND GOVERNMENT

One of the main aspects of the British Labour Government's programme of constitutional reform is devolution. In the referendum on Scottish devolution on 11 Sept. 1997, 1,775,045 votes (74·3%) were cast in favour of a Scottish parliament and 614,400 against (25·7%). The turn-out was 60·4%, so around 44·8% of the total electorate voted in favour. For the second question, on the Parliament's tax-raising powers, 1,512,889 votes were cast in favour (63·5%) and 870,263 against (36·5%). This represented 38·4% of the total electorate.

The Parliamentary electorate of Scotland in the register numbered 3,992,502 in 1998.

RECENT ELECTIONS

At the UK general election held in May 1997, 72 members were returned from Scotland. The Scottish National Party gained 6 seats (3 in 1992). At the June 1994 European Parliament elections the Scottish National Party won 2 seats with 3·2% of the votes cast (European Radical Alliance).

The first elections for a Scottish Parliament were scheduled for 6 May 1999.

See also Constitution and Government, Recent Elections and Current Administration in Great Britain.

CURRENT ADMINISTRATION

Local Government. Local authorities have statutory powers and claims on public funds. Relations with central government are maintained through the Scottish Office. The Local Government (Scotland) Act 1994 set up 29 unitary authorities alongside the existing 3 Island Authority Areas. There are about 1,000 community councils, but unlike their English and Welsh counterparts, they do not have statutory powers.

Resident citizens of the UK, Ireland, a Commonwealth country or an EU country may (at age 18) vote and (at age 21) stand for election. Elections for the full councils are held every 3 years. Mayors of cities may have the title of Lord Mayor conferred on them. 4 towns in Scotland have the status of city (Aberdeen, Dundee, Edinburgh and Glasgow). This status is granted by the personal command of the monarch and confers no special privileges or powers. The chair of city councils is deemed Lord Provost, and is elsewhere known as Convenor or Provost. Basic and other allowances are payable to councillors (except Scottish community councillors).

On 6 April 1995 elections were held for the 29 newly-created unitary councils. 1,161 seats were contested. The Scottish National Party won 181 seats with 26% and gained 3 councils.

The next local government elections were scheduled for 6 May 1999.

DEFENCE

For information on defence, see Great Britain.

ECONOMY

Performance. A deceleration in Scottish GDP growth was predicted for 1999 of between 1·4% and 1·7%, but growth was expected to recover to between 1·9% and 2·9% in 2000.

Budget. Government expenditure in Scotland came to £24,748m. in 1996–97, of which £9,142m. went on social security, £5,225m. on health and personal social services and £4,026m. on education.

Currency. The Bank of Scotland, Clydesdale Bank and the Royal Bank of Scotland have note-issuing powers. The underlying inflation rate rose to 2·6% in Dec. 1998.

Banking and Finance. There is a stock exchange in Glasgow.

ENERGY AND NATURAL RESOURCES

Water. Water supply is the responsibility of the Regional and Island local authorities. 7 river purification boards are responsible for environmental management.

Agriculture. In 1997 total agricultural area was 6,122,000 ha, of which 3,494,000 ha were used for rough grazing and 1,809,000 ha for crops and grass.

Selected crop production, 1997 (1,000 tonnes): Barley, 1,813; potatoes, 1,149; wheat, 821; oats,121.

Livestock, 1997 (in 1,000): Cattle, 2,079; sheep, 9,563; pigs, 645; poultry, 14,725.

Forestry. Total forest area in 1997 was 1,189,000 ha, of which 503,000 ha was state-owned.

Fisheries. The major fishing ports are Aberdeen, Mallaig, Lerwick and Peterhead. In 1997 there were 2,770 fishing vessels that landed 686,400 tonnes of fish worth £278·7m.

INDUSTRY

Labour. In 1997 the economically active population numbered 2,490,000 (1,126,000 females), of whom 212,000 (78,000) were unemployed. This equates to an unemployment rate of 8·5% for men and 7·0% for women. There were 24,600 notified job vacancies at Dec. 1996.

COMMUNICATIONS

Roads. Responsibility for the construction and maintenance of trunk roads belongs to the Scottish Office. Roads not classified as trunk roads are the responsibility of county or unitary councils. In 1997 there were 53,100 km of public roads, of which 329 km were motorways. There were 1,779,000 licenced private and light goods vehicles.

Rail. Total railway length in 1997 was 2,696 km. There is a metro in Glasgow.

Civil Aviation. There are major airports at Aberdeen, Edinburgh, Glasgow and Prestwick. In 1997, 14,429,000 passengers and 63,100 tonnes of freight were carried.

Shipping. The principal Scottish port is Forth, which handled 43·1m. tonnes of cargo in 1997.

SOCIAL INSTITUTIONS

Justice. The High Court of Justiciary is the supreme criminal court in Scotland and has jurisdiction in all cases of crime committed in any part of Scotland, unless expressly excluded by statute. It consists of the Lord Justice General, the Lord Justice Clerk and 24 other Judges, who are the same Judges who preside in the Court of Session, the Scottish Supreme Civil Court. One Judge is seconded to the Scottish Law Commission. The Court is presided over by the Lord Justice General, whom failing, by the Lord Justice Clerk, and exercises an appellate jurisdiction as well as being a court of first instance. The home of the High Court is Edinburgh, but the court visits other towns and cities in Scotland on circuit and indeed the busiest High Court sitting is in Glasgow. The court sits in Edinburgh both as a Court of Appeal

(the *quorum* being 2 judges if the appeal is against sentence or other disposals, and 3 in all other cases) and on circuit as a court of first instance. Although the decisions of the High Court are not subject to review by the House of Lords, with the Scotland Act 1998 coming into force on 20 May 1999, there is a limited right of appeal against the termination of a devolution issue to the Judicial Committee of the Privy Council. One Judge sitting with a Jury of 15 persons can, and usually does, try cases, but 2 or more Judges (with a Jury) may do so in important or complex cases. The court has a privative jurisdiction over cases of treason, murder, rape, breach of duty by Magistrates and certain statutory offences under the Official Secrets Act 1911 and the Geneva Conventions Act 1957. It also tries the most serious crimes against person or property and those cases in which a sentence greater than imprisonment for 3 years is likely to be imposed. Once the Human Rights Act 1998 comes into force in mid-2000, the court will no longer be able to exercise its declaratory power to try and to punish all acts which are plainly criminal though previously unknown to law.

The appellate jurisdiction of the High Court of Justiciary extends to all cases tried on indictment, whether in the High Court or the Sheriff Court, and persons so convicted may appeal to the court against conviction or sentence, or both, except where the sentence is fixed by law. In such an appeal, a person may bring under review any alleged miscarriage of justice including an alleged miscarriage of justice based on the existence and significance of evidence not heard at the original proceedings provided there is reasonable explanation of why it was not heard and an alleged miscarriage of justice where the Jury returned a verdict which no reasonable Jury, properly directed, could have returned. It is also a court of review from courts of summary jurisdiction, and on the final termination of any summary prosecution the convicted person may appeal to the court by way of stated case on questions of law, but not on questions of fact, except in relation to a miscarriage of justice alleged by the person accused on the basis of the existence and significance of additional evidence not heard at the original proceedings provided that there is a reasonable explanation of why it was not heard. Before cases proceed to a full hearing, leave of appeal must first be granted. Grounds of appeal and any relevant reports are sifted by a Judge sitting alone in chambers, who will decide if there are arguable grounds of appeal. Should leave of appeal be refused, this decision may be appealed to the High Court within 14 days, when the matter will be reviewed by 3 Judges. The Lord Advocate is entitled to appeal to the High Court against any sentence passed on indictment on the ground that it is unduly lenient, or on a point of law. Both the prosecution and defence, at any time in solemn and summary proceedings, may appeal by way of Bill of Advocation in order to correct irregularities in the preliminary stages of a case. In summary proceedings the accused may appeal by Bill of Suspension, where he desires to bring under review a warrant, conviction or judgement issued by an inferior Judge. In summary proceedings the accused can also appeal against sentence alone by way of Stated Case. In summary proceedings the Crown can appeal against a sentence on the grounds that it is unduly lenient. The court also hears appeals under the Courts-Martial (Appeals) Act 1951.

The Sheriff Court has an inherent universal criminal jurisdiction (as well as an extensive civil one), limited in general to crimes and offences committed within a sheriffdom (a specifically defined region), which has, however, been curtailed by statute or practice under which the High Court of Justiciary has exclusive jurisdiction in relation to the crimes mentioned above. The Sheriff Court is presided over by a Sheriff Principal or a Sheriff, who when trying cases on indictment sits with a Jury of 15 people. His powers of awarding punishment involving imprisonment are restricted to a maximum of 3 years, but he may under certain statutory powers remit the prisoner to the High Court for sentence if this is felt to be insufficient. The Sheriff also exercises a wide summary criminal jurisdiction and when doing so sits without a Jury; and he has concurrent jurisdiction with every other court within his Sheriff Court district in regard to all offences competent for trial in summary courts. The great majority of offences which come before courts are of a more minor nature and as such are disposed of in the Sheriff Summary Courts or in the District Courts (*see* below). Where a case is to be tried on indictment either in the High Court of Justiciary or in the Sheriff Court, the Judge may, before the trial, hold a preliminary or first diet to decide questions of a preliminary nature, whether relating to the competency or relevancy of proceedings

or otherwise. Any decision at a preliminary diet (other than a decision to adjourn the first or preliminary diet or discharge trial diet) can be the subject of an appeal to the High Court of Justiciary prior to the trial. The High Court also has the exclusive power to provide a remedy for all extraordinary occurrences in the course of criminal business where there is no other mode of appeal available. This is known as the Nobile Officium powers of the High Court and all petitions to the High Court as the Nobile Officium must be heard before at least 3 judges.

In cases to be tried on indictment in the Sheriff Court a first diet is mandatory before the trial diet to decide questions of a preliminary nature and to identify cases which are unlikely to go to trial on the date programmed. Likewise in summary proceedings, an intermediate diet is again mandatory before trial. In High Court cases such matters may be dealt with at a preliminary diet.

District Courts have jurisdiction in more minor offences occurring within a district which before recent local government reorganization corresponded to district council boundaries. These courts are presided over by Lay Magistrates, known as Justices, who have limited powers for fine and imprisonment. In Glasgow District there are also Stipendiary Magistrates, who are legally qualified, and who have the same sentencing powers as Sheriffs.

The Court of Session, presided over by the Lord President (the Lord Justice General in criminal cases), is divided into an inner-house comprising 2 divisions of 4 judges each with a mainly appellate function, and an outer-house comprising 18 single Judges sitting individually at first instance; it exercises the highest civil jurisdiction in Scotland, with the House of Lords as a Court of Appeal.

Police. In Scotland, the unitary councils have the role of police authorities. Establishment levels throughtthe UK home office were abolished in Scotland on 1 April 1996. The actual strength at 31 March 1998 was 12,652 men and 2,227 women. There were 1,723 special constables. The total police net expenditure in Scotland for 1996–97 was £655·7m.

[1]Crimes are generally the more serious criminal acts and offences the less serious. 'Crimes' are not equivalent in coverage to 'indictable/triable either way offences'.

In 1997 there were 421,000 crimes reported, of which 19,000 were violent. There were 48,000 criminal convictions in 1997 and an average prison population in Scotland of 6,084.

Religion. The Church of Scotland, which was reformed in 1560, subsequently developed a presbyterian system of church government which was established in 1690 and has continued to the present day.

The supreme court is the General Assembly, which now consists of some 800 members, ministers and elders in equal numbers, together with members of the diaconate commissioned by presbyteries. It meets annually in May, under the presidency of a Moderator appointed by the Assembly. The Queen is normally

represented by a Lord High Commissioner, but has occasionally attended in person. The royal presence in a special throne gallery in the hall but outside the Assembly symbolizes the independence from state control of what is nevertheless recognized as the national Church in Scotland.

There are also 46 presbyteries in Scotland, roughly co-terminous with District Councils, together with 1 presbytery of England, 1 presbytery of Europe, and 1 presbytery of Jerusalem. At the base of this conciliar structure of Church courts are the kirk sessions, of which there were 1,601 on 31 Dec. 1997. The total communicant membership of the Church at that date was 664,237.

The Episcopal Church of Scotland is a province of the Anglican Church and is one of the historic Scottish churches. It consists of 7 dioceses. As at 31 Dec. 1998 it had 313 churches and missions, 351 clergy and 52,641 members, of whom 32,218 were communicants.

There are in Scotland some small outstanding Presbyterian bodies and also Baptists, Congregationalists, Methodists and Unitarians.

The Roman Catholic Church which celebrated the centenary of the restoration of the Hierarchy in 1978, had in Scotland (1998) 1 cardinal archbishop, 1 archbishop, 5 bishops, 20 permanent deacons, 907 clergy, 463 parishes, and 705,650 adherents.

The proportion of marriages in Scotland according to the rites of the various Churches in 1995 was: Church of Scotland, 36·5%; Roman Catholic, 9·6%; Episcopal, 1·5%; others, 6%; civil, 46·4%.

Education. In Sept. 1997 there were 3,869 publicly funded (education authority, grant-aided and self-governing) schools. All teachers employed in these schools require to be qualified; all figures on teaching relate to Sept. 1996 and are full-time equivalents.

Nursery Education. There were 1,010 publicly funded nursery schools and classes, with a total enrolment of 53,260 pupils in Sept. 1997.

Primary Education. In Sept. 1997 there were 2,300 publicly funded primary schools with 440,594 pupils and 21,187 teachers.

Secondary Education. In Sept. 1997 there were 401 publicly funded secondary schools with 314,916 pupils and 2,044 adults. All but 26 schools provided a full range of Scottish Certificate of Education courses and non-certificate courses. Pupils who start their secondary education in schools which do not cater for a full range of courses may be transferred at the end of their second or fourth year to schools where a full range of courses is provided. There were 23,875 full-time equivalent teachers in secondary schools.

Independent schools. There were 209 independent schools in Sept. 1997, with a total of 32,782 pupils. A small number of the Scottish independent schools are of the 'public school' type, but they are not known as 'public schools' since in Scotland this term is used to denote education authority (i.e., state) schools.

Special Education. In Sept. 1997 there were 158 publicly funded special schools with 8,056 pupils.

Further Education. Under the Further and Higher Education (Scotland) Act 1992 funding of further education colleges was transferred to central government on 1 April 1993.

There are 43 incorporated colleges as well as the education centres in Orkney and Shetland, which are run by the education authorities but funded by direct payments from the Scottish Office Education and Industry Department. The colleges offer training in a wide range of vocational areas and co-operate with the Scottish Qualifications Authority and the Scottish Office Education and Industry Department in the development of new courses. Scottish Vocational Qualifications (SVQs) were introduced in 1989 and General SVQs were piloted in 1993. Both qualifications aim to improve the skills of the nation's workforce and increase the country's competitiveness. The colleges benefit from co-operation with industry, both by the involvement of Industry Lead Bodies and National Training Organizations in developing SVQs, and by membership of the college boards of management.

In 1996–97 there were 334,365 students enrolled at the 43 colleges on vocational courses (61,495 full-time and sandwich). The full-time equivalent staff number in the colleges was 6,865.

A student support system is administered by the Student Awards Agency for Scotland. The Agency offers means-tested awards to eligible Scottish-domiciled students undertaking courses of Higher Education. The arrangements described above for new students in 1998–99 will also apply to Scottish students. The Agency also administers the Postgraduate Students' Allowance Scheme and the Scottish Studentship Scheme (SSS) which offer means-tested awards to students studying at postgraduate and advanced postgraduate levels respectively. 75 new awards are offered each year under the SSS for study in the field of Arts and Humanities.

Awards known as state studentships are offered on a competitive basis by the Students Awards Agency for Scotland to candidates considered by the universities and other higher education institutions to be qualified for postgraduate studies in the humanities; similar awards, tenable at universities or other higher education institutions are offered by the Research Councils to students studying topics within the broad spectrum of agriculture and food; the biological sciences; man's natural environment; science and engineering, and the social sciences at postgraduate level.

Higher Education. In Scotland in 1997 there were 21 institutions of higher education funded by the SHEFC, of which 5 were universities formed from former central institutions (cf. English polytechnics): Abertay Dundee Univ., Glasgow Caledonian Univ., Napier Univ. (Edinburgh), Univ. of Paisley, The Robert Gordon Univ. (Aberdeen); and 8 were already-existing universities:

In 1996–97 there were 127,934 full-time and sandwich students at the institutions funded by SHEFC (67,095 female).

All the higher education institutions are independent and self-governing. In addition to funding through the higher education funding councils, they receive tuition fees through local education authorities for students domiciled in England and Wales, and from the Students Awards Agency for Scotland for students domiciled in Scotland. Institutions which carry out research may also receive funding through the 5 Research Councils administered by the Office of Science and Technology.

WALES

KEY HISTORICAL EVENTS

After the Roman evacuation, Wales divided into tribal kingdoms. Cunedda Wledig, a prince from southern Scotland, founded a dynasty in the north-west district of Gwynedd to become the centrepoint for Welsh unity. Offa's Dyke, the defensive earthwork built in the time of King Offa of Mercia, was the dividing line between England and Wales but over the next two centuries a succession of Welsh kings deferred to the English monarchy.

With the accession of Llewelyn (1194-1240) the house of Gwynedd overcame rival claims from Powys and Deneubarth to forge a stable political state under English suzerainty. But when Llywelyn ap Gruffydd (1246-82) intrigued against Edward I, Wales was annexed and Edward's infant son, born at Caernarvon, was made Prince of Wales.

In the Tudor period, Welsh loyalty to Henry VIII, who was of Welsh descent, was fully reciprocated. The Act of Union in 1536 made English law general and admitted Welsh representatives to Parliament.

TERRITORY AND POPULATION

At the census taken on 21 April 1991 the area of Wales was 20,766 sq. km and the population 2,811,865.

Population ('usually resident') at the census of 1991:

Males	*Females*	*Total*
1,370,104	1,464,969	2,835,073

Population (present on census night) at the 4 previous decennial censuses:

1951	*1961*	*1971*	*1981*
2,598,675[1]	2,644,023[1]	2,731,204[1]	2,790,500[2]

[1]Areas now recognized as part of Gwent formed the English county of Monmouthshire until 1974. [2]The final count is believed to be over-stated as a result of an error in processing. The preliminary counts presented here rounded to the nearest hundred are thought to be more accurate.

Population density (persons per ha), 1991 census: 1·4. Estimated population, mid-1998, 2,937,000, giving a density of 1·41 per ha. Cardiff, the capital and largest city, had a population in 1996 of 315,000; Swansea, the second largest city, had a population of 230,000 in 1996.

In 1991 in Wales 508,098 persons were able to speak Welsh. Private households at the 1991 census: 1,201,700.

For further statistical information, see under Territory and Population, Great Britain.

Wales is divided into 22 unitary authorities (counties and county boroughs).

Areas (in sq. km) and usually resident population at the 1991 census:

	Area	*Population*		*Area*	*Population*
Clwyd	2,430	408,090	Powys	5,072	117,647
Dyfed	5,766	343,543	South Glamorgan

Mid Glamorgan			(W. Glam)	820	361,428
(M. Glam)	1,017	534,101			

As a result of the Local Government Act 1992 the following new unitary authorities were established: (*Counties:* Carmarthenshire, Ceredigion, Denbighshire, Flintshire, Gwynedd, Isle of Anglesey, Monmouthshire, Pembrokeshire, Powys; *County Boroughs:* Blaenau Gwent, Bridgend, Caerphilly, Cardiff, Conwy, Merthyr Tydfil, Neath Port Talbot, Newport, Rhondda Cynon Taff, Swansea, Torfaen, Vale of Glamorgan, Wrexham).

At the UK general election of 1 May 1997, 40 members were returned from Wales. Labour won 34 seats (27 in 1992), Plaid Cymru, 4 seats (4), Liberals, 2 seats (1). There were 2,201,000 eligible voters, and turn-out was 73·5%. At the 1994 European Parliamentary elections, 5 Labour candidates were elected.

The first elections for the Welsh Assembly were scheduled for 6 May 1999.

See also Constitution and Government, Recent Elections and Current Administration in Great Britain.

CURRENT ADMINISTRATION

Local Government. Local authorities have statutory powers and claims on public funds. Relations with central government (pre-devolution) are maintained through the Welsh Office. The Local Government (Wales) Act 1994 set up 22 unitary authorities (9 counties and 13 county boroughs). 730 community councils manage local facilities and may act as agents for district council functions.

Resident citizens of the UK, Ireland, a Commonwealth country or an EU country may (at age 18) vote and (at age 21) stand for election. Elections for the full councils

are held every 4 years. The chair is called Chairman in counties and Mayor in county boroughs.

The next local government elections were scheduled for 6 May 1999.

clear-up rate was 40·6%. 17,350 people were found guilty of indictable offences in Magistrates' Courts and 4,040 in Crown Courts. A total of 4,158 people were given custodial sentences.

In Jan. 1998 there were 282,738 pupils at 1,672 primary schools. In those primary schools (and some secondary schools) which are in the predominantly Welsh-speaking areas, the main language of instruction is Welsh. There are also 'Welsh', or, more accurately, bilingual schools in mainly English-speaking parts of Wales. Generally, children transfer from primary to secondary schools at 11.

In Jan. 1998 there were 229 secondary schools. The majority of secondary schools are classified as comprehensive. In 1996, 67 schools used Welsh as a teaching medium.

Local education authority-maintained secondary, middle and primary schools can apply for Grant Maintained (GM) status as self-governing state schools. By Sept. 1997 there were 5 GM primary, 1 middle and 11 secondary schools.

Under the Education Act 1996 children have special educational needs if they have a learning difficulty which calls for special educational provision to be made for them. In a minority of cases, perhaps just over 2% of children, the Local Education Authority will need to make a statutory assessment of special educational needs under the Education Act 1996, which may ultimately lead to a 'statement'. The total number of pupils with statements in 1995 was 14,521.

In Nov. 1997 there were 29 institutions in the further education sector and 191,966 students.

NORTHERN IRELAND

KEY HISTORICAL EVENTS

Northern Ireland is part of the United Kingdom. The Government of Ireland Act 1920 granted Northern Ireland its own bicameral parliament (Stormont), and between 1921 and 1972 it had full responsibility for local affairs except for such matters as defence and the armed forces, foreign and trade policies, and taxation and customs. However, in the late 1960s a Civil Rights campaign and reactions to it escalated into serious rioting and sectarian violence involving the Irish Republican Army (IRA, an illegal organization aiming to unify Northern Ireland with the Republic of Ireland) and loyalist paramilitary organizations. The Northern Ireland government resigned and direct rule by the UK government began in 1972. The Northern Ireland parliament was abolished in 1973. The Northern Ireland Constitution Act 1973 provided for devolved government on a power-sharing basis, but this collapsed in May 1974.

Under the Northern Ireland Act 1974 the UK parliament approves all laws for Northern Ireland and the Northern Ireland departments are under the direction and control of a UK Cabinet Minister, the Secretary of State for Northern Ireland.

Attempts have been made by successive governments to find a means of restoring greater power to Northern Ireland's political representatives on a widely acceptable basis, including a Constitutional Convention (1975–76), a Constitutional Conference (1979–80) and 78-member Northern Ireland Assembly elected by proportional representation in 1982. This was dissolved in 1986, partly in response to Unionist reaction to the Anglo-Irish Agreement signed on 15 Nov. 1985, which established an Intergovernmental Conference of British and Irish ministers to monitor political, security, legal and other issues of concern to the nationalist community.

On 15 Dec. 1993 the Prime Ministers of the UK and the Republic of Ireland (John Major and Albert Reynolds) issued a joint declaration as a basis for all-party talks to achieve a political settlement, inviting Sinn Féin ('Ourselves Alone', pro-Republican

nationalist party and the political wing of the IRA) to join the talks in an All-Ireland Forum 3 months after the cessation of terrorist violence.

The IRA announced 'a complete cessation of military operations' on 31 Aug. 1994. On 13 Oct. 1994 the anti-IRA Combined Loyalist Military Command also announced a ceasefire 'dependent upon the continued cessation of all nationalist republican violence'.

On 22 Feb. 1995 the British and Irish Prime Ministers (John Major and John Bruton) announced new joint UK-Irish proposals for a settlement in Northern Ireland contained in 2 documents: *A Framework for Accountable Government in Northern Ireland*, drawn up by the UK government, and *A New Framework for Agreement*, agreed by the UK and Irish governments.

The proposals envisaged an elected single-chamber 90-member Northern Ireland assembly with a north-south body comprising members of this assembly and representatives of the Irish government.

On 28 Nov. 1995, John Major and John Bruton agreed on a start to preliminary talks involving Northern Ireland's main political parties while a 3-member international body headed by former US Senator George Mitchell prepared a report on 'the arrangements necessary for the removal from the political equation' of paramilitary arms. The Mitchell report, published on 24 Jan. 1996, set out 6 principles to which all parties should adhere, including a commitment to renounce violence, verifiable disarmament of all paramilitaries and a pledge to adhere to any agreement reached through all-party negotiations. Concluding that the paramilitaries 'will not decommission any arms prior to all-party negotiations', the commission recommended that negotiations and decommissioning of weapons should proceed at the same time. However, John Major suggested that, 'In the absence of prior decommissioning, there may well be another way forward', proposing elections to a temporary body which could be used as a forum for negotiations.

On 9 Feb. 1996 the IRA exploded a bomb in the Docklands area of London (the first of several incidents) and announced the end of their ceasefire.

Elections were held on 30 May to constitute a 110-member forum to take part in talks with the British and Irish governments. Each of the 18 Northern Ireland constituencies returned 5 delegates. The 10 parties receiving the most votes received 2 extra delegates. The Ulster Unionist Party won 30 seats with 24·2% of votes cast; the Social Democratic and Labour Party, 21 with 21·4%; the Democratic Unionist Party, 24 with 18·8%; Sinn Féin, 17 with 15·5%; the Alliance Party, 7 with 6·5%; the United Kingdom Unionist Party, 3 with 3·7%; the Progressive Unionist Party, 2 with 3·5%; the Ulster Democratic Party, 2 with 2·2%; the Northern Ireland Women's Coalition, 2 with 1%; Labour, 2 with 0·8%. The electorate was 1·1m.

Opening Plenary talks, excluding Sinn Féin, began under the chairmanship of Senator Mitchell on 12 June 1996, with Gen. John de Chastelain (Canada) and Harri Holkeri (Finland) as deputies.

Talks resumed on 3 June 1997 under the newly elected Labour Government in which Dr Marjorie ('Mo') Mowlam was appointed as Secretary of State for Northern Ireland. The Government stated its intention that substantive negotiations should begin in September 1997, with a view to reaching a conclusion by May 1998, when the final outcome would be put to the people of Ireland, North and South, for approval in concurrent referendums.

A restoration of the IRA ceasefire was declared from 20 July 1997; the Government indicated it would assess whether it was genuine over a period of some six weeks. Sinn Féin was invited to enter the talks on 29 Aug. The talks resumed on 9 Sept. when Sinn Féin affirmed their commitment to the six Mitchell principles of democracy and non-violence.

Under the chairmanship of George Mitchell, a marathon negotiating struggle on 9–10 April 1998 led to agreement on a framework for sharing power designed to satisfy Protestant demands for a reaffirmation of their national identity as British, Catholic desires for a closer relationship with the predominantly Catholic Republic of Ireland and Britain's wish to return to Northern Ireland the powers London assumed in 1972 when the local Stormont legislature was disbanded.

Under the Good Friday Agreement, there is to be a democratically elected legislature in Belfast, a ministerial council giving the governments of Northern Ireland and Ireland joint responsibilities in areas like tourism, transportation and the environment, and a consultative council meeting twice a year to bring together

ministers from the British and Irish parliaments, and the three assemblies being created in Northern Ireland and in Scotland and Wales.

The Irish government is moving to eliminate from its constitution its territorial claim on Northern Ireland.

The critical issues of police and judicial-system reform, the release of paramilitary prisoners, and the dismantling of the vast underground arsenals of weaponry in the province are the subject of further study and recommendations.

In the referendum on 22 May 1998, 71·12% of votes in Northern Ireland were cast in favour of the Good Friday peace agreement and 94·4% in the Republic of Ireland. As a consequence, in June, Northern Ireland's 1·2m. voters elected the first power-sharing administration since the collapse of the Sunningdale Agreement in 1974.

In Aug. 1998, a breakaway faction of the IRA exploded a bomb in the centre of Omagh, causing extensive mayhem. The outrage increased public demands for a workable peace. In Sept., Gerry Adams, leader of Sinn Féin, declared that violence must be 'a thing of the past'. But IRA blockage on the decommissioning of arms continues to hold up the transfer of powers from London to Belfast.

Under the Northern Ireland Act 1974 the UK parliament approves all laws for Northern Ireland and the Northern Ireland departments are under the direction and control of a UK Cabinet Minister, the Secretary of State for Northern Ireland.

The Parliamentary electorate of Northern Ireland in the register in 1998 numbered 1,188,034.

Secretary of State for Northern Ireland: Rt Hon. Marjorie ('Mo') Mowlam, MP.

CURRENT ADMINISTRATION

David Trimble (Ulster Unionist Party) was elected as the Northern Ireland Assembly's 'first minister' on 25 June 1998.

Local Government. Northern Ireland has a single-tier system of 26 district councils based on main centres of population. Elections were held on 19 May 1993 for the 582 council seats. The Ulster Unionist Party gained 201 seats with 34·5% of votes cast, the Social Democratic and Labour Party 127 with 21·8%, the Democratic Unionist Party 102 with 17·5%, Sinn Féin 51 with 8·8%, the Alliance 44 with 7·6%, the Conservative Party 6 with 1·8%, others 22. Independents gained 29 seats with 5%.

ECONOMY

Policy. The main Northern Ireland government department concerned with economic development is the Department of Economic Development (DED). The department and its agencies have responsibility for the promotion of inward investment and the development of larger home industry (Industrial Development Board, IDB); promotion of enterprise and small business (Local Enterprise Development Unit, LEDU); training and employment matters (Training and Employment Agency, T&EA); promotion of industrially relevant research and development and technology transfer (Industrial Research and Technology Unit, IRTU); promotion and development of tourism (Northern Ireland Tourist Board, NITB); energy matters; mineral development; company regulation; consumer protection; health and safety at work; industrial relations; equality of opportunity in employment; and better regulation.

IDB's overall objective is to encourage the development of internationally competitive companies in the manufacturing and tradeable service sectors in Northern Ireland, and to attract new inward investment, contributing to growth in durable employment.

During 1996–97, IDB secured 35 investment projects by externally owned companies, promoting 4,641 new jobs and safeguarding a further 3,345 jobs. In addition, IDB assisted 56 projects by locally owned companies, promoting 1,364 new jobs and safeguarding a further 2,232 jobs.

The *LEDU* is the small business agency (for companies employing fewer than 50 people). It aims to strengthen the economy by encouraging enterprise and new business start-ups, and by helping established small businesses achieve export-orientated, profitable growth.

In 1996–97 LEDU assisted 1,545 new business start-ups. As a result, LEDU achieved 3,425 new jobs and a further 755 among existing businesses.

The *T&EA* is an Executive Agency within DED. It assists economic development and helps people find work through training and employment services delivered on the basis of equality of opportunity. It works closely with employers and business interests, and with the other economic development agencies in making training relevant to local needs.

In 1996–97 T&EA placed 46,018 people into employment. At the end of 1996–97, 290 companies were receiving assistance to train and develop their management and workforce through the Company Development Programme. Jobskills, which commenced across Northern Ireland in April 1995, achieved its interim target for 1996–97 of 35% attainment of National Vocational Qualification (NVQ) at Level 2 or above, and the Agency is confident that the 1997–98 target of 45% will be achieved.

The *IRTU*, an Executive Agency within DED, provides the focus for all aspects of industry-related technology and innovation policy, including grants for industrial research and development, information, advice, scientific testing and analysis services.

In 1996–97, IRTU disbursed £13·1m. of Government funding to Research and Development projects; in addition, IRTU enabled companies to obtain support under EU programmes.

Currency. Banknotes are issued by Allied Irish Banks, Bank of Ireland, First Trust Bank, Northern Bank and Ulster Bank.

Banking and Finance. The Finance Department is responsible for control of the expenditure of Northern Ireland departments, liaison with HM Treasury and the Northern Ireland Office on financial matters, economic and social research and analysis, Citizens Charter Unit, the Valuation and Lands Agency, the Government Purchasing Service (Northern Ireland) and the Legal Services.

ENERGY AND NATURAL RESOURCES

Electricity. There are 4 power stations with an installed capacity of some 2,200 MW.

Oil and Gas. An undersea pipeline from Scotland was completed in 1996 to bring natural gas to Northern Ireland for the first time. INDUSTRY

Labour. The main sources of employment statistics are the Census of Employment, conducted every 2 years, and the Quarterly Employment Survey. In June 1997 there were 585,290 employees, of whom 289,910 were males. Employment in manufacturing and construction amounted to 128,680, 22% of the total employees in employment. 19,740 of these jobs were in the food, drink and tobacco industries, 12,750 in the manufacture of wearing apparel, 10,640 in textiles, 24,240 in construction and 61,590 in other sectors of manufacturing.

COMMUNICATIONS

Roads. At 1 April 1993 the total mileage of roads was 15,060, graded for administrative purposes as follows: Motorway, 70 miles; Class I dual carriageway, 95 miles; Class I single carriageway, 1,287 miles; Class II, 1,770 miles; Class III, 2,935 miles; unclassified, 8,903 miles.

Ulsterbus and Citybus subsidiaries of N.I. Transport Holding Company (NITHC) provide co-ordinated services with N.I. Railways (NIR) Ltd under the service brand name of Translink.

At 31 March 1997 there were 1,893 professional hauliers and 4,827 vehicles licensed to engage in road haulage.

The number of motor vehicles licensed at 31 Dec. 1996 was 639,286, comprising private light goods, 540,083; motor cycles, scooters and mopeds, 10,026; buses, 2,090; goods vehicles, 17,401; other vehicles, 6,930. In addition, there were 62,756 vehicles which were not subject to licence duty.

Rail. NIR, a subsidiary of NITHC, provide rail services within Northern Ireland and cross-border services to Dublin, jointly with Irish Rail. The number of track-km operated is 478·8. In 1996–97 railways carried 6·2m. passengers.

Civil Aviation. There are scheduled air services to 3 airports in Northern Ireland. Belfast International Airport is the main one of these. Scheduled services are provided by British Airways and its franchise partners British Regional Airlines &

Maersk, British Midland, Jersey European Airways, Aer Lingus and Air UK. Belfast International is also Northern Ireland's holiday airport with holiday flights operated direct to European and transatlantic destinations by a wide range of local and UK tour operators. In the year to 31 March 1997, the airport handled 2·4m. passengers and 38,000 tonnes of freight and mail.

Belfast City Airport offers commuter services to 14 regional airports in Great Britain as well as services to London Gatwick and Luton, the Isle of Man, Channel Islands and Cork. A 'feeder' service operates between Belfast City and City of Derry Airports. In 1994 Belfast City Airport handled 1·35m. passengers. The City of Derry Airport is situated 14 km from Londonderry and provides services from the north-west of Ireland to 14 United Kingdom destinations (Aberdeen, Belfast, Birmingham, Blackpool, Bristol, Glasgow, Guernsey, Isle of Man, Jersey, Leeds/Bradford, Liverpool, London Gatwick, Manchester, Newcastle) and 4 European destinations (Amsterdam, Brussels, Frankfurt and Paris). In 1996 the City of Derry Airport handled 68,000 passengers. There are two other licensed airfields at St Angelo and Newtownards, the latter of which is used principally by flying clubs, private owners and air taxi businesses. St Angelo has commercial flights operated by Brymon Airways to Jersey, and by Crossair to Zürich. It handled 3,500 passengers in 1996.

Shipping. There are passenger services from Belfast to Liverpool and Stranraer, and from Larne to Cairnryan. Drive-on/drive-off cargo services operate from Belfast and Larne to other UK ports. Belfast, Londonderry and Warrenpoint offer conventional cargo services. A new port at Londonderry opened in 1993. A new car ferry service between Ballycastle and Campbeltown, in Scotland, commenced operations on 1 July 1997. It is hoped the season will be extended in future years.

SOCIAL INSTITUTIONS

Justice. The Lord Chancellor has responsibility for the administration of all courts through the Northern Ireland Court Service and for the appointment of judges and magistrates. The court structure has 3 tiers: The Supreme Court of Judicature of Northern Ireland (comprising the Court of Appeal, the High Court and the Crown Court), the County Courts and the Magistrates' Courts. There are 21 Petty Sessions districts which when grouped together for administration purposes form 7 County Court Divisions and 4 Crown Court Circuits.

The County Court has general civil jurisdiction subject to an upper monetary limit. Appeals from the Magistrates' Courts lie to the County Court, or to the Court of Appeal on a point of law, while appeals from the County Court lie to the High Court or, on a point of law, to the Court of Appeal.

Police. The police force consists of the Royal Ulster Constabulary, supported by the Royal Ulster Constabulary Reserve, a mainly part-time force.

Religion. According to the census of 1991 there were: Roman Catholics, 605,639; Presbyterians, 336,891; Church of Ireland, 279,280; Methodists, 59,517. Those belonging to other denominations numbered 122,448; to none, 59,234. 114,827 persons did not answer the voluntary question on religion.

Education. Public education, other than university education, is presently administered centrally by the Department of Education for Northern Ireland and locally by 5 Education and Library Boards. The Department is concerned with the whole range of education from nursery education through to higher education and continuing education; for sport and recreation; for youth services; for the arts and culture (including libraries) and for the development of community relations within and between schools.

Each Education and Library Board is the local education authority for its area. Boards were first appointed in 1973, the year of local government reorganization, and are normally reappointed every 4 years following the District Council elections. The membership of each Board consists of District councillors, representatives of transferors of schools, representatives of trustees of maintained schools and other persons who are interested in the service for which the Board is responsible. Boards have a duty, amongst other things, to ensure that there are sufficient schools of all kinds to meet the needs of their areas. The Boards are responsible for costs associated with capital works at controlled schools. Voluntary schools, including

maintained and voluntary grammar schools, can receive grant-aid from the Department of Education toward capital works of up to 85%, or 100% if they have opted to change their management structures so that no single interest group has a majority of nominees. Most voluntary grammar schools can receive the same rate of grant on the purchase of equipment. The Boards award university and other scholarships; they provide school milk and meals; free books and transport for pupils; they enforce school attendance; provide a curriculum advisory and support service to all schools in their area; regulate the employment of children and young people; and secure the provision of youth and recreational facilities. They are also required to develop a comprehensive and efficient library service for their area. Board expenditure is funded at 100% by the Department of Education. Integrated schools receive 100% funding for recurrent costs from the Department of Education, and, where long-term viability has been established, for capital works.

The Education Reform (NI) Order 1989 made provision for the setting up of a Council for Catholic Maintained Schools with effect from April 1990. The Council has responsibility for all maintained schools under Roman Catholic Management which are under the auspices of the diocesan authorities and of religious orders. The main objective of the Council is to promote high standards of education in the schools for which it is responsible. Its functions include providing advice on matters relating to its schools, the employment of teaching staff and administration of appointment procedures, the promotion of effective management, and the promotion and co-ordination of effective planning and rationalization of school provision in the Catholic Maintained sector. The membership of the Council consists of trustee representatives appointed by the Northern Roman Catholic Bishops, parents, teachers, and persons appointed by the Head of the Department of Education in consultation with the Bishops.

Integrated Schools. In recent years a small number of integrated schools have been established at primary and post-primary levels with the aim of providing education for Roman Catholic and Protestant children together. These schools began as independent schools and qualified for public funding (on the same basis as other non-state schools) when their longer-term viability had been adequately demonstrated. The Education Reform (NI) Order 1989 introduced new measures whereby new integrated schools may receive public funding right from the start. Grant Maintained Integrated schools are eligible for grants on capital works, including purchase of sites and buildings and equipment, at the rate of 100%. At Oct. 1998 there were 40 integrated schools with total enrolments of some 11,381 pupils, about 3·3% of all pupils.

Pre-school Education is provided in nursery schools and nursery or reception classes in primary schools. There were 91 nursery schools in 1998–99 with 5,501 pupils, and 173 teachers in 1997–98. A further 3,377 nursery pupils and 2,521 reception pupils were situated in primary schools.

Primary Education is from 4 to 11 years. In 1998–99 there were 916 primary schools with 175,885 pupils. There were also 24 preparatory departments of grammar schools with 3,167 pupils. In 1997–98 there were 9,367 primary school teachers and 181 preparatory school teachers.

Secondary Education is from 11 to 18 years. In 1998–99 there were 72 grammar schools with 62,192 pupils and 165 secondary schools with 91,758 pupils. In 1997–98 there were 6,567 secondary school teachers and 3,980 grammar school teachers.

Further Education. There were 17 institutions of further education in 1998–99 with 1,974 full-time and 2,867 part-time teachers and in 1997–98 an enrolment of 24,968 full-time, 29,922 part-time day and 30,779 evening students on vocational courses; and about 60,000 students on non-vocational (mostly evening) courses.

Special Education. The Education and Library Boards provide for children with special educational needs up to the age of 19. This provision may be made in ordinary classes in primary or secondary schools or in special units attached to those schools, or in special schools. In 1998–99 there were 47 special schools with 4,675 pupils. This includes 3 hospital schools.

Universities. There are 2 universities: The Queen's University of Belfast (founded in 1849 as a college of the Queen's University of Ireland and reconstituted as a

separate university in 1908) had 20,462 students, 1,402 full-time and 70 part-time academic staff in 1997–98. The University of Ulster, formed on 1 Oct. 1984, has campuses in Belfast, Coleraine, Jordanstown and Londonderry. In the 1997–98 academic year it had 20,158 students, 1,162 full-time and 65 part-time academic staff.

Teacher training takes place at both universities and at 2 colleges of education: Stranmillis, and St. Mary's, the latter mainly for the primary school sector, in respect of which 4-year (Hons) BEd courses and one-year Postgraduate Certificate in Education (PGCE) courses are available. The training of teachers for secondary schools is provided, in the main, in the education departments of the 2 universities, but 4-year (Hons) BEd courses are also available in the colleges for intending secondary teachers of religious education, business studies and craft, design and technology. Part-time PGCE courses (primary and secondary) are available through the Open University. There were a total of 1,547 students (1,231 women) in training at the 2 colleges and the 2 universities during 1997–98. The principal initial teacher-training courses are the Bachelor of Education (4-year honours), BA (Hons) with education (4-year) and the one-year Certificate of Education for graduates.

Gross expenditure by the Department of Education (1997–98) was £1,436m.

Health. The Department of Health and Social Services is responsible for the provision of integrated health and personal social services. 4 Health and Social Services Boards are responsible for assessing the requirements of their resident populations and for purchasing appropriate services. Since 1 April 1996 services have been delivered exclusively by HSS Trusts (similar to NHS Trusts in the rest of the UK) established under the Health and Personal Social Services (NI) Order 1991.

A total of 20 HSS Trusts are fully operational. 8 HSS Trusts based on acute hospitals and the regional Northern Ireland Ambulance Service are identical in structure and management to NHS Trusts in Great Britain. Of the remaining 11, 6 provide community-based health and personal social services and the other 5 provide both hospital and community-based health and personal social services, reflecting the integrated nature of these services in Northern Ireland.

Welfare. Social security schemes are similar to those in Great Britain.

National Insurance. During the year ended 31 March 1998 the expenditure of the National Insurance Fund at £1,202m. exceeded contributions by £186·7m. The shortfall in income was made up by a Treasury Grant, investment income and a transfer from the Great Britain Fund. Total benefit expenditure was £1,130·9m., excluding £2·7m. which was subsequently recovered from damages paid to recipients of National Insurance Fund Benefits. Employers received £1m. reimbursement in respect of Statutory Sick Pay paid to their employees. £14·6m. was paid in Jobseekers Allowance contributions. Widows Benefit amounted to £33·7m. and Retirement Pensions to £751·2m. Incapacity Benefits totalled £327·3m. Maternity Allowance of £1m. was paid and employers were reimbursed £18·5m. in respect of Statutory Maternity Pay. £36·5m. was given to personal pension plan providers.

Child Benefit: During the year ended 31 March 1998, £252·4m. was paid. *Income Support:* In 1997–98, £499·7m. was paid. *Family Credit:* In 1997–98, £891·3m. was paid.

CULTURE

Tourism. 1,415,000 visitors came to Northern Ireland in 1997, contributing £208m. to the economy. The Northern Ireland Tourist Board is responsible for encouraging tourism. 9 Areas of Outstanding Natural Beauty and 45 Statutory Nature Reserves have been declared, and there are many country and regional parks.

STILL IN SEARCH OF AN ANSWER

David Trimble

Named as The Statesman's Yearbook's Statesman of the Year for 1998, David Trimble, First Minister elect of the Northern Ireland Assembly went on to receive the Nobel Peace Prize which he shared with John Hume, leader of the Social Democrat and Labour Party. Speaking in Oslo at the prize-giving ceremony, he told his audience that no single conflict can be used as a model to find the solution to other conflicts.

In fact if anything, the opposite is true. I believe that a sense of the unique is the first indispensable step to solving problems. It was the eighteenth century Irish political philosopher and British Parliamentarian, Edmund Burke, who taught us this essential truth.

Burke was the most powerful and prophetic political intellect of his century. He anticipated and welcomed the American revolution. He foresaw the dark side of the French revolution. He delved deep into the roots of that political violence, based on a false notion of the perfectibility of man, which has plagued us since the French revolution. He is admired by conservatives and liberals. He can be claimed by Britain and Ireland, by Catholic and Protestant, and indeed by the world. For Burke's belief in the rule of law and in parliamentary democracy is not our monopoly, but the birthright of men and women of all countries, all colours and all creeds.

But, of course, Burke has special significance for us in Ireland. The son of a Protestant father and a Catholic mother, he was a man who, in honouring both religious traditions, recognized and respected his Irish roots and the British Parliamentary system which nursed him to the full flowering of his genius.

Burke believed that the source of political, religious and racial violence is the Platonic pursuit of abstract perfection. I say Platonic because that savage pursuit of abstract perfection starts in the Western world with Plato's Republic. It rises to a plateau with the French and Russian revolutions. It descended to new depths with the Nazis and is present in all the national, ethnic and religious conflicts current after the collapse of communism, itself the most determined and ruthless Platonic experiment in perfecting the economic system whatever the cost in human life.

Burke challenged the Platonic perfectibility doctrine proclaimed by Rousseau. Rousseau regarded man as perfect and society as corrupt. Burke believed man was flawed and that society was redemptive. The revolution tested these theories and it was Burke who proved to have the measure of practical politics. At the end of Rousseau's road, Burke predicted, we would find not the perfectibility of man but the gibbet and the guillotine. And so it proved when Stalin set out to perfect the new Soviet man. So it proved with Mao in China and Pol Pot in Cambodia. So it will prove in every conflict when perfection is sought at the point of a gun.

Amos Oz, the distinguished Israeli writer, has arrived at the same conclusion. Recently he was asked to define a political fanatic. 'A political fanatic,' he said, 'is someone who is more interested in you than in himself.' A political fanatic is not someone who wants to perfect himself, he wants to perfect you.

In Northern Ireland we have a few fanatics who dream of forcing the Ulster British people into a Utopian Irish state, more ideologically Irish than its own inhabitants actually want. We also have fanatics who dream of suppressing northern nationalists in a state more supposedly British than its inhabitants actually want.

But a few fanatics are containable. The problem arises when they bury themselves within a morally legitimate political movement. Then there is a double danger. The first is that we might dismiss legitimate claims for reform because of the barbarism of terrorist groups bent on revolution. In this situation experience would suggest that the best way forward is for democrats to carry out what the Irish writer, Eoghan Harris calls acts of good authority. Thus each reformist group has a moral obligation

to deal with its own fanatics. The Serbian democrats must take on the Serbian fascists. The PLO must take on Hamas. In Northern Ireland, constitutional nationalists must take on republican dissident terrorists and constitutional Unionists must confront Protestant terrorists.

There is a second danger. Sometimes in our search for a solution, we deny the darker side of human nature. We cannot ignore the existence of evil. It has many faces. Some look suspiciously like the leaders of the Serbian forces wanted for massacres such as that at Srebenica, some like those wielding absolute power in Baghdad, some like those wanted for the Omagh bombing.

It worries me that there is tendency in Western politics to hope that things are not as bad as they look, that the fanatics can be weaned away from terror. I prefer George Keenan's hardheaded advice, based on his years as US Ambassador in Moscow. 'Don't act chummy with terrorists; don't assume a community of aims with them which does not really exist; don't make fatuous gestures of goodwill.'

Here again we come to Burke's belief that politics proceeds not by abstract notions or by simple appeal to the past, but by close attention to detail and circumstance. 'Circumstances,' says Burke, 'give reality to every political principle, its distinguishing colour and discriminating effect. The circumstances are what render every civil and political scheme beneficial or noxious to mankind.'

Having taken this first step away from abstraction towards reality, we need space to explore possibilities. This is what I have tried to do in Northern Ireland. Critics say that concessions are a sign of weakness. Burke, however, says, 'Magnanimity in politics is not seldom the truest wisdom; and a great empire and little minds go ill together.' Prophetic words when we think of the history of the British Empire.

But the achievement of peace depends on a willingness not to be too precise or pedantic. Burke says, 'It is the nature of greatness not to be exact.' Amos Oz agrees, 'Inconsistency is the basis of coexistence. The heroes of tragedy, driven by consistency and by righteousness, destroy each other. He who seeks total supreme justice seeks death.' Again, the warning is not to aim for abstract perfection. In Ulster, what I have looked for is a peace within the realms of the possible. We can only start from where we are, not from where we would like to be.

And we have started. We will go on all the better if we put aside fantasy and accept the flawed nature of human enterprises. For this reason, I have not pressed the paramilitaries on the details of decommissioning. Although I am under pressure from my own political community I have not insisted on precise dates, quantities and manner of decommissioning. All I have asked for is a credible beginning, a common agreement that the 'war' is over. That is not too much to ask. But common sense dictates that I cannot convince society that real peace is at hand if there is not soon a beginning to the decommissioning of weapons.

Both communities must put sectarianism behind them for both helped to create it. Each thought it had good reason to fear the other. As Namier says, the irrational is not necessarily unreasonable. Ulster Unionists, fearful of being isolated on the island, built a solid house but it was a cold house for Catholics. And Catholic nationalists, although they had a roof over their heads, seemed to us as if they meant to burn the house down.

None of us are entirely innocent. But thanks to our strong sense of civil society, thanks to the knowledge that none of us are perfect, thanks to the thousands of people from both sides who have made countless acts of good authority, thanks to a tradition of parliamentary democracy which has meant that paramilitarism has never displaced politics, thanks to all these specific, concrete circumstances we, thank God, have stopped short of the abyss that is Bosnia, Kosovo, Somalia and Rwanda.

We have a peace of sorts in Northern Ireland. The paramilitaries are finished. But politics is not finished. It is the bedrock to which all societies return. The work that politicians do may be grubby and without glamour. But it has one saving grace. It is grounded on reality and reason. What is the nature of that reason? Let Burke answer.

'Political reason is a computing principle: adding, subtracting, multiplying and dividing, morally—and not metaphysically or mathematically—true moral denominations.'

There are two traditions in Northern Ireland. There are two religious denominations. But there is only one true moral denomination. And it wants peace.

ISLE OF MAN

KEY HISTORICAL EVENTS

The Isle of Man was first inhabited by the Celts and the Island became attached to Norway in the 9th century. In 1266 it was ceded to Scotland, but it came under English control in 1406 when possession was granted to the Stanley family (the Earls of Derby), and was later purchased by the British.

The Isle of Man has been a British Crown Possession since 1828, with the British government responsible for its defence and foreign policy. Otherwise it has extensive right of self-government.

A special relationship exists between the Isle of Man and the European Union providing for free trade, and adoption by the Isle of Man of the EU's external trade policies with third countries. The Island remains free to levy its own system of taxes.

TERRITORY AND POPULATION

Area, 221 sq. miles (572 sq. km); resident population census April 1996, 71,714, giving a density of 125 per sq. km. In 1996 an estimated 73% of the population lived in urban areas. The principal towns are Douglas (population, 23,487), Onchan (adjoining Douglas; 8,656), Ramsey (6,874), Peel (3,819), Castletown (2,958). The Island is divided into 6 sheadings—Ayre, Garff, Glenfaba, Michael, Middle and Rushen. Garff is further subdivided into 2 parishes and the others each have 3 parishes.

SOCIAL STATISTICS

1997: Births, 870; deaths, 950; marriages, 409. Annual growth rate, 1991–96, 1·6%.

CLIMATE

Lying in the Irish Sea, the Island's climate is temperate and lacking in extremes. Thunderstorms, snow and frost are infrequent, although the Island tends to be windy. July and Aug. are the warmest months with an average daily maximum temperature of around 17·6°C (63°F).

CONSTITUTION AND GOVERNMENT

As a result of Revestment in 1765, the Isle of Man became a dependency of the British Crown. The UK Government is responsible for the external relations of the Island, including its defence and international affairs, and the Island makes a financial contribution to the cost of these services. The Isle of Man has a special relationship with the European Union. It neither contributes funds to, nor receives money from, the EU. The Isle of Man is not represented in either the UK or European Parliaments.

The Island is administered in accordance with its own laws by the High Court of *Tynwald*, consisting of the President of Tynwald, the *Legislative Council* and the *House of Keys*. The Legislative Council is composed of the Lord Bishop of Sodor and Man, 8 members selected by the House of Keys and the Attorney General, who has no vote. The House of Keys is an assembly of 24 members chosen by adult suffrage. The President of Tynwald is chosen by the Legislative Council and the House of Keys, sitting together as Tynwald. An open-air Tynwald ceremony is held in early July each year at St Johns. Until 1990 the Lieutenant-Governor, appointed by the UK Government, presided over Tynwald.

A Council of Ministers was instituted in 1990, replacing the Executive Council which had acted as an advisory body to the Lieutenant-Governor. The Council of Ministers consists of the Chief Minister (elected for a 5-year term) and the ministers of the 9 major departments, being the Treasury; Agriculture, Fisheries and Forestry; Education; Health and Social Security; Home Affairs; Local Government and the Environment; Tourism and Leisure; Trade and Industry; and Transport.

RECENT ELECTIONS

The last election for the House of Keys was held on 21 Nov. 1996. 52 candidates stood, mostly independents. Turn-out was 62%.

CURRENT ADMINISTRATION

Lieut.-Governor: Sir Timothy Daunt.

President: Sir Charles Kerruish (elected July 1990).

In Dec. 1998 the *Chief Minister* was Donald Gelling. *Finance Minister:* Richard Corkill.

Local Government. There are 24 local authorities in the Isle of Man, each of which has elections.

ECONOMY

Policy. The Isle of Man's economic policy is the pursuit of manageable and sustainable growth based on a diversified economy with the aims of raising the standard of living of the whole population, securing future prosperity and providing the resources needed to sustain public services.

Performance. In 1996-97, GNP was £713m. and GDP was £645m. Just over 80% of national income is generated from services with the finance sector being the single largest contributor (37%). Around 67% of national income is personal incomes and the remainder is company income.

Budget. The Isle of Man is statutorily required to budget for a surplus of estimated revenue over expenditure. Revenue is raised from income tax, taxes on expenditure, health and social security contributions, and fees and charges for services.

The standard rate of tax is 15% for personal income, and there is a higher rate of 20%. Companies are liable at 20% on their taxable income.

There is a Customs and Excise Agreement with the UK, and rates of tax on expenditure are the same as those in the UK with very few exceptions. In addition, there is a reciprocal agreement on social security with the UK, and the rates of health and social security (National Insurance) contributions are the same as in the UK.

In 1998-99 the Isle of Man Government budgeted for expenditure of £458m. and revenue of £461m.

Currency. The Isle of Man Government issues its own notes and coin on a par with £ sterling. Various commemorative coins have been minted. Inflation was around 3% at the end of 1998.

Banking and Finance. The banking sector is regulated by the Financial Supervision Commission which is responsible for the licensing and supervision of banks, deposit-takers and financial intermediaries giving financial advice, and receiving client monies for investment and management. A compensation fund to protect investors was set up in 1991 under the Commission.

In late 1998, the deposit base was £21bn., and there were 67 licensed banks, 81 investment businesses and 3 building societies with Isle of Man licences.

The insurance industry is regulated by the Insurance and Pensions Authority. In Dec. 1998 there were almost 200 insurance companies.

Weights and Measures. Both metric and avoirdupois are used.

ENERGY AND NATURAL RESOURCES

Electricity. The Manx Electricity Authority generates most of the Island's electricity by oil-fired power stations although there is a small hydroelectric plant. There are plans for a cable link with the UK power grid.

Oil and Gas. At present, all oil and gas needs are met from imports, although there has been exploration for petroleum in the Manx territorial waters, and a gas pipe link with either Eire or the UK is under consideration. The Island's gas suppliers and distributors are in the private sector.

Water. The Isle of Man Water Authority is the statutory body for supply of water in the Island.

Minerals. Although lead and tin mining industries were major employers in the past, they have long since shut down and the only mining activity in the Island is now for aggregates. The Lady Isabella, built in 1854 to drain the mines above Laxey, is one of the largest waterwheels in Europe.

Agriculture. The area farmed is about 113,000 acres, being 80% of a total land area of around 141,500 acres. 65,000 acres are grassland with a further 36,000 acres for

rough grazing. There are approximately 174,000 sheep, 34,000 cattle, 18,000 poultry and 6,000 pigs on the Island's 778 farms. Just over 300 people are employed in agriculture, which now contributes less than 2% of the Island's GDP.

Forestry. The Department of Agriculture, Fisheries and Forestry has a forestry estate of some 6,800 acres. Commercial forestry is directed towards softwood production. The Manx National Glens and other amenity areas are maintained for public use by the Department, which owns some 18,000 acres of the Island's hills and uplands open for public use.

Fisheries. The Isle of Man is noted for the Manx kipper, a gutted smoked herring. Scallops and the related queen scallops (queenies) are the economic mainstay of the Manx fishing fleet.

INDUSTRY

Labour. The economically active population in 1996 was 34,811, of whom 5,695 were self-employed and 1,234 were unemployed. Employment by sector: Professional services, 18%; finance, 18%; construction, 10%; manufacturing, 11%; distributive services, 11%.

At the end of 1998, there were less than 400 persons on the unemployment register giving an unemployment rate of around 1%.

INTERNATIONAL TRADE

The Isle of Man forms part of the customs union of the European Union, although the Island is not part of the EU itself. The relationship with the EU provides for free trade and the adoption of the EU's external trade policies and tariffs with non-EU countries.

COMMUNICATIONS

Roads. There are 500 miles of good roads. At the end of March 1998 there were 49,688 licensed vehicles, with 40,168 of these being private cars. Omnibus services operate to all parts of the Island. The TT (Tourist Trophy) motor cycle races take place annually on the 37·75-mile Mountain Circuit.

Rail. Several novel transport systems operate on the Island during the summer season from May to Sept. Horse-drawn trams run along Douglas promenade, and the Manx Electric Railway links Douglas, Laxey, Ramsey and Snaefell Mountain (2,036 ft) in the north. The Isle of Man Steam Railway also operates between Douglas and Port Erin in the south.

Civil Aviation. Ronaldsway Airport in the south handles scheduled services linking the Island with London, Manchester, Dublin, Belfast, Glasgow, Liverpool, Blackpool, Birmingham, Leeds, Luton, Newcastle, Cardiff and Jersey. Air taxi services also operate.

Education. Education is compulsory between the ages of 5 and 16. In 1998 there were 6,210 pupils in the 33 primary schools and 4,732 pupils in the 5 secondary schools operated by the Department of Education. The Department also runs a college of further education and a special school. Government expenditure on education totalled £51m. in 1998-99. The Island has a private primary school and a private secondary school.

Health. The Island has had its own National Health Service since 1948, providing medical, dental and ophthalmic services. In 1998-99 Government expenditure on the NHS was £67m. There are 2 hospitals and a further hospital was under construction in 1999.

National Theatre and Opera. The main theatre is the Government-owned Gaiety in Douglas, staging a wide variety of drama, musicals and opera throughout the year. Designed by Frank Matcham and opened in 1900, the theatre has undergone extensive restoration to its Victorian decor. A larger concert hall, the Villa Marina, is owned and operated by the local authority for Douglas.

Museums and Galleries. The Manx Museum is the Island's major museum and houses the National Art Gallery. Castle Rushen in Castletown is one of Britain's best-preserved medieval castles and Peel Castle on St. Patrick's Isle dates back to the 11th century. There is also the Nautical Museum in Castletown, Cregneash Village Folk Museum and the Grove Rural Life Museum in Ramsey. CHANNEL ISLANDS

KEY HISTORICAL EVENTS

The Channel Islands consist of Jersey, Guernsey and the following dependencies of Guernsey: Alderney, Brechou, Great Sark, Little Sark, Herm, Jethou and Lihou. They were an integral part of the Duchy of Normandy at the time of the Norman Conquest of England in 1066. Since then they have belonged to the British Crown and are not part of the UK. The islands have created their own form of self-government, with the British government at Westminster being responsible for defence and foreign policy. The Lieut.-Governors of Jersey and Guernsey, appointed by the Crown, are the personal representatives of the Sovereign as well as being the commanders of the armed forces. The legislature of Jersey is 'The States of Jersey', and that of Guernsey is 'The States of Deliberation'.

From 1940 to 1945 the islands were left undefended and were the only British territory to fall to the Germans.

TERRITORY AND POPULATION

The Channel Islands cover a total of 75 sq. miles (194 sq. km), and in 1996 had a population of approximately 147,000.

The official languages are French and English, but English is now the main language.

CLIMATE

The climate is mild, with an average temperature for the year of 11·5°C. Average yearly rainfall totals: Jersey, 862·9 mm; Guernsey, 858·9 mm. The wettest months are in the winter. Highest temperatures recorded: Jersey, 34·8°C; Guernsey, 31·7°C. Maximum temperatures usually occur in July and Aug. (daily maximum 20·8°C in Jersey, slightly lower in Guernsey). Lowest temperatures recorded: Jersey, 10·3°C; Guernsey, –7·4°C Jan. and Feb. are the coldest months (mean temperature approximately 6°C).

CONSTITUTION AND GOVERNMENT

The Lieut.-Governors and Cs.-in-C. of Jersey and Guernsey are the personal representatives of the Sovereign, the Commanders of the Armed Forces of the Crown, and the channel of communication between the Crown and the insular governments. They are appointed by the Crown and have a voice but no vote in the islands' legislatures. The Secretaries to the Lieut.-Governors are their staff officers.

EXTERNAL ECONOMIC RELATIONS

The Channel Islands are not members of the EU, but participate in ERM through their monetary union with the UK. Trade with the UK is classed as domestic.

COMMUNICATIONS

Civil Aviation. Scheduled air services are maintained by Aer Lingus, Air Corbière, Air UK, Aurigny Air Services, British Airways, British Midland, Crossair, Delta, Gill Aviation, Jersey European Airways, KLM, Loganair, Lufthansa and Manx Airlines.

Shipping. Passenger and cargo services between Jersey, Guernsey and England (Poole) are maintained by Condor Ltd hydrofoil; between Guernsey, Jersey and England and St Malo by the Commodore Shipping Co. Emeraude Ferries connect Jersey and Guernsey with St Malo; local companies run between Guernsey, Alderney and England, and between Guernsey and Sark by .

SOCIAL INSTITUTIONS

Justice. Justice is administered by the Royal Courts of Jersey and Guernsey, each of which consists of the Bailiff and 12 Jurats, the latter being elected by an electoral college. There is an appeal from the Royal Courts to the Courts of Appeal of Jersey and of Guernsey. A final appeal lies to the Privy Council in certain cases. A

stipendiary magistrate in each, Jersey and Guernsey, deals with minor civil and criminal cases.

Religion. Jersey and Guernsey each constitutes a deanery under the jurisdiction of the Bishop of Winchester. The rectories (12 in Jersey; 10 in Guernsey) are in the gift of the Crown. The Roman Catholic and various Nonconformist Churches are represented.

UNITED KINGDOM OVERSEAS TERRITORIES

After the retrocession of Hong Kong to China on 1 July 1997, 13 territories remained under British sovereignty as a legacy of the former Empire. 3 of these (British Antarctic Territory, British Indian Ocean Territory and South Georgia and the South Sandwich Islands) have no resident populations and are administered by a commissioner instead of a governor.

Gibraltar is an enclave in Spain; the remainder are islands in the Caribbean and South Atlantic. Gibraltar and the Falkland Islands are the subjects of territorial claims by Spain and Argentina respectively.

Governors of Overseas Territories are appointed by the Queen, and are responsible for external affairs, internal security and the public service. Territories have their own elected legislatures and ministers, but final responsibility for government belongs to the Foreign and Commonwealth Office in London. For the Caribbean Territories some aspects of administration are carried out by the United Kingdom Overseas Territories Regional Secretariat in Barbados. The citizenship status of residents is defined in the British Nationality Act 1981.

ANGUILLA

KEY HISTORICAL EVENTS

Anguilla was probably given its name by the Spaniards or the French because of its eel-like shape. It was inhabited by Arawaks for several centuries before the arrival of Europeans. Anguilla was colonized in 1650 by English settlers from neighbouring St Kitts. In 1688 the island was attacked by a party of Irishmen who then settled. Anguilla was subsequently administered as part of the Leeward Islands, and from 1825 became even more closely associated with St Kitts. In 1875 a petition sent to London requesting separate status and direct rule from Britain met with a negative response. Again in 1958 the islanders formally petitioned the Governor requesting a dissolution of the political and administrative association with St Kitts, but this too failed. From 1958 to 1962 Anguilla was part of the Federation of the West Indies.

Opposition to rule from St Kitts erupted on 30 May 1967 when St Kitts policemen were evicted from the island and Anguilla refused to recognize the authority of the State Government any longer. During 1968–69 the British Government maintained a 'Senior British Official' to advise the local Anguilla Council and devise some solution to the problem. In March 1969, following the ejection from the island of a high-ranking British civil servant, British security forces occupied Anguilla. A Commissioner was installed, and in 1969 Anguilla became *de facto* a separate dependency of Britain, a situation rendered *de jure* on 19 Dec. 1980 under the Anguilla Act 1980 when Anguilla formally separated from the state of St Kitts, Anguilla-Nevis. A new constitution came into effect in 1982 providing for a large measure of internal autonomy under the Crown.

TERRITORY AND POPULATION

Anguilla is the most northerly of the Leeward Islands, some 70 miles (112 km) to the north-west of St Kitts and 5 miles (8 km) to the north of St Martin/Sint Maarten. The territory also comprises the island of Sombrero and several other off-shore islets or cays. *The total area of the territory is about 60 sq. miles (155 sq. km).* Census population (1984) was 6,897. Population estimate, 1997, 10,663. The projected population for 2000 is 12,000. The capital is The Valley. In 1995 an estimated 89% of the population lived in rural areas.

BRITISH ANTARCTIC TERRITORY

KEY HISTORICAL EVENTS

The British Antarctic Territory was established on 3 March 1962, as a consequence of the entry into force of the Antarctic Treaty, to separate those areas of the then Falkland Islands Dependencies which lay within the Treaty area from those which did not (i.e. South Georgia and the South Sandwich Islands).

TERRITORY AND POPULATION

The territory encompasses the lands and islands within the area south of 60°S latitude lying between 20°W and 80°W longitude (approximately due south of the Falkland Islands and the Dependencies). It covers an area of some 660,000 sq. miles, and its principal components are the South Orkney and South Shetland Islands, the Antarctic Peninsula (Palmer Land and Graham Land), the Filchner and Ronne Ice Shelves and Coats Land.

There is no indigenous or permanently resident population. There is however an itinerant population of scientists and logistics staff of about 300, manning a number of research stations.

CURRENT ADMINISTRATION

Commissioner: Anthony J. Longrigg (non-resident).
Administrator: Dr. M. G. Richardson (non-resident)

BRITISH INDIAN OCEAN TERRITORY

KEY HISTORICAL EVENTS

This territory was established to meet UK and US defence requirements by an Order in Council on 8 Nov. 1965, consisting then of the Chagos Archipelago (formerly administered from Mauritius) and the islands of Aldabra, Desroches and Farquhar (all formerly administered from Seychelles). The latter islands became part of Seychelles when that country achieved independence on 29 June 1976.

TERRITORY AND POPULATION

The group, with a total land area of 23 sq. miles (60 sq. km) comprises 5 coral atolls (Diego Garcia, Peros Banhos, Salomon, Eagle and Egmont), of which the largest and southernmost, Diego Garcia, covers 17 sq. miles (44 sq. km) and lies 450 miles (724 km) south of the Maldives. A US Navy support facility has been established on Diego Garcia. There is no permanent population.

FALKLAND ISLANDS

KEY HISTORICAL EVENTS

France established a settlement in 1764 and Britain a second settlement in 1765. In 1770 Spain bought out the French and drove off the British. This action on the part of Spain brought that country and Britain to the verge of war. The Spanish restored the settlement to the British in 1771, but the settlement was withdrawn on economic grounds in 1774. In 1806 Spanish rule was overthrown in Argentina, and the Argentine claimed to succeed Spain in the French and British settlements in 1820. The British objected and reclaimed their settlement in 1832 as a Crown Colony.

On 2 April 1982 Argentine forces occupied the Falkland Islands. On 3 April the UN Security Council called, by 10 votes to 1, for Argentina's withdrawal. After a military campaign, but without a formal declaration of war, the UK regained possession on 14–15 June after Argentina surrendered.

In April 1990 Argentina's Congress declared the Falkland and other British-held South Atlantic islands part of the new Argentine province of Tierra del Fuego.

TERRITORY AND POPULATION

The Territory comprises numerous islands situated in the South Atlantic Ocean about 480 miles north-east of Cape Horn covering 4,700 sq. miles. The main East Falkland Island, 2,610 sq. miles; the West Falkland, 2,090 sq. miles, including the adjacent small islands. The population at the census of 1996 was 2,607. The only town is Stanley, in East Falkland, with a population of 1,636. The population is nearly all of British descent, with 1,267 born in the Islands (1996 census figures) and 885 in the UK. In 1995, 84·1% lived in urban areas. A British garrison of about 2,000 servicemen, stationed in East Falkland in 1991, is not included in the 1996 census figures, but the 483 civilians employed there are.

The official language is English.

CLIMATE
A cool temperate climate, much affected by strong winds, particularly in spring. Stanley, Jan. 49°F (9·4°C), July 35°F (1·7°C). Annual rainfall 27" (681 mm).

CONSTITUTION AND GOVERNMENT
A new Constitution came into force on 3 Oct. 1985. This incorporated a chapter protecting fundamental human rights, and in the preamble recalled the provisions on the right of self-determination contained in international covenants.

Executive power is vested in the Governor who must consult the Executive Council except on urgent or trivial matters. He must consult the Commander British Forces on matters relating to defence and internal security (except police).

There is a *Legislative Council* consisting of 8 elected members and 2 *ex officio* members, the Chief Executive and Financial Secretary. Only elected members have a vote. The Commander British Forces has a right to attend and take part in its proceedings but has no vote. The Attorney General also has a similar right to take part in proceedings with the consent of the person presiding. The Governor presides over sittings. He also presides over sittings of the Executive Council which consists of 3 elected members (elected by and from the elected members of Legislative Council) and the Chief Executive and Financial Secretary (*ex officio*). The Commander British Forces and Attorney General have a right to attend but may not vote.

British citizenship was withdrawn by the British Nationality Act 1981, but restored after the Argentine invasion of 1982.

CURRENT ADMINISTRATION
Governor: Richard Ralph, CVO.

Chief Executive: Andrew Gurr.

DEFENCE
Since 1982 the Islands have been defended by a 2,000-strong garrison of British servicemen. In addition there is a local volunteer defence force.

ECONOMY
Policy. The Falkland Islands Development Corporation began operations in 1984. Projects assisted include a spinning mill dairy, hydroponic market garden, tourist lodges, agricultural supply co-operatives, and research into seabird populations and their diets.

Budget. Revenue and expenditure (in £ sterling) for fiscal years ending 30 June:

	1990–91	*1991–92*	*1992–93*	*1993–94*	*1994–95*	*1995–96*
Revenue	41,940,000	40,270,000	40,452,000	32,690,000	33,812,000	42,351,679
Expenditure	45,967,000	39,145,000	30,452,000	24,535,000	33,614,000	42,351,953

Currency. The unit of currency is the *Falkland Islands pound* (FKP) of 100 *pence,* at parity with £1 sterling.

Banking and Finance. The only bank is Standard Chartered Bank, which had assets of £31m. in 1997.

ENERGY AND NATURAL RESOURCES
Oil and Gas. The UK government authorized exploration for oil in Nov. 1991 in the 200-mile economic exclusion zone, except where it overlapped Argentina's zone in the west. An Anglo-Argentine agreement of 27 Sept. 1995 establishes 2 legal frameworks for marine oil exploration areas without prejudice to either country's claim to sovereignty over the Falkland Islands. The first, close to the Islands, is to have licensing terms which give companies 22 years to explore and complete drilling. The second extends between the Islands and Argentina wherein licensing will be overseen by a joint Anglo-Argentine commission. Argentina may bid for licences in the first area, and draws revenue directly from the second.

Agriculture. The economy was formerly based solely on agriculture, principally sheep farming. Following a programme of sub-division, much of the land is divided into family-size units. There were 100 farms in 1997, averaging 33,600 acres and

8,200 sheep. During 1991 the Falklands Islands Co. sold its agricultural holdings to the Falkland Island government. Less than 5% of the total land area is owned outside the islands. Wool is the principal product; output was 2,521 tonnes in 1991.

Livestock: In 1997 there were over 700,000 sheep. 1996: cattle, 4,000; horses, 1,000.

Fisheries. Since the establishment of a 150-mile interim conservation and management zone around the Islands in 1986 and the consequent introduction, on 1 Feb. 1987, of a licensing regime for vessels fishing within the zone, income from the associated fishing activities is now the largest source of revenue. Licences raised £25m. in 1992. Some 0·2m. tonnes of illex squid are caught annually. In 1994 Argentina's quota was raised to 0·22m. tonnes; that of the Falkland Islands remained at 0·15m. tonnes. 79,803 tonnes were caught in the Falklands zone in 1996. 61,360 tonnes of Patagonian squid and 23,515 tonnes of blue whiting were also caught.

As recently as 1986 the annual catch was just 8 tonnes. Nowhere else in the world has there been such a rapid rate of growth in the annual fish catch since the mid 1980s.

On 26 Dec. 1990 the Falklands outer conservation zone was introduced which extends beyond the 150-mile zone out to 200 miles from baselines. In Nov. 1992 commercial fishing in the outer zone was banned, the zone was reopened to fishing in 1994. A UK-Argentine South Atlantic Fisheries Commission was set up in 1990; it meets at least twice a year.

EXTERNAL ECONOMIC RELATIONS

90% of trade is with the UK, the rest with Latin America, mainly Chile. In 1995 imports totalled £17m.; exports (mainly wool), £3·5m.

COMMUNICATIONS

Roads. There are 27 km of made-up roads in and around Stanley, and another 54 km of all-weather road between Stanley and Mount Pleasant Airport. Other settlements outside Stanley are linked by tracks. There were about 1,100 private cars in 1996.

Civil Aviation. Air communication is currently via Ascension Island. An airport, completed in 1986, is sited at Mount Pleasant on East Falkland. RAF Tristar aircraft operate a twice-weekly service between the Falklands and the UK. Internal air links are provided by the government-operated air service, which carries passengers, mail, freight and medical patients between the settlements and Stanley on non-scheduled flights in Islander aircraft. A Chilean airline runs a weekly service to Punta Arenas.

Shipping. A charter vessel calls 4 or 5 times a year to/from the UK. Vessels of the Royal Fleet Auxiliary run regularly to South Georgia. Sea links with Chile and Uruguay began in 1989. In 1995 merchant shipping totalled 20,000 GRT.

Telecommunications. Number of telephones (Sept. 1991) 1,180. International direct dialling is available, as are international telex and facsimile links. There is a government-operated radio and TV station at Stanley.

SOCIAL INSTITUTIONS

Justice. There is a Supreme Court, and a Court of Appeal sits in the UK; appeals may go from that court to the judicial committee of the Privy Council. Judges may only be removed for inability or misbehaviour on the advice of the judicial committee of the Privy Council. The senior resident judicial officer is the Senior Magistrate. There is an Attorney General and a Senior Crown Counsel.

Education. Education is compulsory between the ages of 5 and 15 years. In 1992 there were 350 children receiving education in the Islands. 60 of these were of primary school age, living on isolated farms and receiving teacher visits and radio lessons. There is a primary school in Stanley, and a community school opened in 1992 with secondary study and sport facilities. Estimated recurrent expenditure on education and training from own funds in 1994–95, £2,041,440.

sheltered accommodation was completed in March 1987. Services include all primary care for Stanley, and the flying doctor service for outlying farm settlements.

A new Constitution was introduced in 1969. The Legislative and City Councils were merged to produce an enlarged legislature known as the *Gibraltar House of Assembly*. Executive authority is exercised by the Governor, who is also Commander-in-Chief. The Governor retains direct responsibility for matters relating to defence, external affairs and internal security. He has the power to intervene in the conduct of domestic affairs in support of this responsibility and has certain powers of intervention in the interests of maintaining financial and economic stability. However, he is normally required to act in accordance with the advice of the Gibraltar Council, which consists of 4 *ex-officio* members (the Deputy Governor,

the Deputy Fortress Commander, the Attorney-General and the Financial and Development Secretary) together with 5 elected members of the House of Assembly appointed by the Governor after consultation with the Chief Minister. Matters of primarily domestic concern are devolved to elected Ministers. There is a Council of Ministers presided over by the Chief Minister.

The House of Assembly consists of a Speaker appointed by the Governor, 15 elected and 2 *ex-officio* members (the Attorney-General and the Financial and Development Secretary). No more than 8 of the elected seats may go to the winning party at elections.

Gibraltarians have full UK citizenship.

A Mayor of Gibraltar is elected by the elected members of the Assembly.

Oil and Gas. Gibraltar is dependent on imported petroleum for its energy supplies.

Water. There are no permanent natural water supplies in Gibraltar. The main sources of water supply are the distillation plants which purify sea water.

Minerals. Mineral fuels comprised around 25% of the value of total imports in 1996.

INDUSTRY

The industrial sector (including manufacturing, construction and power) employed around 15% of the working population in 1996. There is a bottling plant and a floppy diskette manufacturer.

MONTSERRAT

KEY HISTORICAL EVENTS

Montserrat was discovered by Columbus in 1493 and colonized by Britain in 1632, who brought Irish settlers to the island. Montserrat formed part of the federal colony of the Leeward Islands from 1871 until 1958, when it became a separate colony following the dissolution of the Federation.

On 18 July 1995 the Soufriere Hills volcano erupted for the first time in recorded history, which led to over half the inhabitants being evacuated to the north of the island, and the relocation of the chief town, Plymouth. Another major eruption on 25 June 1997 caused a number of deaths and led to further evacuation.

TERRITORY AND POPULATION

Montserrat is situated in the Caribbean Sea, 27 miles south-west of Antigua. The area is 39·5 sq. miles (102 sq. km). Population, 1991, 11,957; estimate, Aug. 1998, 4,008. What was previously the capital, Plymouth, is now deserted as a result of the continuing activity of the Soufriere Hills volcano. The safe area is in the north of the island.

The official language is English.

CLIMATE

A tropical climate with an average annual rainfall of 60" (1,500 mm) the wettest months being Sept.–Dec., with a hurricane season June–Nov. Plymouth, Jan. 76°F (24·4°C), July 81°F (27·2°C).

CONSTITUTION AND GOVERNMENT

Montserrat is a British Overseas Territory. The Constitution dates from the 1989 Montserrat Constitutional Order. The head of state is Queen Elizabeth II, represented by a *Governor* who heads an Executive Council, comprising also the Chief Minister, the Financial Secretary, the Attorney-General and 3 other ministers. The *Legislative Council* consists of 7 elected members, 2 civil service officials (the Attorney-General and Financial Secretary) and 2 nominated members; it sits for 5-year terms.

RECENT ELECTIONS

Following elections to the Legislative Council on 11 Nov. 1996, a coalition government was formed, comprising 2 members of the Movement for National Reconstruction, 1 member of the National Progressive Party and 1 independent.

CURRENT ADMINISTRATION

Governor: Tony Abbott.

Chief Minister: David Brandt.

INTERNATIONAL RELATIONS

Montserrat is a member of CARICOM and the OECS.

ECONOMY

Performance. Real GDP growth was –2·9% in 1995 and 0·8% in 1994.

Budget. In 1998 the estimated expenditure was EC$60·6m. compared with actual expenditure of EC$63·5m. in 1997, a reduction of 5%. It was estimated that the government would collect EC$16·5m. during 1998—a decline of 38% when compared with 1997.

Currency. The *Eastern Caribbean dollar* (*see* ANTIGUA AND BARBUDA: Currency).

Banking and Finance. In 1996 there were 3 commercial and 21 offshore banks. Responsibility for overseeing offshore banking rests with the Governor. In late 1998 there were 2 commercial banks on the island.

Weights and Measures. Both metric and imperial weights and measures are in use.

ENERGY AND NATURAL RESOURCES

Electricity. Production (1995) 19·23m. kWh. With the reduction in habitable area, it is anticipated that the general production will be considerably less.

Agriculture. 3,700 ha are normally suitable for agriculture, with about half in use, but only 1,000 ha were available in 1996 because of the volcanic crisis. Potatoes, tomatoes, onions, mangoes and limes were produced in recent times. Meat production began in 1994 and the island soon became self-sufficient in chicken, mutton and beef.

Livestock (1996); Cattle, 10,000; pigs, 1,000; sheep, 5,000; goats, 7,000.

Forestry. The area under forests in 1995 was 3,000 ha, or 30% of the total land area.

Fisheries. Total catch, 1995, 175 tonnes.

INDUSTRY

Manufacturing has in recent years contributed about 6% to GDP and accounted for 10% of employment, but has been responsible for about 80% of exports. It has been limited to rice milling and the production of light consumer goods such as electronic components, light fittings, plastic bags and leather goods. The volcanic activity has put a halt to the milling of rice in the exclusion zone and curtailed the production of light consumer goods.

Trade Unions. There is 1 trade union, the Montserrat Allied Workers Union (MAWU).

EXTERNAL ECONOMIC RELATIONS

Imports and Exports. Imports in 1995 totalled US$80m.; exports, US$5m. The USA was the main trading partner. Chief exports were milled rice, electronic parts, lighting fittings, plastic bags and leather goods.

These figures have changed since then, but the government, through the Ministry of Communications and Works, is focusing its road developments in the north of the island, and in 1998 and 1999 a number of road work projects were under way.

Civil Aviation. At the W. H. Bramble airport LIAT used to provide services to Antigua with onward connections to the rest of the Eastern Caribbean, but it was closed in June 1997 as volcanic activity increased.

Shipp

ing. Plymouth is the port of entry, but alternative anchorage was provided at Old Bay Road during the volcanic crisis.

Telecommunications. Number of telephones, 1995, 4,783. With the migration of people to the north and overseas, and the subsequent destruction of the southern part of the island, the number of telephones has shrunk to 2,100.

SOCIAL INSTITUTIONS

Justice. Law is based on UK common law as exercised by the Eastern Caribbean Supreme Court. Final appeal lies to the UK Privy Council. Law is administered by the West Indies Associated States Court, a Court of Summary Jurisdiction and Magistrate's Courts.

Religion. In 1997, 25% of the population were Anglican, 20% Methodist, 15% Pentecostal, 10% Roman Catholic and 10% Adventist.

Education. In 1996–97 there were 11 primary schools (only 4 open), a comprehensive secondary school with 3 campuses, and a technical college. Schools are run by the Government, the churches and the private sector. There is a medical school, the American University of the Caribbean.

Health. In 1996 there were 4 medical officers, 1 surgeon, 1 dentist and 1 hospital with 69 beds.

CULTURE

Broadcasting. There is a government-owned radio station (ZJB) and 2 commercial stations (Radio Antilles and GEM Radio). There is a commercial cable TV company.

Press. In 1996 there was 1 weekly newspaper.

Tourism. Tourism has in recent years contributed about 30% of GDP; earnings in 1993 were EC$40m. There were 36,077 visitors including 11,636 cruise ship arrivals in 1994. However, since the volcanic eruptions the tourist industry has become practically non-existent.

SOUTH GEORGIA AND THE SOUTH SANDWICH ISLANDS

KEY HISTORICAL EVENTS

The first landing and exploration was undertaken by Captain James Cook, who formally took possession in the name of George III on 17 Jan. 1775. British sealers arrived in 1788 and American sealers in 1791. Sealing reached its peak in 1800. A German team was the first to carry out scientific studies there in 1882–83. Whaling began in 1904 and ceased in 1966, and the civil administration was withdrawn. Argentine forces invaded South Georgia on 3 April 1982. A British naval task force recovered the Island on 25 April 1982.

TERRITORY AND POPULATION

South Georgia lies 800 miles south-east of the Falkland Islands and has an area of 1,450 sq. miles. The South Sandwich Islands are 470 miles south-east of South Georgia and have an area of 130 sq. miles. In 1993 crown sovereignty and jurisdiction were extended from 12 to 200 miles around the islands. There is no permanent population. There is a small military garrison. The British Antarctic Survey have a biological station on Bird Island. The South Sandwich Islands are uninhabited.

CLIMATE

The climate is wet and cold, with strong winds and little seasonal variation. 15°C is occasionally reached on a windless day. Temperatures below −15°C at sea level are unusual.

CONSTITUTION AND GOVERNMENT

Under the new Constitution which came into force on 3 Oct. 1985 the Territories ceased to be dependencies of the Falkland Islands. Executive power is vested in a Commissioner who is the officer for the time being administering the Government of the Falkland Islands. The Commissioner is obliged to consult the officer for the time being commanding Her Majesty's British Forces in the South Atlantic on matters relating to defence and internal security (except police). The Commissioner, whenever practicable, consults the Executive Council of the Falkland Islands on the exercise of functions that in his opinion might affect the Falkland Islands. There is no Legislative Council. Laws are made by the Commissioner (Richard Ralph, CVO, resident in the Falkland Islands).

ECONOMY

Budget. The total revenue of the Territories (estimate, 1988–89) £268,240, mainly from philatelic sales and investment income. Expenditure (estimate), £194,260.

COMMUNICATIONS

There is occasional communication by sea with the Falkland Islands by means of research and ice patrol ships. Royal Fleet Auxiliary ships, which serve the garrison, run regularly to South Georgia.

Mail is dropped from military aircraft.

SOCIAL INSTITUTIONS

THE TURKS AND CAICOS ISLANDS

KEY HISTORICAL EVENTS
After a long period of rival French and Spanish claims the islands were eventually secured to the British Crown in 1766, and became a separate colony in 1973 after association at various times with the colonies of the Bahamas and Jamaica.

TERRITORY AND POPULATION
The Islands are situated between 21° and 22°N. lat. and 71° and 72°W. long., about 50 miles east of the Bahamas, of which they are geographically an extension. KEY HISTORICAL EVENTS

The first white settlers in north America were Spaniards who made their home in Florida. In 1607 some English settled at Jamestown around which the colony of Virginia grew. In 1620 others landed at Plymouth Rock to found the colony of Massachusetts. Other colonies followed. One group, inhabited chiefly by Puritan exiles was called New England. The South attracted religionists of less rigid views including the Roman Catholics who established Maryland. Between the two were Dutch settlements and Pennsylvania, the Quaker colony founded by William Penn. The Dutch settlements became British after a war in 1664 and the name of the chief town was changed to New York. In 1775 white settlement in America was located in 13 British colonies on the east coast and in Spanish colonial territory in the south and south-west. The rest was Indian land, where former French claims to control had been given up in 1763. Spain succeeded to those claims in land west of the Mississippi and Britain in land east of it. Britain designated such land as Indian territory and forbade colonial expansion west of the Appalachians.

Britain's colonial subjects rebelled against her taxation and trading exploitation. The colonies declared their independence on 4 July 1776, provoking war with Britain which lasted until 1783 when Britain acknowledged the independent United States of America.

The Union extended south to the border of Florida (Spanish) and west to the Mississippi. A permanent constitution came into force in 1789, providing for a federal government. The rights of states to nullify federal laws if they contradicted state policies became a source of dispute, especially in relation to the slave-owning southern states which feared the Union preference for abolition.

In 1800 France bought back from Spain her title to 'Louisiana', the territory west of the Mississippi. In 1803 the USA bought it from France.

In 1812–14 the USA fought an inconclusive war with Britain on the grounds that Britain, operating from Canada, was encouraging Indian resistance; at sea, Britain was using her conduct of the Napoleonic War to harass American shipping.

Westward movement began almost with independence, increasing after the Homestead Act of 1832 and the removal of Indians to reservations during the 1830s.

The Spanish empire in the Americas had ended in 1821, and the north American territories had passed to Mexico, except for Florida which the USA acquired. In 1836 Texas broke away from Mexico, surviving as an independent republic until 1845 when the US, seeing strategic danger in its vulnerability, annexed it. This provoked war with Mexico which the US won in 1848, receiving the Mexican territories in the south-west including the present states of California, Arizona, Colorado, Utah, Nevada and New Mexico.

In the north-west, the Oregon Trail attracted thousands of migrants in the 1840s. In 1846 a long dispute with Britain was resolved, confirming the US title to the Oregon Territory. Westward migration was further stimulated by the California gold rush of 1848.

In the east and mid-west, tension over the question of slavery led to the secession of the southern states in 1860–61, and their formation as the Confederacy. Civil war broke out, ending in northern victory in 1865. Slavery was abolished and a period of radical reconstruction began for the South. Many reforms then implemented were cancelled after 1877, when the northernmilitary presence was withdrawn and southern whites regained their political power, enforcing segregation and curtailing black civil and political rights.

During the late 19th century eastern and mid-western industrialization expanded rapidly. Growing cities attracted thousands of poor European immigrants, many of whom were escaping religious or political persecution as well as looking for work. This inward flow of labour continued into the 1930s and was matched by a flow of

Asians to the west coast. A similar northward movement of Spanish speakers from the Caribbean and Mexico, and of black workers from southern states, continues.

In the west there were Indian wars. The Apache and Navajo wars of the southwest lasted intermittently from 1861 until 1886. The Comanche fought for decades to protect their hunting grounds on the plains from settlement, as did the Cheyenne and Sioux. The latter's victory under Sitting Bull in 1876 only produced an increase in military action against them. Indian resistance ended after some 200 Sioux were shot at Wounded Knee in 1890.

In the Spanish-American war of 1898 the USA succeeded in replacing Spanish influence in the Caribbean with her own. She also replaced it in the Philippines, and acquired Guam in the western Pacific as a strategic base.

The USA entered the First World War in 1917, and afterwards reacted with an isolationist policy. In 1929 the stock market collapsed and serious economic depression lasted through the 1930s. The country turned to policies of government intervention in the economy; recovery began, but only became rapid when the Second World War necessitated a huge increase in production.

The war and subsequent victory led to active participation in the affairs of Europe and to a state of 'cold war' mistrust between the USA and the USSR. The US Marshall Plan financed the recovery of much of European industry. At the same time it appeared prudent to aid other nations where instability might admit Communist influence; this policy governed relations with Caribbean and Central American countries, and involved the USA in war against Communist forces in Korea (1950–53) and Vietnam (1961–73).

Following President Kennedy's assassination in 1963, US military involvement in Vietnam was intensified, but opposition at home led to withdrawal of forces in 1973.

In 1974 President Nixon was forced to resign amidst charges of corruption known collectively as Watergate. A revival of Republican fortunes came with the election of Ronald Reagan in the 1980 presidential race. In international affairs, Reagan was resolutely anti-Communist, raising fears of confrontation with the Soviet Union over his Strategic Defense Initiative, otherwise known as his 'Star Wars' system of defence. However, relations between the two super powers improved in the mid-eighties with successful negotiations on nuclear arms limitations. The collapse of the Soviet empire in 1990 extended US economic aid to Eastern Europe.

The Democrats regained control of the White House with the election of Bill Clinton, who combined economic recovery at home with an active foreign policy which underlined America's role as the only super power. But in his second term, Bill Clinton was dogged by sexual scandal. The Lewinsky affair, leading to an impeachment trial, all but robbed the President of his moral authority.

Of all the American cities with more than 100,000 inhabitants, Phoenix saw the greatest increase in its population between 1990 and 1996, with an additional 174,704 people based on the above estimates, and Henderson the highest percentage increase, with an 88·4% rise. Philadelphia's population saw the greatest decline, dropping by 107,575 based on these estimates, and St Louis the highest percentage fall, with an 11·4% drop.

Immigration and naturalization: The Immigration and Nationality Act, as amended, provides for the numerical limitation of most immigration. The Immigration Act of 1990 established major revisions in the numerical limits and preference system regulating legal immigration. The numerical limits are imposed on visas issued and not admissions. The maximum number of visas allowed to be issued under the preference categories in 1996 was 451,819: 311,819 for family-sponsored

immigrants and 140,000 for employment-based immigrants. Within the overall limitations the per-country limit for independent countries is set to 7% of the total family and employment limits, while dependent areas are limited to 2% of the total. The 1996 limit allowed no more than 31,627 preference visas for any independent country and 9,036 for any dependency. Immigrants not subject to any numerical limitation are spouses, children, and parents of US citizens who are 21 years of age or older; certain former US citizens; ministers of religion; certain long-term US government employees; refugees and asylum-seekers adjusting to immigrant status; and certain other groups of immigrants.

Immigration data for 1996 include 4,635 aliens who were admitted as permanent residents under the legalization programme created by the Immigrant Reform and Control Act of 1986. These aliens have resided in the USA since before 1982 or were agricultural workers on perishable crops and have qualified as temporary residents under the first phase of the legalization programme; in the fiscal year 1989, they began qualifying for permanent status.

Immigrant aliens admitted to the USA for permanent residence, by country or region of birth, for fiscal years:

The total number of immigrants admitted from 1820 up to 30 Sept. 1996 was 63,140,227; this included 7,142,593 from Germany, and 5,427,298 from Italy.

Aliens coming to the USA for temporary periods of time are classified as non-immigrants. During fiscal year 1996, a total of 24,842,503 non-immigrants were admitted. This total included multiple entries but excluded border crossers, crewmen and insular travellers. There were 1,641,455 aliens expelled during the fiscal year 1996. Of this number, 68,657 were removed with a formal order from an immigration judge and 1,572,798 were required to depart without orders of deportation.

During fiscal year 1996, 1,044,689 persons became US citizens through naturalization, including 890,949 naturalized under the general provisions of 5-year residence in the USA, 35,449 spouses and children of US citizens and 6,948 members of the US Armed Forces. The new citizens included 43,087 from China and Taiwan, 62,168 from Cuba, 4,617 from Italy, 24,270 from Jamaica, 24,693 from Korea, 217,418 from Mexico, 45,210 from the Philippines and 47,625 from Vietnam.

The refugee admissions ceiling for the fiscal year 1996 was fixed at 90,000, including 45,000 from Eastern Europe and the former Soviet Union and 29,000 from south-east Asia.

Even though the marriage rate shows a gradual decline, it remains much higher than in most other industrial countries. The most popular age range for marrying is 25–29 for males and 20–24 for females. Estimated number of births to unmarried women in 1995 was 1,254,000 (32·2% of all births), compared to 666,000 in 1980.

Infant mortality rates, per 1,000 live births: 29·2 in 1950; 12·9 in 1980; 7·4 in 1996. Fertility rate, 1996, 2·0 births per woman.

Expectation of life, 1970: males, 67·1 years; females, 74·7 years; 1996: males, 73·0 years; females, 79·0 years.

Numbers of deaths by principal causes, 1995 (and as a percentage of all deaths): heart disease, 738,781 (32·0%); cancer, 537,969 (23·3%); stroke, 158,061 (6·8%); obstructive lung disease, 104,756 (4·5%); accidents, 89,703 (3·9%); pneumonia and influenza, 83,528 (3·6%); diabetes mellitus, 59,085 (2·6%); AIDS, 42,506 (1·8%); suicide, 30,893 (1·3%); liver disease, 24,848 (1·1%).

In 1995 there were 35,957 deaths caused by firearms; 14,218 from drug-induced causes; and 20,231 from alcohol-induced causes.

The number of Americans living below the poverty line in 1997 was 35·6m. or 13·3% of the total population, down from 13·7% in 1996.

CLIMATE

For temperature and rainfall figures, *see* entries on individual states as indicated by regions, below, of mainland USA.

Pacific Coast. The climate varies with latitude, distance from the sea and the effect of relief, ranging from polar conditions in North Alaska through cool to warm temperate climates further south. The extreme south is temperate desert. Rainfall everywhere is moderate. *See* Alaska, California, Oregon, Washington.

Mountain States. Very varied, with relief exerting the main control; very cold in the north in winter, with considerable snowfall. In the south, much higher temperatures and aridity produce desert conditions. Rainfall everywhere is very variable as a result of rain-shadow influences. *See* Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, Wyoming.

High Plains. A continental climate with a large annual range of temperature and moderate rainfall, mainly in summer, although unreliable. Dust storms are common in summer and blizzards in winter. *See* Nebraska, North Dakota, South Dakota.

Central Plains. A temperate continental climate, with hot summers and cold winters, except in the extreme south. Rainfall is plentiful and comes at all seasons, but there is a summer maximum in western parts. *See* Mississippi, Missouri, Oklahoma, Texas.

Mid-West. Continental, with hot summers and cold winters. Rainfall is moderate, with a summer maximum in most parts. *See* Indiana, Iowa, Kansas.

Great Lakes. Continental, resembling that of the Central Plains, with hot summers but very cold winters because of the freezing of the lakes. Rainfall is moderate with a slight summer maximum. *See* Illinois, Michigan, Minnesota, Ohio, Wisconsin.

Appalachian Mountains. The north is cool temperate with cold winters, the south warm temperate with milder winters. Precipitation is heavy, increasing to the south but evenly distributed over the year. *See* Kentucky, Pennsylvania, Tennessee, West Virginia.

Gulf Coast. Conditions vary from warm temperate to sub-tropical, with plentiful rainfall, decreasing towards the west but evenly distributed over the year. *See* Alabama, Arkansas, Florida, Louisiana.

Atlantic Coast. Temperate maritime climate but with great differences in temperature according to latitude. Rainfall is ample at all seasons; snowfall in the north can be heavy. *See* Delaware, District of Columbia, Georgia, Maryland, New Jersey, New York, North Carolina, South Carolina, Virginia.

New England. Cool temperate, with severe winters and warm summers. Precipitation is well distributed with a slight winter maximum. Snowfall is heavy in winter. *See* Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont. *See* also Hawaii and Outlying Territories.

CONSTITUTION AND GOVERNMENT

The form of government of the USA is based on the constitution of 17 Sept. 1787.

By the constitution the government of the nation is composed of three co-ordinate branches, the executive, the legislative and the judicial.

The Federal Government has authority in matters of general taxation, treaties and other dealings with foreign countries, foreign and inter-state commerce, bankruptcy, postal service, coinage, weights and measures, patents and copyright, the armed forces (including, to a certain extent, the militia), and crimes against the USA; it has sole legislative authority over the District of Columbia and the possessions of the USA.

The 5th article of the constitution provides that Congress may, on a two-thirds vote of both houses, propose amendments to the constitution, or, on the application of the legislatures of two-thirds of all the states, call a convention for proposing amendments, which in either case shall be valid as part of the constitution when ratified by the legislatures of three-fourths of the several states, or by conventions in

three-fourths thereof, whichever mode of ratification may be proposed by Congress. Ten amendments (called collectively 'the Bill of Rights') to the constitution were added 15 Dec. 1791; two in 1795 and 1804; a 13th amendment, 6 Dec. 1865, abolishing slavery; a 14th in 1868, including the important 'due process' clause; a 15th, 3 Feb. 1870, establishing equal voting rights for white and black; a 16th, 3 Feb. 1913, authorizing the income tax; a 17th, 8 April 1913, providing for popular election of senators; an 18th, 16 Jan. 1919, prohibiting alcoholic liquors; a 19th, 18 Aug. 1920, establishing woman suffrage; a 20th, 23 Jan. 1933, advancing the date of the President's and Vice-President's inauguration and abolishing the 'lameduck' sessions of Congress; a 21st, 5 Dec. 1933, repealing the 18th amendment; a 22nd, 26 Feb. 1951, limiting a President's tenure of office to 2 terms, or to 2 terms plus 2 years in the case of a Vice-President who has succeeded to the office of a President; a 23rd, 30 March 1961, granting citizens of the District of Columbia the right to vote in national elections; a 24th, 4 Feb. 1964, banning the use of the poll-tax in federal elections; a 25th, 10 Feb. 1967, dealing with Presidential disability and succession; a 26th, 22 June 1970, establishing the right of citizens who are 18 years of age and older to vote; a 27th, 7 May 1992, providing that no law varying the compensation of Senators or Representatives shall take effect until an election has taken place.

National motto: 'In God we trust'; formally adopted by Congress 30 July 1956.

Presidency. The executive power is vested in a president, who holds office for 4 years, and is elected, together with a vice-president chosen for the same term, by electors from each state, equal to the whole number of senators and representatives to which the state may be entitled in the Congress.

The President must be a natural-born citizen, resident in the country for 14 years, and at least 35 years old.

The presidential election is held every fourth (leap) year on the Tuesday after the first Monday in November. Technically, this is an election of presidential electors, not of a president directly; the electors thus chosen meet and give their votes (for the candidate to whom they are pledged, in some states by law, but in most states by custom and prudent politics) at their respective state capitals on the first Monday after the second Wednesday in December next following their election; and the votes of the electors of all the states are opened and counted in the presence of both Houses of Congress on the sixth day of January. The total electorate vote is one for each senator and representative. Electors may not be a member of Congress or hold federal office. If no candidate secures the minimum 270 college votes needed for outright victory, the 12th Amendment to the Constitution applies, and the House of Representatives chooses a president from among the first 3 finishers in the electoral college. (This last happened in 1824).

If the successful candidate for President dies before taking office the Vice-President-elect becomes President; if no candidate has a majority or if the successful candidate fails to qualify, then, by the 20th amendment, the Vice-President acts as President until a president qualifies. The duties of the Presidency, in absence of the President and Vice-President by reason of death, resignation, removal, inability or failure to qualify, devolve upon the Speaker of the House under legislation enacted on 18 July 1947. In case of absence of a Speaker for like reason, the presidential duties devolve upon the President *pro tem.* of the Senate and successively upon those members of the cabinet in order of precedence, who have the constitutional qualifications for President.

The presidential term, by the 20th amendment to the constitution, begins at noon on 20 Jan. of the inaugural year. This amendment also installs the newly elected Congress in office on 3 Jan. instead of—as formerly—in the following December. The President's salary is $200,000 per year (taxable), with in addition $50,000 to assist in defraying expenses resulting from official duties. Also he may spend up to $100,000 non-taxable for travel and $20,000 for official entertainment. The office of Vice-President carries a salary of $171,500 and $10,000 allowance for expenses, all taxable. The Vice-President is *ex-officio* President of the Senate, and in the case of 'the removal of the President, or of his death, resignation, or inability to discharge the powers and duties of his office', he becomes the President for the remainder of the term.

[1]Position vacant thereafter until commencement of the next presidential term.

Cabinet. The administrative business of the nation has been traditionally vested in several executive departments, the heads of which, unofficially and *ex officio*, formed the President's cabinet. Beginning with the Interstate Commerce Commission in 1887, however, an increasing amount of executive business has been entrusted to some 60 so-called independent agencies, such as the Housing and Home Finance Agency, Tariff Commission, etc.

All heads of departments and of the 60 or more administrative agencies are appointed by the President, but must be confirmed by the Senate.

Congress. The legislative power is vested by the Constitution in a Congress, consisting of a Senate and House of Representatives.

Electorate. By amendments of the constitution, disqualification of voters on the ground of race, colour or sex is forbidden. The electorate consists of all citizens over 18 years of age. Literacy tests have been banned since 1970. In 1972 durational residency requirements were held to violate the constitution. In 1973 US citizens abroad were enfranchised.

With limitations imposed by the constitution, it is the states which determine voter eligibility. In general states exclude from voting: persons who have not established residency in the jurisdiction in which they wish to vote; persons who have been convicted of felonies whose civil rights have not been restored; persons declared mentally incompetent by a court.

Illiterate voters are entitled to receive assistance in marking their ballots. Minority-language voters in jurisdictions with statutorily prescribed minority concentrations are entitled to have elections conducted in the minority language as well as English. Disabled voters are entitled to accessible polling places. Voters absent on election days or unable to go to the polls are generally entitled under state law to vote by absentee ballot.

The Constitution guarantees citizens that their votes will be of equal value under the 'one person, one vote' rule.

Senate. The Senate consists of 2 members from each state (but not from the District of Columbia), chosen by popular vote for 6 years, approximately one-third retiring or seeking re-election every 2 years. Senators must be no less than 30 years of age; must have been citizens of the USA for 9 years, and be residents in the states for which they are chosen. The Senate has complete freedom to initiate legislation, except revenue bills (which must originate in the House of Representatives); it may, however, amend or reject any legislation originating in the lower house. The Senate is also entrusted with the power of giving or withholding its 'advice and consent' to

the ratification of all treaties initiated by the President with foreign powers, a two-thirds majority of senators present being required for approval. (However, it has no control over 'international executive agreements' made by the President with foreign governments; such 'agreements' cover a wide range and are more numerous than formal treaties.) It also has the power of confirming or rejecting major appointments to office made by the President, but it has no direct control over the appointment by the President of 'personal representatives' or 'personal envoys' on missions abroad. Members of the Senate constitute a High Court of Impeachment, with power, by a two-thirds vote, to remove from office and disqualify any civil officer of the USA impeached by the House of Representatives, which has the sole power of impeachment.

The Senate has 17 *Standing Committees to which all bills are referred for study*, revision or rejection. The House of Representatives has 19 such committees. In both Houses each Standing Committee has a chairman and a majority representing the majority party of the whole House; each has numerous sub-committees. The jurisdictions of these Committees correspond largely to those of the appropriate executive departments and agencies. Both Houses also have a few select or special Committees with limited duration.

House of Representatives. The House of Representatives consists of 435 members elected every second year. The number of each state's representatives is determined by the decennial census, in the absence of specific Congressional legislation affecting the basis. In 1997 the states had the following numbers of representatives:

Alabama	7	Indiana	10	Nebraska	3	South Carolina	6
Alaska	1	Iowa	5	Nevada	2	South Dakota	1
Arizona	6	Kansas	4	New Hampshire	2	Tennessee	9
Arkansas	4	Kentucky	6	New Jersey	13	Texas	30
California	52	Louisiana	7	New Mexico	3	Utah	3
Colorado	6	Maine	2	New York	31	Vermont	1
Connecticut	6	Maryland	8	North Carolina	12	Virginia	11
Delaware	1	Massachusetts	10	North Dakota	1	Washington	9
Florida	23	Michigan	16	Ohio	19	West Virginia	3
Georgia	11	Minnesota	8	Oklahoma	6	Wisconsin	9
Hawaii	2	Mississippi	5	Oregon	5	Wyoming	1
Idaho	2	Missouri	9	Pennsylvania	21		
Illinois	20	Montana	1	Rhode Island	2		

The constitution requires congressional districts within each state to be substantially equal in population. Final decisions on congressional district boundaries are taken by the state legislatures and governors. By custom the representative lives in the district from which he is elected. Representatives must be not less than 25 years of age, citizens of the USA for 7 years and residents in the state from which they are chosen.

In addition, 5 delegates (1 each from the District of Columbia, American Samoa, Guam, the US Virgin Islands and Puerto Rico) are also members of Congress. They have a voice but no vote, except in committees. The delegate from Puerto Rico is the resident commissioner. Puerto Ricans vote at primaries, but not at national elections. Each of the two Houses of Congress is sole 'judge of the elections, returns and qualifications of its own members'; and each of the Houses may, with the concurrence of two-thirds, expel a member. The period usually termed 'a Congress' in legislative language continues for 2 years, terminating at noon on 3 Jan.

The salary of a senator is $133,600 per annum, with tax-free expense allowance and allowances for travelling expenses and for clerical hire. The salary of the Speaker of the House of Representatives is $171,500 per annum, with a taxable allowance. The salary of a Member of the House is $133,600 ($148,400 for the Majority Leader and Minority Leader).

No senator or representative can, during the time for which he is elected, be appointed to any *civil* office under authority of the USA which shall have been created or the emoluments of which shall have been increased during such time; and no person holding *any* office under the USA can be a member of either House during his continuance in office. No religious text may be required as a qualification to any office or public trust under the USA or in any state.

Indians. By an Act passed on 2 June 1924 full citizenship was granted to all Indians born in the USA, though those remaining in tribal units were still under special federal jurisdiction. The Indian Reorganization Act of 1934 gave the tribal Indians,

at their own option, substantial opportunities of self-government and the establishment of self-controlled corporate enterprises empowered to borrow money and buy land, machinery and equipment; these corporations are controlled by democratically elected tribal councils. Recently a trend towards releasing Indians from federal supervision has resulted in legislation terminating supervision over specific tribes. In 1988 the federal government recognized that it had a special relationship with, and a trust responsibility for, federally recognized Indian entities in continental USA and tribal entities in Alaska. In 1993 the Bureau of Indian Affairs listed 552 'Indian Entities Recognized and Eligible to Receive Services'. Indian lands (1991) amounted to 52,092,247 acres, of which 41,868,582 was tribally owned and 10,233,665 in trust allotments. Indian lands are held free of taxes. Total Indian population at the 1990 census was 1,959,000, of which Oklahoma, Arizona, California and New Mexico accounted for 832,466.

The **District of Columbia**, ceded by the State of Maryland for the purposes of government in 1791, is the seat of the US Government. It includes the city of Washington, and embraces a land area of 61 sq. miles. The Reorganization Plan No. 3 of 1967 instituted a Mayor Council form of government with appointed officers. In 1973 an elected Mayor and elected councillors were introduced; in 1974 they received power to legislate in local matters. Congress retains power to enact legislation and to veto or supersede the Council's acts. Since 1961 citizens have had the right to vote in national elections. On 23 Aug. 1978 the Senate approved a constitutional amendment giving the District full voting representation in Congress. This has still to be ratified.

The Commonwealth of Puerto Rico, American Samoa, Guam and the Virgin Islands each have a local legislature, whose acts may be modified or annulled by Congress, though in practice this has seldom been done. Puerto Rico, since its attainment of commonwealth status on 25 July 1952, enjoys practically complete self-government, including the election of its governor and other officials. The conduct of foreign relations, however, is still a federal function and federal bureaux and agencies still operate in the island.

General supervision of territorial administration is exercised by the Office of Territories in the Department of Interior.

National Anthem. The Star-spangled Banner, 'Oh say, can you see by the dawn's early light'; words by F. S. Key, 1814, tune by J. S. Smith; formally adopted by Congress 3 March 1931.

Local Government. The Union comprises 13 original states, 7 states which were admitted without having been previously organized as territories, and 30 states which had been territories—50 states in all. Each state has its own constitution (which the USA guarantees shall be republican in form), deriving its authority, not from Congress, but from the people of the state. Admission of states into the Union has been granted by special Acts of Congress, either (1) in the form of 'enabling Acts' providing for the drafting and ratification of a state constitution by the people, in which case the territory becomes a state as soon as the conditions are fulfilled, or (2) accepting a constitution already framed, and at once granting admission.

Each state is provided with a legislature of two Houses (except Nebraska, which since 1937 has had a single-chamber legislature), a governor and other executive officials, and a judicial system. Both Houses of the legislature are elective, but the senators (having larger electoral districts usually covering 2 or 3 counties compared with the single county or, in some states, the town, which sends 1 representative to the Lower House) are less numerous than the representatives, while in 38 states their terms are 4 years; in 12 states the term is 2 years. Of the 4-year senates, Illinois, Montana and New Jersey provide for two 4-year terms and one 2-year term in each decade. Terms of the lower houses are usually shorter; in 45 states, 2 years.

Members of both Houses are paid at the same rate, which varies from $200 a year in New Hampshire to $57,500 a year in New York. The trend is towards annual sessions of state legislatures; most meet annually now whereas in 1939 only 4 did.

The Governor has power to summon an extraordinary session, but not to dissolve or adjourn. The duties of the two Houses are similar, but in many states money bills must be introduced first in the Lower House. The Senate sits as a court for the trial

of officials impeached by the other House, and often has power to confirm or reject appointments made by the Governor.

State legislatures are competent to deal with all matters not reserved for the federal government by the federal constitution nor specifically prohibited by the federal or state constitutions. Among their powers are the determination of the qualifications for the right of suffrage, and the control of all elections to public office, including elections of members of Congress and electors of President and Vice-President; the criminal law, both in its enactment and in its execution, with unimportant exceptions, and the administration of prisons; the civil law, including all matters pertaining to the possession and transfer of, and succession to, property; marriage and divorce, and all other civil relations; the chartering and control of all manufacturing, trading, transportation and other corporations, subject only to the right of Congress to regulate commerce passing from one state to another; labour; education; charities; licensing; fisheries within state waters, and game laws (apart from the hunting of migratory birds, which is a federal concern under treaties with Canada and Mexico). Taxes on income were left to the states until 1913, when the 16th amendment authorized the imposition of federal taxes on income without regard to apportionment.

The Governor is elected by direct vote of the people over the whole state for a term of office ranging in the various states from 2 to 4 years, and with a salary ranging from $60,000 (Arkansas) to $130,000 (New York). His duty is to see to the faithful administration of the law, and he has command of the military forces of the state. He may recommend measures but does not present bills to the legislature. In some states he presents estimates. In all but one of the states (North Carolina) the Governor has a veto upon legislation, which may, however, be overridden by the two Houses, in some states by a simple majority, in others by a three-fifths or two-thirds majority. In some states the Governor, on his death or resignation, is succeeded by a Lieut.-Governor who was elected at the same time and has been presiding over the state Senate. In several states the Speaker of the Lower House succeeds the Governor.

There were elections for 36 governors' seats on 4 Nov. 1998: Republicans won 23, Democrats 11 and Independents 2. As a result there were 31 Republican, 17 Democrat and 2 Independent Governors in total.

The chief officials by whom the administration of state affairs is carried on (secretaries, treasurers, members of boards of commissioners, etc.) are usually chosen by the people at the general state elections for terms similar to those for which governors hold office.

The chief unit of local government is the county, of which there were (1997) 2,994 with definite functions; in addition, Rhode Island has 5 'counties' which have no functions; Alaska does not have counties but 25 divisions and, since Oct. 1960, there has been no active county government in Connecticut. Louisiana has 64 'parishes'. The counties maintain public order through the sheriff and his deputies, who may, in a crisis, be drawn temporarily from willing citizens; in many states the counties maintain the smaller local highways; other functions are the granting of licences and the apportionment and collection of taxes. In a few states they also manage the schools.

The unit of local government in New England is the rural township, governed directly by the voters, who assemble annually or more often if necessary, and legislate in local affairs, levy taxes, make appropriations and appoint and instruct the local officials. Townships are grouped to form counties. Where cities exist, the township government is superseded by the city government.

Local elections and 94 referendums were held on 5 Nov. 1996.

DEFENCE

The President is C.-in-C. of the Army, Navy and Air Force.

The National Security Act of 1947 provides for the unification of the Army, Navy and Air Forces under a single Secretary of Defense with cabinet rank. The President is also advised by a National Security Council and the Office of Civil and Defense Mobilization.

The major components of the Department of Defense are the Office of the Secretary of Defense and the Joint Chiefs of Staff, who provide immediate staff assistance and advice to the Secretary; the departments of the Army, Navy and Air

Force, each separately organized under a civilian head (not of cabinet rank); and the unified and specified commands.

Defence expenditure in 1997 totalled US$272,955m. (US$1,018 per capita), representing 3·4% of GDP. The USA spent more on defence in 1997 than the next 7 biggest spenders combined. In 1997 the Quadrennial Defense Review (QDR) was implemented—a plan to transform US defence strategy and military forces. The 1999 defence budget continues to support the plan by funding relevant new technologies.

The USA is the world's largest exporter of arms, with sales in 1997 worth $20·9bn., or 45% of the world total. In 1987 sales had been worth more, at $23·6bn., but had only represented 26·7% of the total. The estimated number of active military personnel in 1998 was 1,483,000.

In accordance with START I—the treaty signed by the US and USSR in 1991 to reduce strategic offensive nuclear capability—the number of nuclear warheads (intercontinental ballistic missiles, submarine-launched ballistic missiles and bombers) in Jan. 1998 was approximately 7,250. In 1990 the number of warheads had been 12,718. Strategic nuclear delivery vehicles were made up as follows:

Intercontinental ballistic missiles: 500 Minuteman III; 50 Peacekeeper (MX).
Submarine-launched ballistic missiles: 192 Trident I (C-4); 240 Trident II (D-5).
Bombers: 71 B-52H; 21 B-2.

Army. *Secretary of the Army:* Louis Caldera.

Central Administration. The Secretary of the Army is the head of the Department of the Army. Subject to the authority of the President as C.-in-C. and of the Secretary of Defense, he is responsible for all affairs of the Department.

The Secretary of the Army is assisted by the Under Secretary of the Army, 5 Assistant Secretaries of the Army (Civil Works, Financial Management, Installations, Logistics and Environment, Manpower and Reserve Affairs, Research, Development and Acquisition), General Counsel, Administrative Assistant, Director for Information Systems for Command, Control, Communications and Computers, Inspector General, Auditor General, Chief of Legislative Liaison, Chief of Public Affairs, Director for Small and Disadvantaged Business Utilization, Chairman of the Army Reserve Forces Policy Committee and the Army Staff headed by the Chief of Staff, US Army. The Office of the Under Secretary of the Army includes a Deputy Under Secretary (Operations Research).

The Chief of Staff, Army, in his role as a member of the Joint Chiefs of Staff, takes part in the planning and supervision of the operational forces under the command of the Commanders-in-Chief. The Vice Chief of Staff assists and advises the Chief of Staff.

The Army General Staff is the principal element of the Army Staff and includes the Offices of the Chief of Staff, Deputy Chief of Staff for Operations and Plans, Deputy Chief of Staff for Personnel, Deputy Chief of Staff for Logistics, and Deputy Chief of Staff for Intelligence. Other elements of the Army Staff are the offices of the Judge Advocate General, Surgeon General, Chief of Chaplains, Chief, Army Reserve, Chief, National Guard Bureau, and Chief of Engineers.

The Army consists of the Active Army, the Army National Guard of the US, the Army Reserve and civilian workforce; and all persons appointed to or enlisted into the Army without component; and all persons serving under call or conscription, including members of the National Guard of the States, etc., when in the service of the US. The strength of the Active Army was (1 Aug. 1996) 495,000 (including 67,100 women).

The US Army Forces Command, with headquarters at Fort McPherson, Georgia, commands the Third US Army; 4 continental US Armies, and all assigned Active Army and US Army Reserve troop units in the continental US, the Commonwealth of Puerto Rico, and the Virgin Islands of the USA. The headquarters of the continental US Armies are: First US Army, Fort George G. Meade, Maryland; Second US Army, Fort Gillem, Georgia; Fifth US Army, Fort Sam Houston, Texas; Sixth US Army, Presidio of San Francisco, California. The US Army Training and Doctrine Command, with headquarters at Fort Monroe, Virginia, co-ordinates and integrates the total combat development effort of the Army as well as developing, managing, establishing and verifying the training of individuals of the US Army and authorized foreign nationals. The US Army Health Services Command, with

headquarters at Fort Sam Houston, Texas, provides health services in the continental US for the US Army and provides professional education and training for medical personnel of the US Army and authorized foreign national personnel. The US Army Materiel Command, with headquarters in Alexandria, Virginia, is responsible for US Army activities dealing with equipment development, procurement, delivery, supply and maintenance. The US Army Information Systems Communications Command, with headquarters at Fort Huachuca, Arizona, provides worldwide communication automation support to the Department of the Army and supports the Defense Communications Systems. The US Army Military District of Washington, with headquarters at Fort McNair, Washington, D.C., provides support to the Department of the Army and the Department of Defense at the seat of Government. The US Army Space Command, with headquarters in Colorado Springs (CO), is the Army component to the US Space Command.

Approximately 32% of the Active Army is deployed outside the continental USA. Several divisions, which are located in the USA, keep equipment in Germany and can be flown there in 48–72 hours. Headquarters of US Seventh and Eighth Armies are in Europe and Korea respectively.

Operational Commands and Weapons. The larger commands are the theater army and corps. The typical theater army may consist of a variable number of corps composed of combat forces of armour, infantry, air defense artillery, aviation and field artillery units; combat support forces of aviation, engineer, intelligence and signal elements; and combat service support forces. A typical corps consists of a variable number and mixture of infantry, mechanized infantry, armoured, air assault, or airborne divisions; one or more separate infantry, mechanized infantry or armoured brigades; one or more armoured cavalry regiments; corps artillery (155-mm howitzer, 203-mm howitzer, multiple launch rocket system (MLRS); corps air defense brigade *(Hawk, Chaparral, Patriot* and *Avenger battalions),* corps aviation brigade and combat support and combat service support forces.

US Army Divisions have a common base (containing command, divisional artillery, air defense artillery, combat support and combat service support units) aviation brigade, and a varying mixture of combat manoeuvre battalions (usually 9 or 10 in number in 3 brigades) to make up airborne, infantry, armoured, mechanized infantry and air assault divisions. Divisions can in this way be 'tailored' to fit a variety of strategic or tactical situations. A mechanized infantry division, with about 17,300 soldiers, may have 5 mechanized infantry battalions and 4 armoured battalions; an armoured division, with about 17,300 soldiers, may have 4 mechanized infantry battalions and 5 armoured battalions; an airborne division, with 13,100 soldiers, may have 9 infantry (airborne) battalions. The air assault division is a highly specialized force capable of battlefield helicopter operations for infantry, field artillery, air defense artillery and necessary support forces.

The 10,800-man light infantry divisions consist of 9 infantry battalions and offer rapid strategic force projection. Light divisions can operate in all environments and are general-purpose forces. Special operations forces consist of special forces, rangers, special operations aviation psychological operations, and civil affairs units. The units are designed, equipped, and trained for special missions.

Small arms include the M-9 (9mm pistol), the M-16 series rifle and the M-249 Squad Automatic Weapon both of which fire a 5·56-mm cartridge. The standard generalpurpose machine-gun is the M-60 (23 lb; 550 rounds of 7·62-mm per minute). Infantry weapons also include M-203 grenade launcher attachment for the M-16A1 rifle, which fire a 40-mm grenade up to 400 metres, the *TOW* and *Dragon* anti-tank missile systems, and the M-72 rocket, a light anti-tank weapon.

Combat vehicles of the US Army are the tank, armoured personnel carrier, infantry fighting vehicle, and the armoured command vehicle. The first-line tanks are the M1A1 Abrams tank with a 120mm main gun, and the M1 Abrams. The standard armoured infantry personnel carrier is the M2 Bradley Fighting Vehicle (BFV), which is replacing the older M113. Both carry a mechanized infantry squad, but the BFV mounts a 25-mm Bushmaster gun and *TOW* missile launchers. The M3 version of the BFV is being used as the ground scout vehicle in armoured cavalry regiments, armoured and mechanized infantry divisional cavalry squadrons and in scout platoons of armoured and mechanized infantry battalions.

The approved calibres of artillery are: light, 105-mm howitzer; medium, 155-mm howitzer; heavy, 203-mm howitzer. The Multiple Launch Rocket System (MLRS) is

a 227-mm rapid firerocket system used in a non-nuclear counterfire, reinforcing and deep fire roles. The 107-mm mortar, the 81-mm mortar and the 60-mm mortar are used by the combat manoeuvre elements. The 120-mm mortar will replace the 107-mm mortar. The *TOW* is the primary anti-tank weapon. Forward-area air-defence weapons, including the *Chaparral, Stinger* and *Avenger* 20-mm gun, provide the capability of low-altitude defence against high-performance aircraft.

The Army has three categories of missiles—surface-to-surface (field artillery) and surface-to-air (air defence artillery) and anti-tank. Surface-to-surface missiles are now limited to the Army Tactical Missile System (ATACMS; fielded) and the Tri-Service Stand-Off Attack Missile (TSSAM; EMD). ATACMS is a semi-ballistic missile capable of carrying a variety of warheads to ranges in excess of 150 km. Planned improvements include an extended range variant with a range of 300+ km. TSSAM is a joint Army, Air Force, Navy cruise missile programme. TSSAM carries the Bat submunition (anti-tank) to distances in excess of 200 km. Planned improvements modify Bat submunition for targets other than armour. Surface-to-air missiles, for air defence, are: *Patriot*, guided, conventional warhead, operational; *Hawk*, homing type, low-to-mid-altitude, field operational (product improvements continue to improve the effectiveness of the system); *Chaparral*, infra-red homing, low-altitude, forward area, operational (improvements to the basic system are under development); *Stinger*, hand-held or mobile-launched, infra-red homing, low-altitude, forward area, operational. Anti-tank missiles are: *TOW*, tube launched, optically tracked, wire guided, anti-armour, forward area, operational; *Hellfire*, laser-guided, anti-armour, operational and *Dragon*, wire-guided, medium anti-armour, forward area, operational.

The Army employs rotary- and fixed-wing aircraft as organic elements of its ground formations where their use is required on a full-time basis and their immediate and constant availability is essential. The front line commander exploits the benefits of aviation technology to perform traditional land battle tasks in the third dimension. This concept of airmobility for ground formation utilizes aerial vehicles as a highly integrated team to perform all five functions of land combat: reconnaissance, command and control, logistics and that inseparable combination, firepower and manoeuvre.

The Army has some 7,000 aircraft, all but about 400 of them helicopters. The principal types are 1,000 UH-1 Iroquois Huey and 1,600 UH-60 Black Hawk utility helicopters, 1,000 OH-58 Kiowa observation helicopters, 600 AH-1 Cobra and 700 AH-64 Apache attack helicopters, and 450 CH-47 Chinook cargo helicopters.

Enlistment, Terms of Service. Since 1974 the Army has operated an 'all volunteer' system making it, in effect, an all-regular force both regular and reserve components. Terms of service may be 2, 3, 4, 5 or 6 years. Men and women who enlist incur an 8-year obligation and must serve in the reserve components any part of the period not served on active duty. Over 95% of recruits enlisting in the Army have a high-school education and over 50% of the Army is married. Women serve in both combat support and combat service support units.

The National Guard is a reserve military component with both a state and a federal role. Enlistment is voluntary. The members are recruited by each state, but are equipped and paid by the federal government (except when performing state missions). Training is supervised by the active Army (FORSCOM), and unit organization parallels that for the active Army; training facilities are made available by the USA and each state. As the organized militia of the several states, the District of Columbia, Puerto Rico and the Territories of the Virgin Islands and Guam, the Guard may be called into service for local emergencies by the chief executives in those jurisdictions; and may be called into federal service by the President to thwart invasion or rebellion or to enforce federal law. In its role as a reserve component of the Army, the Guard is subject to the order of the President in the event of national emergency. In 1996 it numbered 499,800 (Army, 387,100; Air Force, 112,700).

The Army Reserve is designed to supply qualified and experienced units and individuals in an emergency. US Army Forces Command is charged with the command, support and training supervision of US Army Reserve units. Members of units are assigned to the Ready Reserve, which is subject to call by the President in case of national emergency without declaration of war by Congress. The Standby Reserve and the Retired Reserve may be called only after declaration of war or national emergency by Congress. In 1996 the Army Reserve numbered 596,700 (114,000 women).

Navy. *Secretary of the Navy:* John Dalton.

The Department of the Navy is administered under the Defense Secretary by the Secretary of the Navy, assisted by the Under Secretary and 4 Assistant Secretaries (for Financial Management; Installation and Environment; Manpower and Reserve Affairs; and Research, Development and Acquisition). Other divisions of the Department of the Navy are those of: Legislative Affairs, Information and the Judge Advocate General of the Navy.

The professional head of the Navy is the Chief of Naval Operations, whose staff includes the Vice Chief, 4 Deputy Chiefs responsible for Manpower and Personnel; Plans, Policy and Operations; Logistics; and Resources, Warfare Requirements and Assessments. There are 3 major staff directorates for Intelligence; Training; and Space and electronic warfare and 5 specialist divisions.

The Operating Forces include the Atlantic Fleet, divided between the 2nd fleet (home waters) and 6th fleet (Mediterranean) and the Pacific Fleet, similarly divided between the 3rd fleet (home waters), the 7th fleet (West Pacific) and the 5th fleet (Indian Ocean), which was formally activated in 1995 and maintained by units from both Pacific and Atlantic. All fleets include associated Fleet Marine Forces. Other operational commands include the Military Sealift Command, US Naval Forces Europe, the Mine Warfare Command and the Operational Test and Evaluation Force.

The authorized budget for the Department of the Navy (which includes funding both for the Navy and Marine Corps) for current and recent fiscal years: 1995, $78,200m.; 1996, $76,400m.; 1997, $79,370m.; 1998, $79,340m.

Personnel and fleet strength declined during the mid-1990s but are now stabilizing. The '600-ship battle force' planned in the late 1980s has reduced to such an extent that the eventual figure is likely to be about 335. In late 1997 it was 347. The Navy personnel total in 1997 was 388,760, including 52,178 women who are eligible to serve at sea in support ships.

The operational strength of the Navy at the end of the year indicated:

Ships in the inactive reserve are not included in the table, but those serving as Naval Reserve Force training ships are. Amphibious Carriers are those ships of the WASP, Tarawa, and Iwo Jima classes capable of operating AV-8 Harrier-type aircraft as well as helicopters.

Submarine Forces. A principal part of the US naval task is to deploy the seaborne strategic deterrent from nuclear-powered ballistic missile-carrying submarines (SSBN), of which there were, in 1997, 18, all of the Ohio class. These ships, the first of which entered service in 1981, are of 18,700 tons submerged displacement, and capable of speeds in excess of 25 knots. 10 of the 18 submarines are designed to deploy the Trident-2 D-5 missile, with a range of 4,000 nautical miles, carrying as many as 24 warheads with substantially improved targeting accuracy over the Trident-1 C-4 missile, which is deployed in the first 8 ships of the class, also with up to 24 warheads. The first submarine deployed the Trident-2 operationally in 1990. Pending ratification of the START II treaty, 4 of the first 8 ships may be retrofitted with the Trident-2. The remaining 4 ships will be removed from strategic service and may be employed in a non-strategic role. The last of the Benjamin Franklin class previous generation SSBNs was withdrawn in 1995.

The listed total of 67 nuclear-powered attack submarines (SSN) includes the first of 3 new Seawolf class and 54 of the Los Angeles class (7,040 tons) in 3 major batches: a basic design (23 ships) completed 1976–85, a small group of 8 ships additionally equipped with vertical-launch missile tubes for Tomahawk cruise missiles completed 1985–89, and the remaining 23 ships, the last of which was completed in 1996. These latter are known as the 'Improved' Los Angeles class

(6881), incorporating vertical-launch cruise missile tubes, a new combat control system, and several important additional technical modifications. There are also 9 Sturgeon class (5,040 tons) completed 1967–75, and 3 other submarines.

Surface Combatant Forces. The surface combatant forces are comprised of modern cruisers, destroyers and frigates equipped with standoff strike weapons, anti-air missiles, guns and anti-submarine torpedoes. These ships provide multi-mission capabilities to achieve maritime dominance in the crowded and complex littoral warfare environment.

The cruiser force consists of 27 Ticonderoga class ships. These vessels, commissioned between 1983 and 1993, are 9,600 tons, capable of in excess of 30 knots, equipped with the highly capable Aegis weapon system and armed with medium range Standard Missile (SM2-MR) surface-to-air missiles (SAM). They have two 127mm guns, 8 Harpoon anti-surface ship missiles and 2 SH-60B Seahawk, Light Airborne Multipurpose System (LAMPS-III) helicopters. All but the first 5 ships of the class are equipped with two 61-cell vertical launch systems, designed to launch the Standard Missile (SM2-MR), Vertical Launched Anti-Submarine Rocket (ASROC) and Tomahawk land attack cruise missile.

There are 24 guided-missile Arleigh Burke Aegis class destroyers, 24 Spruance class destroyers, and 38 (28 active and 10 in the reserve force) Oliver Hazard Perry class guided missile frigates.

The surface combatant force is undergoing a 'measured' revolution into the 21st century. Fundamental changes are occurring in Land Attack and Theatre Ballistic Missile Defence missions. The Extended Range Guided Munition (ERGM) will increase naval fires from 21 km to a precise 113 km. In the final testing stages are new land attack missiles, some of which are hypersonic. The Tomahawk missile system has been completely reconfigured since the Gulf War. The Tactical Tomahawk extends naval fires beyond the littoral. Area theatre ballistic missile defence will be achieved through the evolution of the SM-2 block IV standard missile and deployment of a theatre-wide capability is on the near horizon with the SM-3. Through these developments, and those which are dramatically increasing network capacity, the Navy's ability to mass volume precision fires from distributed sources is now a reality.

Aircraft carriers. There are 7 Nimitz class carriers of about 90,000 tons completed between 1975 and 1995, nuclear-powered and capable of 33 knots. The USS *Enterprise,* completed in 1961, displacing 76,000 tons, was the prototype nuclear-powered carrier and is also capable of 33 knots. The 2 ships of the Kitty Hawk and 1 of the John F. Kennedy classes are about 80,000 tons, were completed between 1961 and 1968, and represent the last oil-fuelled carriers built by the US Navy. The force is completed by the remaining ship of the Forrestal class, USS *Independence,* completed in 1959, of about 82,000 tons full load. All carriers deploy an air group which comprises on average 2 squadrons each of 10 F-14 Tomcat fighters and 3 squadrons each of 12 F/A-18 Hornet fighter/ground attack aircraft. They also carry a squadron of 4 E-2C Hawkeye early warning aircraft, 4 KA-6 airborne tankers, 4 EA-6B Prowler electronic combat aircraft, 6 S-3B Viking anti-submarine aircraft and 6 SH-3D Sea King or SH-60F Oceanhawk anti-submarine helicopters.

Amphibious Warfare. Amphibious capability comprises 42 specialist ships. The 5 Wasp (LHD-1) class and the 5 Tarawa (LHA-1) class ships are in many respects similar to the vertical/short take-off and landing carriers in other principal navies and are capable of sea control tasks. The Wasp class, completed from 1989 to 1995 and still building, are of 41,200 tons, capable of 23 knots, equipped with an air group of some 6-8 Harrier AV-8B aircraft, and up to 42 mixed helicopters, and accommodating 1,900 troops. The 5 ships of the Tarawa class are of 40,000 tons, were completed between 1976 and 1981, deploy a similar air group and carry 1,700 troops. The 1 remaining Iwo Jima class ship is also capable of operating vertical/short take-off and landing aircraft but does not normally do so. Dating from the 1960s, it is of 18,800 tons, is capable of 21 knots and normally carries 20 mixed helicopters and accommodates 1,740 troops. Additionally there are 2 amphibious command ships, 16 dock-landing ships, 11 transport dock ships and 2 tank-landing ships. There are 129 amphibious craft including 91 air-cushion landing craft (hovercraft) and 38 others, and several hundred minor personnel and vehicle transports. The total oceanic lift capability of the amphibious forces amounts to over

50,000 personnel, 1,000 main battle tank equivalents, and operating facilities for about 180 helicopters.

Underway Support. The ships of Military Sealift Command's Naval Fleet Auxiliary Force—composed of 3 ammunition ships, 6 combat stores ships, 2 hospital ships, 12 underway replenishment oilers and 7 ocean-going tugs—provide underway replenishment services to US Navy ships worldwide, alleviating the need for them to return to port for supplies. Providing fuel, food, ammunition, mail, spare parts and other supplies, these NFAF ships enable the Navy fleet to operate at the highest operational tempo possible.

Military Sealift Command also provides operating platforms and service for unique US military and federal government missions. Both civil service and contractor-employed mariners operate an acoustic survey ship, a cable repair ship; 3 counter-drug surveillance ships; 1 missile range instrumentation ship; 3 navigation test/launch area support ships; 8 oceanographic surveillance ships; and 9 oceanographic surveying ships. Technical work, research and communications are conducted by embarked military personnel, civilian scientists and related technicians.

In addition, Military Sealift Command operates 34 prepositioning ships—which include tankers, freighters, large, medium-speed, roll-on/roll-off ships (LMSRs)—which improve US capabilities to deploy forces in any area of conflict or contingency. The Prepositioning Program provides support to the US Marine Corps, Navy, Army, Air Force and the Defense Logistics Agency around the globe.

Sealift support for deployment, supplies and redeployment to Joint Forces around the world is routinely provided through MSC's surge sealift capability, employing 8 fast sealift ships and 96 Ready Reserve Force ships. MSC's ability to quickly contract for unique shipping requirements allows MSC to be responsive to contingencies in every region of the world.

Military Sealift Command employs approximately 7,500 people worldwide, the vast majority of whom are assigned to seagoing jobs. MSC's workforce consists mainly of civil service personnel, but includes military and contractor personnel.

Shipbuilding. Major warship building yards involved in the current building programme are located at Groton, Conn. (submarines), Newport News, Va. (submarines and aircraft carriers), Pascagoula, Miss. (destroyers and amphibious ships), Bath, Me. (destroyers), New Orleans, La. (amphibious and auxiliary ships) and San Diego, Ca. (auxiliary ships).

Naval Aviation. The principal function of the naval aviation organization (72,500 strong in 1997) is to train and provide combat ready aviation forces (both sea and shore-based consisting of 10 Air Wings maintained for service in Aircraft Carriers; maritime patrol and helicopter forces; and support and training aircraft). Carrier Air Wings usually consist of 70 fixed-wing and 6 rotary-wing aircraft. In addition, 1 reserve carrier air wing is available. The main carrier-borne combat aircraft in the current inventory are 230 F-14 fighters, 770 F/A-18 Hornet dual-purpose fighter/attack aircraft, 117 S-3B Viking anti-submarine aircraft and 126 EA-6B Prowler electronic warfare aircraft. Combat support roles are performed by 70 E-2C Hawkeye airborne early-warning aircraft, 16 ES-3 electronic warfare/intelligence aircraft and 115 SH-60F Seahawk helicopters for inner-zone anti-submarine defence. SH-60B Seahawk helicopters are routinely embarked on various surface combatants. The SH-60B force consists of approximately 165 aircraft. The principal tasks of the shore-based elements of US naval aviation are maritime reconnaissance and patrol, and anti-submarine warfare, for which there are 12 active and 8 reserve P-3C Orion squadrons (240 aircraft). Additional sea/shore-based tasks include electronic warfare (12 EP-3 aircraft) and mine countermeasures accomplished by a force of 40 MH-53 helicopters. Finally there are some 700 training aircraft (both fixed-wing and helicopters) and other aircraft for transport and other miscellaneous duties.

The Marine Corps. While administratively part of the Department of the Navy, the Corps ranks as a separate armed service, with the Commandant serving in his own right as a member of the Joint Chiefs of Staff, and responsible directly to the Secretary of the Navy. Its strength had stabilized at 174,000 by late 1997.

The role of the Marine Corps is to provide specially trained and equipped amphibious expeditionary forces. It is organized into Marine Forces Atlantic,

Marine Forces Pacific and Marine Forces Reserve. Nearly 65% of the active duty force is assigned to Marine Forces Atlantic and Marine Forces Pacific. The commanders of Marine Forces Atlantic and Pacific provide the regional Commanders-in-Chief with versatile forces with which to respond to their respective needs. In peacetime, Marine Expeditionary Units are permanently deployed afloat in the Eastern Atlantic/Mediterranean and the West Pacific/Indian Ocean. The principal equipment of the Corps consists of 420 M-1A1 Abrams tanks, 747 Light Armoured Vehicles, primarily of the LAV-25 variant which mounts a 25 mm chain gun, 1,320 amphibious assault vehicles and about 800 artillery pieces of calibres between 105 mm and 155 mm. Additional heavy equipment for US-based Marine forces units, beyond that which can be embarked in the amphibious shipping, is provided in 3 squadrons each of 13 large cargo ships prepositioned at Diego Garcia (Indian Ocean), the Pacific, and in the Mediterranean. In addition the Corps includes an autonomous aviation element numbering 34,000 in 1998 with some 400 combat aircraft and 515 helicopters. There are 280 F/A 18 Hornet, 180 AV-8B Harriers, 25 EA-6B electronic warfare aircraft, 75 KC-130 tankers, and a miscellany of other support and training aircraft. Helicopters include 240 CH-46E and 175 CH-53 transport, as well as 180 AH-1W Cobra attack helicopters of various types. Harriers and helicopters are normally employed afloat on amphibious assault ships. The Hornets and other fixed-wing aircraft are normally based ashore, but may be embarked on aircraft carriers, given the operational need.

Under development is the MV-22 Osprey, a tilt-rotor aircraft which can take off and land vertically like a helicopter, but whose twin engines tilt completely to the front for forward flight. It is intended to replace the Corps' fleet of CH-46E medium transport helicopters. Estimated cost of the development programme was $36bn. and the delivery date for the aircraft is 2001.

The US Coast Guard. The Coast Guard operates under the Department of Transportation in time of peace and as a part of the Navy in time of war or when directed by the President. The act of establishment stated the Coast Guard 'shall be a military service and branch of the armed forces of the United States at all times'. It comprises 250 ships including cutters of destroyer, frigate, corvette and patrol vessel types, 2 large Polar class icebreakers, and various auxiliaries and tenders, as well as over 1,400 rescue and utility craft. It also maintains 74 fixed-wing aircraft and 137 helicopters. The workforce, in 1996, was made up of over 34,000 active duty personnel augmented by 7,340 reserve and 35,638 auxiliary members.

The Coast Guard missions include maintenance of aids to navigation, boating safety, defence operations, environmental response (oil spills), ice operations, maritime law enforcement, marine inspection, marine licensing, marine science, port safety and security, search and rescue and waterways management.

On an average Coast Guard day, the service saves 12 lives, conducts 142 Search and Rescue cases and 128 maritime law-enforcement boardings, responds to 34 oil or hazardous chemical spills, seizes over $8m. in illegal contraband, interdicts 22 illegal immigrants and services 150 aids to navigation.

Air Force. *Secretary of the Air Force:* Dr Sheila E. Widnall.

The Department of the Air Force was activated within the Department of Defense on 18 Sept. 1947, under the terms of the National Security Act of 1947. It is administered by the Secretary of the Air Force, assisted by an Under Secretary, a Deputy for International Affairs and 4 Assistant Secretaries (Acquisition; Space; Manpower, Reserve Affairs, Installations and Environment; and Financial Management and Comptroller). The USAF, under the administration of the Department of the Air Force, is supervised by a Chief of Staff, who is a member of the Joint Chiefs of Staff. He is assisted by a Vice Chief of Staff, Assistant Vice Chief of Staff, 4 Deputy Chiefs of Staff (Personnel; Plans and Operations; Logistics; Communications and Information) and an Assistant Chief of Staff for Intelligence.

The USAF consists of active duty Air Force officers and enlisted personnel, civilian employees, the Air National Guard and the Air Force Reserve. The USAF has the mission to defend the USA through control and exploitation of air and space. For operational purposes the service is divided into 8 major commands, 37 field operating agencies and 3 direct-reporting units. Under these organizations there are 88 major and 89 minor facilities worldwide including National Guard and Reserve bases.

Major commands are organized on a functional basis in the USA and a geographic basis overseas. They accomplish designated phases of Air Force worldwide activities. They also organize, administer, equip and train their subordinate elements for the accomplishment of assigned missions. Major commands are generally assigned specific responsibilities based on functions. In descending order of command, elements of major commands include numbered air forces, wings, groups, squadrons and flights.

The bulk of the combat forces are grouped under the Air Combat Command, which controls strategic bombing, tactical strike, air defence and reconnaissance assets in the USA. The Air Mobility Command provides air lift, air refuelling, special air mission and aeromedical evacuation for US forces. The newest major command is the Air Education and Training Command which provides a wide variety of training from initial to advanced degree-granting education.

The other major commands are the Air Force Materiel Command, Air Force Special Operations Command, Air Force Space Command, Pacific Air Forces and United States Air Forces in Europe. The Pacific (PACAF) and European (USAFE) are responsible for offensive and defensive air operations in the Pacific and Asia, and Europe and the Mediterranean, respectively.

The field operating agencies are (AF = Air Force): the AF Audit Agency, AF Base Disposal Agency, AF Center for Environmental Excellence, AF Civil Engineering Support Agency, AF Civilian Personnel Management Center, AF Combat Operations Staff, AF Command, Control, Communications and Computer Agency, AF Cost Analysis Agency, AF Flight Standards Agency, AF Frequency Management Agency, AF Historical Research Agency, AF Inspection Agency, AF Intelligence Command, AF Intelligence Support Agency, AF Legal Services Agency, AF Logistics Management Agency, AF Management Engineering Agency, AF Medical Operations Agency, AF Medical Support Agency, AF Military Personnel Center, AF Morale, Welfare, Recreation and Services Agency, AF News Agency, AF Office of Special Investigations, AF Program Executive Office, AF Real Estate Agency, AF Review Boards Agency, AF Safety Agency, AF Security Police Agency, AF Studies and Analyses Agency, AF Technical Applications Center, Air Reserve Personnel Center, Air Weather Service, Center for Air Force History, Joint Services Survival, Evasion, Resistance and Escape Agency, and 7th Communications Group.

The direct-reporting units are: AF Academy, AF District of Washington and AF Operational Test and Evaluation Center.

Air Force aircraft are categorized as bombers, fighters, attack and observation aircraft, reconnaissance and special duty aircraft, transports and tankers, trainers and helicopters. The bombers are the B-1B Lancer, a supersonic inter-continental, nuclear and conventional aircraft; the B-2A, a subsonic, multi-role strategic bomber; and the B-52G/H Stratofortress, which has been the primary manned strategic bomber for over 35 years.

In the fighter category are the F-15 Eagle for air superiority tactical missions; the F-16 Fighting Falcon, a compact, multi-role fighter and attack aircraft; the F-117A, the world's first operational aircraft to exploit low-observable stealth technology; the A-10/OA-10 Thunderbolt II attack aircraft; and the AC-130H/U for counter-insurgency.

Under the reconnaissance and special duty heading are the U-2R/S for reconnaissance; the EC-130E/H Commando/Compass Call and the EF-111A Raven for electronic countermeasures; the E-3B/C Sentry, the E-4B and E-8 Joint Surveillance and Target Attack Radar System for command and control functions; the E-9A for telemetry relay; and the WC-130E/H for weather reconnaissance.

The primary transporters are the C-5A/B Galaxy for long-range heavy loads; the C-9A/C Nightingale for aeromedical evacuation; the C-17A Globemaster III for cargo and tactical air lift, the C-141B Starlifter for long-range troop and cargo; and the C-130 Hercules for theatre tactical air lift. The 2 refuelling aircraft types are the KC-135 Stratotanker and the KC-10A Extender.

Strategic missiles in the Air Force's inventory include the LGM-30G Minuteman, the LGM-118A Peacekeeper, the AGM-69A Short-Range Attack Missile and the AGM-86B/C Air-Launched Cruise Missile.

In 1996 the Air Force had approximately 390,000 military personnel. Approximately 60,000 Air Force members are women. Since 1991 women have

been authorized to fly combat aircraft, but not until 1993 were they allowed to fly fighters.

National Income. The Bureau of Economic Analysis of the Department of Commerce prepares detailed estimates on the national income and product. In Jan. 1996, the Bureau revised these accounts back to 1959 (eventually 1929), notably by introducing a new featured measure of real output and prices. The principal tables are published monthly in *Survey of Current Business;* the complete set of national income and product tables are published in the *Survey* normally each Aug., showing data for recent years. *The National Income and Product Accounts of the United States* (1929–94, 2 vols.) were published in 1998. The conceptual framework and statistical methods underlying the accounts are described in National Income and Product Account (NIPA) Methodology Papers 1–6. Subsequent limited changes are described in the Jan.–Feb. 1996, Aug. 1997, Aug. 1998, and Sept. 1998 *Surveys.*

[1]In 1996 the chain-weighted method of estimating GDP replaced that of constant base-year prices. In chain-weighting the weights used to value different sectors of the economy are continually updated to reflect changes in relative prices.

Currency. The unit of currency is the *dollar* (USD) of 100 *cents*. Notes are issued by the 12 Federal Reserve Banks, which are denoted by a branch letter (A = Boston, MA; B = New York, NY; C = Philadelphia, PA; D = Cleveland, OH; E = Richmond, VA; F = Atlanta, GA; G = Chicago, IL; H = St Louis, MO; I = Minneapolis, MN; J = Kansas City, MO; K = Dallas, TX; L = San Francisco, CA).

Inflation was 2·3% in 1997 and was forecast to drop to 1·6% in 1998. Foreign exchange reserves in Feb. 1998 were US$31,230m. Gold reserves in Feb. 1998 were 261·7m. troy oz. The USA has the most gold reserves of any country, and more than the combined reserves of the next three (Germany, Switzerland and France). Total money supply in Dec. 1997 was $1,281bn.

Banking and Finance. The Federal Reserve System, established under The Federal Reserve Act of 1913, comprises the Board of 7 Governors, the 12 regional Federal Reserve Banks with their 25 branches, and the Federal Open Market Committee. The 7 members of the Board of Governors are appointed by the President with the consent of the Senate. Each Governor is appointed to a full term of 14 years or an unexpired portion of a term, one term expiring every 2 years. The Board exercises broad supervisory authority over the operations of the 12 Federal Reserve Banks, including approval of their budgets and of the appointments of their presidents and first vice presidents; it designates 3 of the 9 directors of each Reserve Bank including the Chairman and Deputy Chairman. The *Chairman* of the Federal Reserve Board is appointed by the President for 4-year terms. The Chairman for 1996–2000 is Alan Greenspan. The Board has supervisory and regulatory responsibilities over banks that are members of the Federal Reserve System, bank holding companies, bank mergers, Edge Act and agreement corporations, foreign activities of member banks, international banking facilities in the USA, and activities of the US branches and agencies of foreign banks. Legislation of 1991 requires foreign banks to prove that they are subject to comprehensive consolidated supervision by a regulator at home, and have the Board's approval to establish branches, agencies and representative offices. The Board also assures the smooth functioning and continued development of the nation's vast payments system. Another area of the Board's responsibilities involves the implementation by regulation of major federal laws governing consumer credit.

The 12 members of the Federal Open Market Committee (FOMC) include the 7 members of the Board of Governors and 5 of the 12 Federal Reserve Bank presidents. The latter serve 1-year terms on the FOMC in rotation except for the President of the Federal Reserve Bank of New York, who is a permanent member. The FOMC has an essential role in the formulation of monetary policy. It influences credit market conditions, money and bank credit, by buying or selling US Government securities; and it also oversees system operations in foreign currencies for the purpose of helping to safeguard the value of the dollar in international exchange markets and facilitating co-operation and efficiency in the international monetary system. The Board of Governors also influences credit conditions through

powers to set reserve requirements, to approve discount rates at Federal Reserve Banks, and to fix margin requirements on stock-market credit.

The Reserve Banks advance funds to depository institutions, issue Federal Reserve notes (the only form of currency apart from coins), act as fiscal agent for the Government, and afford nationwide cheque-clearing and fund transfer arrangements. They may increase or reduce the country's supply of reserve funds by buying or selling Government securities and other obligations at the direction of the FOMC. The purchase and sale of securities in the open market is conducted by the Federal Reserve Bank of New York. Their capital stock is held by the member banks, but it carries no voting rights except in the election of directors.

From 1968, the Congress passed a number of consumer financial protection acts, the first of which was the Truth in Lending Act, for which it has directed the Board to write implementing regulations and assume partial enforcement responsibility. Others include the Equal Credit Opportunity Act, Home Mortgage Disclosure Act, Consumer Leasing Act, Fair Credit Billing Act, Truth in Savings Act and Electronic Fund Transfer Act. To manage these responsibilities the Board has established a Division of Consumer and Community Affairs. To assist it, the Board consults with a Consumer Advisory Council, established by the Congress in 1976 as a statutory part of the Federal Reserve System.

Another statutory body, the Federal Advisory Council, consists of 12 members (one from each district); it meets in Washington four times a year to advise the Board of Governors on economic and banking developments. Following the passage of the Monetary Control Act of 1980, the Board of Governors established the Thrift Institutions Advisory Council to provide information and views on the special needs and problems of thrift institutions. The group is comprised of representatives of mutual savings banks, savings and loan associations, and credit unions.

All depository institutions (commercial and savings banks, savings and loan associations, credit unions, US agencies and branches of foreign banks, and Edge Act and agreement corporations) must meet reserve requirements set by the Federal Reserve and hold the reserves in the form of vault cash or deposits at Federal Reserve Banks.

Banks which participate in the federal deposit insurance fund have their deposits insured against loss up to $100,000 for each account. The fund is administered by the Federal Deposit Insurance Corporation established in 1933; it obtains resources through annual assessments on participating banks. All members of the Federal Reserve System are required to insure their deposits through the Corporation, and non-member banks may apply and qualify for insurance.

The Federal Deposit Insurance Corporation Improvement Act of 1992 originated with bank reform initiatives. It imposed new capital rules on banks, new reporting requirements and a code of 'safety and soundness' standards. The main aim of the Act is to reduce risk through rigorous enforcement of capital requirements. Regulators are required to take action where banks fail to observe these standards.

In June 1997 the 10 major banks in terms of assets ($1,000m.) were: Chase Manhattan, 281; Citibank, 254; Bank of America, 224; Morgan Guaranty, 189; NationsBank, 159; Bankers Trust, 99; Wells Fargo, 92; First Union, 84; Keybank, 66; BankBoston; 57.

The key stock exchanges are the New York Stock Exchange (NYSE), the Nasdaq Stock Exchange (NASDAQ) and the American Stock Exchange (ASE). There are several other stock exchanges, in Philadelphia, Boston, San Francisco (Pacific Stock Exchange) and Chicago, although trading is very limited in them.

Weights and Measures. The US Customary System derives from the British Imperial System. It differs in respect of the *gallon* (= 0·83268 Imperial gallon); *bushel* (= 0·969 Imperial bushel); *hundredweight* (= 100 lbs); and the *short* or *net ton* (= 2,000 lbs).

ENERGY AND NATURAL RESOURCES

Electricity. Installed capacity in 1997 was 709·9m. kW. In 1997, 20·1% of electricity was produced by 107 nuclear reactors. (The last one to begin commercial operation was in 1996.) Electricity production in 1997 was the highest in the world, at 3,122,522m. kWh. Consumption per capita in 1996 was an estimated 11,681 kWh.

Oil and Gas. Crude oil production (includes natural gas plant liquids and other liquids):1995, 8,626,000 bbls. a day; 1996, 8,607,000 bbls. a day; 1997, 8,611,000 bbls. a day. Proven reserves were 22,546m. bbls. at 31 Dec. 1997. Output (1997, preliminary) was valued at $40·34bn. Dry natural gas production, 1997, was 18,901,423m. cu. ft with marketed production 19,865,182m. cu. ft, valued at $48·13bn. (provisional). The USA produced 9·7% of the world total oil output in 1997.

Coal. Demonstrated coal reserves were 507·7bn. short tons at 1 Jan. 1997. Output in 1997 (in 1m. short tons): 1,089·9 including bituminous coal, 653·8; sub-bituminous coal, 345·1; lignite, 86·3; anthracite, 4·7. Output from opencast workings, 669·3; underground mines, 420·7. Value of total output, 1997 (preliminary), $19·80bn.

Water. The total area covered by water is approximately 181,518 sq. miles: comprising 78,937 sq. miles inland; 42,528 sq. miles coastal; 60,052 great lakes.

Non-Fuel Minerals. The USA is wholly dependent upon imports for columbium, bauxite, mica sheet, manganese, strontium and graphite, and imports over 80% of its requirements of industrial diamonds, fluorspar, platinum, tantalum, tungsten, chromium and tin.

Total value of non-fuel minerals produced in 1995 was $38,500m. ($33,464m. in 1990). Details of some of the main minerals produced are given in the following tables.

Agriculture. Agriculture in the USA is characterized by its ability to adapt to widely varying conditions, and still produce an abundance and variety of agricultural products. From colonial times to about 1920 the major increases in farm production were brought about by adding to the number of farms and the amount of land under cultivation. During this period nearly 320m. acres of virgin forest were converted to

crop land or pasture, and extensive areas of grasslands were ploughed. Improvident use of soil and water resources was evident in many areas.

During the next 20 years the number of farms reached a plateau of about 6·5m., and the acreage planted to crops held relatively stable around 330m. acres. The major source of increase in farm output arose from the substitution of power-driven machines for horses and mules. Greater emphasis was placed on development and improvement of land, and the need for conservation of basic agricultural resources was recognized. A successful conservation programme, highly co-ordinated and on a national scale—to prevent further erosion, to restore the native fertility of damaged land and to adjust land uses to production capabilities and needs—has been in operation since early in the 1930s.

Since the Second World War the uptrend in farm output has been greatly accelerated by increased production per acre and per farm animal. These increases are associated with a higher degree of mechanization; greater use of lime and fertilizer; improved varieties, including hybrid maize and grain sorghums; more effective control of insects and disease; improved strains of livestock and poultry; and wider use of good husbandry practices, such as nutritionally balanced feeds, use of superior sites and better housing. During this period land included in farms decreased slowly, crop land harvested declined somewhat more rapidly, but the number of farms declined sharply.

All land in farms totalled less than 500m. acres in 1870, rose to a peak of over 1,200m. acres in the 1950s and declined to 968m. acres in 1997, even with the addition of the new States of Alaska and Hawaii in 1960. The number of farms declined from 6·35m. in 1940 to 2·06m. in 1997, as the average size of farms doubled. The average size of farms in 1997 was 471 acres, but ranged from a few acres to many thousand acres. In 1997 the total value of land and buildings was $912,344m. The average value of land and buildings per acre in 1998 was $1,000.

At the 1990 census 66,964,000 persons (22·5% of the population) were rural, of whom 4,591,000 (under 2%) lived on farms. In 1997 there were an estimated 1,317,000 farm operators and managers and 2,030,000 persons in other agricultural and related occupations, of which 796,000 were farm workers.

Forestry. Forests covered a total area of 525m. acres (212m. ha) in 1995, or 23% of the land area. The gross area of national forest was 231·7 acres in 1996, of which 191·6m. acres were federally owned ('National Forest system'). Between 1990 and 1995 new planting resulted in the total area under forests growing by 7·2m. acres (2·9m. ha), the largest increase in any country in the world over the same period. In 1992 there were 490m. acres of timberland (97m. acres federally owned or managed, 35m. acres state, county or municipality owned, 358m. acres private). Timber production was 503·41m. cu. metres (17,777·76m. cu. ft) in 1995. The USA is both the world's largest producer of roundwood (15% of the world total in 1995) and the largest exporter (17% of the world total in 1995). Lumber consumption in 1996 reached its highest level since 1987 with just over 9·2bn. cu. ft being consumed, including 2·6bn. cu. ft of imports.

There are 624 designated wilderness areas throughout the USA, covering a total of 104m. acres (42m. ha). More than half of the areas are in Alaska (56%), followed by California (13%), Arizona, Washington and Idaho.

Fisheries. In 1996 the domestic catch was 9,565m. lbs (4,338,588 tonnes), valued at $3,487m. (including 1,292m. lbs of shellfish valued at $1,695·7m.). Main species landed in terms of value ($1m.): shrimp, 509; crab, 426·7; salmon, 368·7; Alaska pollock, 238·1; flounder, 154. Disposition of the domestic catch (1m. lbs): fresh or frozen, 7,054; tinned, 678; cured, 93; reduced to meal or oil, 1,740. The USA's imports of fishery commodities in 1995 ($7·14bn.) were exceeded only by those of Japan, and exports in 1995 ($3·38bn.) were exceeded only by those of Thailand.

In the period 1991–93 the average American citizen consumed 47·2 lbs (21·4 kg) of fish and fishery products a year, compared to an average 28·7 lbs (13 kg) for the world as a whole. In 1996 per capita consumption of fish and shellfish was 14·7 lbs (6·7kg).

Tennessee Valley Authority. Established by Act of Congress, 1933, the TVA is a multiple-purpose federal agency which carries out its duties in an area embracing some 41,000 sq. miles in the 7 Tennessee River Valley states: Tennessee, Kentucky, Mississippi, Alabama, North Carolina, Georgia and Virginia. In addition, 76 counties outside the Valley are served by TVA power distributors. Its 3 directors are appointed by the President, with the consent of the Senate; headquarters are in Knoxville (TN). Under a policy announced in Dec. 1994 the TVA is subject to a debt ceiling of $30,000m. Total debt in 1994 was $26,000m.

The primary task of the TVA was the multipurpose development of the Tennessee River for flood control, navigation, and electric power production. In 1994 three nuclear reactors were in operation.

The TVA has also contributed to controlling erosion on the land, introducing better fertilizers and new farming practices, eradicating malaria, demonstrating ways electricity could lighten the burdens in the home and increase production on the farm, and the creation of potential job-producing enterprises.

INDUSTRY

The following table presents industry statistics of manufactures as reported at various censuses from 1909 to 1987 and from the Annual Survey of Manufactures for years in which no census was taken.

The annual Surveys of Manufactures carry forward the key measures of manufacturing activity which are covered in detail by the Census of Manufactures. The large plants in the surveys account for approximately two-thirds of the total employment in operating manufacturing establishments in the USA.

The number of employees in the manufacturing industry in 1997 was approximately 18,657,000. Employees worked an average of 42 hours per week for an average weekly income of $533.

The leading industries in 1995 in terms of value added by manufacture (in $1m.) were: motor vehicles and car bodies, 55,696; semiconductors and related devices, 51,272; motor vehicle parts, 43,084; pharmaceutical preparations, 41,186.

In 1997 principal commodities produced (by value of shipments, in $1m.) included: industrial machinery and equipment, 408,860; electronic components and accessories, 351,554; motor vehicles and parts, 346,606; petroleum and coal products, 177,314.

Net profits (1997) for manufacturing corporations reached a record $335bn. before tax ($247bn. after tax).

Iron and Steel: Output of the iron and steel industries (in 1m. net tons of 2,000 lb.), according to figures supplied by the American Iron and Steel Institute, was:

	Pig-iron (including ferro-alloys)	*Raw steel*	*Steel by method of production*[1] *Electric*	*Basic Oxygen*

1997	54·7	108·6	47·5	61·1

[1]The sum of these 2 items should equal the total in the preceding column; any difference is due to rounding.

In 1997 companies comprising 65% of raw steel production employed 83,466 wage-earners who worked an average of 42·7 hours per week and earned an average

of $23·90 per hour: total employment costs were $6,465m. and total employment costs for 28,359 salaried employees were $2,378m.

Labour. The Bureau of Labor Statistics estimated that in 1998 the civilian labour force was 137,673,000 (67·1% of those 16 years and over), of whom 131,463,000 were employed and 6,210,000 (4·5%) were unemployed. Employment by industry in 1998:

A total of 29 strikes and lockouts of 1,000 workers or more occurred in 1997, involving 339,000 workers and 4·5m. idle days; the number of idle days was 0·01% of the year's total working time of all workers.

The Federal Mediation and Conciliation Service, the National Labor Relations Board, the National Mediation Board and the National Railroad Adjustment Board provide formal machinery for the settlement of labour disputes.

On 1 Sept. 1997 the federal hourly minimum wage was raised from $4·75 to $5·15 an hour. On 1 Oct. 1996 it had been raised from $4·25 to $4·75 an hour, the first time it had been raised since 1991.

Labour relations are legally regulated by the National Labor Relations Act, amended by the Labor–Management Relations (Taft–Hartley) Act, 1947 as amended by the Labor–Management Reporting and Disclosure Act, 1959, again amended in 1974, and the Railway Labor Act of 1926, as amended in 1934 and 1936.

Trade Unions. The labour movement comprises 78 national and international labour organizations plus a large number of small independent local or single-firm labour organizations. The American Federation of Labor and the Congress of Industrial Organizations merged into one organization, the AFL–CIO, in 1955, with 13m. members in 1995. Its president is John Sweeney, elected 1995.

Unaffiliated or independent labour organizations, inter-state in scope, had an estimated total membership excluding all foreign members (1993) of about 3m.

Labour organizations represented 15·4% (17·9m.) of wage and salary workers in 1998; a newly developing 'associative unionism' is not based on the workplace, but provides representation for employees which is portable throughout their work history; 13·9% (16·2m.) were actual members of unions. 37% of employees in the public sector, and 10% in the private sector, were members of unions in 1998. Strongholds of organized labour are, industry-wise, iron and steel, railways, coal mining and car building; region-wise, East coast cities and the mid-West industrial belt.

INTERNATIONAL TRADE

The North American Free Trade Agreement (NAFTA) between the USA, Canada and Mexico was signed on 7 Oct. 1992 and came into effect on 1 Jan. 1994. The UK has had 'most-favoured-nation' status since 1815. In 1997 foreign direct investment totalled $681,651m., the leading investor still being the United Kingdom.

Roads. On 31 Dec. 1996 the total public road mileage was 3,933,985 miles (urban, 833,623; rural, 3,100,362), of which an estimated 60·8% was paved. Of the urban roads, 113,000 were state controlled and 719,000 under local control. 693,000 miles of rural roads were controlled by the states, about 2,238,000 miles of rural roads were under local control, and there were about 169,000 miles of federal park and forest roads. State highway funds were $71,736m. in 1996.

Motor vehicles registered in 1996: 206,365,000, including 138,203,000 automobiles, 701,000 buses and coaches, 64,756,000 trucks and 3,816,000 motor cycles and mopeds. There were 179,539,000 licensed drivers in 1996 (177·43m. in 1995 of which 87·2m. were females). The average distance travelled by a passenger car in the year 1995 was 11,330 miles. There were 41,907 deaths in road accidents in 1996 (39,250 in 1992). 1996 was the 4th consecutive year in which the number of road deaths went up.

Rail. Freight service is provided by 12 major independent railroad companies and several hundred smaller operators. Long-distance passenger trains are run by the National Railroad Passenger Corporation (Amtrak), which is federally assisted. Amtrak was set up in 1971 to maintain a basic network of long-distance passenger trains, and is responsible for almost all non-commuter services over some 38,000 route-km, of which it owns only 1,256 km (555 km electrified). Outside the major conurbations, there are almost no regular passenger services other than those of Amtrak, which carried 19,700,000 passengers in 1996. Passenger revenue for Amtrak (1996) was $756·2m.; revenue passenger miles, 5,066m.

Civil Aviation. There were 39 airports with more than 100,000 international enplanements in 1997. These were, in descending order: New York (John F. Kennedy), Miami, Los Angeles, Honolulu, San Francisco, Chicago (O'Hare), New York (Newark), Houston (George Bush), Guam, Atlanta (Hartsfield), Dallas/Fort Worth, Boston (Logan), Washington, D.C. (Dulles International), Detroit (Metropolitan-Wayne County), San Juan (Luis Muñoz Marin International), Orlando (Orlando International), Philadelphia, Anchorage, Saipan, Seattle-Tacoma, Minneapolis/St Paul, Fort Lauderdale (Hollywood), New York (La Guardia), Orlando (Sanford), Las Vegas (McCarran), Cincinnati (Northern Kentucky), Phoenix (Sky Harbor), Bangor, Baltimore (Baltimore/Washington), Charlotte, Portland, Denver, Tampa, San Jose, Pittsburgh, St Petersburg/Clearwater, San Diego (Lindbergh Field) and Kahului.

In 1995 Delta Air Lines carried the most passengers of any airline in the world, with 86,909,000 (7,810,000 on international flights), ahead of American Airlines, with 79,511,000 (16,638,000 on international flights) and United Airlines, with 78,665,000 (11,409,700 on international flights). American Airlines carried the most international passengers of any US carrier, ahead of United Airlines. American Airlines also flew the furthest of any carrier in the world in 1995, covering 1,479·8m. km, ahead of United Airlines, with 1,311·3m. km.

The busiest airport in 1996 was Chicago (O'Hare), which handled 69,154,000 passengers (61,935,000 on domestic flights). The second busiest was Atlanta, Hartsfield International, with 62,885,000 passengers (59,825,000 on domestic flights), followed by Los Angeles International, with 57,975,000 passengers (43,942,000 on domestic flights). As well as being the 3 busiest airports in the USA for passenger traffic in 1996, they are also the 3 busiest in the world. New York (John F. Kennedy) was the busiest airport in the USA for international passengers in 1996, with 17,453,000 (9th in the world), ahead of Miami International, with 14,913,000. The leading domestic routes for 1996 were New York to/from Los Angeles (3,149,020 passengers), New York to/from Chicago (2,996,460) and New York to/from Miami (2,777,610).

The leading airports in 1997 on the basis of aircraft departures completed were Dallas/Fort Worth (451,500); Chicago, O'Hare (446,300); Atlanta, Hartsfield International (392,900). The leading domestic routes for 1997 based on enplanements were New York to/from Los Angeles, Chicago to/from New York, Boston to/from New York, Honolulu to/from Kahului, and New York to/from Orlando.

US flag carriers in scheduled service had 594·7m. revenue passengers enplaned in 1997, with 599,300m. revenue passenger miles.

Shipping. On 1 Oct. 1994 US merchant ocean-going vessels were employed as follows: Active, 345 of 15·2m. DWT, of which 132 of 4·7m. DWT were foreign trade, 129 of 7·3m. DWT in domestic trade and 24 of 1·8m. DWT in foreign to foreign operations. Inactive vessels totalled 4·7m. DWT; 26 of 1·4m. DWT privately owned were laid up and 136 of 2·7m. DWT were Government-owned National Defense reserve fleet. Of the total vessels in the US fleet, 333 of 15·1m. DWT were privately owned.

US exports and imports carried on dry cargo and tanker vessels in 1994 totalled 899·1m. long tons, of which 35m. long tons were carried in US flag vessels. In 1995, 55,184 vessels entered, and 52,772 cleared, all US ports.

On 1 Oct. 1998 the US merchant marine included 473 ocean-going self-propelled merchant vessels of 1,000 gross tons or over, with an aggregate 16·8m. DWT. This included 156 tankers of 9·4m. DWT.

Telecommunications. Regional private companies formed from the American Telephone and Telegraph Co. after its dissolution in 1995 ('Baby Bells') operate the telephone, telegraph, telex and electronic transmission services system at the national and local levels. In 1997 main telephone lines numbered 172,452,500 (or 643·7 per 1,000 persons); there were 55,312,000 subscribers to cellular phones. There were 86·3m. PCs in 1995 (328 for every 1,000 persons) and 14,052,000 fax machines.

Legislation on the media and telecommunications of 1996 coming into force on 31 March 1999 aimed at deregulating the market while preserving safeguards against over-concentration of individual ownership: a single company may not control a network reaching more than 35% of TV viewers, or produce a newspaper and a television service in the same market. Local companies are now permitted to operate long-distance telephone services and also cable TV services. There were estimated to be 73m. Internet users in Oct. 1998, or 27% of the population.

Postal Services. The US Postal Service superseded the Post Office Department on 1 July 1971.

Postal business for the years ended 30 Sept. included the following items:

	1995	*1996*	*1997*	*1998*
Number of post offices	39,749	38,212	38,019	37,941
Operating revenue ($1,000)	54,293,000	56,402,000	58,132,600	54,873,000
Expenditures ($1,000)	50,730,200	53,112,500	60,192,256	58,385,426

SOCIAL INSTITUTIONS

Justice. Legal controversies may be decided in two systems of courts: The federal courts, with jurisdiction confined to certain matters enumerated in Article III of the Constitution, and the state courts, with jurisdiction in all other proceedings. The federal courts have jurisdiction exclusive of the state courts in criminal prosecutions for the violation of federal statutes, in civil cases involving the government, in bankruptcy cases and in admiralty proceedings, and have jurisdiction concurrent with the state courts over suits between parties from different states, and certain suits involving questions of federal law.

The highest court is the Supreme Court of the US, which reviews cases from the lower federal courts and certain cases originating in state courts involving questions of federal law. It is the final arbiter of all questions involving federal statutes and the Constitution; and it has the power to invalidate any federal or state law or executive action which it finds repugnant to the Constitution. This court, consisting of 9 justices appointed by the President who receive salaries of $164,100 a year (the Chief Justice, $171,500), meets from Oct. until June every year. For the term ended June 1996 it disposed of 6,692 cases, deciding 129 on their merits. In the remainder of cases it either summarily affirms lower court decisions or declines to review. A few suits, usually brought by state governments, originate in the Supreme Court, but issues of fact are mostly referred to a master.

The US courts of appeals number 13 (in 11 circuits composed of 3 or more states and 1 circuit for the District of Columbia and 1 Court of Appeals for the Federal Circuit); the 179 circuit judges receive salaries of $141,700 a year. Any party to a suit in a lower federal court usually has a right of appeal to one of these courts. In addition, there are direct appeals to these courts from many federal administrative agencies. In the year ending 30 June 1997, 53,742 appeals were filed in the courts of appeals, including 1,417 in the Federal Circuit.

The trial courts in the federal system are the US district courts, of which there are 89 in the 50 states, 1 in the District of Columbia and 1 each in the Commonwealth of Puerto Rico and the Territories of the Virgin Islands, Guam and the Northern Marianas. Each state has at least 1 US district court, and 3 states have 4 apiece. Each district court has from 1 to 28 judgeships. There are 649 US district judges ($133,600 a year), who received 265,151 civil cases and 68,307 criminal defendants from 1 July 1996 to 30 June 1997.

In addition to these courts of general jurisdiction, there are special federal courts of limited jurisdiction. The US Court of Federal Claims (16 judges at $133,600 a year) decides claims for money damages against the federal government in a wide variety of matters; the Court of International Trade (9 judges at $133,600) determines controversies concerning the classification and valuation of imported merchandise.

The judges of all these courts are appointed by the President with the approval of the Senate; to assure their independence, they hold office during good behaviour and cannot have their salaries reduced. This does not apply to judges in the Territories, who hold their offices for a term of 10 years or to judges of the US Court of Federal Claims. The judges may retire with full pay at the age of 70 years if they have served a period of 10 years, or at 65 if they have 15 years of service, but they are subject to call for such judicial duties as they are willing to undertake. 11 US judges up to 1997 have been involved in impeachment proceedings, of whom 7 were convicted and removed from office.

In 1997, of the 265,151 civil cases filed in the district courts, 167,807 arose under various federal statutes (such as labour, social security, tax, patent, securities, antitrust and civil rights laws); 52,710 involved personal injury or property damage claims; 38,858 dealt with contracts; and 5,761 were actions concerning real property.

Among the 69,052 criminal defendants (48,682 criminal cases) filed in 1997 in the district courts, 25,090 persons were charged with alleged infractions of drug laws; 11,832 persons were charged with miscellaneous general offences; 11,664 with embezzlement and fraud; 4,089 for larceny and theft; 7,016 were charged with immigration violations; 1,763 with robbery; and 1,663 with forgery and counterfeiting and fraud.

Persons convicted of federal crimes may be fined, released on probation under the supervision of the probation officers of the federal courts, confined in prison, or confined in prison with a period of supervised release to follow, also under the supervision of probation officers of the federal courts. Federal prisoners are confined in 87 institutions incorporating various security levels that are operated by the Bureau of Prisons. Prisoners confined in Federal and State Prisons at June 1996, numbered 1,136,819 (6·1% women). In 1996 there were 615 inmates in prisons and jails per 100,000 population. By 1998 the figure had risen to 668 per 100,000.

The state courts have jurisdiction over all civil and criminal cases arising under state laws, but decisions of the state courts of last resort as to the validity of treaties or of laws of the USA, or on other questions arising under the Constitution, are subject to review by the Supreme Court of the US. The state court systems are generally similar to the federal system, to the extent that they generally have a number of trial courts and intermediate appellate courts, and a single court of last resort. The highest court in each state is usually called the Supreme Court or Court of Appeals with a Chief Justice and Associate Justices, usually elected but sometimes appointed by the Governor with the advice and consent of the State Senate or other advisory body; they usually hold office for a term of years, but in some instances for life or during good behaviour. The lowest tribunals are usually those of Justices of the Peace; many towns and cities have municipal and police courts, with power to commit for trial in criminal matters and to determine misdemeanours for violation of the municipal ordinances; they frequently try civil cases involving limited amounts of damages.

There were no executions from 1968 to 1976. The US Supreme Court had held the death penalty, as applied in general criminal statutes, to contravene the eighth and fourteenth amendments of the US constitution, as a cruel and unusual punishment when used so irregularly and rarely as to destroy its deterrent value. The death penalty was reinstated by the Supreme Court in 1976, but has not been authorized in Alaska, the District of Columbia, Hawaii, Iowa, Kansas, Maine, Massachusetts, Michigan, Minnesota, North Dakota, Rhode Island, Vermont, West

Virginia and Wisconsin. There were, in 1996, 3,219 prisoners under sentence of death. In 1997 there were 74 executions (45 in 1996).

Education. Elementary and secondary education is mainly a state responsibility. Each state and the District of Columbia has a system of free public schools, established by law, with courses covering 12 years plus kindergarten. There are 3

structural patterns in common use; the K8-4 plan, meaning kindergarten plus 8 elementary grades followed by 4 high school grades; the K6-3-3 plan, or kindergarten plus 6 elementary grades followed by a 3-year junior high school and a 3-year senior high school; and the K5-3-4 plan, kindergarten plus 5 elementary grades followed by a 3-year middle school and a 4-year high school. All plans lead to high-school graduation, usually at age 17 or 18. Vocational education is an integral part of secondary education. Some states also have 2-year colleges in which education is provided at a nominal cost. Each state has delegated a large degree of control of the educational programme to local school districts (numbering 14,883 in school year 1995–96), each with a board of education (usually 3 to 9 members) selected locally and serving mostly without pay. The school policies of the local school districts must be in accord with the laws and the regulations of their state Departments of Education. While regulations differ from one jurisdiction to another, in general it may be said that school attendance is compulsory from age 7 to 16.

'Charter schools' are legal entities outside the school boards administration. They retain the basics of public school education, but may offer unconventional curricula and hours of attendance. Founders may be parents, teachers, public bodies or commercial firms. Organization and conditions depend upon individual states' legislation. The first charter schools were set up in Minnesota in 1991.

The Census Bureau estimates that in Nov. 1979 only 1m. or 0·6% of the 170m. persons who were 14 years of age or older were unable to read and write; in 1930 the percentage was 4·8. In 1940 a new category was established—the 'functionally illiterate', meaning those who had completed fewer than 5 years of elementary schooling; for persons 25 years of age or over this percentage was 1·8 in March 1996 (for the Black population it was 2·3%); it was 0·9% for white and 0·4% for Blacks in the 25–29-year-old group. The Bureau reported that in March 1998, 82·8% of all persons 25 years old and over had completed 4 years of high school or more, and that 24·4% had completed 4 or more years of college. In the age group 25 to 29, 88·1% had completed 4 years of high school or more, and 27·3% had completed 4 or more years of college.

In the autumn of 1996, 14,300,000 students (7,956,000 women) were enrolled in 3,647 colleges and universities; 2,193,000 were first-time students. 35·5% of the population between the ages of 18 and 24 were enrolled in colleges and universities.

Public elementary and secondary school revenue is supplied from the county and other local sources (45·9% in 1995–96), state sources (47·5%) and federal sources (6·6%). In 1996–97 expenditure for public elementary and secondary education totalled about $310,200m., including $274,500m. for current operating expenses, $29,100m. for capital outlay and $6,600m. for interest on school debt. The current expenditure per pupil in average daily attendance was about $6,390. The total cost per pupil, also including capital outlay and interest, amounted to about $7,230.

In 1996–97 total expenditure on education came to about 7·3% of GDP. Estimated total expenditures for private elementary and secondary schools in 1996–97 were about $25,800m. In 1996–97 college and university spending totalled about $223,500m., of which about $140,000m. was spent by institutions under public control. The federal government contributed about 12% of total current-fund revenue; state governments, 23%; student tuition and fees, 28%; and all other sources, 37%.

Vocational education below college grade, including the training of teachers to conduct such education, has been federally aided since 1918. Federal support for vocational education in 1996–97 amounted to about $1,115m. Many public high schools offer vocational courses in addition to their usual academic programmes.

[1]Schools with both elementary and secondary grades are counted twice, once with the elementary and once with the secondary schools. [2]Data for 1995–96.

In the autumn of 1996 there were 18·8 pupils per teacher in public elementary schools in the USA and 14·6 pupils per teacher in public secondary schools.

Most of the private elementary and secondary schools are affiliated with religious denominations. In 1996–97 there were 7,005 Roman Catholic elementary schools with 1,885,000 pupils and 107,500 teachers, and 1,226 secondary schools with 612,000 pupils and 45,700 teachers.

During the school year 1996–97 high-school graduates numbered about 2,573,000 (of whom about 2,306,000 were from public schools). Institutions of higher education conferred about 1,166,000 bachelor's degrees during the year 1996–97, 528,000 associate's degrees; 402,000 master's degrees; 45,000 doctorates; and 80,000 first professional degrees. In 1996–97 the federal government provided $8,983m. in grants and work-study programmes and $27,081m. in loans and other financial assistance to students.

During the academic year 1997–98, 481,000 foreign students were enrolled in American colleges and universities. The countries with the largest numbers of students in American colleges were: Japan, 47,100; China, 47,000; South Korea, 42,900; India, 33,800; Taiwan, 30,900; Canada, 22,100.

In 1996–97, 99,400 US students were enrolled at colleges and universities abroad. The country attracting the most students from the USA was the United Kingdom, with 22,800.

School enrolment, Oct. 1996, embraced 94·0% of the children who were 5 and 6 years old; 97·7% of the children aged 7–13 years; 98·0% of those aged 14–15, 92·8% of those aged 16–17 and 61·5% of those aged 18–19.

The US National Center for Education Statistics estimates the total enrolment in the autumn of 1998 at all of the country's elementary, secondary and higher educational institutions (public and private) at 67·3m. (66·2m. in the autumn of 1997).

The number of teachers in regular public and private elementary and secondary schools in the autumn of 1998 was expected to increase slightly to 3,126,000. The average annual salary of public school teachers was $39,400 in 1997–98.

Health. Admission to the practice of medicine (for both doctors of medicine and doctors of osteopathic medicine) is controlled in each state by examining boards directly representing the profession and acting with authority conferred by state law. Although there are a number of variations, the usual time now required to complete training is 8 years beyond the secondary school with up to 3 or more years of additional graduate training. Certification as a specialist may require between 3 and 5 more years of graduate training plus experience in practice. In Jan. 1994 the estimated number of active physicians (MD and DO—in all forms of practice) in the USA, Puerto Rico and outlying US areas was 684,400.

Active dentists in Dec. 1994 numbered 190,000.

Number of hospitals listed by the American Hospital Association in 1996 was 6,201, with 1,062,000 beds (equivalent to 4 beds per 1,000 population). Of the total, 290 hospitals with 73,000 beds were operated by the federal government; 1,330 with 155,000 beds by state and local government; 3,045 with 598,000 beds by non-profit organizations (including church groups); 759 with 109,000 beds were investor-owned. The categories of non-federal hospitals were (1996): 5,143 short-term general and special hospitals with approximately 864,000 beds; 112 non-federal long-term general and special hospitals with 19,000 beds; 653 psychiatric hospitals with approximately 106,000 beds; 3 tuberculosis hospitals with (in 1995) 214 beds.

Patient admissions to community hospitals (1996) was 31,099,000; average daily census was 530,800. There were 505·5m. outpatient visits and 97·6m. emergencies.

Personal health-care costs in 1996 totalled $907,200m., distributed as follows: hospital care, $358,500m.; doctors, $202,100m.; nursing-home care, $78,500m.;

drugs, $91,400m.; dentists, $47,600m.; medical durables, $13,300m.; home health care, $30,200m.; other personal health care, $27,600m. Total national health expenditure in 1996 amounted to $1,035·1bn.

Welfare. Social welfare legislation was chiefly the province of the various states until the adoption of the Social Security Act of 14 Aug. 1935. This as amended provides for a federal system of old-age, survivors and disability insurance; health insurance for the aged and disabled; supplemental security income for the aged, blind and disabled; federal state unemployment insurance; and federal grants to states for public assistance (medical assistance for the aged and aid to families with dependent children generally and for maternal and child health and child welfare services).

Legislation of Aug. 1996 began the transfer of aid administration back to the states, restricted the provision of aid to a maximum period of 5 years, and abolished benefits to immigrants (both legal and illegal) for the first 5 years of their residence in the USA. The Social Security Administration (formerly part of the Department of Health and Human Services but an independent agency since March 1995) has responsibility for the programmes—old-age, survivors and disability insurance and supplemental security income. The Administration for Children and Families (ACF), an agency of the Department of Health and Human Services, is responsible for federal programmes which promote the economic and social wellbeing of families, children, individuals and communities. ACF has federal responsibility for the following programmes: The Aid to Families with Dependent Children Program (providing cash assistance to family and children in the 50 states, the District of Columbia, Guam, Puerto Rico and the Virgin Islands); low income energy assistance; Head Start; child care; child protective services; and a community services block grant. The ACF also has federal responsibility for social service programmes for children, youth, native Americans and persons with developmental disabilities.

The Administration of Aging (AOA), an agency of the Department of Health and Human Services, serves older persons and their families with social, nutritional, education, and aging-related research and demonstration projects through the administration of the Older Americans Act. In addition, AOA is the focal point for aging policy within the Federal government. The Assistant Secretary for Aging is the primary advocate for the elderly in the USA. In 1995–96, $830m. was expended through a network of 57 State Units on Aging, 661 Area Agencies on Aging, 228 tribal organizations, 6,000 senior centres, and more than 27,000 service providers. More than 250m. meals were also provided through this programme.

The Health Care Financing Administration, an agency of the Health and Human Services Department, has federal responsibility for health insurance for the aged and disabled. Unemployment insurance is the responsibility of the Department of Labor.

In 1996 an average of 4,166,000 families were receiving payments under Aid to Families with Dependent Children (average monthly payment, $383 per family). Total payments under Aid to Families with Dependent Children were $20,411m. in 1996. The role of Child Support Enforcement is to ensure that children are supported by their parents. Money collected is for children who live with only one parent because of divorce, separation or out-of-wedlock birth. In 1996 approximately $12,020m. was collected on behalf of these children.

The Social Security Act provides for protection against the cost of medical care through Medicare, a two-part programme of health insurance for people age 65 and over, people of any age with permanent kidney failure, and for certain disabled people under age 65 who receive Social Security disability benefits. In 1995, payments totalling $116,400m. were made under the hospital portion of Medicare on behalf of 37m. people. During the same period, $65,000m. was paid under the voluntary medical insurance portion of Medicare on behalf of 36m. people.

In 1996 about 43·3m. beneficiaries were on the rolls; the average paid to a retired worker (not counting any benefits paid to his/her dependants) was about $724 per month. Full retirement benefits are now payable at age 65, with reduced benefits available as early as age 62. Beginning in 2000, the age for full retirement benefits will gradually increase until it reaches 67 in 2027.

In Dec. 1995, 6·5m. persons were receiving Supplementary Security Income payments, including 1·4m. persons aged 65 or over and over 5·1m. disabled or blind

persons, of whom nearly 1m. were children. Payments, including supplemental amounts from various states, totalled $27,600m. in 1995.

In 1996 a total of $367,712m. was spent on cash and non-cash benefits (such as food stamps) for persons with limited incomes: 1,413,000 old-age persons received $28,792m. in benefits; 82,000 blind people received $4,507m.; and 5,119,000 disabled people received $23,906m. In 1997 the food stamp programme helped 22,799,000 persons at a cost of $19,504m.; and 25,903,000 persons received help from the national school lunch programme at a cost of $4,814m.

CULTURE

To mark the new Millennium, a non-stop three-day Party 2000 will take place on 6 sq. miles (16 sq. km) of land in southern California between Palm Springs and the Arizona border. It has described itself as "The Biggest Concert and Party ever held on Planet Earth" with "the largest fireworks' display ever held in the world". The projected budget is $1·1bn (£675m.).

In Times Square in New York City giant video screens will be positioned around the square, broadcasting footage of celebrations taking place around the world, beginning with the Fiji Islands at 7 a.m. EST.

Boston has developed the concept of the First Night alcohol-free celebrations, which have won support in well over 100 communities across the USA.

Broadcasting. The licensing agency for broadcasting stations is the Federal Communications Commission, an independent federal body composed of 5 Commissioners appointed by the President. Its regulatory activities comprise: allocation of spectrum space; consideration of applications to operate individual stations; and regulation of their operations. In 1996 there were 12,313 commercial radio stations, 1,174 commercial TV stations, 352 non-commercial TV stations and 11,119 cable TV systems. Programming is targeted to appeal to a given segment of the population or audience taste. There are 5 national TV networks (3 commercial; colour by NTSC) with 46 national cable networks. All major cities have network affiliates and additional commercial stations.

Legislation on the media and telecommunications of 1996 came into force on 31 March 1999 deregulating the market while preserving safeguards against over-concentration of individual ownership: a single company may not control a network reaching more than 35% of TV viewers, or produce a newspaper and a television service in the same market. Local companies are now permitted to operate long-distance telephone services and also cable TV services.

Broadcasting to countries abroad is conducted by The Voice of America, which functions under a 7-member council nominated by the President and reviewed by Congress. In 1996 Voice of America had 126m. listeners.

In 1996 there were 570m. radio receivers in use, equivalent to 2,115 per 1,000 inhabitants. No other country averaged more than 1,500 radios per 1,000. There were 217m. TV receivers in 1996, or 805 per 1,000 inhabitants—a figure only exceeded in Bermuda, with 1,041 per 1,000 in 1996.

Cinema. In Jan. 1994 there were 25,737 screens, including 850 drive-ins. 420 full-length films were made in 1995. An estimated 66% of adults went to the cinema in 1997.

Press. In 1997 there were 1,509 daily newspapers with a combined daily circulation of 56·7m., the second highest in the world behind Japan. These included 705 morning papers and 816 evening papers, and there were also 903 Sunday papers (circulation, 60·5m.). Unlike Japan, where circulation is rising, in the USA it has fallen since 1980, when daily circulation was 62·2m.

New books and editions published in 1996, 68,175.

Tourism. In 1996 the USA received 46,489,000 visitors, of whom 19,110,004 were classified as tourists. Of the 46,489,000 visitors, 15,301,000 were from Canada and 8,530,000 from Mexico. Tourists came mainly from Japan (3·62m.), the UK (2·49m.) and Germany (1·62m.). Nearly 40% of all tourists were from Europe.

In 1997 an estimated 46,216,000 visitors spent approximately $68,043m. (excluding transportation paid to US international carriers). The USA has the highest annual revenue from tourists of any country (more than twice as much as Italy, which with $28,673m. received the second most in 1996). Expenditure by US

travellers in foreign countries for 1997 was an estimated $53,991m. (excluding transportation paid to foreign flag international carriers).

ALABAMA

KEY HISTORICAL EVENTS

The first European explorers were Spanish, including Hernando de Soto in 1540, but the first permanent European settlement was French, as part of French Louisiana after 1699. During the 17th and 18th centuries the British, Spanish and French all fought for control of the territory; it passed to Britain in 1763 and thence to the USA in 1783, except for a Spanish enclave on Mobile Bay, which lasted until 1813. Alabama was organized as a Territory in 1817 and was admitted to the Union as a state on 14 Dec. 1819.

The economy was then based on cotton, grown in white-owned plantations by black slave labour imported since 1719. Alabama seceded from the Union at the beginning of the Civil War (1861) and joined the Confederate States of America; its capital Montgomery became the Confederate capital. After the defeat of the Confederacy the state was readmitted to the Union in 1878. Attempts made during the reconstruction period to find a role for the newly freed black slaves—who made up about 50% of the population—largely failed, and when whites regained political control in the 1870s a strict policy of segregation came into force.

At the same time Birmingham began to develop as an important centre of iron- and steel-making. Most of the state was still rural. In 1915 a boll-weevil epidemic attacked the cotton and forced diversification into other farm produce. More industries developed from the power schemes of the Tennessee Valley Authority in the 1930s.

The black population remained mainly rural, poor and without political power, until the 1960s when confrontations on the issue of civil rights produced reforms.

TERRITORY AND POPULATION

Alabama is bounded in the north by Tennessee, east by Georgia, south by Florida and the Gulf of Mexico and west by Mississippi. Land area, 50,750 sq. miles (131,443 sq. km). Census population, 1 April 1990, 4,040,587 (60·4% urban), an increase of 3·87% since 1980. Population estimate (1997), 4,319,000 (of the total population in 1995, 48·0% were male).

Population in 5 census years was:

	White	*Black*	*Indian*	*Asiatic*	*Total*	*Per sq. mile*
1930	1,700,844	944,834	465	105	2,646,248	51·3
1960	2,283,609	980,271	1,726	915	3,266,521	64·0
			All others			
1970	2,533,831	903,467	6,867		3,444,165	66·7
1980	2,872,621	996,335	24,932		3,893,888	74·9
1990	2,975,797	1,020,705	44,085		4,040,587	79·6

Of the total population in 1990, 47·9% were male, 60·4% were urban and 68·7% were 21 years or older.

ALASKA

KEY HISTORICAL EVENTS

Discovered in 1741 by Vitus Bering, Alaska's first settlement, on Kodiak Island, was in 1784. The area known as Russian America with its capital (1806) at Sitk was ruled by a Russo-American fur company and vaguely claimed as a Russian colony. Alaska was purchased by the United States from Russia under the treaty of 30 March 1867 for $7·2m. Settlement was boosted by gold workers in the 1880s. In 1884 Alaska became a 'district' governed by the code of the state of Oregon. By Act of Congress approved 24 Aug. 1912 Alaska became an incorporated Territory; its first legislature in 1913 granted votes to women, 7 years in advance of the Constitutional Amendment.

During the Second World War the Federal Government acquired large areas for defence purposes and for the construction of the strategic Alaska Highway. In the 1950s oil was found. Alaska became the 49th state of the Union on 3 Jan. 1959.

In the 1970s new oilfields were discovered and the Trans-Alaska pipeline was opened in 1977. The state obtained most of its income from petroleum by 1985.

Questions of land-use predominate; there are large areas with valuable mineral resources, other large areas held for the native peoples and some still held by the Federal Government. The population increased by over 400% between 1940 and 1980.

TERRITORY AND POPULATION

Alaska is bounded north by the Beaufort Sea, west and south by the Pacific and east by Canada. The land area is 570,374 sq. miles (1,477,268 sq. km). Census population, 1 April 1990, was 550,043 (67·5% urban), including military personnel, an increase of 37·4% over 1980. Population estimate (1997), 609,000.

Population in 5 census years was:

	White	*Black*	*All Others*	*Total*	*Per sq. mile*
1950	92,808	...	35,835	128,643	0·23
1960	174,649	...	51,518	226,167	0·40
1970	236,767	8,911	54,704	300,382	0·53
1980	309,728	13,643	78,480	401,851	1·00
1990	415,492	22,451	112,100	550,043	1·00

Of the total population in 1990, 52·7% were male, 67·5% were urban and 68·7% were aged 18 years or over.

The largest city is in the borough of Anchorage, which had a 1990 census population of 226,338 and an estimated 1994 population of 254,000. CONSTITUTION AND GOVERNMENT

The state has the right to select 103·55m. acres of vacant and unappropriated public lands in order to establish 'a tax basis'; it can open these lands to prospectors for

minerals, and the state is to derive the principal advantage in all gains resulting from the discovery of minerals. In addition, certain federally administered lands reserved for conservation of fisheries and wild life have been transferred to the state. Special provision is made for federal control of land for defence in areas of high strategic importance.

The constitution of Alaska was adopted by public vote, 24 April 1956. The state legislature consists of a Senate of 20 members (elected for 4 years) and a House of Representatives of 40 members (elected for 2 years). The state sends 1 representative to Congress. The franchise may be exercised by all citizens over 18.

The capital is Juneau.

Proven reserves at 31 Dec. 1997 were 5,161m. bbls. Oil comes mainly from Prudhoe Bay, the Kuparuk River field and several Cook Inlet fields. Revenue to the state from petroleum in 1993 was $2,684·8m. (87% of general fund revenues). General fund unrestricted revenues, 1993: Severance taxes, 33%; oil and gas royalties, 25%; investment earnings, 2%; other oil and gas, 27%; non-petroleum, 13%. Agriculture. In some parts of the state the climate during the brief spring and summer (about 100 days in major areas and 152 days in the south-eastern coastal area) is suitable for agricultural operations, thanks to the long hours of sunlight, but Alaska is a food-importing area. In 1995 about 1m. acres was farmland and there were (in 1994) 520 farms and ranches with annual sales of $1,000 or more; crops covered 28,940 acres. In 1997 the average farm had 1,804 acres.

Total value of agricultural products in 1994: $27,766,000 of which $2,828,000 was from feed crops, $2,738,000 from vegetables (including potatoes), $6·1m. from livestock and poultry, $2,465,000 from dairy products and $15,833,000 from greenhouse and nursery industries. Net income from farms in 1996 was $10m.

13m. acres are considered commercial forest, of which 3·4m. acres are in designated parks or wilderness and unavailable for harvest. The coastal rain forests provide the bulk of commercial timber volume; of their 13·6m. acres, 7·6m. acres support commercial stands, of which 1·9m. acres are in parks or wilderness and unavailable for harvest. In 1992, 590m. bd ft of timber were harvested from private land for a total value of $548·9m., and in 1993, 9·38m. bd ft from state land for $342·6m.

There are 624 designated wilderness areas throughout the USA, covering a total of 104m. acres (42m. ha). Nearly 56% of the system is in Alaska (58·18m acres or 23·54m. ha).

Fisheries. The catch for 1993 was 2·7m. lbs of fish and shellfish having a value to fishermen of $905m. The most important species are salmon, crab, herring, halibut and pollock.

INDUSTRY

The largest manufacturing sectors are wood processing, seafood products and printing and publishing.

The Alaska Highway extends 1,523 miles from Dawson Creek, British Columbia, to Fairbanks, Alaska. It was built by the US Army in 1942, at a cost of $138m. The greater portion of it, because it lies in Canada, is maintained by Canada.

Rail. There is a railway of 111 miles from Skagway to the town of Whitehorse, the White Pass and Yukon route, in the Canadian Yukon region (this service operates seasonally). The government-owned Alaska Railroad runs from Seward to Fairbanks, a distance of 471 miles. This is a freight service with only occasional passenger use. A passenger service operates from Anchorage to Fairbanks via Denali National Park in the tourist season.

Civil Aviation. Commercial passengers by air from Alaska's largest international airports Anchorage and Fairbanks in fiscal year 1994 numbered 4,358,437 at Anchorage and 721,496 at Fairbanks. General aviation aircraft in the state per 1,000 population is about 10 times the US average.

Shipping. Regular shipping services to and from the USA are furnished by 2 steamship and several barge lines operating out of Seattle and other Pacific coast ports. A Canadian company also furnishes a regular service from Vancouver, BC. Anchorage is the main port.

A 1,435 nautical-mile ferry system for motor cars and passengers (the 'Alaska Marine Highway') operates from Bellingham, Washington and Prince Rupert (British Columbia) to Juneau, Haines (for access to the Alaska Highway) and Skagway. A second system extends throughout the south-central region of Alaska linking the Cook Inlet area with Kodiak Island and Prince William Sound.

ARIZONA

KEY HISTORICAL EVENTS

Spaniards looking for sources of gold or silver entered Arizona in the 16th century, finding there people from several Native American groups, including Tohono O'odham, Navajo, Hopi and Apache. The first Spanish Catholic mission was founded in the early 1690s by Father Eusebio Kino, settlements were made in 1752 and a Spanish army headquarters was set up at Tucson in 1776. The area was governed by Mexico after the collapse of Spanish colonial power. Mexico ceded it to the USA in the Treaty of Guadelupe Hidalgo after the Mexican-American war (1848). Arizona was then part of New Mexico; the Gadsen Purchase (of land south of the Gila River) was added to it in 1853. The whole was organized as the Arizona Territory on 24 Feb. 1863.

Miners and ranchers began settling in the 1850s. Conflicts between Indian and immigrant populations intensified when troops were withdrawn to serve in the Civil War. The Navajo surrendered in 1865, but the Apache continued to fight, under Geronimo and other leaders, until 1886. Arizona was admitted to the Union as the 48th state in 1912.

Large areas of the state have been retained as Indian reservations and as parks to protect the exceptional desert and mountain landscape. In recent years this landscape and the Indian traditions have been used to attract tourist income.

TERRITORY AND POPULATION

Of the total area in 1992, 28% was Indian Reservation, 17% was in individual or corporate ownership, 19% was held by the US Bureau of Land Management, 15% by the US Forest Service, 13% by the State and 8% by others. Census population on 1 April 1990 was 3,665,228 (87·5% urban), an increase of 34·92% over 1980. Population estimate (1996), 4,462,300.

ARKANSAS

KEY HISTORICAL EVENTS

In the 16th and 17th centuries, French and Spanish explorers entered Arkansas, finding there tribes of Chaddo, Osage and Quapaw. The first European settlement was French, at Arkansas Post in 1686, and the area became part of French Louisiana. The USA bought Arkansas from France as part of the Louisiana Purchase in 1803, it was organized as a Territory in 1819 and entered the Union on 15 June 1836 as the 25th state.

The eastern plains by the Mississippi were settled by white plantation-owners who grew cotton with black slave labour. The rest of the state attracted a scattered population of small farmers. The plantations were the centre of political power. Arkansas seceded from the Union in 1861 and joined the Confederate States of America. At that time the slave population was about 25% of the total.

In 1868 the state was readmitted to the Union. Attempts to integrate the black population into state life achieved little, and a policy of segregation was rigidly adhered to until the 1950s.

In 1957 federal law ordered that segregation in a public high school must end. The state governor ordered the state militia to prevent desegregation; there was rioting, and federal troops were called to Little Rock, the capital, to restore order. School segregation ended within the following 10 years.

The main industrial development followed the discovery of large reserves of bauxite.

CALIFORNIA

KEY HISTORICAL EVENTS

There were many small Indian tribes, but no central power, when the area was discovered in 1542 by the Spanish navigator Juan Cabrillo. The Spaniards did not begin to establish missions until the 18th century, when the Franciscan friar Junipero Serra settled at San Diego in 1769. The missions became farming and ranching villages with large Indian populations. When the Spanish empire collapsed in 1821, the area was governed from newly independent Mexico.

The first wagon-train of American settlers arrived from Missouri in 1841. In 1846, during the war between Mexico and the USA, Americans in California proclaimed it to be part of the USA. The territory was ceded by Mexico on 2 Feb. 1848 and became the 31st state of the Union on 9 Sept. 1850.

Gold was discovered in 1848–49 and there was an immediate influx of population. The state remained isolated, however, until the development of railways in the 1860s. From then on the population doubled on average every 20 years. The sunny climate attracted fruit-growers, market-gardeners and wine producers. In the early 20th century the bright light and cheap labour attracted film-makers to Hollywood, Los Angeles.

Southern California remained mainly agricultural with an Indian or Spanish-speaking labour force until after the Second World War. Now more than 90% of the population is urban, with the main manufacture being hi-technology equipment, much of it for the aerospace, computer and office equipment industries.

COLORADO

KEY HISTORICAL EVENTS

Spanish explorers claimed the area for Spain in 1706; it was then the territory of the Arapaho, Cheyenne, Ute and other Plains and Great Basin Indians. Eastern

Colorado, the hot, dry plains, passed to France in 1802 and then to the USA as part of the Louisiana Purchase in 1803. The rest remained Spanish, becoming Mexican when Spanish power in the Americas ended. In 1848, after war between Mexico and the USA, Mexican Colorado was ceded to the USA. A gold rush in 1859 brought a great influx of population, and in 1861 Colorado was organized as a Territory. The Territory officially supported the Union in the Civil War of 1861–65, but its settlers were divided and served on both sides.

Colorado became a state in 1876. Mining and ranching were the mainstays of the economy. In the 1920s the first large projects were undertaken to exploit the Colorado River. The Colorado River Compact was agreed in 1922, and the Boulder Dam (now Hoover Dam) was authorized in 1928. Since then irrigated agriculture has overtaken mining as an industry and is as important as ranching. In 1945 the Colorado-Big Thompson project diverted water by tunnel beneath the Rocky Mountains to irrigate 700,000 acres (284,000 ha) of northern Colorado. Now more than 80% of the population is urban, and most engaged in telecommunications, aerospace and computer technology.

TERRITORY AND POPULATION

Colorado is bounded north by Wyoming, north-east by Nebraska, east by Kansas, south-east by Oklahoma, south by New Mexico and west by Utah. Land area, 103,729 sq. miles (268,658 sq. km).

Population, 1 July 1997, was 3,892,644 (83·1% urban). Population estimate (2000), 4,175,003.

Population in 5 census years was:

CONNECTICUT

KEY HISTORICAL EVENTS

Formerly territory of Algonquian-speaking Indians, Connecticut was first colonized by Europeans during the 1630s, when English Puritans moved there from Massachusetts Bay. Settlements were founded in the Connecticut River Valley at Hartford, Saybrook, Wethersfield and Windsor in 1635. They formed an organized commonwealth in 1637. A further settlement was made at New Haven in 1638 and was united to the commonwealth under a royal charter in 1662. The charter confirmed the commonwealth constitution, drawn up by mutual agreement in 1639 and called the Fundamental Orders of Connecticut.

The area was agricultural and its population of largely English descent until the early 19th century. After the War of Independence Connecticut was one of the original 13 states of the Union. Its state constitution came into force in 1818 and survived with amendment until 1965 when a new one was adopted.

In the early 1800s a textile industry was established using local water power. By 1850 the state had more employment in industry than in agriculture, and immigration from the continent of Europe (and especially from southern and eastern Europe) grew rapidly throughout the 19th century. Some immigrants worked in whaling and iron-mining, both now extinct, but most sought industrial employment. Settlement was spread over a large number of relatively small cities, with no single dominant culture.

Yale University was founded at New Haven in 1701. The US Coastguard Academy was founded in 1876 at New London, a former whaling port.

DELAWARE

KEY HISTORICAL EVENTS

Delaware was the territory of Algonquian-speaking Indians who were displaced by European settlement in the 17th century. The first settlers were Swedes who came in 1638 to build Fort Christina (now Wilmington), and colonize what they called New Sweden. Their colony was taken by the Dutch from New Amsterdam in 1655. In 1664 the British took the whole New Amsterdam colony, including Delaware, and called it New York.

In 1682 Delaware was granted to William Penn, who wanted access to the coast for his Pennsylvania colony. Union of the two colonies was unpopular, and Delaware gained its own government in 1704, although it continued to share a royal governor with Pennsylvania until the War of Independence. Delaware then became one of the 13 original states of the Union and the first to ratify the federal constitution (on 7 Dec. 1787).

The population was of Swedish, Finnish, British and Irish extraction. The land was low-lying and fertile, and the use of slave labour was legal. There was a significant number of black slaves, but Delaware was a border state during the Civil War (1861–65) and did not leave the Union.

The main 19th-century immigrants were European Jews, Poles, Germans and Italians. The north became industrial and densely populated, becoming more so after the Second World War with the rise of the petrochemical industry. Industry in general profited from the opening of the Chesapeake and Delaware Canal in 1829; it was converted to a toll-free deep channel for ocean-going ships in 1919.

CONSTITUTION AND GOVERNMENT

Local government, from 1 July 1878 until Aug. 1967, was that of a municipal corporation administered by a board of 3 commissioners, of whom 2 were appointed from civil life by the President, and confirmed by the Senate, for a term of 3 years each. The other commissioner was detailed by the President from the Engineer Corps of the Army. The Commission form of government was abolished in 1967 and a new Mayor Council instituted with officers appointed by the President with the advice and consent of the Senate. On 24 Dec. 1973 the appointed officers were replaced by an elected Mayor and councillors, with full legislative powers in local matters as from 1974. Congress retains the right to legislate, to veto or supersede the Council's acts. The 23rd amendment to the federal constitution (1961) conferred the right to vote in national elections. The District has 2 delegates in Congress who may vote in committees but not on the House floor.

RECENT ELECTIONS

In the 1996 presidential election Clinton polled 152,031 votes; Dole, 16,637; Perot, 3,479.

CURRENT ADMINISTRATION

Governor: Anthony Williams (D.), 1998–2002.

ECONOMY

Budget. The District's revenues are derived from a tax on real and personal property, sales taxes, taxes on corporations and companies, licences for conducting

various businesses and from federal payments. The District of Columbia has no bonded debt not covered by its accumulated sinking fund.

ENERGY AND NATURAL RESOURCES

Water. The total area covered by water is approximately 7 sq. miles.

INDUSTRY

The main industries are government service, service, wholesale and retail trade, finance, real estate, insurance, communications, transport and utilities.

COMMUNICATIONS

Roads. Within the District are 340 miles of bus routes. There are 1,102 miles of streets maintained by the District; of these, 673 miles are local streets, 262 miles are major arterial roads. In 1996, 237,000 motor vehicles were registered.

Rail. There is a metro in Washington extending to 130 km, and 2 commuter rail networks.

SOCIAL INSTITUTIONS

Justice. The death penalty was declared unconstitutional in the District of Columbia on 14 Nov. 1973. In 1996 there were 9,376 prisoners in state correctional institutions.

The District's Court system is the Judicial Branch of the District of Columbia. It is the only completely unified court system in the United States, possibly because of the District's unique city-state jurisdiction. Until the District of Columbia Court Reform and Criminal Procedure Act of 1970, the judicial system was almost entirely in the hands of Federal Government. Since that time, the system has been similar in most respects to the autonomous systems of the states.

Education. In 1996 there were an estimated 105,700 pupils enrolled at elementary and secondary public schools. Average expenditure per pupil in 1997 was $8,167.

Higher education is given through the Consortium of Universities of the Metropolitan Washington Area, which consists of six universities and three colleges: Georgetown University, founded in 1795 by the Jesuit Order; George Washington University, non-sectarian founded in 1821; Howard University, founded in 1867; Catholic University of America, founded in 1887; American University (Methodist) founded in 1893; University of D.C., founded 1976; Gallaudet College, founded 1864; Trinity College, founded 1897. There are altogether 18 institutes of higher education.

Health. The District government provides primary health care for residents, mainly through its Department of Human Services. In 1994 there were 12 community hospitals with 4,000 beds.

Welfare. There were 77,000 beneficiaries of social security in 1996 including 53,000 retired workers and dependants, 15,000 survivors of deceased workers and 9,000 disabled workers and dependants. Total annual payments were $539m.

FLORIDA

KEY HISTORICAL EVENTS

There were French and Spanish settlements in Florida in the 16th century, of which the Spanish, at St Augustine in 1565, proved permanent. Florida was claimed by Spain until 1763 when it passed to Britain. Although regained by Spain in 1783, the British used it as a base for attacks on American forces during the war of 1812. Gen. Andrew Jackson captured Pensacola for the USA in 1818. In 1819 a treaty was signed which ceded Florida to the USA with effect from 1821 and it became a Territory of the USA in 1822.

Florida had been the home of the Apalachee and Timucua Indians. After 1770 groups of Creek Indians began to arrive as refugees from the European-Indian wars. These 'Seminoles' or runaways attracted other refugees including slaves, the recapture of whom was the motive for the first Seminole War of 1817–18. A second war followed in 1835–42, when the Seminoles retreated to the Everglades swamps. After a third war in 1855–58 most Seminoles were forced or persuaded to move to reserves in Oklahoma.

Florida became a state in 1845. About half of the population were black slaves. At the outbreak of Civil War in 1861 the state seceded from the Union.

During the 20th century Florida continued to grow fruit and vegetables, but real-estate development (often for retirement) and the growth of tourism and the aerospace industry set it apart from other ex-plantation states.

GEORGIA

KEY HISTORICAL EVENTS

Originally the territory of Creek and Cherokee tribes, Georgia was first settled by Europeans in the 18th century. James Oglethorpe founded Savannah in 1733, intending it as a colony which offered a new start to debtors, convicts and the poor. Settlement was slow until 1783, when growth began in the cotton-growing areas

west of Augusta. The Indian population was cleared off the rich cotton land and moved beyond the Mississippi. Georgia became one of the original 13 states of the Union.

A plantation economy developed rapidly, using slave labour. In 1861 Georgia seceded from the Union and became an important source of supplies for the Confederate cause, although some northern areas never accepted secession and continued in sympathy with the Union during the Civil War. At the beginning of the war 56% of the population were white, descendants of British, Austrian and New England immigrants; the remaining 44% were black slaves.

The city of Atlanta, which grew as a railway junction, was destroyed during the war but revived to become the centre of southern states during the reconstruction period. Atlanta was confirmed as state capital in 1877. Also in Atlanta were developed successive movements for black freedom in social, economic and political life. The Southern Christian Leadership Conference, led by Martin Luther King (assassinated in 1968), was based in King's native city of Atlanta.

HAWAII

KEY HISTORICAL EVENTS

The islands of Hawaii were settled by Polynesian immigrants, probably from the Marquesas Islands, about AD 400. A second major immigration, from Tahiti, occurred around 800–900. In the late 18th century all the islands of the group were united into one kingdom by Kamehameha I. Western exploration began in 1778, and Christian missions were established after 1820. Europeans called Hawaii the Sandwich Islands. The main foreign states interested were the USA, Britain and France. Because of the threat imposed by their rivalry, Kamehameha III placed Hawaii under US protection in 1851. US sugar-growing companies became dominant in the economy and in 1887 the USA obtained a naval base at Pearl Harbour. A struggle developed between forces for and against annexation by the USA. In 1893 the monarchy was overthrown. The republican government agreed to be annexed to the USA in 1898, and Hawaii became a US Territory in 1900.

The islands and the naval base were of great strategic importance during the Second World War, when the Japanese attack on Pearl Harbour brought the USA into the war.

Hawaii became the 50th state of the Union in 1959. The 19th-century plantation economy led to much immigration of workers, especially from China and Japan. At the same time the Hawaiian laws, religions and culture were gradually adapted to foreign models.

TERRITORY AND POPULATION

The Hawaiian Islands lie in the North Pacific Ocean, between 18° 56' and 28° 25' N. lat. and 154° 49' and 178° 22' W. long., about 2,090 nautical miles south-west of San Francisco. There are 136 named islands and islets in the group, of which 7 major and 8 minor islands are inhabited. Land area, 6,423 sq. miles (16,636 sq. km). Census population, 1 April 1990, 1,108,229 (51% male, 89% urban), an increase of 14·84% since 1980; density was 172·5 per sq. mile. Estimated population (1997), 1,186,602.

IDAHO

KEY HISTORICAL EVENTS

The original people of Idaho were Kutenai, Kalispel, Nez Percé and other tribes, living on the Pacific watershed of the northern Rocky Mountains. European exploration began in 1805, and after 1809 there were trading posts and small settlements, with fur-trapping as the primary economic activity. The area was disputed between Britain and the USA until 1846 when British claims were dropped. In 1860 gold and silver were found, and there was a rush of immigrant prospectors. The newly enlarged population needed organized government. An area including that which is now Montana was created a Territory in March 1863. Montana was separated from it in 1864. Population growth continued, stimulated by refugees from the Confederate states after the Civil War and by settlements of Mormons from Utah.

Fur-trapping and mining gave way to farming, especially of grains, as the main economic activity. Idaho became a state in 1890, with its capital at Boise. The Territory capital, Idaho City, had been a gold-mining boom town in the 1860s whose population (about 40,000 at its height) was the largest in the Pacific Northwest. The population declined to 1,000 by 1869.

During the 20th century the Indian population shrunk to nearly 1%. The Mormon community has grown to include much of south-eastern Idaho and more than half the church-going population of the state.

Industrial history has been influenced by the development of the Snake River of southern Idaho for hydro-electricity and irrigation, especially at the American Falls and reservoir. Processing food, minerals and timber are important to the economy. The population, however, remains mainly sparse and rural. Rapid growth of high technology companies in Idaho's metropolitan areas has prompted economic diversification and rapid population growth. Between 1990 and 1998, the Idaho rate of population change of 22% has been the third highest in the United States. The two county Boise metropolitan area population exceeds 400,000.

ILLINOIS

KEY HISTORICAL EVENTS

Territory of a group of Algonquian-speaking tribes, Illinois was explored first by the French in 1673. France claimed the area until 1763 when, after the French and Indian War, it was ceded to Britain along with all the French land east of the Mississippi. In 1783 Britain recognized the US' title to Illinois, which became part of the North West Territory of the USA in 1787, and of Indiana Territory in 1800. Illinois became a Territory in its own right in 1809, and a state in 1818.

Settlers from the eastern states moved on to the fertile farmland, immigration increasing greatly with the opening in 1825 of the Erie Canal from New York along which settlers could move west and their produce back east for sale. Chicago was incorporated as a city in 1837 and quickly became the transport, trading and distribution centre of the middle west. Once industrial growth had begun there, a further wave of immigration took place in the 1840s, mainly of European refugees looking for work. This movement continued with varying force until the 1920s, when it was largely replaced by immigration of black work-seekers from the southern states.

During the 20th century the population became largely urban and heavy industry was established along an intensive network of rail and waterway routes. Chicago recovered from a destructive fire in 1871 to become the hub of this network and at one time the second largest American city.

INDIANA

KEY HISTORICAL EVENTS

The area was inhabited by Algonquian-speaking tribes when the first European explorers (French) laid claim to it in the 17th century. They established some fortified trading posts but there was little settlement. In 1763 the area passed to Britain, with other French-claimed territory east of the Mississippi. In 1783 Indiana became part of the North West Territory of the USA; it became a separate territory in 1800 and a state in 1816. Until 1811 there had been continuing conflict with the Indian inhabitants, who were then defeated at Tippecanoe.

Early farming settlement was by families of British and German descent, including Amish and Mennonite communities. Later industrial development offered an incentive for more immigration from Europe, and, later, from the southern states. In 1906 the town of Gary was laid out by the United States Steel Corporation and named after its chairman, Elbert H. Gary. The industry flourished on navigable water midway between supplies of iron ore and of coal. Trade and distribution in general benefited from Indiana Port on Lake Michigan, especially after the opening of the St Lawrence Seaway in 1959. The Ohio River was also exploited for carrying freight.

Indianapolis was laid out after 1821 and became the state capital in 1825. Natural gas was discovered in the neighbourhood in the late 19th century, and this stimulated the growth of a motor industry, celebrated with the Indianapolis 500 race, held annually since 1911.

IOWA

KEY HISTORICAL EVENTS

Originally the territory of the Iowa Indians, the area was explored by the Frenchmen Marquette and Joliet in 1673. French trading posts were set up, but there was little other settlement. In 1803 the French sold their claim to Iowa to the USA as part of the Louisiana Purchase. The land was still occupied by Indians but, in the 1830s, the tribes sold their land to the US government and migrated to reservations. Iowa became a US Territory in 1838 and a state in 1846.

The state was settled by immigrants drawn mainly from neighbouring states to the east. Later there was more immigration from Protestant states of northern Europe. The land was extremely fertile and most immigrants came to farm. Not all the Indian population had accepted the cession and there were some violent confrontations, notably the murder of settlers at Spirit Lake in 1857.

The population is still mainly rural and farming predominates, especially livestock farming with its associated stockfeed crops. Most industry is based on agriculture, either as food-processing or agricultural engineering.

The capital, Des Moines, was founded in 1843 as a fort to protect Indian rights. It expanded rapidly with the growth of a local coal field after 1910.

TERRITORY AND POPULATION

Iowa is bounded east by the Mississippi River (forming the boundary with Wisconsin and Illinois), south by Missouri, west by the Missouri River (forming the boundary with Nebraska), north-west by the Big Sioux River (forming the boundary with South Dakota) and north by Minnesota. KANSAS

KEY HISTORICAL EVENTS

The area was explored from Mexico in the 16th century, when Spanish travellers found groups of Kansa, Wichita, Osage and Pawnee tribes. The French claimed Kansas in 1682 and they established a valuable fur trade with local tribes in the 18th century. In 1803 the area passed to the USA as part of the Louisiana Purchase and became a base for pioneering trails further west. After 1830 it was 'Indian Territory' and a number of tribes displaced from eastern states were settled there. In 1854 the Kansas Territory was created and opened for white settlement. The early settlers were farmers from Europe or New England, but the Territory's position brought it into contact with southern ideas also. Until 1861 there were frequent outbursts of violence over the issue of slavery. Slavery had been excluded from the future Territory by the Missouri Compromise of 1820, but the 1854 Kansas-Nebraska Act had affirmed the principle of 'popular sovereignty' to settle the issue, which was then fought out by opposing factions throughout 'Bleeding Kansas'.

Kansas finally entered the Union (as a non-slavery state) in 1861; the part of Colorado which had formed part of the Kansas Territory was then separated from it.

The economy developed through a combination of cattle-ranching and railways. Herds were driven to the railheads and shipped from vast stockyards, or slaughtered and processed in railhead meat-packing plants. Wheat and sorghum also became important once the plains could be ploughed on a large scale.

KENTUCKY

KEY HISTORICAL EVENTS

Lying west of the Appalachians and south of the Ohio River, the area was the meeting place and battleground for the eastern Iroquois and the southern Cherokees. Northern Shawnees also penetrated. The first successful white settlement took place in 1769 when Daniel Boone reached the Bluegrass plains from the eastern, trans-Appalachian, colonies. After 1783 immigration from the east was rapid, settlers travelling by river or crossing the mountains by the Cumberland Gap. The area was originally attached to Virginia but became a separate state in 1792.

Large plantations dependent on slave labour were established, as were small farms worked by white owners. The state became divided on the issue of slavery, although plantation interests (mainly producing tobacco) dominated state government. In the event the state did not secede in 1861, and the majority of citizens supported the Union. Public opinion swung round in support of the south during the difficulties of the reconstruction period.

The eastern mountains became an important coal-mining area, tobacco-growing continued and the Bluegrass plains produced livestock, including especially fine thoroughbred horses.

LOUISIANA

KEY HISTORICAL EVENTS

Originally the Territory of Choctaw and Caddo tribes, the whole area was claimed for France in 1682. The French founded New Orleans in 1718 and it became the centre of a crown colony in 1731. During the wars which the European powers fought over their American interests, the French ceded the area west of the

Mississippi (most of the present state) to Spain in 1762 and the eastern area, north of New Orleans, to Britain in 1763. The British section passed to the USA in 1783, but France bought back the rest from Spain in 1800, including New Orleans and the mouth of the Mississippi. The USA, fearing to be excluded from a strategically important and commercially promising shipping area, persuaded France to sell Louisiana again in 1803. The present states of Missouri, Arkansas, Iowa, North Dakota, South Dakota, Nebraska and Oklahoma were included in the purchase.

The area became the Territory of New Orleans in 1804 and was admitted to the Union as a state in 1812. The economy at first depended on cotton and sugar-cane plantations. The population was of French, Spanish and black descent, with a growing number of American settlers. Plantation interests succeeded in achieving secession in 1861, but New Orleans was occupied by the Union in 1862. Planters re-emerged in the late 19th century and imposed rigid segregation of the black population, denying them their new rights.

The state has become mainly urban industrial, with the Mississippi ports growing rapidly. There is petroleum and natural gas, and a strong tourist industry based on the French culture and Caribbean atmosphere of New Orleans.

MAINE

KEY HISTORICAL EVENTS

Originally occupied by Algonquian-speaking tribes, the Territory was disputed between different groups of British settlers, and between the British and French, throughout the 17th and most of the 18th centuries. After 1652 it was governed as part of Massachusetts, and French claims finally failed in 1763. Most of the early settlers were English and Protestant Irish, with many Quebec French.

The Massachusetts settlers had gained control when the original colonist, Sir Ferdinando Gorges, supported the losing royalist side in the English civil war. Their control was questioned during the English-American war of 1812, when Maine residents claimed that the Massachusetts government did not protect them against British raids. Maine was separated from Massachusetts and entered the Union as a state in 1820.

Maine is a mountainous state and even the coastline is rugged, but the coastal belt is where most settlement has developed. In the 19th century there were manufacturing towns making use of cheap water-power, and the rocky shore

supported a shell-fish industry. The latter still flourishes, together with intensive horticulture, producing potatoes and fruit. The other main economic development has been in exploiting the forests for timber, pulp and paper.

The capital is Augusta, a river trading post which was fortified against Indian attacks in 1754, incorporated as a town in 1797 and chosen as capital in 1832.

TERRITORY AND POPULATION

Maine is bounded west, north and east by Canada, south-east by the Atlantic, south and south-west by New Hampshire. Land area, 30,865 sq. miles (79,931 sq. km). Census population, 1 April 1990, 1,127,928 (44·6% urban), an increase of 9·18% since 1980. Population estimate (1997), 1,242,000.

Population for 5 census years was:

MARYLAND

KEY HISTORICAL EVENTS

The first European visitors found groups of Algonquian-speaking tribes, often under attack by Iroquois from further north. The first white settlement was made by the Calvert family, British Roman Catholics, in 1634. The settlers received some legislative rights in 1638. In 1649 their assembly passed the Act of Toleration, granting freedom of worship to all Christians. A peace treaty was signed with the Iroquois in 1652, after which it was possible for farming settlements to expand north and west. The capital (formerly at St Mary's City) was moved to Annapolis in 1694. Baltimore, which became the state's main city, was founded in 1729.

The first industry was tobacco-growing, which was based on slave-worked plantations. There were also many immigrant British small farmers, tradesmen and indentured servants.

At the close of the War of Independence the treaty of Paris was ratified in Annapolis. Maryland became a state of the Union in 1788. In 1791 the state ceded land for the new federal capital, Washington, and its economy has depended on the capital's proximity ever since. Baltimore also grew as a port and industrial city, attracting much European immigration in the 19th century. Although strong sympathy for the south was expressed, Maryland remained within the Union in the Civil War albeit under the imposition of martial law.

TERRITORY AND POPULATION

Maryland is bounded north by Pennsylvania, east by Delaware and the Atlantic, south by Virginia and West Virginia, with the Potomac River forming most of the boundary, and west by West Virginia. MASSACHUSETTS

KEY HISTORICAL EVENTS

The first European settlement was at Plymouth, when the *Mayflower* landed its company of English religious separatists in 1620. In 1626–30 more colonists arrived, the main body being a large company of English Puritans who founded a Puritan commonwealth. This commonwealth, of about 1,000 colonists led by John Winthrop, became the Massachusetts Bay Colony and was founded under a company charter. Following disagreement between the English government and the

colony the charter was withdrawn in 1684, but in 1691 a new charter united a number of settlements under the name of Massachusetts Bay. The colony's government was rigidly theocratic.

Shipbuilding, iron-working and manufacturing were more important than farming from the beginning, the land being poor. The colony was Protestant and of English descent until the War of Independence. The former colony adopted its present constitution in 1780. In the struggle which ended in the separation of the American colonies from the mother country, Massachusetts took the foremost part, and on 6 Feb. 1788 became the 6th state to ratify the US constitution. The state acquired its present boundaries (having previously included Maine) in 1820.

During the 19th century industrialization and immigration from Europe both increased while Catholic Irish and Italian immigrants began to change the population's character. The main inland industry was textile manufacture, the main coastal occupation was whaling; both have now gone. Boston has remained the most important city of New England, attracting a large black population since 1950.

MICHIGAN

KEY HISTORICAL EVENTS

The French were the first European settlers, establishing a fur trade with the local Algonquian Indians in the late 17th century. They founded Sault Ste Marie in 1668 and Detroit in 1701. In 1763 Michigan passed to Britain, along with other French territory east of the Mississippi, and from Britain it passed to the USA in 1783. Britain, however, kept a force at Detroit until 1796, and recaptured Detroit in 1812. Regular American settlement did not begin until later. The Territory of Michigan (1805) had its boundaries extended after 1818 and 1834. It was admitted to the Union as a state (with its present boundaries) in 1837.

During the 19th century there was rapid industrial growth, especially in mining and metalworking. The largest groups of immigrants were British, German, Irish and Dutch. Other significant groups came from Scandinavia, Poland and Italy. Many groups of immigrants came to settle as miners, farmers and industrial workers. The motor industry became dominant, especially in Detroit. Lake Michigan ports shipped bulk cargo, especially iron ore and grain.

Detroit was the capital until 1847, when that function passed to Lansing. Detroit remained, however, an important centre of flour-milling and shipping and, after the First World War, of the motor industry.

TERRITORY AND POPULATION

Michigan is divided into two by Lake Michigan. The northern part is bounded south by the lake and by Wisconsin, west and north by Lake Superior, east by the North Channel of Lake Huron; between the two latter lakes the Canadian border runs through straits at Sault Ste Marie. The southern part is bounded in the west and north by Lake Michigan, east by Lake Huron, Ontario and Lake Erie, south by Ohio and Indiana. Area, 58,110 sq. miles (150,544 sq. km). Census population, 1 April 1990, 9,295,297 (70·5% urban), an increase of 0·4% since 1980. Population estimate (1998), 9,817,242.

MINNESOTA

KEY HISTORICAL EVENTS

Minnesota remained an Indian territory until the middle of the 19th century, the main groups being Chippewa and Sioux, many of whom are still there. In the 17th century there had been some French exploration, but no permanent settlement. After passing under the nominal control of France, Britain and Spain, the area became part of the Louisiana Purchase and so was sold to the USA in 1803.

Fort Snelling was founded in 1819. Early settlers came from other states, especially New England, to exploit the great forests. Lumbering gave way to homesteading, and the American settlers were joined by Germans, Scandinavians and Poles. Agriculture, mining and forest industries became the mainstays of the

economy. Minneapolis, founded as a village in 1856, grew first as a lumber centre, processing the logs floated down the Minnesota River, and then as a centre of flour-milling and grain marketing. St Paul, its twin city across the river, became Territorial capital in 1849 and state capital in 1858. St Paul also stands at the head of navigation on the Mississippi, which rises in Minnesota.

The Territory (1849) included parts of North and South Dakota, but at its admission to the Union in 1858, the state of Minnesota had its present boundaries.

TERRITORY AND POPULATION

Minnesota is bounded north by Canada, east by Lake Superior and Wisconsin, with the Mississippi River forming the boundary in the south-east, south by Iowa, west by South and North Dakota, with the Red River forming the boundary in the north-west. Land area, 79,617 sq. miles (206,207 sq. km). Census population, 1 April 1990, 4,375,099 (69·9% urban), an increase of 7·31% since 1980. Population estimate (1997), 4,686,000.

MISSISSIPPI

KEY HISTORICAL EVENTS

Mississippi was one of the territories claimed by France after the 17th century and ceded to Britain in 1763. The indigenous people were Choctaw and Natchez. French settlers at first traded amicably with them, but in the course of three wars (1716, 1723 and 1729) the French allied with the Choctaw to drive the Natchez out. During hostilities the Natchez massacred the settlers of Fort Rosalie, which the French had founded in 1716 and which was later renamed Natchez.

In 1783 the area became part of the USA except for Natchez which was under Spanish control until 1798. The United States then made it the capital of the Territory of Mississippi. The boundaries of the Territory were extended in 1804 and again in 1812. In 1817 it was divided into two territories, with the western part becoming the state of Mississippi. (The eastern part became the state of Alabama in 1819.) The city of Jackson was laid out in 1822 as the new state capital.

A cotton plantation economy developed, based on black slave labour, and by 1860 the majority of the population was black. Mississippi joined the Confederacy during the Civil War. After defeat and reconstruction there was a return to rigid segregation and denial of black rights. This situation lasted until the 1960s. There was a black majority until the Second World War, when out-migration began to change the pattern. By 1990 about 35% of the population was black, and manufacture (especially clothing and textiles) had become the largest single employer of labour.

MISSOURI

KEY HISTORICAL EVENTS

Territory of several Indian groups, including the Missouri, the area was not settled by European immigrants until the 18th century. The French founded Ste Genevieve in 1735, partly as a lead-mining community. St Louis was founded as a fur-trading base in 1764. The area was nominally under Spanish rule from 1770 until 1800 when it passed back to France. In 1803 the USA bought it as part of the Louisiana Purchase.

St Louis was made the capital of the whole Louisiana Territory in 1805, and of a new Missouri Territory in 1812. In that year American immigration increased markedly. The Territory became a state in 1821, but there had been bitter disputes between slave-owning and anti-slavery factions, with the former succeeding in obtaining statehood without the prohibition of slavery required of all other new states north of latitude 36°30'; this was achieved by the Missouri Compromise of 1820. The Compromise was repealed in 1854 and declared unconstitutional in 1857. During the Civil War the state held to the Union side, although St Louis was placed under martial law.

With the development of steamboat traffic on the Missouri and Mississippi rivers, and the expansion of railways, the state became the transport hub of all western movement. Lead and other mining remained important, as did livestock farming. European settlers came from Germany, Britain and Ireland.

MONTANA

KEY HISTORICAL EVENTS

Originally the territory of many groups of Indian hunters including the Sioux, Cheyenne and Chippewa, Montana was not settled by American colonists until the 19th century. The area passed to the USA with the Louisiana Purchase of 1803, but the area west of the Rockies was disputed with Britain until 1846. Trappers and fur-traders were the first immigrants, and the fortified trading post at Fort Benton (1846) became the first permanent settlement. Colonization increased when gold was found in 1862. Montana was created a separate Territory (out of Idaho and Dakota Territories) in 1864. In 1866 large-scale grazing of sheep and cattle was allowed, and this provoked violent confrontation with the indigenous people whose hunting lands were invaded. Indian wars led to the defeat of federal forces at Little Bighorn in 1876 and at Big Hole Basin in 1877, but the Indians could not continue the fight and they had been moved to reservations by 1880. Montana became a state in 1889.

Helena, the capital, was founded as a mining town in the 1860s. In the early 20th century there were many European immigrants who settled as farmers or in the mines, especially in copper-mining at Butte.

NEBRASKA

KEY HISTORICAL EVENTS

The Nebraska region was first reached by Europeans from Mexico under the Spanish general Coronado in 1541. It was ceded by France to Spain in 1763, retroceded to France in 1801, and sold by Napoleon to the USA as part of the Louisiana Purchase in 1803. During the 1840s the Platte River valley became an established trail for thousands of pioneers' wagons heading for Oregon and California. The need to serve and protect the trail led to the creation of Nebraska as a Territory in 1854. In 1862 the Homestead Act opened the area for settlement, but colonization was not very rapid until the Union Pacific Railroad was completed in 1869. The largest city, Omaha, developed as the starting point of the Union Pacific and became one of the largest railway towns in the country.

Nebraska became a state in 1867, with approximately its present boundaries except that it later received small areas from the Dakotas. Many early settlers were from Europe, brought in by railway-company schemes, but from the late 1880s eastern Nebraska suffered catastrophic drought. Crop and stock farming recovered, but crop growing was only established in the west by means of irrigation.

TERRITORY AND POPULATION

Nebraska is bounded in the north by South Dakota, with the Missouri River forming the boundary in the north-east and the boundary with Iowa and Missouri to the east; south by Kansas, south-west by Colorado and west by Wyoming. NEVADA

KEY HISTORICAL EVENTS

The area was part of Spanish America until 1821, when it became part of the newly independent state of Mexico. Following a war between Mexico and the USA, Nevada was ceded to the USA as part of California in 1848. Settlement began in 1849, and the area was separated from California and joined with Utah Territory in 1850. In 1859 a rich deposit of silver was found in the Comstock Lode. Virginia City was founded as a mining town and immigration increased rapidly. Nevada Territory was formed in 1861. During the Civil War the Federal Government, allegedly in order to obtain the wealth of silver for the Union cause, agreed to admit Nevada to the Union in 1864 as the 36th state. Areas of Arizona and Utah Territories were added to it in 1866–67.

The mining boom lasted until 1882, by which time cattle ranching had become equally important in the valleys where the climate is less arid. Carson City, the capital, developed in association with the nearby mining industry. The largest cities, Las Vegas and Reno, grew most in the 20th century with the building of the Hoover dam, the introduction of legal gambling and of easily obtained divorce.

After 1950 much of the desert area was adopted by the Federal Government for weapons testing and other military purposes.

TERRITORY AND POPULATION

Nevada is bounded north by Oregon and Idaho, east by Utah, south-east by Arizona, with the Colorado River forming most of the boundary, south and west by California. Land area, 109,889 sq. miles (284,613 sq. km). The federal government (fiscal year 1995) owned 54,159,458 acres, or 77·1% of the land area.

Census population on 1 April 1990, 1,201,833 (88·3% urban), an increase of 401,325 since 1980. Population estimate (1999), 1,961,670.

Population in 5 census years was:

	White	*Black*	*Indian*	*All others*	*Total*	*Per sq. mile*

1990	1,012,695	78,771	19,637	90,730	1,201,833	10·9

Of the total population in 1990, 611,880 were male, 1,061,312 were urban and 364,109 were under 21 years of age. Nevada's population rise has made it the fastest-growing state in the USA every year since 1986.

The largest cities (with 1998 estimated population) are: Las Vegas, 441,230; Reno, 165,940; Henderson, 159,380; North Las Vegas, 106,660; Sparks, 61,560; Carson City (the capital), 51,860.

SOCIAL STATISTICS

NEW HAMPSHIRE

KEY HISTORICAL EVENTS

The area was part of a grant by the English crown made to John Mason and fellow-colonists, and was first settled in 1623. In 1629 an area between the Merrimack and Piscatagua rivers was called New Hampshire. More settlements followed, and in 1641 they were taken under the jurisdiction of the governor of Massachusetts. New Hampshire became a separate colony in 1679.

After the War of Independence New Hampshire became one of the 13 original states of the Union, drawing up its constitution in 1784 and revising it on accession to the Union in 1792.

The settlers were Protestants from Britain and Northern Ireland. They developed manufacturing industries, especially shoe-making, textiles and clothing, to which large numbers of French Canadians were attracted after the Civil War.

Portsmouth, originally a fishing settlement, was the colonial capital and is the only seaport. In 1808 the state capital was moved to Concord (having had no permanent home since 1775); Concord produced the Concord Coach which was widely used on the stagecoach routes of the West until at least 1900.

NEW JERSEY

KEY HISTORICAL EVENTS

Originally the territory of Delaware Indians, the area was first settled by immigrant colonists in the early 17th century, when Dutch and Swedish traders established fortified posts on the Hudson and Delaware Rivers. The Dutch took control but lost it to the English in 1664. In 1676 the English divided the area in two; the eastern portion was assigned to Sir George Carteret and the western granted to Quaker settlers. This division lasted until 1702 when New Jersey was united as a colony of the Crown and placed under the jurisdiction of the governor of New York. It became a separate colony in 1738.

During the War of Independence crucial battles were fought at Trenton, Princeton and Monmouth. New Jersey became the 3rd state of the Union in 1787. Trenton, the state capital since 1790, began as a Quaker settlement and became an iron-working town. Industrial development grew rapidly, there and elsewhere in the state, after the opening of canals and railways in the 1830s. Princeton, also a Quaker settlement, became an important post on the New York road; the college of New Jersey (Princeton University) was transferred there from Newark in 1756.

The need for supplies in the Civil War stimulated industry and New Jersey became a manufacturing state. The growth beyond its borders of New York and Philadelphia, however, produced a pattern of commuting to employment in both centres. By 1980 about 60% of the state's population lived within 30 miles of New York.

NEW MEXICO

KEY HISTORICAL EVENTS

The first European settlement was established in 1598. Until 1771 New Mexico was the Spanish kings' 'Kingdom of New Mexico'. In 1771 it was annexed to the northern province of New Spain. When New Spain won its independence in 1821, it took the name of Republic of Mexico and established New Mexico as its northernmost department. Ceded to the USA in 1848 after war between the USA and Mexico, the area was organized as a Territory in 1850, by which time its population was Spanish and Indian. There was frequent conflict, especially between new settlers and raiding parties of Navajo and Apaches. The Indian war lasted from 1861 until 1866, and from 1864–68 about 8,000 Navajo were imprisoned at Bosque Redondo.

The boundaries were altered several times when land was taken into Texas, Utah, Colorado and lastly (1863) Arizona. New Mexico became a state in 1912.

Settlement proceeded by means of irrigated crop-growing and Mexican-style ranching. During the Second World War the desert areas were brought into use as testing zones for atomic weapons. Mineral extraction also developed, especially after the discovery of uranium and petroleum.

NEW YORK STATE

KEY HISTORICAL EVENTS

The first European immigrants came in the 17th century, when there were two powerful Indian groups in rivalry: the Iroquois confederacy (Mohawk, Oneida, Onondaga, Cayuga and Seneca) and the Algonquian-speaking Mohegan and

Munsee. The Dutch made settlements at Fort Orange (now Albany) in 1624 and at New Amsterdam in 1625, trading with the Indians for furs. In the 1660s there was conflict between the Dutch and the British in the Caribbean; as part of the concluding treaty the British in 1664 received Dutch possessions in the Americas, including New Amsterdam, which they renamed New York.

In 1763 the Treaty of Paris ended war between the British and the French in North America (in which the Iroquois had allied themselves with the British). Settlers of British descent in New England then felt confident enough to expand westward into the area. The climate of northern New York being severe, most settled in the Hudson river valley. After the War of Independence New York became the 11th state of the Union (1778), having first declared itself independent of Britain in 1777.

The economy depended on manufacturing, shipping and other means of distributing goods, and trade. During the 19th century New York became the most important city in the USA. Its manufacturing industries, especially clothing, attracted thousands of European immigrants. Industrial development spread along the Hudson-Mohawk valley, which was made the route of the Erie Canal (1825) linking New York with Buffalo on Lake Erie and thus with the developing farmlands of the middle west.

CONSTITUTION AND GOVERNMENT

The present constitution dates from 1894; a later constitutional convention, 1938, is now legally considered merely to have amended the 1894 constitution, which has now had 93 amendments. For local government the state is divided into 62 counties, 5 of which constitute the city of New York. There were state parks and recreation areas covering 260,198 acres in 1990.

Each of the state's 62 cities is incorporated by charter, under special legislation. The government of New York City is vested in the mayor (David Dinkins), elected for 4 years, and a city council, whose president and members are elected for 4 years. The council has a President and 51 members, each elected from a district wholly within the city. The mayor appoints all the heads of departments, except the comptroller, who is elected. Each of the 5 city boroughs (Manhattan, Bronx, Brooklyn, Queens and Staten Island) has a president, elected for 4 years. NORTH CAROLINA

KEY HISTORICAL EVENTS

The early inhabitants were Cherokees. European settlement was attempted in 1585–87, following an exploratory visit by Sir Walter Raleigh, but this failed. Settlers from Virginia came to the shores of Albemarle Sound after 1650, and in 1633 Charles II chartered a private colony of Carolina. In 1691 the north was put under a deputy governor who ruled from Charleston in the south. The colony was formally separated into North and South Carolina in 1712. In 1729 control was taken from the private proprietors and vested in the Crown, whereupon settlement grew, and the boundary between north and south was finally fixed (1735).

After the War of Independence North Carolina became one of the original 13 states of the Union. The city of Raleigh was laid out as the new capital. Having been a plantation colony North Carolina continued to develop as a plantation state, growing tobacco with black slave labour. It was also an important source of gold before the western gold-rushes of 1848.

In 1861 at the outset of the Civil War North Carolina seceded from the Union, but General Sherman occupied the capital unopposed. A military governor was admitted in 1862, and civilian government restored with readmission to the Union in 1868.

NORTH DAKOTA

KEY HISTORICAL EVENTS

The original inhabitants were various groups of Plains Indians. French explorers and traders were active among them in the 18th century, often operating from French possessions in Canada. France claimed the area until 1803, when it passed to the USA as part of the Louisiana Purchase, except for the north-eastern part which was held by the British until 1818.

Trading with the Indians, mainly for furs, continued until the 1860s, with American traders succeeding the French. In 1861 the Dakota Territory (North and South) was established. In 1862 the Homestead Act was passed (allowing 160 acres of public land free to any family who had worked and lived on it for 5 years) and this greatly stimulated settlement. Farming settlers came on to the wheat lands in great numbers, many of them from Canada, Norway and Germany.

Bismarck, the capital, began as a crossing-point on the Missouri and was fortified in 1872 to protect workers building the Northern Pacific Railway. There followed a gold-rush nearby, and the town became a service centre for prospectors. In 1899 North and South Dakota were admitted to the Union as separate states, and Bismarck became the Northern capital. The largest city is Fargo which was also a railway town, named after William George Fargo the express-company founder.

The population grew rapidly until 1890 and steadily until 1930 by which time it was about one-third European in parentage. Between 1930 and 1970 there was a steady population drain, increasing whenever farming was affected by the extremes of the continental climate. The state is still mainly agricultural although oil was discovered in 1951.

OHIO

KEY HISTORICAL EVENTS

The land was inhabited by Delaware, Miami, Shawnee and Wyandot Indians. It was explored by French and British traders in the 18th century and confirmed as part of British North America in 1763. After the War of Independence it became part of the Northwest Territory of the new United States. Former American soldiers of the war came in from New England in 1788 and made the first permanent white settlement at Marietta, at the confluence of the Ohio and Muskingum rivers. In 1803 Ohio was separated from the rest of the Territory and admitted to the Union as the 17th state.

During the early 19th century there was steady immigration from Europe, mainly of Germans, Swiss, Irish and Welsh. Industrial growth began from the processing of local farm, forest and mining products; it increased rapidly with the need to supply the Union armies in the Civil War of 1861–65.

As the industrial cities grew, so immigration began again, with many whites from eastern Europe and the Balkans and blacks from the southern states looking for work in Ohio.

Cleveland, which developed rapidly as a Lake Erie port after the opening of commercial waterways to the interior and the Atlantic coast (1825, 1830 and 1855), became an iron-and-steel town during the Civil War.

KEY HISTORICAL EVENTS

Francisco Coronado led a Spanish expedition in 1541, claiming the land for Spain. There were several Indian groups, but no strong political unit. In 1714 Juchereau de Saint Denis made the first French contact. During the 18th century French fur-traders were active, and France and Spain struggled for control, a struggle which was resolved by the French withdrawal in 1763. France returned briefly in 1800–03, and the territory then passed to the USA as part of the Louisiana Purchase.

In 1828 the Federal Government set aside the area of the present state as Indian Territory, that is, a reservation and sanctuary for Indian tribes who had been driven off their lands elsewhere by white settlement. About 70 tribes came, among whom were Creeks, Choctaws and Cherokees from the south-eastern states, and Plains Indians.

In 1889 the government took back about 2·5m. acres of the Territory and opened it to white settlement. About 10,000 homesteaders gathered at the site of Oklahoma City on the Santa Fe Railway in the rush to stake their land claims. The settlers' area, and others subsequently opened to settlement, were organized as the Oklahoma Territory in 1890. In 1907 the Oklahoma and Indian Territories were combined and admitted to the Union as a state. Indian reservations were established within the state.

The economy first depended on ranching and farming, with packing stations on the railways. A mining industry grew in the 1870s attracting foreign immigration, mainly from Europe. In 1901 oil was found near Tulsa, and the industry grew rapidly.

TERRITORY AND POPULATION

Oklahoma is bounded north by Kansas, north-east by Missouri, east by Arkansas, south by Texas (the Red River forming part of the boundary) and, at the western extremity of the 'panhandle', by New Mexico and Colorado. Land area, 68,679 sq. miles (177,877 sq. km). Census population, 1 April 1990, 3,189,456 (67·7% urban), an increase of 5·42% since 1980. Population estimate (1997), 3,317,000.

The population at 5 federal censuses was:

	White	*Black*	*Indian*	*Other*	*Total*	*Per sq. mile*

CONSTITUTION AND GOVERNMENT

The constitution, dating from 1907, provides for amendment by initiative petition and legislative referendum; it has had 155 amendments (as of Jan. 1995).

The Legislature consists of a Senate of 48 members, who are elected for 4 years, and a House of Representatives elected for 2 years and consisting of 101 members. The Governor and Lieut.-Governor are elected for 4-year terms; the Governor can only be elected for two terms in succession. Electors are (with necessary exceptions) all citizens 18 years or older, with the usual qualifications.

The state sends 6 representatives to Congress.

The capital is Oklahoma City. The state has 77 counties.

Irrigated production has increased in the Oklahoma 'panhandle'. The Ogalala aquifer is the primary source of irrigation water there and in western Oklahoma, a finite source because of its isolation from major sources of recharge. Declining groundwater levels necessitate the most effective irrigation practices.

There are 3 forest regions: Ozark (oak, hickory); Ouachita highlands (pine, oak); Cross-Timbers (post oak, black jack oak). Southern pine is the chief commercial species, at almost 80% of saw-timber harvested annually. Replanting is essential.

OREGON

KEY HISTORICAL EVENTS

The area was divided between many Indian groups including the Chinook, Tillamook, Cayuse and Modoc. In the 18th century English and Spanish visitors tried to establish national claims, based on explorations of the 16th century. The USA also laid claim by right of discovery when an expedition entered the mouth of the Columbia River in 1792.

Oregon was disputed between Britain and the USA. An American fur company established a trading settlement at Astoria in 1811, which the British took in 1812. The Hudson Bay Company were the most active force in Oregon until the 1830s when American pioneers began to migrate westwards along the Oregon Trail. The dispute between Britain and the USA was resolved in 1846 with the boundary fixed

at 49°N. lat. Oregon was organized as a Territory in 1848 but with wider boundaries; it became a state with its present boundaries in 1859.

Early settlers were mainly American. They came to farm in the Willamette Valley and to exploit the western forests. Portland developed as a port for ocean-going traffic, although it was 100 miles inland at the confluence of the Willamette and Columbia rivers. Industries followed when the railways came and the rivers were exploited for hydro-electricity. The capital of the Territory from 1851 was Salem, a mission for Indians on the Willamette river; it was confirmed as state capital in 1864. Salem became the processing centre for the farming and market-gardening Willamette Valley.

TERRITORY AND POPULATION

Oregon is bounded in the north by Washington, with the Columbia River forming most of the boundary, east by Idaho, with the Snake River forming most of the boundary, south by Nevada and California and west by the Pacific. Land area, 97,060 sq. miles (251,385 sq. km). The federal government owned (1994) 32,132,581 acres (51·73% of the state area). Census population, 1 April 1990, 2,842,321 (70·5% urban), an increase of 8% since 1980. Population estimate (1997), 3,243,000.

PENNSYLVANIA

KEY HISTORICAL EVENTS

Pennsylvania was occupied by 4 powerful tribes in the 17th century: Delaware, Susquehannock, Shawnee and Iroquois. The first white settlers were Swedish, arriving in 1643. The British became dominant in 1664, and in 1681 William Penn, an English Quaker, was given a charter to colonize the area as a sanctuary for his fellow Quakers. Penn's ideal was peaceful co-operation with the Indians and religious toleration within the colony. Several religious groups were attracted to Pennsylvania because of this policy, including Protestant sects from Germany and France. During the 18th century, co-operation with the Indians failed as the settlers pushed into more territory and the Indians resisted.

During the War of Independence the Declaration of Independence was signed in Philadelphia, the main city. Pennsylvania became one of the original 13 states of the Union. In 1812 the state capital was moved to its current location in Harrisburg, which began as a trading post and ferry point on the Susquehanna River in the south-central part of the state. The Mason-Dixon line, the state's southern boundary, became the dividing line between free and slave states during the conflict leading to the Civil War. During the war crucial battles were fought in the state, including the battle of Gettysburg. Industrial growth was rapid after the war. Pittsburgh, founded as a British fort in 1761 during war with the French, had become an iron-making town by 1800 and grew rapidly when canal and railway links opened in the 1830s. The American Federation of Labor was founded in Pittsburgh in 1881, by which time the city was of national importance in producing coal, iron, steel and glass.

At the beginning of the 20th century, industry attracted immigration from Italy and eastern Europe. In farming areas the early sect communities survive, notably Amish and Mennonites. (The Pennsylvania 'Dutch' are of German extraction.)

RHODE ISLAND

KEY HISTORICAL EVENTS

The earliest white settlement was founded by Roger Williams, an English Puritan who was expelled from Massachusetts because of his dissident religious views and his insistence on the land-rights of the Indians. At Providence he bought land from the Narragansetts and founded a colony there in 1636. A charter was granted in 1663. The colony was governed according to policies of toleration, which attracted Jewish and nonconformist settlers; later there was French Canadian settlement also.

Shipping and fishing developed strongly, especially at Newport and Providence; these two cities were twin capitals until 1900, when the capital was fixed at Providence.

Significant actions took place in Rhode Island during the War of Independence. In 1790 the state accepted the federal constitution and was admitted to the Union.

Early farming development was most successful in dairying and poultry. Early industrialization was mainly in textiles, beginning in the 1790s, and flourishing on abundant water power. Textiles dominated until the industry began to decline after the First World War. British, Irish, Polish, Italian and Portuguese workers settled in the state, working in the mills or in the shipbuilding, shipping, fishing and naval ports. The crowding of a new population into cities led to the abolition of the property qualification for the franchise in 1888.

SOUTH CAROLINA

KEY HISTORICAL EVENTS

Originally the territory of Yamasee Indians, the area attracted French and Spanish explorers in the 16th century. There were attempts at settlement on the coast, none of which lasted. Charles I of England made a land grant in 1629, but the first permanent white settlement began at Charles Town in 1670, moving to Charleston in 1680. This was a proprietorial colony including North Carolina until 1712; both passed to the Crown in 1729.

The coastlands developed as plantations worked by slave labour. In the hills there were small farming settlements and many trading posts, dealing with Indian suppliers.

After active campaigns during the War of Independence, South Carolina became one of the original states of the Union in 1778.

In 1793 the cotton gin was invented, enabling the speedy mechanical separation of seed and fibre. This made it possible to grow huge areas of cotton and meet the rapidly growing needs of new textile industries. Plantation farming spread widely, and South Carolina became hostile to the anti-slavery campaign which was strong in northern states. The state first attempted to secede from the Union in 1847, but was not supported by other southern states until 1860, when secession led to civil war.

At that time the population was about 730,000, of whom 413,000 were black. During the reconstruction periods there was some political power for black citizens, but control was back in white hands by 1876. The constitution was amended in 1895 to disenfranchise most black voters, and they remained with hardly any voice in government until the Civil Rights movement of the 1960s. Columbia became the capital in 1786.

TERRITORY AND POPULATION

South Carolina is bounded in the north by North Carolina, east and south-east by the Atlantic, south-west and west by Georgia. Land area, 30,111 sq. miles (77,988 sq. km). SOUTH DAKOTA

KEY HISTORICAL EVENTS

The area was part of the hunting grounds of nomadic Dakota (Sioux) Indians. French explorers visited the site of Fort Pierre in 1742–43, and claimed the area for France. In 1763 the claim fell and, together with French claims to all land west of the Mississippi, passed to Spain. Spain held the Dakotas until defeated by France in the Napoleonic Wars, when France regained the area and sold it to the USA as part of the Louisiana Purchase in 1803.

Fur-traders were active, but there was no settlement until Fort Randall was founded on the Missouri river in 1856. In 1861 North and South Dakota were organized as the Dakota Territory, and the Homestead Act of 1862 stimulated settlement, mainly in the south-east until there was a gold-rush in the Black Hills of the west in 1875–76. Colonization developed as farming communities in the east, miners and ranchers in the west. Livestock farming predominated, attracting European settlers from Scandinavia, Germany and Russia.

In 1899 the North and South were separated and admitted to the Union as states. The capital of South Dakota is Pierre, founded as a railhead in 1880, chosen as a temporary capital and confirmed as permanent capital in 1904. It faces Fort Pierre, the former centre of the fur trade, across the Missouri river. During the 20th century there have been important schemes to exploit the Missouri for power and irrigation.

TENNESSEE

KEY HISTORICAL EVENTS

Bordered on the west by the Mississippi, Tennessee was part of an area inhabited by Cherokee. French, Spanish and British explorers penetrated the area up the Mississippi and traded with the Cherokee in the late 16th and 17th centuries. French claims were abandoned in 1763, colonists from the British colonies of Virginia and Carolina then began to cross the Appalachians westwards, but there was no organized Territory until after the War of Independence. In 1784 there was a short-lived, independent state called Franklin. In 1790 the South West Territory (including Tennessee) was formed, and Tennessee entered the Union as a state in 1796.

The state was active in the war against Britain in 1812. After the American victory, colonization increased and pressure for land mounted. The Cherokee were

forcibly removed during the 1830s and taken to Oklahoma, a journey on which many died.

Tennessee was a slave state and seceded from the Union in 1861, although eastern Tennessee was against secession. There were important battles at Shiloh, Chattanooga, Stone River and Nashville. In 1866 Tennessee was readmitted to the Union.

Nashville, the capital since 1843, Memphis, Knoxville, and Chattanooga all developed as river towns, Memphis becoming an important cotton and timber port. Growth was greatly accelerated by the creation of the Tennessee Valley Authority in the 1930s, producing power for a manufacturing economy. Industry increased to the extent that, by 1970, the normal southern pattern of emigration and population loss had been reversed.

TERRITORY AND POPULATION

TEXAS

KEY HISTORICAL EVENTS

A number of Indian tribes occupied the area before French and Spanish explorers arrived in the 16th century. In 1685 La Salle established a colony at Fort St Louis, but Texas was confirmed as Spanish in 1713. Spanish missions increased during the 18th century with San Antonio (1718) as their headquarters.

In 1820 a Virginian colonist, Moses Austin, obtained permission to begin a settlement in Texas. In 1821 the Spanish empire in the Americas came to an end, and Texas, together with Coahuila, formed a state of the newly independent Mexico. The Mexicans agreed to the Austin venture, and settlers of British and American descent came in.

The settlers became discontented with Mexican government and declared their independence in 1836. Warfare, including the siege of the Alamo fort, ended with the foundation of the independent Republic of Texas, which lasted until 1845. During this period the Texas Rangers were organized as a policing force and border patrol. Texas was annexed to the Union in Dec. 1845, as the Federal Government feared its vulnerability to Mexican occupation. This led to war between Mexico and the USA from 1845 to 1848. In 1861 Texas left the Union and joined the southern states in the Civil War, being readmitted in 1869. Ranching and cotton-growing were the main activities before the discovery of oil in 1901.

UTAH

KEY HISTORICAL EVENTS

Spanish Franciscan missionaries explored the area in 1776, finding Shoshoni Indians. Spain laid claim to Utah and designated it part of Spanish Mexico. As such it passed into the hands of the Mexican Republic when Mexico rebelled against Spain and gained independence in 1821.

In 1848, at the conclusion of war between the USA and Mexico, the USA received Utah along with other south-western territory. Settlers had already arrived in 1847 when the Mormons (the Church of Jesus Christ of Latter-day Saints) arrived, having been driven on by local hostility in Ohio, Missouri and Illinois. Led by Brigham Young, they entered the Great Salt Valley and colonized it. In 1849 they applied for statehood but were refused. In 1850 Utah and Nevada were joined as one Territory. The Mormon community continued to ask for statehood but this was only granted in 1896, after they had renounced polygamy and disbanded their People's Party.

Mining, especially of copper, and livestock farming were the base of the economy. Settlement had to adapt to desert conditions, and the main centres of population were in the narrow belt between the Wasatch Mountains and the Great Salt Lake. Salt Lake City, the capital, was founded in 1847 and laid out according to Joseph Smith's plan for the city of Zion. It was the centre of the Mormons' provisional 'State of Desert' and Territorial capital from 1856 until 1896, except briefly in 1858 when federal forces occupied it during conflict between territorial and Union governments.

VERMONT

KEY HISTORICAL EVENTS

The original Indian hunting grounds of the Green Mountains and lakes was explored by the Frenchman Samuel de Champlain in 1609 who reached Lake Champlain on the north-west border. The first attempt at permanent settlement was also French, on Isle la Motte in 1666. In 1763 the British gained the area from the French by the

Treaty of Paris. The Treaty, which also brought peace with the Indian allies of the French, opened the way for settlement, but in a mountain state transport was slow and difficult. Montpelier, the state capital from 1805, was chartered as a township site in 1781 to command the main pass through the Green Mountains.

During the War of Independence Vermont declared itself an independent state, to avoid being taken over by New Hampshire and New York. In 1791 it became the 14th state of the Union.

Most early settlers were New Englanders of British and Protestant descent. After 1812 a granite-quarrying industry grew around the town of Barre, attracting immigrant workers from Italy and Scandinavia. French Canadians also settled in Winooski. When textile and engineering industries developed in the 19th century these brought more European workers.

Vermont saw the only Civil War action north of Pennsylvania, when a Confederate raiding party attacked from Canada in 1864.

During the 20th century the textile and engineering industries have declined but paper and lumber industries flourish. Settlement is still mainly rural or in small towns, and farming is pastoral.

TERRITORY AND POPULATION

Vermont is bounded in the north by Canada, east by New Hampshire, south by Massachusetts and west by New York. Land area, 9,614 sq. miles (23,955 sq. km). Census population, 1 April 1990, 562,758 (32·2% urban), an increase of 10% since 1980. Population estimate (1997), 589,000.

Population at 5 census years was:

CLIMATE

Burlington, Jan. 17°F (–8·3°C), July 70°F (21·1°C). Annual rainfall 33" (820 mm). Vermont belongs to the New England climate zone (*see* UNITED STATES: Climate).

CONSTITUTION AND GOVERNMENT

The constitution was adopted in 1793 and has since been amended. Amendments are proposed by two-thirds vote of the Senate every 4 years, and must be accepted by two sessions of the legislature; they are then submitted to popular vote. The state Legislature, consisting of a Senate of 30 members and a House of Representatives of 150 members (both elected for 2 years), meets in Jan. every year. The Governor and Lieut.-Governor are elected for 2 years. Electors are all citizens who possess certain residential qualifications and have taken the freeman's oath set forth in the constitution.

The state sends 1 representative to Congress.

The capital is Montpelier (8,254 in 1990). There are 14 counties and 251 cities, towns and other administrative divisions.

VIRGINIA

KEY HISTORICAL EVENTS

In 1607 a British colony was founded at Jamestown, on a peninsula in the James River, to grow tobacco. The area was marshy and unhealthy but the colony survived and in 1619 introduced a form of representative government. The tobacco plantations expanded and African slaves were imported. Jamestown was later abandoned, but tobacco-growing continued and spread through the eastern part of the territory.

In 1624 control of the colony passed from the Virginia Company of London to the Crown. Growth was rapid during the 17th and 18th centuries. The movement for American independence was strong in Virginia; George Washington and Thomas Jefferson were both Virginians, and crucial battles of the War of Independence were fought there.

When the Union was formed, Virginia became one of the original states, but with reservations regarding the constitution because of its attachment to slave-owning. In 1831 there was a slave rebellion. The tobacco plantations began to decline, and plantation owners turned to the breeding of slaves. While the eastern plantation lands seceded from the Union in 1861, the small farmers and miners of the western hills refused to secede and remained in the Union as West Virginia.

Richmond, the capital, became the capital of the Confederacy. Much of the Civil War's decisive conflict took place in Virginia, with considerable damage to the economy. After the war the position of the black population was little improved. Blacks remained without political or civil rights until the 1960s.

WASHINGTON

KEY HISTORICAL EVENTS

The strongest Indian tribes in the 18th century were Chinook, Nez Percé, Salish and Yakima. The area was designated by European colonizers as part of the Oregon Country. Between 1775 and 1800 it had been claimed by explorers for Spain, Britain and the USA; the dispute between the two latter nations was not settled until 1846.

The first small white settlements were Indian missions and fur-trading posts. In the 1840s American settlers began to push westwards along the Oregon Trail, making a speedy solution of the dispute with Britain necessary. When this was achieved the whole area was organized as the Oregon Territory in 1848, and Washington was made a separate Territory in 1853.

Apart from trapping and fishing, the important industry was logging, mainly to supply building timbers to the new settlements of California. After 1870 the westward extension of railways helped to stimulate settlement. Statehood was granted in 1889. The early population was composed mainly of Americans from neighbouring states to the east, and Canadians. Scandinavian immigrants followed. Seattle, the chief city, was laid out in 1853 as a saw-milling town and named after the Indian chief who had ceded the land and befriended the settlers. It grew as a port during the Alaskan and Yukon gold-rushes of the 1890s. The economy thrived on exploiting the Columbia River for hydro-electric power.

WEST VIRGINIA

KEY HISTORICAL EVENTS

In 1861 the state of Virginia seceded from the Union over the issue of slave-owning. The 40 western counties of the state were composed of hilly country, settled by miners and small farmers who were not slave-owners. In 1862 these counties ratified an ordinance providing for the creation of a new state. On 20 June 1863 West Virginia became the 35th state of the Union.

The capital, Charleston, was an 18th-century fortified post on the early westward migration routes across the Appalachians. In 1795 local brine wells were tapped and the city grew as a salt town. Coal, oil, natural gas and a variety of salt brines were all found in due course. Huntington, the next largest town, developed as a railway terminus serving the same industrial area, and also providing transport on the Ohio river.

Three-quarters of the state is forest and settlement has been concentrated in the mineral-bearing Kanawha valley, along the Ohio river and in the industrial Monongahela valley of the north. More than half of the population is still classified as rural. The traditional small firms and small hill-mines, however, support few, and the majority of rural dwellers commute to industrial employment.

TERRITORY AND POPULATION

West Virginia is bounded in north by Pennsylvania and Maryland, east and south by Virginia, south-west by the Big Sandy River (forming the boundary with Kentucky) and west by the Ohio River (forming the boundary with Ohio). WISCONSIN

KEY HISTORICAL EVENTS

The French were the first European explorers of the territory; Jean Nicolet landed at Green Bay in 1634, a mission was founded in 1671 and a permanent settlement at Green Bay followed. In 1763 French claims were surrendered to Britain. In 1783 Britain ceded them to the USA, which designated the Northwest Territory, of which Wisconsin was part. In 1836 a separate Territory of Wisconsin was organized, including the present Iowa, Minnesota and parts of the Dakotas.

Territorial organization was a great stimulus to settlement. In 1836 James Duane Dooty founded the town site of Madison and successfully pressed its claim to be the capital of the Territory even before it was inhabited. In 1848 Wisconsin became a state, with its present boundaries.

The city of Milwaukee was founded, on Lake Michigan, when Indian tribes gave up their claims to the land in 1831–33. It grew rapidly as a port and industrial town, attracting Germans in the 1840s, Poles and Italians 50 years later. The Lake Michigan shore was developed as an industrial area; the rest of the south proved suitable for dairy farming; the north, mainly forests and lakes, has remained sparsely settled except for tourist bases.

There is a Menominee Indian reservation in the north-east, where many of the 29,000 remaining Indians live. Since the Second World War there has been black immigration from the southern states to the industrial lake-shore cities.

WYOMING

KEY HISTORICAL EVENTS

The territory was inhabited by Plains Indians (Arapahoes, Sioux and Cheyenne) in the early 19th century. There was some trading between them and white Americans, but very little white settlement. In the 1840s the great western migration routes, the Oregon and the Overland Trails, ran through the territory, Wyoming offering mountain passes accessible to wagons. Once migration became a steady flow it was necessary to protect the route from Indian attack, and forts were built.

In 1867 coal was discovered. In 1868 Wyoming was organized as a separate Territory, and in 1869 the Sioux and Arapaho were confined to reservations. At the same time the route of the Union Pacific Railway was laid out, and working settlements and railway towns grew up in southern Wyoming. Settlement of the north was delayed until after the final defeat of hostile Indians in 1876.

The economy of the settlements at first depended on ranching. Cheyenne had been made Territorial capital in 1869, and also functioned as a railway town moving cattle. Casper, on the site of a fort on the Pony Express route, was also a railway town on the Chicago and North Western. Laramie started as a Union Pacific construction workers' shanty town in 1868. In 1890 oil was discovered at Casper, and Wyoming became a state in the same year. Subsequently, mineral extraction became the leading industry, as natural gas, uranium, bentonite and trona were exploited as well as oil and coal.

OUTLYING TERRITORIES

GUAM

KEY HISTORICAL EVENTS
Magellan is said to have discovered the island in 1521; it was ceded by Spain to the USA by the Treaty of Paris (10 Dec. 1898). The island was captured by the Japanese on 10 Dec. 1941, and retaken by American forces from 21 July 1944. Guam is of great strategic importance; substantial numbers of naval and air force personnel occupy about one-third of the usable land.

TERRITORY AND POPULATION
Guam is the largest and most southern island of the Marianas Archipelago, in 13° 26' N. lat., 144° 43' E. long. Total area, 209 sq. miles (541 sq. km). Agaña, the seat of government is about 8 miles from the anchorage in Apra Harbor. The census on 1 April 1990 showed a population of 133,152, an increase of 27,173 since 1980 (62,207 female). Estimate, 1996, 157,000; density, 290 per sq. km. In 1995 an estimated 61·7% of the population lived in rural areas. In 1990 those of Guamanian ancestry numbered 63,504. CONSTITUTION AND GOVERNMENT
Guam's constitutional status is that of an 'unincorporated territory' of the USA. Entry of US citizens is unrestricted; foreign nationals are subject to normal regulations. In 1949–50 the President transferred the administration of the island from the Navy Department (who held it from 1899) to the Interior Department. The transfer conferred full citizenship on the Guamanians, who had previously been 'nationals' of the USA. There was a referendum on status on 30 Jan. 1982. 38% of eligible voters voted; 48·5% of those favoured Commonwealth status.

The Governor and his staff constitute the executive arm of the government. The legislature is a 21-member Senate; its powers are similar to those of an American state legislature.

RECENT ELECTIONS
At the election of 3 Nov. 1998 for the Guam Legislature the Republican Party won 12 seats. Guam returns 1 non-voting delegate to the House of Representatives.

KEY HISTORICAL EVENTS

The Samoan Islands were first visited by Europeans in the 18th century; the first recorded visit was in 1722. On 14 July 1889 a treaty between the USA, Germany and Great Britain proclaimed the Samoan islands neutral territory, under a 4-power government consisting of the 3 treaty powers and the local native government. By the Tripartite Treaty of 7 Nov. 1899, ratified 19 Feb. 1900, Great Britain and Germany renounced in favour of the USA all rights over the islands of the Samoan group east of 171° long. west of Greenwich, the islands to the west of that meridian being assigned to Germany (now the independent state of Samoa). The islands of Tutuila and Aunu'u were ceded to the USA by their High Chiefs on 17 April 1900, and the islands of the Manu'a group on 16 July 1904. Congress accepted the islands under a Joint Resolution approved 20 Feb. 1929. Swain's Island, 210 miles north of the Samoan Islands, was annexed in 1925 and is administered as an integral part of American Samoa.

TERRITORY AND POPULATION

The islands (Tutuila, Aunu'u, Ta'u, Olosega, Ofu and Rose) are approximately 650 miles east-north-east of the Fiji Islands. The total area is 1,511 sq. km (583 sq. miles), of which 200 sq. km (77 sq. miles) are dry land; population (1990 Census), 46,773, nearly all Polynesians or part-Polynesians, of whom 25,573 were born in American Samoa (female, 22,750); estimate (July 1996), 59,566, giving a density of 298 per sq. km (774 per sq. mile). The projected population for 2000 is 65,000.

In 1995 an estimated 50·3% of the population lived in urban areas. The island's 3 Districts are Eastern (population, 1980, 17,311), Western (13,227) and Manu'a (1,732). There is also Swain's Island, with an area of 1·9 sq. miles and 100 inhabitants (1994), which lies 210 miles to the north-west. Rose Island (uninhabited) is 0·4 sq. mile in area. In 1990 some 85,000 American Samoans lived in the USA.

Samoan and English are spoken.

CONSTITUTION AND GOVERNMENT

American Samoa is constitutionally an unorganized unincorporated territory of the USA administered under the Department of the Interior. Its indigenous inhabitants are US nationals and are classified locally as citizens of American Samoa with certain privileges under local laws not granted to non-indigenous persons. Polynesian customs (not inconsistent with US laws) are respected.

Fagatogo is the seat of the Government.

The islands are organized in 15 counties grouped in 3 districts; these counties and districts correspond to the traditional political units. On 25 Feb. 1948 a bicameral legislature was established, at the request of the Samoans, to have advisory legislative functions. With the adoption of the Constitution of 22 April 1960, and the revised Constitution of 1967, the legislature was vested with limited law-making authority. The lower house, or House of Representatives, is composed of 20 members elected by universal adult suffrage and 1 non-voting member for Swain's Island. The upper house, or Senate, is comprised of 18 members elected, in the traditional Samoan manner, in meetings of the chiefs. The Governor and Lieut.-Governor have been popularly elected since 1978.

RECENT ELECTIONS

At elections on 3 Nov. 1998 only non-partisans were elected.

ECONOMY

Policy. The first formal Economic Development and Planning Office completed its first year in 1971. Much has been done to promote economic expansion within the Territory and a large amount of outside investment interest has been stimulated.

The Office initiated the first Territorial Comprehensive Plan. This plan when completed will, with periodic updating, provide a guideline to territorial development for 20 years. The planning programme was made possible under a Housing and Urban Development '701' grant programme, and Economic Development Administration '302' planning programmes.

The focus will be on physical development and the problems of a rapidly increasing population with severely limited labour resources.

Budget. The chief sources of revenue are annual federal grants from the USA, and local revenues from taxes, and duties, and receipts from commercial operations (enterprise and special revenue funds), utilities, rents and leases and liquor sales. In 1990–91 revenues were $97m. ($43m. in local revenue and $54m. in grant revenue).

Banking and Finance. The American Samoa branch of the Bank of Hawaii and the American Samoa Bank offer all commercial banking services. The Development Bank of American Samoa, government-owned, is concerned primarily through loans and guarantees with the economic advancement of the Territory.

Livestock (1996): Pigs, 11,000.

Fisheries. Total catches in 1995 were 385,800 lbs (175 tonnes).

South Pacific Island Airways also operates between Pago Pago and Honolulu, and between Pago Pago and Tonga. The islands are also served by Air Nauru which operates between Pago Pago, Tahiti and Auckland, and Air Pacific (Fiji Islands and westward). South Pacific and Manu'a Air Transport run local services. There are 3 airports.

Shipping. The harbour at Pago Pago, which nearly bisects the island of Tutuila, is the only good harbour for large vessels in American Samoa. In 1952 Puerto Rico was proclaimed a commonwealth with a representative government and a directly elected governor.

The executive power resides in a Governor, elected directly by the people every 4 years. 22 heads of departments form the Governor's Council of Secretaries. The legislative functions are vested in a Senate, composed of 28 members, and the House of Representatives, composed of 54 members. Both houses meet annually in Jan. Puerto Rican men are subject to conscription in US services.

A new constitution was drafted by a Puerto Rican Constituent Assembly and approved by the electorate at a referendum on 3 March 1952. It was then submitted to Congress, which struck out Section 20 of Article 11 covering the 'right to work' and the 'right to an adequate standard of living'; the remainder was passed and proclaimed by the Governor on 25 July 1952.

VIRGIN ISLANDS OF THE UNITED STATES

KEY HISTORICAL EVENTS

The Virgin Islands of the United States, formerly known as the Danish West Indies, were named and claimed for Spain by Columbus in 1493. They were later settled by Dutch and English planters, invaded by France in the mid-17th century and abandoned by the French *c.* 1700, by which time Danish influence had been established. St Croix was held by the Knights of Malta between two periods of French rule.

The Virgin Islands were purchased by the United States from Denmark for $25m. in a treaty ratified by both nations and proclaimed on 31 March 1917. Their value was wholly strategic, inasmuch as they commanded the Anegada Passage from the Atlantic Ocean to the Caribbean Sea and the approach to the Panama Canal. Although the inhabitants were made US citizens in 1927, the islands are, constitutionally, an 'unincorporated territory'.

TERRITORY AND POPULATION

The Virgin Islands group, lying about 40 miles due east of Puerto Rico, comprises the islands of St Thomas (31 sq. miles), St Croix (83 sq. miles), St John (20 sq. miles) and 65 small islets or cays, mostly uninhabited. The total area is 1,910 sq. km (738 sq. miles), of which 346 sq. km (134 sq. miles) are dry land.

The population, according to the census of 1 April 1990, was 101,809, a decrease of 8,991 since 1985 (52,599 females); population estimate, 1996, 97,120, giving a density of 725 per sq. mile. An estimated 54·9% of the population were rural in 1995.

Population (1990 census) of St Croix, 50,139; St Thomas, 48,166; St John, 3,504. About 45% (1990) were native-born, 29% from other Caribbean islands, 13% from mainland USA and 5% from Puerto Rico. St Croix has over 40% of Puerto Rican origin or extraction, Spanish speaking.

The capital and only city, Charlotte Amalie, on St Thomas, had a population (1990 census) of 12,331. There are two towns on St Croix: Christiansted (2,555) and Frederiksted (1,064).

SOCIAL STATISTICS

1996: birth rate, 17·6 per 1,000 population; death rate, 5·2; infant mortality rate, 12·5 per 1,000 live births.

CLIMATE

Average temperatures vary from 77°F to 82°F throughout the year; humidity is low. Average annual rainfall, about 45". The islands lie in the hurricane belt; tropical storms with heavy rainfall can occur in late summer, but hurricanes rarely.

CONSTITUTION AND GOVERNMENT

The Organic Act of 22 July 1954 gives the US Department of the Interior full jurisdiction; some limited legislative powers are given to a single-chambered legislature, composed of 15 senators elected for 2 years representing the two legislative districts of St Croix and St Thomas-St John.

The Governor is elected by the residents. Since 1954 there have been four attempts to redraft the Constitution, to provide for greater autonomy. Each has been rejected by the electorate. The latest was defeated in a referendum in Nov. 1981, 50% of the electorate participating.

For administration, there are 14 executive departments, 13 of which are under commissioners and the other, the Department of Justice, under an Attorney-General. The US Department of the Interior appoints a Federal Comptroller of government revenue and expenditure.

The franchise is vested in residents who are citizens of the United States, 18 years of age or over. In 1986 there were 34,183 voters, of whom 26,377 participated in the

local elections that year. They do not participate in the US presidential election but they have a non-voting representative in Congress.

The capital is Charlotte Amalie, on St Thomas Island.

KEY HISTORICAL EVENTS

Uruguay was the last colony settled by Spain in the Americas. Part of the Spanish viceroyalty of Rio de la Plata until revolutionaries expelled the Spanish in 1811, and subsequently a province of Brazil, Uruguay declared its independence on 25 Aug. 1825 which was recognized by the treaty between Argentina and Brazil signed at Rio de Janeiro on 27 Aug. 1828. The first constitution was adopted on 18 July 1830. In the 1830s two political parties, the *blancos* (conservatives) and the *colorados* (liberals), emerged and conflict between the parties in 1865-70 precipitated the War of the Triple Alliance. In 1903, peace and prosperity were restored under President José Battle y Ordónezo. Since 1904 Uruguay has been unique in her constitutional innovations, all designed to protect her from the emergence of a dictatorship. The favourite device of the group known as the 'Batllistas' (a *colorado* faction) which, until defeated at the 1958 elections, held a parliamentary majority for over 90 years, has been the collegiate system of government, in which the two largest political parties were represented.

The early part of the 20th century saw the development of a welfare state in Uruguay which encouraged extensive immigration. In 1919 a new constitution was adopted providing for a *colegiado*—plural executive based on the Swiss pattern. However, the system was abolished in 1933 and replaced by presidential government, with quadrennial elections. From 1951 to 1966 a collective form of leadership again replaced the presidency. During the 1960s, following a series of strikes and riots, the Army became increasingly influential, repressive measures such as censorship of the press were adopted and presidential government was restored in 1967. The Tupamaro, Marxist urban guerrillas, sought violent revolution but were finally defeated by the Army in 1972. In 1984 the military permitted presidential elections, although several candidates were banned.

The return to civilian rule came on 12 Feb. 1985 when Gen. Alvarez resigned as president and was succeeded by Dr Julio Maria Sanguinetti, who established a government of National Unity and ordered the release of all political prisoners.

Referendums may be called at the instigation of 10,000 signatories. A referendum was held on 8 Dec. 1996 to prohibit parties from presenting more than 1 candidate in presidential elections, and to provide for 2 rounds of voting if no candidate gained an absolute majority in the first round. 50·2% of votes cast were in favour.

ECONOMY

Policy. Uruguay's small economy benefits from a favourable climate for agriculture and substantial hydropower potential. Economic development has been restrained in recent years by high—though declining—inflation and extensive government regulation. The Sanguinetti government's conservative monetary and fiscal policies are aimed at continuing to reduce inflation, at 24·3% at year end 1996; other priorities include extensive reform of the social security system and increased investment in education. Uruguayan trade continued to expand and the potential for new markets continued to open through the negotiations of Mercosur (Southern Cone Common Market) with neighbouring countries and the EU.

Performance. Uruguay recovered from recession in 1996—partly due to the recovery in Argentina—and ended the year with a rise in GDP of nearly 5%. In 1997 the economy grew by almost 6%.

Budget. Central government finance (millions of pesos):

KEY HISTORICAL EVENTS

Descended from nomadic Mongol tribes who settled in Central Asia in the 13th century, the Uzbeks came under Russian control in the late 19th century. In Oct. 1917 the Tashkent Soviet assumed authority and in the following years established its power throughout Turkestan. The semi-independent Khanates of Khiva and Bokhara were first (1920) transformed into People's Republics, then (1923–24) into Soviet Socialist Republics, and finally merged in the Uzbek SSR and other republics.

The Uzbek Soviet Socialist Republic was formed on 27 Oct. 1924 from lands formerly included in Turkestan. It included a large part of the Samarqand (formerly Samarkand) region, the southern part of the Syr Darya, Western Ferghana, the western plains of Bukhara, the Karakalpak ASSR and the Uzbek regions of Khorezm. In 1963, 40,000 sq. km were transferred from Kazakhstan. On 20 June 1990 the Supreme Soviet adopted a declaration of sovereignty, and in Aug. 1991, following an unsuccessful coup, declared independence as the 'Republic of Uzbekistan'. This was confirmed by referendum in Dec. In Dec. 1991 Uzbekistan became a member of the CIS. In the meantime it changed spelling to 'Uzbekiston'.

The population in 1997 was 23,467,700 (11,842,800 females); density, 52·5 per sq. km.

KEY HISTORICAL EVENTS

Vanuatu occupies the group of islands formerly known as the New Hebrides, in the south-western Pacific Ocean. Many of the northern islands have been inhabited by Melanesian peoples for at least 3,000 years. The islands which comprise the Republic of Vanuatu were first discovered in 1606 by the Portuguese. They were rediscovered by the French in 1768 and charted and named the New Hebrides by Captain Cook in 1774. Captain Bligh and his companions, cast adrift by the *Bounty* mutineers, sailed through part of the island group in 1789. Sandalwood merchants and European missionaries came to the islands in the mid 19th century and were then followed by cotton planters—mostly French and British—in 1868.

Complaints by missionaries regarding the activities of slave traders induced Britain to establish legislation to protect the islanders. Shortly thereafter British and French settlers began to arrive and French influence increased. In response to Australian calls to annexe the islands, Britain and France agreed on joint supervision, initially through an 1888 Joint Naval Commission and subsequently through a Condominium Government, established in 1906, which was superseded by an Anglo-French Protocol in 1914. Joint sovereignty was held over the indigenous Melanesia people, but each nation retained responsibility for its own nationals according to the protocol of 1914. The island group escaped Japanese invasion during the Second World War and became an Allied base.

In 1972, the New Hebrides National Party, now known as the Vanuaaku Pati, was formed. The Vanuaaku Pati was instrumental in winning agreement from the condominium powers for independence and on 30 July 1980 New Hebrides became an independent nation under the name of Vanuatu, meaning 'Our Land Forever'.

For many centuries the Popes bore temporal sway over a territory stretching across mid-Italy from sea to sea and comprising some 17,000 sq. miles, with a population finally of over 3m. In 1859–60 and 1870 the Papal States were incorporated into the Italian Kingdom. The consequent dispute between Italy and successive Popes was only settled on 11 Feb. 1929 by three treaties between the Italian Government and the Vatican: a political treaty, which recognized the full and independent sovereignty of the Holy See in the city of the Vatican; a concordat, to regulate the condition of religion and of the Church in Italy; and a financial convention, in accordance with which the Holy See received 750m. lire in cash and 1,000m. lire in Italian 5% state bonds. This sum was to be a definitive settlement of all the financial claims of the Holy See against Italy in consequence of the loss of its temporal power in 1870. The treaty and concordat were ratified on 7 June 1929 and embodied in the Constitution of the Italian Republic of 1947. A revised Concordat between the Italian Republic and the Holy See was negotiated and signed in 1984, and came into force on 3 June 1985. à

TERRITORY AND POPULATION

The area of the Vatican City is 44 ha (108·7 acres). It includes the Piazza di San Pietro (St Peter's Square), which is to remain normally open to the public and subject to the powers of the Italian police. It has its own railway station (for freight only), postal facilities, coins and radio. Twelve buildings in and outside Rome enjoy extra-territorial rights, including the Basilicas of St John Lateran, St Mary Major and St Paul without the Walls, the Pope's summer villa at Castel Gandolfo and a further Vatican radio station on Italian soil. *Radio Vaticana* broadcasts an extensive service in 34 languages from the transmitters in the Vatican City and in Italy.

The Vatican City has about 900 inhabitants.

CONSTITUTION AND GOVERNMENT

The Vatican City State is governed by a Commission appointed by the Pope. The reason for its existence is to provide an extra-territorial, independent base for the Holy See, the government of the Roman Catholic Church. The Pope exercises sovereignty and has absolute legislative, executive and judicial powers. The judicial power is delegated to a tribunal in the first instance, to the Sacred Roman Rota in appeal and to the Supreme Tribunal of the Signature in final appeal.

The Pope is elected by the College of Cardinals, meeting in secret conclave. The election is by scrutiny and requires a two-thirds majority.

ROMAN CATHOLIC CHURCH

The Roman Pontiff (in orders a Bishop, but in jurisdiction held to be by divine right the centre of all Catholic unity, and consequently Pastor and Teacher of all Christians) has for advisers and coadjutors the Sacred College of Cardinals, consisting in Nov. 1996 of 167 Cardinals appointed by him from senior ecclesiastics who are either the bishops of important Sees or the heads of departments at the Holy See. In addition to the College of Cardinals, the Pope has created a 'Synod of Bishops'. This consists of the Patriarchs and certain Metropolitans of the Catholic Church of Oriental Rite, of elected representatives of the national episcopal conferences and religious orders of the world, of the Cardinals in charge of the Roman Congregations and of other persons nominated by the Pope. The Synod meets as and when decided by the Pope. The last Synod (on the formation of priests) met in Oct. 1990.

The central administration of the Roman Catholic Church is carried on by a number of permanent committees called Sacred Congregations, each composed of a number of Cardinals and diocesan bishops (both appointed for 5-year periods), with Consultors and Officials. Besides the Secretariat of State and the Second Section of the Secretariat of State (Section for Relations with States) there are now 9 Sacred Congregations, viz.: Doctrine, Oriental Churches, Bishops, the Sacraments and Divine Worship, Clergy, Religious, Catholic Education, Evangelization of the Peoples and Causes of the Saints. Pontifical Councils have replaced some of the previously designated Secretariats and Prefectures and now represent the Laity, Christian Unity, the Family, Justice and Peace, Cor Unum, Migrants, Health Care Workers, Interpretation of Legislative Texts, Inter-Religious Dialogue, Culture, Preserving the Patrimony of Art and History, and a new Commission, for Latin America. There are also various Offices. The Pontifical Academy of Sciences was revived in 1936. The director of the Vatican Bank (Istituto per le Opere di Religione) is Giovanni Bodio.

CULTURE

The Vatican is building some 25 new churches to mark The Great Jubilee. One of the most prominent will be the Church of the Year 2000. The Pope will usher in the new Millennium by banging on the Holy Door of St Peter's Basilica with a silver hammer in accordance with tradition.

KEY HISTORICAL EVENTS

Columbus sighted Venezuela in 1498 and it was visited by Alonzo de Ojeda and Amerigo Vespucci in 1499 who named it Venezuela (Little Venice). It was part of the Spanish colony of New Granada until 1821 when it became independent, at first in union with Colombia and then as a separate independent republic from 1830.

Between 1830 and 1945 the country was governed mainly by dictators. In 1945 a three-day revolt against the reactionary government of Gen. Isaias Medina led to Romulo Betancourt assuming the presidency. Betancourt produced constitutional and economic reforms but he was replaced by Gen. Marcos Pérez Jiménez who seized power in 1952. Jiménez was himself overthrown by a military junta in a revolution in 1958, led by Adm. Wolfgang Larrazabal. Betancourt again became president.

In 1961 a new constitution was promulgated which provided for a presidential election every five years, a national congress, and state and municipal legislative assemblies.

Betancourt's progressive policies were continued by his successor, Dr Raúl Leoni. There was an abortive military uprising in 1966. In 1969 Dr Rafael Caldera Rodriguez became the first Christian Democratic president. In 1978 Dr Luis Herrera was chosen president but as his party, the *Partido Social-Christiano* (COPEI), failed to obtain an overall majority in congress he was forced to form alliances with smaller parties in order to make legislative progress.

Twenty political parties participated in the 1983 elections. Of 13 presidential candidates, Dr Jaime Lusinchi was elected with 57% of the votes. By now the economy was in crisis and social unrest was widespread. Corruption linked to drug trafficking led to further violence. In Feb. 1992 an attempt to overthrow the President by rebel troops was narrowly averted. There was another abortive coup in Nov. A state of emergency was declared. President Perez resisted demands for his resignation but he was later suspended from office. In Dec. 1993, Dr Rafael Caldera Rodriguez was returned to the presidency with 30·5% of the vote. Dr Caldera's election reflected disenchantment with the established political parties and concern over allegations of mismanagement and corruption. He took office in the early stages of a banking crisis which cost 15% of GDP to resolve. Fiscal tightening backed by the IMF brought rapid recovery.

KEY HISTORICAL EVENTS

Vietnam was conquered by the Chinese in 111 BC, and though it broke free of Chinese domination in 939 AD, at many subsequent periods it was a nominal Chinese vassal.

By the end of the 15th century, the Vietnamese had conquered most of the Kingdom of Champa (now Vietnam's central area), and by the end of the 18th century had acquired Cochin-China (now its southern area). At the end of the 18th century, France helped to establish the Emperor Gia-Long (with whom Louis XVI had signed a treaty in 1787) as ruler of a unified Vietnam, known then as the Empire of Annam. French influence increased with a series of treaties between 1874 and 1884, the establishment of French protectorates over Tonkin and Annam, and the formation of the French colony of Cochin-China. By a Sino-French treaty of 1885, the Empire of Annam ceased to be a tributary to China. Cambodia had become a French protectorate in 1863, and in 1899 after the extension of French protection to Laos in 1893, the Indo Chinese Union was proclaimed.

In 1940, Vietnam was occupied by the Japanese. In 1941, a nationalist coalition of nationalist, revolutionary and Communist organizations, known as the Vietminh League, was founded by the Communists. On 9 March 1945, the Japanese interned the French authorities and proclaimed the independence of Indo-China. In Aug. 1945, they allowed the Vietminh movement to seize power, dethrone the Emperor of Annam and establish a republic known as Vietnam. On 6 March 1946, France recognized 'the Democratic Republic of Vietnam' as a 'Free State within the Indo-Chinese Federation'. On 19 Dec. Vietminh forces made a surprise attack on Hanoi, the signal for nearly eight years of hostilities. An agreement on the cessation of hostilities in Vietnam was reached on 20 July 1954 at the Geneva Conference. The French withdrew, and by the Paris Agreement of 29 Dec. 1954 completed the transfer of sovereignty to Vietnam.

The conference divided Vietnam along the 17th parallel into Communist North Vietnam and non-Communist South Vietnam. From 1959 the North promoted insurgency in the south, and from 1961 the USA came to the aid of the south and a full scale guerrilla war developed.

In 1963, the South Vietnamese president, Diem, was overthrown; Nguyen Van Thieu took power as chairman of a national leadership committee in 1965, becoming president in 1967.

In Paris on 27 Jan. 1973, an agreement was signed ending the war in Vietnam. After the US withdrawal in that year, however, hostilities continued between the North and the South until the latter's defeat in 1975. Between 150,000 and 200,000 South Vietnamese fled the country, including the former President Thieu.

After the collapse of Thieu's régime the provisional revolutionary government established an administration in Saigon. A general election was held on 25 April 1976 for a national assembly representing the whole country. Voting was by universal suffrage of all citizens of 18 or over, except former functionaries of South Vietnam undergoing 're-education'. The unification of North and South Vietnam into the Socialist Republic of Vietnam finally took place on 2 July 1976. Following the signing of a treaty of friendship with the USSR in 1978, relations with China correspondingly deteriorated. Vietnam invaded Cambodia in Dec. 1978 and China attacked Vietnam in consequence. Thailand's relations with Vietnam worsened considerably in view of Vietnam attacks on guerrilla bases along the Thai border. Many refugees escaped in small boats across the South China Sea.

In 1986, Vietnam implemented economic reforms, eliminating subsidies and gradually shifting to a multi-sectoral market economy under State regulation. On 11 July 1995, Vietnam and the USA officially normalized relations. On 28 July 1995, Vietnam became an official member of the Association of South East Asian Nations (ASEAN), and in the same month, signed a trade agreement with the European Union. At the present time, it has established diplomatic relations with more than 160 countries.

CONSTITUTION AND GOVERNMENT

The National Assembly unanimously approved a new constitution on 15 April 1992. Under this the Communist Party retains a monopoly of power and the responsibility for guiding the state according to the tenets of Marxism-Leninism and Ho Chi Minh, but with certain curbs on its administrative functions. The powers of the National Assembly are increased. The 450-member *National Assembly* is elected for 5-year terms. Candidates may be proposed by the Communist Party or the Fatherland Front (which groups various social organizations), or they may propose themselves as individual Independents. The Assembly convenes 3 times a year and appoints a prime minister and cabinet. It elects the *President*, the head of state. The latter heads a *State Council* which issues decrees when the National Assembly is not in session.

KEY HISTORICAL EVENTS

Following an agreement reached in Dec. 1989 on a constitution for a unified state, the (northern) Yemen Arab Republic and the (southern) People's Democratic Republic of Yemen were united as the Republic of Yemen on 22 May 1990.

In Aug. 1993 Vice-President Ali Salem Albidh withdrew to Aden and demanded the implementation of a reform programme as a condition of re-joining President Saleh in Sana'a. Albidh agreed to a modified reform programme at an agreement brokered by King Hussein of Jordan in Feb. 1994, but clashes between north and south escalated into full civil war at the beginning of May. Southern officials announced their secession from Yemen on 21 May 1994. Aden was captured by northern forces on 7 June 1994. The former vice-president and government went into exile.

TERRITORY AND POPULATION

Yemen is bounded in the north by Saudi Arabia, east by Oman, south by the Gulf of Aden and west by the Red Sea. The territory includes 112 islands including Kamaran (181 sq. km) and Perim (300 sq. km) in the Red Sea and Socotra (3,500 sq. km) in the Gulf of Aden. The islands of Greater and Lesser Hanish is claimed by both Yemen and Eritrea. On 15 Dec. 1995 Eritrean troops occupied it, and Yemen retaliated with aerial bombardments. A ceasefire was agreed at presidential level on 17 Dec. On 20 Dec. the UN resolved to send a good offices mission to the area. In an agreement of 21 May 1996 brokered by France, Yemen and Eritrea renounced the use of force to settle the dispute and agreed to submit it to arbitration. The area is 555,000 sq. km excluding the desert Empty Quarter (Rub Al-Khahi). A dispute with Saudi Arabia broke out in Dec. 1994 over some 1,500–2,000 km of undemarcated desert boundary. A memorandum of understanding signed on 26 Feb. 1995 reaffirmed the border agreement reached at Taif in 1934. An agreement of June 1995 completed the demarcation of the border with Oman.

The population was estimated at 15·8m. in 1995; density, 21 persons per sq. km.

The UN gives a projected population for 2000 of 18·12m.

In 1995, 33·5% of the population lived in urban areas. At the census of 1986 in the north and 1988 in the south the population was 9,664,939 (4,938,318 females). There were 1,168,199 citizens working abroad mainly in Saudi Arabia and the United Arab Emirates not included in the census total. Since 1990 Saudi Arabia has compulsorily repatriated almost all Yemeni workers. In 1988 there were 17 governorates:

	1986/88 census population		*1986/88 census population*
Sana'a (city)	427,502	Shabwah	192,324

KEY HISTORICAL EVENTS

On 28 June 1914 Archduke Franz Ferdinand of Austria was assassinated in Bosnia by a young nationalist. Though Serbia complied with most of the terms of Austria's subsequent ultimatum, Austria declared war on 28 July, thus precipitating the First World War. In the winter of 1915–16 the Serbian army was forced to retreat to Corfu, where the government, under Prime Minister Pašić, was established. Montenegro capitulated in 1916 and its king fled. Exiles from Croatia and Slovenia had formed a Yugoslav Committee in 1914 whose aim was South Slav federation. This was not compatible with Pašić's goal of a centralized, Serb-run state, but the Committee and the government managed to contrive a joint 'Corfu Declaration' in July 1917 demanding a 'constitutional, democratic, parliamentary monarchy headed by the Karadjordevićs. This was accepted by the Allies as the basis for the new state. The Croats were forced by the pressure of events to join Serbia and Montenegro on 1 Dec. 1918. From 1918–29 the country was known as the Kingdom of the Serbs, Croats and Slovenes.

Boundary disputes with Italy and other neighbouring countries lasted into the 1920s. A constitution of 1921 established an assembly under King Alexander, but the trappings of parliamentarianism could not bridge the gulf between Serbs and Croats. The Croat peasant leader Radić was assassinated in 1928; his successor, Vlatko Maček, set up a separatist assembly in Zagreb. On 6 Jan. 1929 the king suspended the constitution and established a royal dictatorship, redrawing provincial boundaries without regard for ethnicity. In Oct. 1934 he was murdered by a Croat extremist while on an official visit to France.

During the 1930s Yugoslavia (southern Slavs) had become heavily dependent on the German economy. During the regency of Prince Paul, Prime Minister Stojadinović pursued a pro-fascist line. On 25 March 1941 Paul was induced to adhere to the Axis Tripartite Pact. On 27 March he was overthrown by military officers in favour of the boy king Peter. Germany invaded on 6 April. Within 10 days Yugoslavia surrendered; king and government fled to London. Two resistance movements came into being, a royalist group, under Draža Mihailović, and the communist-dominated partisans of Josip Broz, nicknamed Tito. The latter were imbued with revolutionary as well as liberationist aims. The movements often fought each other, and Mihailović collaborated to some extent with the Germans. Allied support was switched from him to Tito in 1944.

Tito succeeded in liberating Yugoslavia largely by his own efforts. The partisan Liberation Committee formed the nucleus of the post-war provisional government. A constituent assembly was elected in Nov. 1945 from a single list of People's Front candidates. A people's republic was proclaimed with a Soviet-type constitution. Tito embarked on a programme of enthusiastic Sovietization, but was too independent for Stalin, who sought to topple him by excommunicating Yugoslavia in 1948–49. However, Tito survived by the support of his people and a *rapprochement* with the west, and it was the Soviet Union under Khrushchev which had to extend the olive branch in 1956. As a spin-off from this schism Yugoslavia evolved its 'own road to socialism'. Collectivization of agriculture was abandoned; the principles of 'industrial self-management' were developed, and extended into the whole of the representative process; and Yugoslavia became a champion of international 'non-alignment'. A collective presidency came into being with the death of Tito in 1980.

Dissensions in Kosovo between Albanians and Serbs, and in parts of Croatia between Serbs and Croats, brought inter-ethnic tensions into prominence after 1988.

With the election of new national assemblies in all 6 republics during 1990, several of the latter came increasingly into conflict with the federal government. At the end of 1990 both Croatia and Slovenia proclaimed their right to secede from federal Yugoslavia. In May 1991, following escalating Serb-Croat violence and demands for secession from predominantly Serb-inhabited areas of Croatia, the federal army was given powers to restrict the movement of unofficial armed groups. On 12 May the Krajina area held a self-styled referendum resulting, it was claimed, in an overwhelming vote for union with Serbia. Croatia rejected the poll.

On 15 May 1991 Croatia's representative in the federal presidency, Štipe Mesić, failed to secure the 5 votes needed to become president, hitherto a mere formality. Serbia, Kosovo and Vojvodina voted against and Montenegro abstained, leaving Yugoslavia without a head of state.

On 25 June Croatia and Slovenia made declarations of independence, agreeing on 30 June to an EU proposal to suspend them for 3 months. Fighting began during the summer in Croatia between Croatian forces and Serb irregulars from Serb-majority areas of Croatia. Federal forces had left Slovenia by July 1991. On 25 Sept. the UN Security Council imposed a mandatory arms embargo on Yugoslavia.

The 3-month moratorium agreed at the EU peace talks on 30 June having expired, both Slovenia and Croatia declared their complete independence from the Yugoslav federation on 8 Oct.

Trade sanctions on the whole of Yugoslavia were applied from 8 Nov., but restricted to Serbia after 2 weeks.

After 13 ceasefires had failed to be observed, a fourteenth was signed on 23 Nov. by the presidents of Croatia and Serbia and the federal defence minister, for the first time under UN auspices. Following a request on 26 Nov. from the federal government, a Security Council resolution of 27 Nov. proposed the deployment of a UN peace-keeping force if the ceasefire were kept. Fighting, however, continued.

On 15 Jan. 1992 the EU recognized Croatia and Slovenia as independent states. Bosnia-Hercegovina was recognized on 7 April 1992 and Macedonia on 8 April 1993. A UN delegation began monitoring the ceasefire on 17 Jan. and the UN Security Council on 21 Feb. voted unanimously to send a 14,000-strong peace-keeping force to Croatia and Yugoslavia.

On 27 April 1992 Serbia and Montenegro announced the formation of a federal republic of Yugoslavia constituted by themselves as the legal successor to the former Socialist Federal Republic of Yugoslavia (SFRY).

On 30 May, responding to further Serbian military activities in Bosnia and Croatia, the UN Security Council voted in favour of the imposition of sanctions.

In mid-1992 NATO countries began to commit air, sea and eventually land forces to enforce sanctions and protect humanitarian relief operations in Bosnia.

At a joint UN-EC peace conference on Yugoslavia held in London on 26–27 Aug. some 30 countries and all the former republics of Yugoslavia endorsed a plan to end the fighting in Croatia and Bosnia, install UN supervision of heavy weapons, recognize the borders of Bosnia-Hercegovina and return refugees. At a further conference at Geneva on 30 Sept. the Croatian and Yugoslav presidents agreed to make efforts to bring about a peaceful solution in Bosnia, but fighting continued.

On 22 Sept. the UN resolved (by 127 votes to 6 with 26 abstentions) that the self-proclaimed Federal Republic of Yugoslavia of Serbia and Montenegro could not automatically assume the seat of the former SFRY and excluded it from the General Assembly.

On 16 Nov. the UN Security Council voted for sanctions against Yugoslavia to be made more effective, and NATO agreed to lend naval support to their enforcement.

Further peace talks were held in Geneva in Jan. 1993, and transferred to the UN in Feb. On 22 Feb. the UN Security Council resolved to set up a war crimes tribunal for alleged violations of human rights in the former SFRY. A court was inaugurated at The Hague on 17 Nov. 1993. In 1995 the tribunal was merged into the International Penal Tribunal for Yugoslavia and Rwanda sitting at The Hague. The first sentence on a Yugoslav was delivered in Nov. 1996.

Following the Serbian President Milošević's announcement that Yugoslavia would no longer send supplies to Bosnian Serbs and would not accept international monitors on its borders, on 24 Sept. 1994 the UN Security Council lifted the non-trade sanctions against Yugoslavia affecting civil aviation, culture and sport. Following the Bosnian-Croatian-Yugoslav (Dayton) agreement all remaining UN sanctions were lifted in Nov. 1995.

Massive public anti-government demonstrations took place in Nov.–Dec. 1996 following the government's annulment of municipal election results where opposition candidates had been elected. An OSCE delegation investigated the disputed results and found that opposition candidates should have won in 22 municipalities. As demonstrations and protests from various quarters continued throughout Jan. 1997, Milošević conceded opposition victories in at first some, then finally on 7 Feb., all, the disputed municipalities.

In July 1997 Slobodan Milošević switched his power base to become president of federal Yugoslavia. Vojislav Seselj, leader of the ultra-nationalist Radical party, defeated his Socialist rival in the run-off for the Serbian presidency. But since the turn-out fell short of the 50% required by the constitution there was a further election in Dec. in which the former Yugoslav foreign minister, Milan Milutinović finally succeeded Milošević. Meanwhile, in Montenegro, the pro-western Milo Djukanović succeeded a pro-Milošević president despite violent demonstrations which raised fears that Montenegro might break away from Serbia to create an independent state.

In 1998 unrest in Kosovo led to a bid for outright independence. Violence flared resulting in what a US official described as 'horrendous human rights violations', including massive shelling of civilians and destruction of villages. A US-mediated agreement to allow negotiations to proceed during an interim period of autonomy allowed for food and medicine to be delivered to refugees and American support for a degree of autonomy (short of independence), accepted in principle by President Milošević, lifted the immediate threat of NATO air strikes. Further outbreaks of violence in early 1999 were followed by the departure of the 800-strong team of international 'verifiers' of the fragile peace. Peace talks in Paris broke down without a settlement though subsequently Albanian freedom fighters accepted terms allowing them broad autonomy. The sticking point on the Serbian side was the international insistence on having 28,000 NATO-led peacemakers in Kosovo to keep apart the warring factions. Meanwhile, the scale of Serbian repression in Kosovo persuaded the NATO allies to take direct action. On the night of 24 March, NATO aircraft began a bombing campaign against Yugoslavian military targets. Further Serbian provocation in Kosovo caused hundreds of thousands of ethnic Albanians to seek refuge in neighbouring countries.

REPUBLICS AND PROVINCES

In Dec. 1992 the new self-styled Federal Republic of Yugoslavia comprised the 2 republics of Montenegro and Serbia, and the 2 formerly autonomous provinces of Kosovo and Metohija, and Vojvodina within Serbia.

MONTENEGRO

KEY HISTORICAL EVENTS

Montenegro emerged as a separate entity on the break-up of the Serbian Empire in 1355. Owing to its mountainous terrain, it was never effectively subdued by Turkey. It was ruled by Bishop Princes until 1851, when a royal house was founded. The Treaty of Berlin (1828) recognized the independence of Montenegro and doubled the size of the territory. The remains of King Nicholas I, who was deposed in 1918, were returned to Montenegro for reburial in Oct. 1989.

TERRITORY AND POPULATION

Montenegro is a mountainous region which opens to the Adriatic in the south-west. SERBIA

KEY HISTORICAL EVENTS

The Serbs received Orthodox Christianity from the Byzantines in 891, but shook off the latter's suzerainty to form a prosperous state, firmly established under Stevan Nemanja (1167–96). A Serbian Patriarchate was established at Peć during the reign of Stevan Dušan (1331–55). Dušan planned the conquest of Constantinople, but he was forestalled by incursions of Turks. After he died many Serbian nobles accepted Turkish vassalage; the reduced Serbian state under Prince Lazar received the coup de grace at Kosovo on St Vitus day, 1389. Turkish preoccupations with a Mongol invasion and wars with Hungary, however, postponed the total incorporation of Serbia into the Ottoman Empire until 1459.

The Turks permitted the Orthodox church to practice, though the Patriarchate was abolished in 1776. The native aristocracy was eliminated and replaced by a system of fiefdoms held in return for military or civil service. Local self-government based on rural extended family units (*zadruga*) continued. In its heyday the Ottoman system probably bore no harder on the peasantry than the Christian feudalism it had replaced, but with the gradual decline of Ottoman power, corruption, oppression and reprisals led to economic deterioration and social unrest.

In 1804 murders carried out by mutinous Turkish infantry provoked a Serbian rising under Djordje Karadjordje. The Sultan's army disciplined the mutineers, but was then defeated by the intransigent Serbs. By the Treaty of Bucharest (1812), however, Russia agreed that Serbia, known as Servia until 1918, should remain Turkish. The Turks reoccupied Serbia with ferocious reprisals. A new rebellion broke out in 1815 under Miloš Obrenović which, this time with Russian support, won autonomy for Serbia within the Ottoman empire. Obrenović had Karadjordje murdered in 1817. In 1838 he was forced to grant a constitution establishing an appointed state council, and abdicated in 1839. In 1842 a coup overthrew the Obrenovićs and Alexander Karadjordjević was elected as ruler. He was deposed in 1858.

During the reign of the western-educated Michael Obrenović (1860 until his assassination in 1868) the foundations of a modern centralized and militarized state were laid, and the idea of a 'Great Serbia', first enunciated in Prime Minister Garašanin's *Draft Programme* of 1844, took root. Milan Obrenović, adopting the title of king, proclaimed formal independence in 1882. He suffered defeats against Turkey (1876) and Bulgaria (1885) and abdicated in 1889. Alexander Obrenović was assassinated in 1903, and replaced by Peter Karadjordjević, who brought in a period of stable constitutional rule.

In its foreign policy, Serbia's striving for an outlet to the sea was consistently thwarted by Austria. Annexing Bosnia in 1908, Austria forced the Serbs to withdraw from the Adriatic after the first Balkan war (1912).

SERBIA

Following the break-up of Yugoslavia, in March 1998 a coalition government was formed between the Socialist Party of Slobodan Milošević and the ultra-nationalist Radical Party.

TERRITORY AND POPULATION

Serbia is bounded in the north-west by Croatia, in the north by Hungary, in the north-east by Romania, in the east by Bulgaria, in the south by Macedonia and in the west by Albania, Montenegro and Bosnia-Hercegovina. The capital is Belgrade (population estimate, 1997, 1,597,599). Population at the 1991 census was (with Kosovo and Vojvodina) 9,778,991, of which the predominating ethnic group was Serbs (6,446,595). CONSTITUTION AND GOVERNMENT

In Sept. 1990 a new constitution was adopted by the National Assembly. It defines Serbia as a 'democratic' instead of a 'socialist' republic, lays down a framework for multi-party elections, and describes Serbia as 'united and sovereign on all its territory', thus stripping Kosovo and the Vojvodina of the attributes of autonomy granted by the 1974 federal constitution.

There is a 250-member single-chamber National Assembly. The *President* is elected by universal suffrage for not more than two 5-year terms.

RECENT ELECTIONS

At the elections on 20 Dec. 1992, Slobodan Milošević was re-elected *President* of Serbia with 56·32% of the votes cast against 34·05% for Milan Panić, the then prime minister. In July 1997 Milošević became President of Yugoslavia.

KOSOVO AND METOHIJA

KEY HISTORICAL EVENTS

Kosovo has a large ethnic Albanian majority. Following Albanian-Serb conflicts, the Kosovo and Serbian parliaments adopted constitutional amendments in March 1989 surrendering much of Kosovo's autonomy to Serbia. Renewed Albanian rioting broke out in 1990. The Prime Minister and 6 other ministers resigned in April 1990 over ethnic conflicts. In July 1990, 114 of the 130 Albanian members of the National Assembly voted for full republican status for Kosovo but the Serbian National Assembly declared this vote invalid and unanimously voted to dissolve the Kosovo Assembly. Direct Serbian rule was imposed causing widespread violence. Western demands for negotiations in granting Kosovo some kind of special status were rejected. Ibrahim Rugova, the leader of the main Albanian party, the Democratic League of Kosovo (LDK), has declared himself 'president' demanding talks on independence. In 1998 armed conflict between Yugoslavia and the Kosovo Liberation Army led to 200,000 people, or a tenth of the population of the whole province, fleeing the fighting. Further repression by Serbian forces led to the threat of NATO direct action. Air strikes against Yugoslavian military targets began on 24 March 1999. Retaliation against Albanian Kosovars led to a massive exodus of refugees.

ZAMBIA

Republic of Zambia

Capital: Lusaka
Population estimate, 2000: 9·87m.
GNP per capita: (PPP$) 860
HDI/world rank: 0·378/146

KEY HISTORICAL EVENTS

The early history of Zambia is obscure. The first expedition of real geographical value was Livingstone's missionary journey of 1851 during which he discovered the Victoria Falls.

The great majority of the present African population of the area is of Bantu origin, descended from invaders who swept over the country. There are more than 70 different tribes, the most important being the Bemba and the Bgoni in the north-east, and there are also about 30 different dialects in use. The chief invaders of the early 19th century were the Arabs from the north, the Ngoni Zulus fleeing from Shaka, and the Kololo, who fought their way from the south across the Zambezi and founded a kingdom with a high degree of social organization. One of the more successful of the invading tribes was the Lozi under Lewanika, who asked for and obtained the protection of the British government in 1891. In 1900 the chartered company acquired certain trading and mining rights over Lewanika's territory. These 2 territories were amalgamated in 1911 under the name of Northern Rhodesia, and in 1924 the Crown took over the administration of Northern Rhodesia from the British South Africa Company.

In 1953, following a referendum in Southern Rhodesia, the Federation of Rhodesia and Nyasaland, of which Northern Rhodesia was a component part, was created. Federation brought great economic benefits to Northern Rhodesia, but it was from the outset bitterly opposed by the African leaders there. Kenneth Kaunda led a sustained campaign against Federation, and after elections held under a new constitution of 1962, his United National Independence party gained wide success. In March 1963 Britain agreed in principle to Northern Rhodesia's right to secede from the Federation, which was duly dissolved at the end of the year. In Jan. 1964 full internal self-government was attained. On 24 Oct. Northern Rhodesia became an independent republic within the Commonwealth, changing its name to Zambia. Kaunda became its first president, and led the efforts to break the foreign hold on Zambia's mineral resources. He was ousted in the country's first multi-party elections in 1991.

A highly centralized one-party state was created which suffocated the emergent economy. Living standards fell sharply and the production of copper, Zambia's biggest foreign exchange earner, almost halved. In 1991 the Movement for Multiparty Democracy (MMD) was elected on a promise to transform the economy. Markets were liberalized and the budget deficit contained. Inflation fell from 46% in 1995 to around 20% in 1997. A Privatization Act was passed in 1992.

TERRITORY AND POPULATION

Zambia is bounded by the Democratic Republic of the Congo in the north, Tanzania in the north-east, Malaŵi in the east, Mozambique in the south-east and by Zimbabwe and Namibia in the south. The area is 290,586 sq. miles (752,614 sq. km). Population estimate (1997), 9·35m.; population density, 11·7 per sq. km.

The projected population for 2000 is 9·87m.

In 1995 an estimated 57% of the population were rural.

The republic is divided into 9 provinces. Area, population and chief towns:

Province	*Area (in sq. km)*	*Population (1991 census)*	*Chief Town*
Central	94,395	697,000	Kabwe
Copperbelt	31,328	1,294,000	Ndola
Eastern	69,106	995,000	Chipata

Southern	85,283	944,000	Livingstone
Western	126,386	630,000	Mongu

Major towns (with estimated 1989 population in 1,000) are: Lusaka, 921; Kitwe, 495; Ndola, 467; Kabwe, 210; Mufulira, 206; Chingola, 201; Luanshya, 171; Livingstone, 102; Kalulushi, 100; Chililabombwe, 85.

It had last been 43 in the mid 1960s. The sharp decline is largely attributed to the huge number of people in the country with HIV. Annual growth rate, 1990–95, 3·0%. KEY HISTORICAL EVENTS

Shona-speaking people lived in Zimbabwe hundreds of years before the Europeans arrived. It was a major commercial centre in the 14th and 15th centuries, although the ruins of Great Zimbabwe date back to the 8th century. It became increasingly secondary of the Kingdom of Mwanamutapa which arose on the north. By backing rival kings, Portuguese traders managed to destroy Mwanamutapa by 1700. The Shona inhabitants were unable to repel the invasion of Ndebele people under Mzilikazi in 1870; the Ndebele had a very powerful state. However, it was not strong enough to defeat European settlers who forcibly aquired Shona lands in 1890 and turned to Ndebele territory in 1893. Revolts by both peoples several years later were also defeated.

The territory which now forms Zimbabwe was administered by the British South Africa Company from the beginning of European colonization in 1890 until 1923 when it was granted the status of a self-governing colony. In 1911 it had been divided into Southern and Northern Rhodesia (*see* Zambia).

In 1953 Southern and Northern Rhodesia were again united, along with Nyasaland to form the Federation of Rhodesia and Nyasaland. When this federation was dissolved on 31 Dec. 1963 Southern Rhodesia reverted to the status of a self-governing colony within the British Commonwealth.

Ian Smith, prime minister from April 1964, had discussions about independence on three occasions with two British prime ministers during 1964 and 1965. On 11 Nov. 1965 Smith and his government issued a unilateral declaration of independence (UDI). Thereupon the Governor dismissed Smith and his cabinet, and the British government reasserted its own formal responsibility for Rhodesia; but effective internal government was carried on by the Smith cabinet.

The UN Security Council on 20 Nov. called upon all member states to break off economic relations with Rhodesia. From 1-3 Dec. Harold Wilson, the British prime minister, and others met Smith on board H.M.S. *Tiger* and drafted a 'Working Document' on the procedure for progress towards legal independence. This statement was approved by the British cabinet, but rejected by the Smith government. As a result the Security Council voted for mandatory sanctions including oil: France and the USSR abstained. On 2 March 1970 the Smith government declared Rhodesia a republic and adopted a new constitution.

On 3 March 1978 Smith signed a constitutional agreement with the internationally-based black nationalist leaders. It decreed independence, as Zimbabwe, on 31 Dec. 1978. In Nov. 1978 the government considered it was impossible to meet the independence date. A draft constitution was published in Jan. 1979 and was accepted by the white electorate in a referendum. In April 1979 general elections were held for the 72 black seats in the 100-seat parliament. The United African National Council won 51 of the 72 seats and Bishop Abel Muzorewa became prime minister of Rhodesia-Zimbabwe on 1 June 1979.

At the Commonwealth Conference held in Lusaka in Aug. 1979 agreement was reached for a new constitutional conference to be held in London; elections took place in March 1980 resulting in a victory for the Zimbabwe African National Union (ZANU). Southern Rhodesia became the Republic of Zimbabwe, with Canaan Banana as president, and Robert Mugabe as prime minister. On 31 Dec. 1987 Robert Mugabe became the first executive president.

The state of emergency in force since 1965 was lifted in July 1990. In June 1991 the ZANU (PF) renounced Marxism.

Zimbabwe is currently beset by economic problems. A run on the currency in 1998 led to price rises on essential goods which caused widespread unrest. Hopes of IMF support have so far foundered on the government's reluctance to countenance radical economic reforms.

TERRITORY AND POPULATION

Zimbabwe is bounded in the north by Zambia, east by Mozambique, south by South Africa and west by Botswana and the Caprivi Strip of Namibia. The area is 150,872 sq. miles (390,759 sq. km). The population was (1992 census) 10,401,767 (51·2% female). Estimate, 1995, 11,536,000 (50·4% female); density, 29·5 per sq. km.

The UN gives a projected population for 2000 of 12·39m.

In 1995 an estimated 68·2% of the population were rural.

There are 8 provinces and 2 cities, Harare and Bulawayo, with provincial status. Area and population (1992 census):

	Area (sq. km)	*Population*		*Area (sq. km)*	*Population*
Bulawayo	479	620,936	Mashonaland West	57,441	1,116,928
Harare	872	1,478,810	Masvingo	56,566	1,221,845
Manicaland	36,459	1,537,676	Matabeleland North	75,025	640,957
Mashonaland Central	28,374	857,318	Matebeleland South	54,172	591,747
Mashonaland East	32,230	1,033,336	Midlands	49,166	1,302,212

The chief cities (with 1992 census populations) were Harare, the capital (1,184,169), Bulawayo (620,936), Chitungwiza (274,035), Mutare (131,808) and Gweru (124,735). The main ethno-linguistic groups are the Shona (71%), Ndebele (16%) and Nyanja (3%).

The official language is English.

SOCIAL STATISTICS

1995 births, 434,000; deaths, 158,000. Rates, 1995: Birth, 38·8 per 1,000 population; death 14·1 per 1,000. Annual rate of increase, 1990–95, 4·1%. Zimbabwe's expectation of life at birth in 1998 was 49 years, down from 56 in 1990. The sharp decline is largely attributed to the huge number of people in the country with HIV. Life expectancy had last been 49 in the early 1970s. Researchers predict that by 2008 it will have dropped to 31. Infant mortality, 1990–95, 70 per 1,000 live births; fertility rate, 5·2 births per woman.

CLIMATE

Though situated in the tropics, conditions are remarkably temperate throughout the year because of altitude, and an inland position keeps humidity low. The warmest weather occurs in the three months before the main rainy season, which starts in Nov. and lasts till March. The cool season is from mid-May to mid-Aug. and, though days are mild and sunny, nights are chilly. Harare, Jan. 69°F (20·6°C), July 57°F (13·9°C). Annual rainfall 33" (828 mm). Bulawayo, Jan. 71°F (21·7°C), July 57°F (13·9°C). Annual rainfall 24" (594 mm). Victoria Falls, Jan. 78°F (25·6°C), July 61°F (16·1°C). Annual rainfall 28" (710 mm).

CONSTITUTION AND GOVERNMENT

The Constitution provides for a single-chamber 150-member Parliament (*House of Assembly*), universal suffrage for citizens over the age of 18, an *Executive President* (elected for a 6-year term of office by Parliament), an independent judiciary enjoying security of tenure and a Declaration of Rights, derogation from certain of the provisions being permitted, within specified limits, during a state of emergency. The House of Assembly is elected for 5 year terms: 120 members are elected by universal suffrage, 10 are chiefs elected by all the country's tribal chiefs, 12 are appointed by the President and 8 are provincial governors. The constitution can be amended by a two-thirds parliamentary majority.

Parliamentary party composition: ZANU-PF, 147 seats; ZANU (Ndonga), 2; independents, 1. The next elections are due in March 2000.

INTERNATIONAL RELATIONS

Zimbabwe is a member of UN, the Commonwealth, OAU and SADC and is an ACP member state of the ACP-EU relationship. Claiming to act on behalf of the 14 member Southern African Development Community (SADC), Zimbabwe has committed 10,000 troops to the campaign to support the Democratic Republic of the Congo's President Laurent Kabila.

ECONOMY

Policy. The second phase of structural adjustment dubbed Zimbabwe Programme for Economic and Social Transformation (ZIMPREST) was launched in early 1998. Its goals are similar to those of the first phase (1991–95), promoting a market economy by economic stabilization, liberalization of trade, deregulation, reform of the public sector and social reform. But confidence in the economy was undermined by promises to pay compensation (Z$365m.) to war veterans and to make compulsory purchase of 1,471 privately-owned farms for resettlement.

Performance. GDP is estimated to have grown by 5% in 1997. Agriculture contributes about 65% of GDP, which was left in tatters in 1992 after a severe drought cut it by about 12%. In 1996, on the other hand, thanks to favourable weather conditions in the 1995/96 growing season, agricultural production jumped 45% and GDP rose 8·1%. Manufacturing industry is estimated to have grown by 7% in 1997, against a 2·1% rise in 1996.

Budget. The 1999 budget forecasts a budget deficit of 6%.

Revenue and expenditure (in Z$1,000):

	1996–97	*1997–98*
Revenue	27,289	52,152
Expenditure	32,366	63,857

From Jan. 1998 the top rate of income tax was to be 55% for $80,000. Sales tax was cut from 17·5% to 15% and corporate tax from 39·4% to 35%.

Currency. The unit of currency is the *Zimbabwe dollar* (ZWD), divided into 100 *cents*. Gold reserves were 470,000 troy oz. in Feb. 1998 and foreign exchange reserves US$127m. The currency was devalued 17% in Jan. 1994 and made fully convertible. Its value dropped by 65% in 1998. Inflation doubled from 14·5% in 1997 to 35% by the end of 1998 and is expected to rise to 45% by the end of 1999. Total money supply was Z$21,320m. in Dec. 1997.

Banking and Finance. The Reserve Bank of Zimbabwe is the central bank (established 1965; *Governor*, Dr Leonard Tsumba). It acts as banker to the Government and to the commercial banks, is the note-issuing authority and co-ordinates the application of the Government's monetary policy. The Zimbabwe Development Bank, established in 1983 as a development finance institution, is 51% Government-owned. In 1997 there were 7 commercial and 5 merchant banks. There are 5 registered finance houses, 3 of which are subsidiaries of commercial banks.

The IMF announced in June 1998 that it was to lend Zimbabwe US$175m. in the form of a 13-month standby credit which would allow Harare to draw US$52m. immediately to replenish its depleted reserves.

There is a stock exchange.

Weights and Measures. The metric system is in use but the US short ton is also used.

ENERGY AND NATURAL RESOURCES

Electricity. Installed capacity was 2·15m. kW in 1994. In 1997 Zimbabwe Electricity Supply Authority's (Zesa) five power stations supplied 7,323·3 GWh, and a further 3,171·5 GWh was imported via the Southern African Power Pool (SAPP). Electricity sales during the financial year 1995/96 increased by 3·6% and revenues grew by 28% from US$2,222·7m. to US$2,852·7m. Consumption per capita in 1995 was estimated to be 747 kWh.

Minerals. The total value of all minerals produced in 1995 was Z$5,249·3m. 1995 production: gold, 23·9 tonnes, value Z$2,395m.; nickel, value (1993) Z$369·1m.; asbestos, 0·70m. tonnes; coal, some 5m. tonnes.

Agriculture contributes 30% of the country's annual production and 40% of its foreign-exchange earnings. It is also the largest employer, providing jobs for more than 320,000 labourers.

A constitutional amendment providing for the compulsory purchase of land for peasant resettlement came into force in March 1992. But dependence on IMF support has deterred the government from carrying out plans for the mass confiscation of white-owned farms. For the next two years the state will limit itself to buying land that farmers are willing to sell.

The staple food crop is maize. Tobacco is the most important cash crop. Production, 1993, in 1,000 tonnes: Maize, 2,562; tobacco, 205,000; sorghum, 90; barley, 24; millet, 95; soya beans, 65; groundnuts, 64; fruit, 153; vegetables and melons, 140; seed cotton, 187; wheat, 300; tea, 14; coffee, 4; sugar-cane, 700. Zimbabwe is the world's second largest exporter of flue-cured tobacco. In 1996 more than 201m. kg of tobacco were sold at nearly 3m. kg up on the previous year, fetching Z$5·8bn. More than 150,000 people work in the tobacco industry. Tobacco is a highly commercial crop, worth nearly 60 times as much as the same acreage planted with soya or maize.

Livestock (1996): Cattle, 5·44m.; pigs, 266,000; sheep, 530,000; goats (1995), 2·61m.; chickens (1995), 14m. Milk production (1993): 400,000 tonnes.

Forestry. In 1995 forests covered 8·71m. ha, or 22·5% of the total land area (down from 8·96m. ha in 1990). Timber production in 1995 was 8·1m. cu. metres.

Fisheries. Trout, prawns and bream are farmed to supplement supplies of fish caught in dams and lakes. The catch in 1995 was approximately 20,500 tonnes, entirely from inland waters.

INDUSTRY

Metal products account for over 20% of industrial output. Important agro-industries include food processing, textiles, furniture and other wood products.

Labour. The labour force in 1996 totalled 5,281,000 (56% males). Unemployment in Jan. 1998 was around 50%.

The death penalty is authorized. The last execution took place in 1997.

The Supreme Court consists of the Chief Justice and at least 2 Supreme Court judges. It is the final court of appeal. It exercises appellate jurisdiction in appeals from the High Court and other courts and tribunals; its only original jurisdiction is that conferred on it by the Constitution to enforce the protective provisions of the Declaration of Rights. The Court's permanent seat is in Harare but it sits regularly in Bulawayo also.

The High Court is also headed by the Chief Justice, supported by the Judge President and an appropriate number of High Court judges. It has full original jurisdiction, in both Civil and Criminal cases, over all persons and all matters in Zimbabwe. The Judge President is in charge of the Court, subject to the directions of the Chief Justice. The Court has permanent seats in both Harare and Bulawayo and sittings are held three times a year in 3 other principal towns.

Regional courts, established in Harare and Bulawayo but also holding sittings in other centres, exercise a solely criminal jurisdiction which is intermediate between that of the High Court and the Magistrates' courts. Magistrates' courts, established in 20 centres throughout the country, and staffed by full-time professional magistrates, exercise both civil and criminal jurisdiction.

Primary courts consist of village courts and community courts. Village courts are presided over by officers selected for the purpose from the local population, sitting with two assessors. They deal with certain classes of civil cases only and have jurisdiction only where African customary law is applicable. Community courts are presided over by presiding officers in full-time public service who may be assisted by assessors. They have jurisdiction in all civil cases determinable by African customary law and also deal with appeals from village courts. They also have limited criminal jurisdiction in respect of petty offences.

Both the overall rate and the rate for males are the highest in Africa.
